GOLD MEDALS
PARIS
1900
PAN AMERICAN
1901

Thorburn's Seeds

for over a hundred years have been universally recognized as the standard of excellence. They received the GOLD MEDAL (the highest award) both at the Paris Exposition of 1900 and at the Pan-American, 1901. .. ..

Our Catalogue —the 102d successive annual edition—contains a more complete assortment and fuller cultural directions than any other seed annual published. It is beautifully illustrated, not with highly colored exaggerations, but with the finest half-tones from life photographs. It contains 128 large size pages, and in addition 16 full page half-tone plates, and is in every respect and without exception the most complete, most reliable and most beautiful of American Garden Annuals. We will mail it free on receipt of 10 cents in stamps, which amount may be deducted from your first seed order. .. ..

Market-Gardeners are invited to send for our special price-list of high-class vegetable seeds for truckers and large market growers. It contains all sorts of approved merit. .. ..

CORSETS **KABO** CORSETS

HAVE NO BRASS EYELETS

It would be absurd

to assert that nobody can make as good corsets as KABO, but it is quite safe to say NOBODY IS DOING SO, and further that there is no other line

So extensive
So well balanced
So popular

Proof positive that the models are always the precise things decreed by fashion. OVER ONE HUNDRED of the most alluringly dainty STRAIGHT FRONT STYLES at $1.00 to $10.00, and intermediate prices.

Write for catalog de luxe.

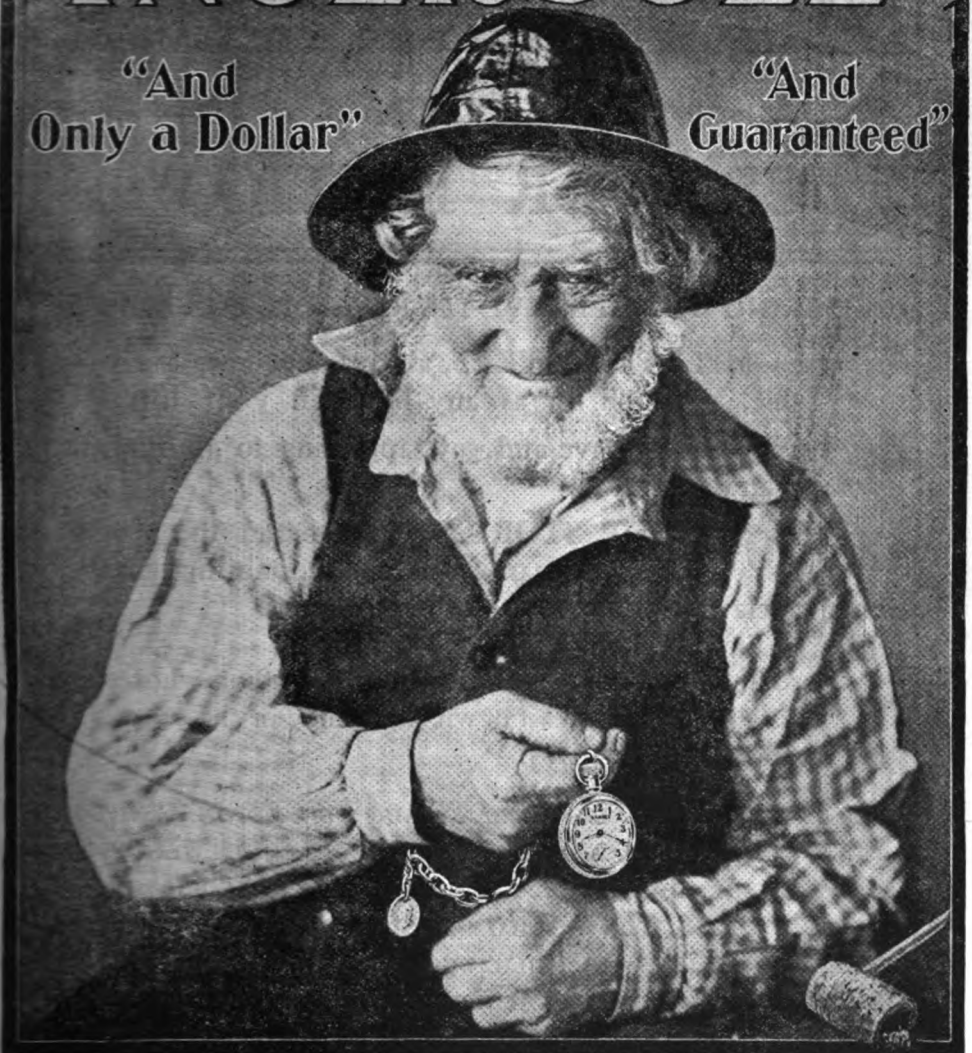
"IT'S AN INGERSOLL"

"And Only a Dollar"

"And Guaranteed"



PRIDE AND SATISFACTION GO WITH POSSESSION OF AN

Ingersoll Dollar Watch.

Millions of Americans are daily showing all the signs of pleasure of our old friend above. It is just this that makes the sale of the wonderful number—6,000 watches a day—so easy. It's not our statement, but the testimony of the ones who know by carrying the watches.

About TWO MILLION Ingersolls were made in 1902 by automatic machinery. This accounts for the high quality and low price. The GUARANTEE as a perfect timekeeper is the strongest ever given with *any* watch. Sold by 50,000 dealers or mailed, postpaid by us.

No Poor Man need apply

This is the truth that stares at us from the imposing architectural beauty of our grand colleges throughout this country to-day.

My Dear Young People:

Please do not misunderstand this statement, for it is not a thoughtless one. I fully realize, with all thinking people, that never was there a better chance for a young man to work his way through college than the present day. If he has time. "Ay, there's the rub." How many poor men can give up their earning capacity, be it ever so little, and take the years that are needed to go through college? That small salary of his is needed, not alone for his own necessities, but in most cases for a family dependent upon him. So many a young man is held down to drudgery who should be drawing a larger salary at more congenial employment.

I want you to examine carefully one of our FREE TUITION CONTRACTS, which means simply this: You pay us during the first four months $15, in weekly payments (or $13.50 in cash). This pays us our costs for postage, materials, instruction papers, necessary books, thirty criticisms, as many personal letters of advice as may be necessary.

There will be no further expense to you during your course.

The above is carefully explained in one of our Free Tuition Contracts, which we will send you.

In Illustrating and Advertisement-Writing we are able, through our Sales Department, to dispose of a great deal of our students' work. Write me personally and mention the profession you wish to take up. I know that I can help you.

ALT F. CLARK, President,

THE EQUITABLE

"STRONGEST IN THE WORLD"

J. W. ALEXANDER
PRESIDENT

J. H. HYDE
VICE PRESIDENT

"GREAT OAKS FROM LITTLE ACORNS GROW"

and great fortunes from little savings grow.

For example: Take an Endowment.

It gives protection to your family *at once*---- if you die. Helps provide for your own future---- if you live---- *and about 15 cents a day will pay for an Endowment for $1,000---- 30 dollars a day for $200,000*---- or between amounts in proportion.

Here is the result, in 1902, of Endowment No. 240,125, for $10,000, taken out twenty years ago:

Cash.....$14,934.00

This is a return of all premiums paid, with $5,140.00 in addition, to say nothing of the twenty years protection of assurance.

Vacancies in every State for men of energy and character to act as representatives.
Apply to GAGE E. TARBELL, 2nd Vice President.

Send this coupon for particulars of such a policy issued at your age.
The EQUITABLE SOCIETY, 120 Broadway, New York. Dept. No. 107

Please send me information regarding an Endowment for $.....if issued at.....years of age.

A Map of Knowledge

THIS BOOK is intended to do for the student, the business man, the writer, for all active citizenship, the work which the MAP does for the traveller. When this great country was in its primitive condition, geographical knowledge was a matter of individual study, and of memory. The oldest Indian knew by heart the deer paths, the salt licks, the places for crossing dangerous streams or descending deep canyons in time of danger or migration. This word-of-mouth geography was taught by the old warriors to the young men, and taught by them in turn to their children. The oldest and most learned Indian could command at best a knowledge of a few miles or a few scores of miles of the surrounding country.

To-day no man relies on memory for his knowledge of geography. Any child of ten with a map spread out in front of him possesses more knowledge of that old Indian's hunting territory than he and all his brothers possessed between them.

Except for purposes of mental discipline, there is no more memorizing of geographical detail. Every individual, in a moment, having access to a few maps, can put his finger on any detail of this earth's divisions, or can at a glance survey its broad and general plan.

As the map with its ready information has replaced the old-fashioned system of geographical memory, so this work is intended to replace the always inefficient supplies of various knowledge that men carry in their minds.

Condensed, methodically arranged, we endeavor to present in this volume an Almanac, an Atlas, and a sufficient store of encyclopædic information.

A man in business, or otherwise actively engaged in modern civilization, needs a knowledge of facts, statistics, etc., even more than the old Indian needed a knowledge of paths through the woods.

The facts which all men need in every-day lives are here gathered together. No human memory was ever great enough to retain accurately even a small fraction of the knowledge which this book contains. Between these covers a condensation of important knowledge lies at the command of the busiest man, or the poorest memory. This volume, the first edition of this work, will be renewed from year to year, with statistics, new discoveries, maps and all other information carefully and conscientiously brought up to date.

The object of this book is to give every man easy access to the knowledge which he requires from day to day.

Every effort will be made to insure above all things accuracy and completeness in this condensed map of essential knowledge.

ANY reader of this Almanac who may take the trouble to write letters of suggestion or of criticism will have the thanks of the editor and will perhaps render service to a great reading public.

The American Almanac

(The Astronomical Calculations in the American Almanac are prepared by Berlin H. Wright, M. D., of Penn Yan, N. Y., and Lake Helen, Fla.)

The Year.

There have been many methods of computing time since man became wise enough to devise a calendar, which, whether based upon the lunar or the solar system of computation, has aided him in his attempt to keep pace with the passing of the seasons and has enabled him to record those events which he has deemed of sufficient importance to be preserved for posterity. There were the Athenians, for example, who began their year in June; the Macedonians, in September; the Persians, in August, and the ancient Mexicans, in February.

In the old Roman, or Julian, Calendar the months corresponded with our own, excepting that the year first began with March and that up to the time of the Emperor Augustus the fifth and sixth months of the year were designated as Quintilis and Sextilis. After that time, however, the names of Julius and Augustus were bestowed upon them, and so they were brought down to modern times.

The old Romans had a somewhat peculiar method of reckoning the days. Their three points of computation were: (1) The "Kalends," as the first of each month was called. (2) The "Nones," which occurred on the seventh day of the months of March, May, July and October, and on the fifth day of each of the other months; and (3) the "Ides," which came exactly eight days after the "Nones." In reckoning the days, therefore, these three fixed dates were taken as a basis, and each day of the week was said to be so many days before the next fixed date. Thus, while the first day of January was known as the "Kalends of January," the 31st of December was "the day before the 'Kalends of January,'" but when the computations were carried further back both the days between and the fixed date itself were reckoned, a method which made December 30th the "third day before the 'Kalends.'"

The most peculiar calendar of comparatively modern times is that which was instituted as the result of the French Revolution. It was in September, 1793, that the Convention determined to abolish the use of the common era in all civil affairs and to substitute one of their own invention. According to their plan the new era should begin with the day of the last true Autumnal Equinox, September 22, 1792, and each succeeding year should begin at midnight of the day on which this equinox fell. The year was divided into twelve months of thirty days each, while the months were divided into three decades of ten days each. In order to make up the necessary 365 days, however, the five days were added at the end of the month of September: "Primidi," dedicated to Virtue; "Duodi," to Genius; "Tridi," to Labor; "Quartidi," to Opinion, and "Quintidi," to Reward. To complete the leap year a sixth day, called "Olympic," and dedicated to "the day of the Revolution," was added.

The National Convention also decreed that to each tenth day, thirty-six in all, should be assigned thirty-six "Fetes Decadaires," each of which should be dedicated to the honor of some trait of character or condition of being that in this manner might be made to appeal more strongly to the hearts of the people. Thus these "Fetes" were dedicated to the Supreme Being and Nature, the Human Race, the French People, the Benefactors of Humanity, the Martyrs for Liberty, Liberty and Equality, the Republic, Liberty of the World, Love of Country, Hatred of Tyrants, Truth, Justice, Modesty, Glory and Immortality, Friendship, Frugality, Courage, Good Faith, Heroism, Disinterestedness, Stoicism, Love, Conjugal Fidelity, Paternal Love, Maternal Tenderness, Filial Piety, Infancy, Childhood, Manhood, Old Age, Sickness, Agriculture, Industry, Ancestors, Posterity and Goodness.

The Gregorian Calendar was restored on January 1, 1806, and the following are the dates for the year 1903, the last complete year of the Revolutionary era:

Vendemiaire (Vintage)	Sept. 23 to Oct. 22	Germinal (Budding)	Mar. 22 to Apr. 21
Brumaire (Foggy)	Oct. 23 to Nov. 22	Floreal (Flowery)	Apr. 21 to May 20
Frimaire (Sleety)	Nov. 22 to Dec. 21	Prairial (Pasture)	May 21 to June 20
Nivose (Snowy)	Dec. 22 to Jan. 21	Messidor (Harvest)	June 20 to July 19
Pluviose (Rainy)	Jan. 21 to Feb. 20	Thermidor (Hot)	July 20 to Aug. 19
Ventose (Windy)	Feb. 20 to Mar. 21	Fructidor (Fruit)	Aug. 19 to Sept. 18

ERAS.

The year 1903, from July 4, is the 128th year of the Independence of the United States, and corresponds to the following:

Year 7411-12 of the Byzantine era, year 7411 beginning September 1.
Year 2656 since the foundation of Rome, according to Varro.
Year 2650 of the era of Nabonassar.
Year 2679 of the Olympiads.
Year 2215 of the Grecian era.
Year 1619 of the Grecian era of Seleucidae.
Year 2563 of the Japanese era.
Year 5663-64 of the Jewish era. See calendar.
Year 1321 of the Mohammedan era. See calendar.
Year 4600 of the Chinese era. See calendar.

CHRONOLOGICAL CYCLES.

Dominical Letter	D	Dionysian Period	282
Epact	2	Jewish Lunar Cycle	1
Solar Cycle (Golden Number)	4	Mohammedan Era, year 1321, begins March 30,	
Roman Cycle	8	Jewish Era, year 5664, begins September 22, or at	
Roman Indiction	1	sunset, September 21.	
Julian Period	6616	Chinese Era, year 4600, begins January 28.	

Explanatory Note.—The Dominical Letter indicates the day of the year on which the first Sunday occurs. D is the fourth letter, and, therefore, the first Sunday will occur on January 4. The Golden Number is that number in a cycle of nineteen years which shows how many years have passed since new moon fell on January 1. This is also called the Metonic Cycle from the astronomer Meton, who first discovered (B. C. 432) that in nineteen years the solar and lunar years come together again, nearly and hence the dates of the Olympic games, celebrated every fourth year at full moon next after the Summer Solstice, could be adjusted both to the solstices and moon, and his tables were inscribed in golden figures on a marble pillar; hence our Golden Number. The Golden Number and epact, or moon's age, January 1, are chiefly used in fixing the date of Easter. The Solar Cycle indicates the number of years that have elapsed before the days of the week fell on the same days of the year—a cycle of twenty-eight years, and is used to find the Dominical or Sunday letter. It is the remainder found by adding 9 to the year and dividing by 28. The Roman Indiction is a cycle of fifteen years, and is of no utility except to chronologers; it is the remainder found by adding 3 to the year and dividing the sum by 15. The Julian Period is a cycle of 7980 years, and is the product of the three cycles—Golden Number (19); Solar Cycle (28), and Roman Indiction (15), and hence shows the time when they will coincide or begin at the same time. The Dionysian Period is a cycle of 532 years, and is called the Great Paschal Cycle, being the product of a complete Solar and Lunar Cycle (28x19). It is the remainder found by adding 457 to the year and dividing by 532, and with the Julian Period, is chiefly used in chronology. The Jewish Lunar Cycle is always three less than the Golden Number and is used by the Jews in fixing the time of their festivals.

Digitized by Google

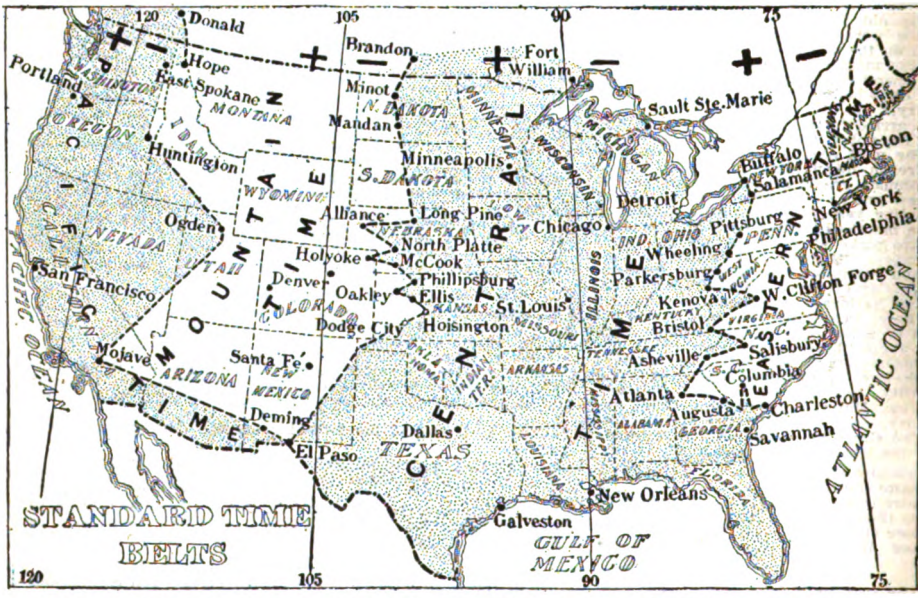
Time.

All the calculations in the American Almanac are based upon mean or clock time unless otherwise stated. The sun's rising and setting are for the upper limb, corrected for parallax and refraction. In the case of the moon no correction is needed, as in the sun, for "parallax and refraction;" with her, they are of an opposite nature and just balance each other. The figures given, therefore, are for the moon's centre on a true horizon, such as the ocean or a large plain affords.

The calculation in each of the geographical divisions of each calendar page will apply with sufficient accuracy to all places in the contiguous North American zones indicated by the headings of the divisions. This statement is based on the fact that in the same latitude, or in the same line running due east and west, the sun and moon rise and set at almost the same moment of local or mean time, the difference in extremes being so slight as to be of no importance for ordinary purposes, except in the case of the moon's rising, southing and setting, when 6 m. for Pacific Coast points and 3 m. for Mississippi River Valley region, including Chicago, etc., must be added, or 2m. for each hour of longitude.

The column, "Shadow at Noon Mark," is given to aid those who have "noon marks" or meridian lines to ascertain the correct time. It will not do to suppose that the sun arrives at the noon mark at 12 o'clock. Such is really the case only four times in a year—April 15, June 15, September 1 and December 24—and the error may amount to as much as 16 minutes.

MAP OF THE STANDARD TIME BELTS.



The heavy dotted line shows the arbitrary divisions of time in the United States. The plus and minus marks on either side of the meridian lines show whether it is necessary to add to or substract from the standard time of points east or west of these lines, to arrive at actual, or Greenwich time. See table on Page 3.

STANDARD TIME.

For the convenience of the railroads and business in general, a standard of time was established by mutual agreement in 1883, and it is by this method of calculation that trains are now run and local time is regulated. In accordance with this system the United States, extending from 65° to 125° west longitude, is divided into four time sections, each of 15° of longitude, exactly equivalent to one hour (7 1-2° or 30 m. on each side of a meridian), commencing with the 75th meridian. The first or eastern section includes all territory between the Atlantic Coast and an irregular line drawn from Buffalo to Charleston, S. C., the latter city being its southernmost point. The second or central section includes all the territory between this eastern line and another irregular line extending from Bismarck, N. D., to the mouth of the Rio Grande. The third or mountain section includes all the territory between the last-named line and nearly the western borders of Idaho, Utah and Arizona. The fourth or Pacific section includes all the territory of the United States between the boundary of the mountain section and the Pacific Coast. Inside of each of these sections Standard time is uniform, and the time of each section differs from that next to it by exactly one hour.

The following is the table of times based upon the meridian used by the United States and Canada:

Name of Time.	Degrees.	Central Meridian.—From Greenwich.	Nearest Place.
Intercolonial	60	4 hours west.	About 3 1-8° east of Halifax, N. S.
Eastern	75	5 hours west.	Between New York and Philadelphia.
Central	90	6 hours west.	St. Louis and New Orleans.
Mountain	105	7 hours west.	Denver, Col.
Pacific	120	8 hours west.	1 1-2° east of Sacramento, Cal.
Sitka	135	9 hours west.	1-4° east of Sitka, Alaska.
Tahiti	150	10 hours west.	1-2° west of the Island of Tahiti.
Hawaiian	157½	10 h. 31 m. west.	Near Centre of Molokai.

It is obvious that to express the time of rising and setting of the sun and moon in Standard time would limit the usefulness of such data to the single point, or place, for which it was computed, while in mean time it is practically correct for places as widely separated as the width of the continent, as already explained, and persons having the mean time may easily ascertain the correct Standard time of any event by making use of the following table:

Digitized by Google

To obtain standard time add or subtract the figures given to local time.

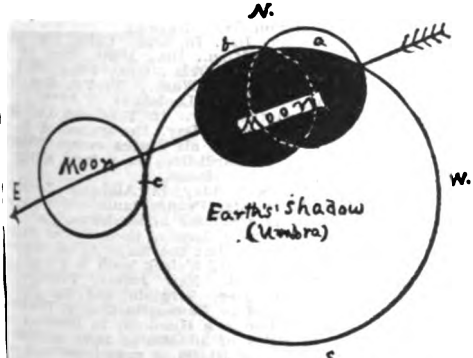
Eclipses of 1903 and Their History.

There will be four eclipses this year, two each of the sun and moon, as follows:

I. **An Annular Eclipse of the Sun**, March 29. The annular phase will only be visible through Central and Northern Asia and the Arctic regions. The partial phase will be visible in the Philippine Islands and Alaska and partially visible on the Pacific Coast of North America, between the 43d and 61st parallels of latitude. Near Cape Blanco, Oregon, the eclipse will begin at sunset, and from that point to Vancouver Island a very small part of the eclipse will be visible on the sun's northern limb just before sunset. The last preceding return of this eclipse was on March 16, 1885, when the path of the annual phase extended across North America, and a fine partial eclipse was visible throughout the United States, and its next recurrence will be on April 17, 1921, when it will be visible in the Arctic Ocean and Northern Europe.

II. **A Partial Eclipse of the Moon**, April 11. The beginning of this eclipse will be visible in Europe, Africa, Western Asia and Eastern South America, and the end in Eastern United States, where the Moon will rise with the eclipse upon it, and in Africa and Europe. The size of the eclipse will be 11.68 digits, the apparent diameter of the Moon being taken as 12 digits. Hence, when greatest, it will be nearly total, as will be seen by the figure below:



LUNAR ECLIPSE OF APRIL 11, 1903.
a—Phase at rising, 6h. 25m. p. m., Eastern time.
b—Phase when largest, 7h. 13m. p. m., Eastern time.
c—Last contact, 8:52 p. m., Eastern time.

The greatest eclipse will occur when the Moon in its passage through the earth's shadow from west to east reaches the point b, and her last contact with the shadow, will take place at c. This eclipse will be visible as follows:

	Cent. St'd Time. P. M.	East. St'd Time. P. M.	Inter-Col. St'd Time. P. M.
Middle or greatest eclipse	...	7:13	8:13
Moon leaves dark shadow or umbra	7:52	8:52	9:52
Moon leaves light shadow or penumbra	9:00	10:00	11:00

During the 1h. and 8m. while the Moon remains in the penumbra after last contact, she will appear nearly as bright as usual.

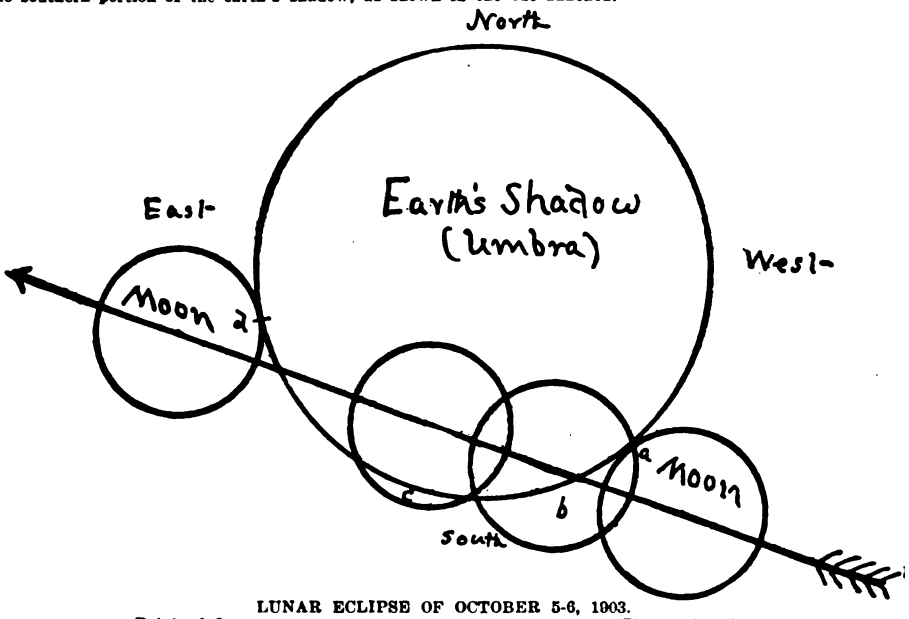
The last preceding return was on March 30, 1885, when it was partial also, but smaller than at this time. The next recurrence will be on April 21, 1921, when it will be larger and total and visible in North and South America.

III. **A Total Eclipse of the Sun**, September 21, visible in South Africa, Indian Ocean and Australia. The last preceding recurrence of this eclipse was on September 8, 1885, when it was total also, and seen in the Southern Pacific, but further east than now. In 1921, September 30, it will recur and be visible in South America.

IV. **A Partial Eclipse of the Moon**, October 5-6. The beginning will be visible in Africa and the Pacific Ocean, and the ending in Africa, Eastern Europe and the Pacific Ocean. The eclipse begins with the setting

Digitized by Google

of the Moon on the Pacific coast, and will be visible, therefore, only in our Pacific possessions. The si
will be 10.4 digits, the Moon's apparent diameter being taken as 12 digits, or 0.868, the Moon's diamet
being taken as unity (1.00). The eclipse will be upon the Moon's northern limb as it passes throu
the southern portion of the earth's shadow, as shown in the cut annexed.



LUNAR ECLIPSE OF OCTOBER 5-6, 1903.

a—Point of first contact.
b—Phase at 3:57 a. m., Hawaiian standard time.
c—Phase when largest.
d—Point of last contact.

The figure shows the eclipse at b, as it will appear at 3:57 a. m., Hawaiian standard time; greatest eclipse at c, first contact at a, and last at d. At Manila, P. I., the first contact occurs at 9:44 p. m., the middle at 11:21 p. m., and the last contact with the dark shadow or umbra at 0:58 a. m. of the 6th. The *last* preceding recurrence of this eclipse was September 23, 1885, when it was smaller and visible throughout the United States. The next recurrence will be on October 16, 1921, when it will be nearly total and visible in North and South America, the moon rising eclipsed.

Venus will be occulted by the moon, December 14, visible in Southern States.

Mars will be occulted by the moon, July 1, visible in Southern States.

Legal Holidays in the United States.

Jan. 1.—New Year's Day. In all States except Colo., Mass., N. H.
Jan. 8.—Anniversary Battle New Orleans. In Louisiana.
Jan. 19.—Gen. Robert E. Lee's Birthday. In Ala., Fla., Ga., N. C., S. C., Va.
Feb. 2.*—Arbor Day. In Arizona.
Feb. 12.*—Lincoln's Birthday. In Conn., Del., Ill., Minn., N. J., N. Y., N. D., Penna., Wash., Wyo.
Feb. 17.*—Election Day. In Penna.
Feb. 22.—Washington's Birthday. In all States except Colo., Ind. Ter., Miss., N. M.
March 2.—Anniversary Texan Independence. In Texas.
March 4.—Firemen's Anniversary. In New Orleans, La.
March 4.—Inauguration Day (every four years). In Washington, D. C.
April 1.—State Election Day. In Rhode Island.
April 15.—Arbor Day. In Utah.
April 19.—Patriots' Day. In Massachusetts.
April 21.—Anniversary of the Battle of San Jacinto. In Texas.
April 26.—Memorial Day. In Ala., Fla., Ga.
May 3.*—Memorial Day. Tennessee.
May 10.—Memorial Day. In N. C., S. C.
May 20.—Anniversary of the Signing of the Mecklenberg Declaration of Independence. In N. C.
May 30.—Decoration Day. In all States except Ala., Ark., Col., Fla., Ga., Idaho, La., Nev., N. Mex., N. C., S. C., Texas.
June 3.—Jefferson Davis's Birthday. In Ala., Fla., Ga., S. C.
June 17.—Bunker Hill Day. Boston.
July 4.—Independence Day. In all States except Colorado.
July 24.—Pioneers' Day. In Utah.
Aug. 6.*—Election Day. In Tenn.
Aug. 16.—Bennington Battle Day. In Vermont.
Sept. 3.—Labor Day. In North Carolina.
Sept. 7.—Labor Day. In Ala., Calif., Colo., Conn., Del., D. C., Fla., Ga., Ill., Ind., Ia., Kan., Me., Md., Mass., Mich., Minn., Mont., Mo., Neb., N. H., N. J., N. Y., O., Ore., Penn., R. I., S. C., S. D., Tenn., Tex., Utah, Va., Wash., W. Va.
Sept. 9.—Admission Day. In Calif.
Sept 12.—Defenders' Day. In Baltimore, Md.
Oct. 31.—Admission Day. Nevada.
Nov. 3.*—Election Day. In Ariz., Calif., Fla., Idaho, Ind., Kan., Md., Minn., Mo., Mont., Nev., N. H., N. J., N. Y., N. D., Okla., Ore., Penn., R. I., S. C., S. D., Tenn., Tex., Wash., W. Va., Wis., Wyo.
Nov. 21.—Labor Day. In Louisiana.
Nov. 23.—Repudiation Day. In Frederick Co., Md.
Nov. 26.*—Thanksgiving Day. Recognized all States.
Dec. 25.—Christmas. In all States except Colorado.

Shrove Tuesday or Mardi-Gras is a legal holiday in Alabama and New Orleans.

Good Friday is a holiday in Alabama, Louisiana, Maryland, Minnesota, Pennsylvania and Tennessee.

All Saints' Day is a holiday in Louisiana.

In some States, like Colorado, there are no statutes regulating holidays, but the majority are observed.

Every Saturday after 12 o'clock noon is a legal holiday in New York, New Jersey, Pennsylvania, Maryland, Tennessee, Virginia and the City of New Orleans, and in Newcastle County, Delaware, except in St. George's Hundred; in Louisiana and Missouri in cities of 100,000 or more inhabitants; in Ohio in cities of 50,000 or more inhabitants; and June 1 to August 31 in Denver, Col. In the District of Columbia for all purposes respecting the presentation for payment or acceptance or the protesting of all commercial paper whatsoever. In Connecticut, Maine and West Virginia banks close at 12 noon on Saturdays. In North Carolina is observed in certain sections.

*These dates are for 1903.

Nov. 25. British evacuated New York, 1783.
Nov. 28. Spanish-American War peace terms concluded, 1898.
Dec. 13. First savings bank in United States at Boston, 1816.
Dec. 14. Death of George Washington, 1799.
Dec. 16. Boston "Tea Party," 1773.
Dec. 20. South Carolina seceded, 1860.
Dec. 26. Battle of Trenton, 1776.

Around the World in Sixty Days.

Many years have passed since Jules Verne carried Mr. Phineas Fogg around the world in eighty days, and since that time so many improvements have been made in methods of transportation that the once-wonderful feat of the imaginary Mr. Fogg now seems like an extremely commonplace achievement. To-day the man who could not circumnavigate the globe in less than eighty days would be regarded as a very poor traveller. George Francis Train, in 1890, established a record of 67 days, 13 hours, 3 minutes and 3 seconds, not counting one day which he spent in New York; but, in 1901, Charles C. Fitzmorris, who represented Hearst's Chicago American, set a record for globe-girdlers by winning the "Round the World Race" in 60 days, 13 hours, 29 minutes and 42 4-5 seconds.

There were three contestants in this "Round the World Race," which was conducted by the three Hearst newspapers. The winner, Fitzmorris, represented the Chicago American and the schoolboys of Chicago; Louis St. Clair Eunson, the New York Journal, and the schoolboys of New York, and William C. Crittenden, the Examiner and the schoolboys of San Francisco, and while each lad spared no effort to be first to return to the United States, Fitzmorris completed his mission far ahead of his closest competitor.

The itinerary of this world-record feat was as follows:

Fitzmorris left Chicago	**May 20, 1901**	**Fitzmorris left Blagoveschensk**	**June 21, 1901**
New York	**May 22, 1901**	**Vladivostock**	**June 27, 1901**
Berlin	**May 30, 1901**	**Yokohama**	**July 5, 1901**
Moscow	**June 1, 1901**	**Victoria, B. C.**	**July 16, 1901**
Irkutsk	**June 10, 1901**	**Arrived in Chicago**	**July 20, 1901**
Stretensk, Siberia	**June 13, 1901**

CHURCH DAYS AND MOVABLE FEASTS.

Epiphany	January 6
Septuagesima Sunday	February 8
Sexagesima Sunday	February 15
Quinquagesima Sunday	February 22
Shrove Tuesday	February 24
Ash Wednesday	February 25
Quadragesima Sunday (Lent begins)	March 1
Mid-Lent Sunday	March 22
Passion Sunday	March 29
Palm Sunday	April 5
Good Friday	April 10
Easter Sunday	April 12
Low Sunday	April 19
Rogation Sunday	May 17
Ascension Thursday (Holy Thursday)	May 21
Whit-Sunday (Pentecost)	May 31
Trinity Sunday	June 7
Corpus Christi	June 11
Advent Sunday	November 29
Christmas Day	December 25

EMBER DAYS.

Wed., Fri. and Sat.	after	1st Sunday in Lent	March 4, 6 and 7
		Pentecost	June 3, 5 and 6
		14th of Sept	Sept. 16, 18 and 19
		13th of Dec	Dec. 16, 18 and 19

MORNING STARS.

INFERIOR PLANETS (WEST OF SUN).

MERCURY (☿), from Feb. 2 to April 12, June 3 to July 26 and from Oct. 3 to Nov. 21.
VENUS (♀) after Sept. 17.

SUPERIOR PLANETS.

MARS (♂), not this year.
JUPITER (♃), from Feb. 19 to June 13.
SATURN (♄), from Jan. 21 to April 30.
URANUS (♅), until March 17 and after Dec. 15.
NEPTUNE (♆), from June 26 to Sept. 30.

SUPERIOR PLANETS (WEST OF SUN).

MARS, until March 29.
JUPITER, from Feb. 19 to Sept. 12.
SATURN, from Jan. 21 to July 30.
URANUS, until June 15 and after Dec. 18.
NEPTUNE, from June 26 to Dec. 27.

THE FOUR SEASONS.

	Washington Mean Time.	D.	H.	M.
Winter	begins, 1902, Dec. 22, 1:19 p.m.; lasts	89	0	39
Spring	begins, 1903, March 21, 1:58 p.m.; lasts	93	7	50
Summer	begins, 1903, June 22, 9:48 a.m.; lasts	93	14	39
Autumn	begins, 1903, Sept. 24, 1:27 a.m.; lasts	89	6	37
Winter	begins, 1903, Dec. 22, 7:04 p.m.			

Tropical year lasts	365d.	5h.	45m.
Sun north of the equator	186d.	22h.	29m.
Sun south of the equator	178d.	7h.	16m.
Difference	8d.	15h.	13m.

Due to the slower motion of the earth when farthest from the sun.

EVENING STARS.

INFERIOR PLANETS (EAST OF SUN).

MERCURY (☿), until Feb. 2 and from April 12 to June 3, July 26 to Oct. 3 and after Nov. 21.
VENUS (♀), until Sept. 17.

SUPERIOR PLANETS.

MARS (♂), all the year.
JUPITER (♃), until Feb. 19 and after June 13.
SATURN (♄), until Jan. 21 and after April 30.
URANUS (♅), from March 17 to Dec. 18.
NEPTUNE (♆), until June 26 and after Sept. 30.

SUPERIOR PLANETS (EAST OF SUN).

MARS, after March 29.
JUPITER, until Feb. 19 and after Sept. 12.
SATURN, until Jan. 21 and after July 30.
URANUS, from June 15 to Dec. 18.
NEPTUNE, until June 26 and after Dec. 27.

The Ritualistic Calendar.

The Ritualistic calendar changes with each year, and those who desire to follow all the variations of the code may find such detailed information in one of the many church calendars. In general, however, the following is the order in which colors are used on the altar in Ritualistic Churches in the United States:

White is used from Christmas Day to the Octave of the Epiphany and from the first service on Easter Day to the Vigil of Pentecost, except on the days commemorative of martyred saints, when red is the color prescribed. It is also used on several holy days throughout the year—Trinity Sunday, the conversion of St. Paul, the Purification, the Annunciation, the feast of St. John Baptist, St. Michael, St. Luke, All Saints and on days commemorative of saints who are not martyrs.

Red is used from the first Vespers of Pentecost to the first Vespers of Trinity Sunday; on the Day of Holy Innocents, if it falls on a Sunday, and on the feasts of all martyred saints.

Violet is used from Septuagesima to Easter Eve (Maundy Thursday); from Advent Sunday, the beginning of the Church year, until Christmas Eve; on Ember Days, except in Whitsun week, on Rogation Days, and on Holy Innocents, if it does fall on a Sunday.

Black is used only on Good Friday and at funerals.

Green is the color prescribed for all other days.

Signs of the Zodiac.

The signs of the Zodiac and parts of the human body supposed to be affected by the same. For the Moon's place see calendar pages. Pisces ♓, feet; Aries ♈, head; Taurus ♉, neck; Gemini ♊, arms; Cancer ♋, breast; Leo ♌, heart; Virgo ♍, bowels; Libra ♎, kidneys; Scorpio ♏, loins; Sagittarius ♐, thighs; Capricornus ♑, knees; Aquarius ♒, legs. Both the sign and constellation are given in the column "Moon's Place at 7 P. M.," the former being approximately 30° behind the latter, owing to the precession of the equinoxes. The sign is given inasmuch as that is used by astronomers, while the constellation is used by astrologers.

Time Calculations and Explanations of Signs and Abbreviations

All the calculations except the Moon's Phases and seasons are in mean local time. (See table for its conversion into Standard Time). The Sun's rising and setting is for the upper limb and corrected for refraction. The signs used are as follows: ☌ conjunction or near approach; at which time a line from the North Star through one will also pass through the other; ☍, opposition or 180° from the Sun, at which time the Superior Planets are the brightest; □, quadrature or 90° from the Sun; ☉, Sun; ⊕, Earth; ☿, Mercury; ♀, Venus; ♂, Mars; ♃, Jupiter; ♄, Saturn; ♅, Uranus; ♆, Neptune; ☊, Ascending Node; ☋, Descending Node; ☋, Moon lowest; ☊, Moon highest; ☽, Moon generally.

Per.—Perihelion, or nearest to Sun; opposed to Planets.
Aph.—Aphelion or farthest from Sun; applied to Planets.
Per.—Perigee, or nearest to Earth; applied to the Moon.
Apo.—Apogee, or farthest from the earth; as applied to the Moon.
So.—Southing, or Meridian Passage.

Duration of Light and Darkness.

The tenth column of the second calendar page for each month contains a diagram showing the amount of Darkness or of Sunlight or Moonlight. These small figures represent the twelve hours from 6 P. M. to 6 A. M., and have four divisions, each representing three hours. Example—from the 11th to the 26th of January there is moonlight from 6 P. M. to 6 A. M., but from the 7th to the 30th it will be seen that there is no moonlight. The light portions of the diagrams are not at all times to be considered as moonlight, for the reason that in some months light is derived from the sun after 6 P. M. and before 6 A. M. In the Summer months the light is increased by the sun.

Digitized by Google

JANUARY.

For Pacific Coast Points corresponding to these zones of Lat. add 6m. to Moon's rising and setting, or add 2m. for each hour west of Merid. of Wash. and subtract same for eastern Longitude.

Notes.—Mars' motion past the Stars is very slight at this time, as he is nearing that point in his orbit where his motion is in line with our line of vision and consequently his change in right ascension is slight. The Earth will be nearest to the Sun on the 3d, being about 3,000,000 miles nearer than when farthest away on July 2d. The close companionship of Venus and Saturn will be interesting during the evenings of the earlier part of this month; Saturn's apparent diameter will be the greater by about 2″ and he will be nearly 1° North of Venus. Orion is near the meridian with the finest stellar display of the year grouped around it.

Meteoric Showers or Shooting-Star Nights:

No.	Date. Jan.	Radiant Point. R.A.	Radiant Point. Dec.	Name of Near-by Star.	Authority.	Other Dates and Remarks.
1	2–3	232°	+ 49°.	Quadrantids.	Greg.	Dec. 26, May 10, July 21.
2	4–17	295°	+ 53°.	Psi Cygnæ.	Denning.	Oct. Nov. Slow Trained.
3	8	175°	+ 14°.	Beta Leonis.	Greg.	Nov. Active, March 31.

NOTES.—Mars becomes stationary on the 18th and soon begins his retrograde motion past the Stars. He will advance to within a few degrees of *α Virginis* (Spica), southeast of him, and then turn back westward. JUPITER, being in conjunction with the Sun on the 19th, will be invisible for some days before and after that date and when next visible he will be on the other side (west) of the Sun as a Morning Star.

METEORIC SHOWERS OR SHOOTING STAR NIGHTS.

No.	Date Feb.	Radiant Point R.A. Dec.	Name of near-by star.	Authority.	Other Dates and Remarks.
4	3	158° +29°	Leo Minor.	Greg.	Dec. Near Sickle—East. Mch. 31
5	6	180° +56°	Big Dipper.	Greg.	Nov., Dec., Apr. 25.
6	20 A. M.	263° +36°	Hercules.	Denning.	West of Vega, Swift, Streaks.

See Nos. 11, 15, 16, 17, 22, 37, 41, 67, 68—71.

NOTES.—Mars will be in opposition to the Sun on the 29th, when he will rise with the setting of the Sun, and therefore from this on we must look for him in the west in the morning hours. This opposition is not the most favorable possible for observing Mars. The conditions must be that Mars must pass his perihelion at or near the time of opposition and these events occur at or near the Earth's aphelion. Such conditions last obtained in 1892, and will not recur until 1907, when the planet will be some 30,000,000 miles nearer to us than when the conditions are reversed.

METEORIC SHOWERS OR SHOOTING STAR NIGHTS.

Notes.—Mars crosses the Solsticial Colure on the 21st. In the Starry Hosts the most conspicuous object directly south in the evening is the Sickle in Leo, with the brilliant Regulus in the end of the handle. Further east α *Virginis* (Spica) is well up west of the meridian and low in the south Sirius, the Dog Star shines, with Procyon in Canis Minor, above and still higher up Castor and Pollux in Gemini and Capella in the north-west. In the northern circumpolar group the Great Dipper and Pointers are low down below the Pole Star and Cassiopeia's Chair directly opposite or above the Pole Star—near the Zenith: the Little Dipper to the left and Perseus to the right.

METEORIC SHOWERS OR SHOOTING STAR NIGHTS.

No.	Date.	Radiant Point. R.A. Dec.	Constellation or Near-by Star.	Authority.	Other Dates and Remarks.
9	1	204°+56°	Great Bear—Big Dipper.	Greg.	July, Dec., Jan., Aug., May 25.
10	5	272°+35°	Lyrids, near Vega.	Greg.	May 10, Apr. 19–20, June, July.
11	12	235°+23°	Coronids, Northern Crown.	Greg.	June 30, Jan., Feb.
12-14	19–23	284–294+22–44	Cygnus—The Cross.	Denning.	Aug., July, Oct., Nov.

See also Nos. 6, 7, 20, 47 and 73.

Notes.—Mars becomes stationary again on the 10th in the eastern portion of the Constellation Leo, after which he again moves forward (eastward) past the Stars. He is still very bright and is in the meridian at sunset is setting. The conjunction of Venus and Neptune on the 15th will aid in locating the latter: 3° south of the former.

NOTES.—Venus will be in the handle of the Sickle, near α *Leonis* (Regulus) in Leo, on the 5th and 6th, Venus being only one-half a degree north of that brilliant Star. MARS will be in conjunction with the bright Star α *Virginis* (Spica) on the 23d, being only 1° 30′ north of that Star. The occultation of MARS by the Moon on the 1st will be visible in the Southern States, the parallels of latitude between which it will be visible in the main, are 42° N. and 25° S.

METEORIC SHOWERS OR SHOOTING STAR NIGHTS.

NOTES.—VENUS is at Inferior Conjunction on the 17th, after which she will be seen on the other side (west) of the Sun. Jupiter will be brightest on the 12th. AMONG THE STARS: Cygnus, the Swan, in which is the striking figure of the Great Cross is in the Zenith, while below it (southward) is the three bright Stars, equally distant, in the Eagle (Aquila), the first Magnitude Star Altair being the central one. The long arm of the Cross lies in the *Via Lactea* or Milky-Way. There is a fine nebula just north of western end of the Cross. There is a fine resolvable nebula just above Altair and a little to the right—"a curious object," Herschel.

METEORIC SHOWERS OR SHOOTING STAR NIGHTS.

No.	Date.	Radiant Point. R.A.	Dec.	Constellation or Nearby Star.	Authority.	Other Dates and Remarks.
42	1	306°	+54°	Cygnus, N. of Cross.	Denning.	Swift, Brilliant.
43	17	84°	+48°	Aurigids II. E. of Capella.	Greg.	To Nov. 25, Active in Oct.
44	25	105°	+27°	Geminids, below Castor and Pollux.	Greg.	To Oct. 28, Very active in Oct.
45	Sept.	97°	+45°	Lynx, E. of Capella.	Denning.	Oct. Very Swift, Streaks.

See also Nos. 21, 22, 26, 28, 33, 35, 38.

Digitized by Google

OCTOBER.

For Pacific Coast Points corresponding to these zones of Lat. add 6m. to Moon's rising and setting, or add 2m. for each hour west of Merid. of Wash. and subtract same for eastern Longitude.

NOTES.—VENUS begins advancing (moving eastward) past the Stars on the 6th and is now west of the Sun. MARS on the 3d–4th Mars passes 3° north of the bright, red star *a Scorpii* (Antares). THE CONSTELLATIONS—Circumpolar: To the right Cassiopea and Auriga; below—Great Bear—to the left Little Bear and Dragon. West of Meridian: Eagle, Lyra, Hercules, Crown. Near the Meridian: Fomalhaut near the horizon and the Square of Pegasus high up. East of the Meridian: Aries, Cetus, Andromeda. The last (Andromeda) a naked-eye object—may be located by a N. E. diagonal through the Square of Pegasus.

METEORIC SHOWERS OR SHOOTING STAR NIGHTS.

Date.	Radiant Point. R.A. Dec.	Constellation. or Nearby Stars.	Authority.	Other Dates and Remarks.
	225° + 52°	Quadrant.	Denning.	Slow. Bright, Dec., Jan.
	39° + 15°	Orionids.	Greg.	To Nov. 13, May-Oct. 16–20, Rich.
	60° + 20°	Taurids I. Bet. Pleiadæs & Hy.	Greg.	To Nov. 30. Very rich.
	133° + 21°	Cancer.	Denning.	Jan., Nov., Dec. Very Swift.
	78° + 32°	Aurigs—Blow Capella.	Denning.	Aug., Nov. Swift.
	143° + 28°	Leo—W. of Sickle.	Denning.	Nov., Dec. Swife.
Nov. 1.	43° + 22°	Aries, W. of Pleiades.	Denning.	Slow. Bright.
	120° + 15°	β Cancer—S. of Pollux.	Denning.	Long continued.

NOTES.—Venus will be close to the brilliant star α *Virginis* (Spica) on the 30th, being only about 4° north of the Star. MARS will pass about 5° north of the Milk-Maid's Dipper during the middle of the month. The stars of the evening sky of this month are about the most uninteresting of any of the year. The great expanse near the meridian devoted to Cetus, the Whale, is pretty nearly devoid of interesting objects or bright stars. East of the meridian Orion is rising and Taurus is well up and is a first-class constellation, embracing two fine groups—the Pleiades and Hyades. Aldebaran, the lucida, is one of the finest double stars—having been separated with a 3½ foot telescope of 2¼ in. aperture and an eye-piece magnifying 200 times.

METEORIC SHOWERS OR SHOOTING STAR NIGHTS.

No.	Date.	Radiant Point. R. A.	Dec.	Constellation or Nearby Star.	Authority.	Other Dates and Remarks.
60	9	102°	+73°	Camelopardalis.	Denning.	Oct. 28. Active. Swift.
61	11-15	149°	+23°	Leonids, Sickle.	Greg.	Great Display in 1866, and smaller in 1899.
62	24	25°	+43°	Andromedes □.	Greg.	To Dec. 7, Max. Nov. 27, 1872. Great
63	25-28	155°	+36°	Leo Minor, N. of Sickle.	Denning.	Fine in 1876. [Display.
65	27	54°	+47°	Perseus, near Algenib.	Denning.	Aug., Mch. Swift.
66	27	105°	+32°	Geminids, W. of Castor.	Greg.	To Dec. 27. Max. Dec. 10-11. Very rich.
67	Nov.	145°	+ 7°	Leo, S. of Regulus.	Denning.	To Dec., Feb., Mch. Swift. Streaks.

Digitized by Google

DECEMBER.

For Pacific Coast Points corresponding to these zones of Lat. add 6m. to Moon's rising and setting, or add 2m. for each hour west of Merid. of Wash. and subtract same for eastern Longitude.

Notes.—Neptune will be brightest Dec. 27, passing the Meridian at midnight in R. A., 6h. 19m. 34s. Dec. 22° 17′ 10″ + in the Constellation Gemini. Mars passes 8° south of the three brightest stars in Capricornus on the 13th. These stars are the only ones by which this constellation is readily distinguished: they are 25° directly south of below the group of stars known as "Job's Coffin" in the Dolphin. The close conjunction of Mars and Saturn on the evening of the 20th will be most interesting.

Venus will be occulted by the Moon Dec. 14, the conjunction in R. A. being at 6.26 P.M. and the limiting parallels of latitude + 34° and 29°. This will be an interesting spectacle in the south where the planet will disappear at the eastern limb of the Moon, and reappear at the western.

Meteoric Showers or Shooting Star Nights.

The first seven letters of the alphabet, in numerical order, have long been used in almanacs as "Dominical Letters," or Sunday letters, to indicate what day of the week the year begins on. The days on which consecutive years begin are in the *reverse* order of the Sunday letters, A, B, C, D, E, F, G, and these show the days of the week for Jan. 1 as follows: A, Sunday, B, Saturday, C, Friday, D, Thursday, E, Wednesday, F, Tuesday, and G, Monday.

TABLE 3.

Used for Both Styles. The vertical columns show the Sundays.

If the year is a leap-year, there must be two letters for it; the left-hand letter must be used for Jan. and Feb. only, and the other letter used for the other ten months. A table of Dominical Letters affords a very simple and ready method of finding the day of the week, of any day of any month, in any year. Table 1 gives the dominical letters for the "Gregorian Style," now in general use, beginning in the Catholic States of Europe in 1582. This was not adopted by England until 1752, and Russia not until 1901. The Julian Calendar, or "Old Style," as now designated, was founded by Julius Cæsar, and began with the year 45 B. C. It assumed the civil year to be just 365¼ days long, which was 11¼ minutes too much, and every fourth year was of 366 days. In 1582 this error amounted to 10 days, and Oct. 5th was counted 15th. The history of the world, from 45 B. C., to 1582, over 1600 years, is very largely recorded in the old style dates. That these dates may be put into week-days for the convenience of students of history, Table 2 is given above. There are no dates in this style prior to 45 B. C. Table 3 can be used in both "Old and New Style." In this Table the Sundays in any month are under the Dominical Letter for the year given, and in the vertical column opposite to the month given, and once knowing the Sundays, the other days are mentally obtained.

EXAMPLE: On what day of the week did Columbus discover America (San Salvador), Oct. 12, 1492? This being an "old style" date, Table 2 must be used. Under the Centurial 1400, and at the right of 92 are the letters AG (a leap-year). In Table 3, under G, the 14th of Oct. is found to be Sunday, and hence the 12th was Friday, the day sought. When the given year has two letters, the first applies only to Jan. and Feb. Therefore G is used in this case

EXAMPLE: On what day of the week was Abraham Lincoln shot, April 14th, 1865? This is a New Style date, and Table 1 must be used. Under the Centurial year 1800, and opposite 65 is A, and in Table 3 under A the 16th of April is found to be Sunday, hence the 14th was Friday, the day wanted, and by a strange coincidence it was "Good Friday" of Church days.

THE MOON'S AGE, NEW AND FULL, FROM 1738 TO 1946.

By S. Hart Wright, M.D., A.M., Ph.D.

The Golden Number, or Lunar Cycle, of 19 solar years is the basis of this useful table. The dates of New and Full Moon are affected by slight planetary perturbations.

N means New Moon.

F means Full Moon.

Figures in the same column express the age of the Moon on the dates under each month.

EXAMPLE: On the 26th of May, 1900, the Moon was 29 days old.

YEARS.

Planets Brightest or Best Seen.

MERCURY, about February 20 and October 18, rising shortly before the sun; also about April 21 and September 13, setting shortly after the sun. VENUS, August 12 and October 24. MARS, March 29. JUPITER, September 12. SATURN, July 30. URANUS, June 15, and NEPTUNE, December 27.

Notes.—MERCURY, when brightest, will rise and set as follows for lat. New York:

Rises, February 20, 5:36 a. m., December 17° 49′ S., or about 6° S. of sunrise point, and 20 m. after beginning of twilight.

Rises, October 18, 4:44 a. m., December 0° 44′ S., or about 10° S. of sunrise point, and at the beginning of twilight.

Sets, April 21, 7:31 p. m., December 15° 36′ N., or about 12° S. of sunset point, and 52 m. before close of twilight.

Sets, September 13, 6:54 p. m., December 9° 11′ S., or about 13° S. of sunset point, and 53 m. before close of twilight.

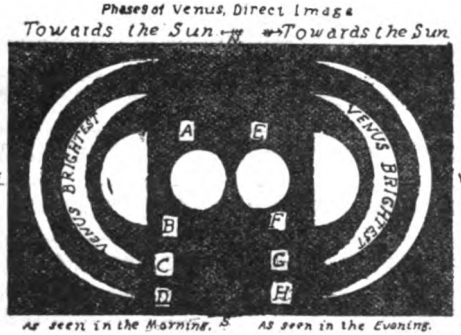
He will reach his greatest elongation west of the sun (27°) February 27 and October 18 (18°).

He will reach his greatest elongation east of the sun (22°) May 10 and September 7 (27°).

The elongations chosen are only those nearest to the times of his greatest brilliancy.

Few people ever see Mercury, yet he can readily be seen when looked for at the right time by knowing where to look. Pick out the brightest and reddest star-like body in the vicinity indicated above and you have it. As a further means of identification we will add that on February 20 he will be 15° S. of the λ in Aquarius; on October 18, 10° N. and a little west of Spica Virginis; on April 21 in Aries, and a line drawn through the two southern stars of the square of Pegasus to the eastern horizon will hit him; on September 13 he is 5° east of Spica Virginis.

VENUS has two dates when she will be brighter than any of the other planets or stars. On the latter date, October 24, she will perhaps appear to the best advantage owing to a lesser amount of moonlight, but she will be very bright for a considerable time before and after these dates. On the first date, August 12, she will be an evening star, and October 24 a morning star. A small telescope or good field glass will show her as a beautiful crescent, not unlike that of the moon just before and after new moon. She will also increase and decrease in apparent size as she approaches or recedes from us. All of these features are shown in the annexed figure.



A—15 days after superior conjunction, July 8, 1904. Apparent diameter, 10″.

B—At greatest elongation west, November 28, 1903. Apparent diameter, 24″.

C—When brightest, October 24, 1903. Apparent diameter, 40″.

D—Just after inferior conjunction, September 20, 1903. Apparent diameter, 60″.

E—15 days before superior conjunction, July 8, 1904. Apparent diameter, 10″.

F—At greatest elongation east, July 9, 1903. Apparent diameter, 24″.

G—When brightest, August 12, 1903. Apparent diameter, 38″.

H—Just before inferior conjunction, September 20, 1903. Apparent diameter, 60″.

At the time of her greatest angular distance from the sun (elongation) eastward she will appear exactly like a half moon, or the moon at one of the quarters, with the illuminated half toward the sun, as must always be the case. Later, as she approaches the sun in angular distance, and therefore sets earlier, she is also nearing the earth. Hence her apparent diameter or size, as well as brilliancy, will be increased. This will continue until August 12, when she will be brightest. Later on, September 17, she will be nearer still to us, at inferior conjunction, or between us and the sun. She has her greatest apparent diameter at that time, being nearest, yet she will be invisible, as she will be in line with the sun and earth. Nevertheless only a few days before and after that date she may be seen as a beautiful crescent, as a morning star before and an evening star after. Before July 9 and after November 28 she will grow dimmer and smaller, and present a gibbous phase. As she approaches her point of superior conjunction her illuminated portion becomes more nearly round, and she will be seen in the west at sunrise and in the east at sunset, yet will she be dim, because so far from us. See her movement through the constellations as given each month of the calendar pages; also her rising and setting.

MARS is an interesting object only when near his opposition in March and April this year. On March 29 he will rise at sunset and set at sunrise. While he will be brightest of the year at this time, he is sometimes still brighter. This will be the case when he comes to his opposition on or about the time of its perihelion at or near the earth's aphelion. These conditions will eventuate in 1907, as they did in 1892. The two tiny satellites, Deimos and Phobos, are only to be seen under the most favorable conditions and by the aid of the best telescopes.

JUPITER at his brightest is a beautiful object, but the chief interest lies in his five satellites, four of which are to be seen by the aid of a very small telescope or good field glass. Such a glass will also show the peculiar equatorial zones or belts. The spectroscope has demonstrated that Jupiter is a semi-sun, or shines partially by his own light. The satellites will not show well until April. It is very interesting to watch them as they suddenly drop out of sight—eclipsed—as they pass into the shadow of the planet or reappear as they come out of it. Or as they make their transits across his face, followed or preceded by their shadows thrown on the bright disk of the planet. We give herewith a table of such of these phenomena as are visible from the 10th to the 20th of October, when the light of the moon will not be sufficient to prevent good vision and Jupiter will pass the meridian at a convenient hour of the evening. For the purpose of illustration, take the series of phenomena within the braces: When Sat. I. disappears on the west side it passes behind the planet, and instead of reappearing at the east limb of the planet it is not seen again until some distance east of it, having passed into the shadow of Jupiter, hence, its next reappearance is from an eclipse. Then the Sat. passes around and moves across the planet—transit—between us and the planet, and from east to west (left to right), and 48 minutes later (8:56) the shadow of the Sat. may be seen moving across Jupiter's disk. Then the Sat. passes off at the west, and 48 minutes later its shadow does the same. The inhabitants of Jupiter are treated to about 900 of these events in the course of a Jovian year.

SATURN is also a very attractive celestial object, but requires a telescope of fair power to distinguish the wonderful system of satellites and rings. His rings were most favorably observed last in 1899 and will be again in 1914 and in 1906.

URANUS can barely be seen with the naked eye, in the absence of the moon and by knowing just where to look.

NEPTUNE is only to be seen by the aid of the best telescopes and favorable conditions. A first-class 7 or 8 inch (aperture) telescope will show him at opposition with good atmospheric conditions.

Roman Notation.

In the ancient Roman form of notation the principal symbols used were I., which stood as the equivalent of the Arabic, 1; V., which stood for 5; X., for 10; L., for 50; C., for 100; D., for 500, and M., for 1000. In order to express a series of numbers these symbols were combined according to the following rule: When the two letters, which were written one after the other, were intended to be added together, the symbol which represented a number which was equal to or greater than that represented by the other occupied the first position in the line, while the appearance of the lesser number in the first position denoted that its value was to be subtracted from that of the greater. Thus, for example, while XI. stood for 10 plus 1, or 11, IX. stood for 10 minus 1, or 9.

While it is not customary, at the present time, to make use of the Roman numerals except in the expression of dates, or for marking divisions in books, pamphlets, documents, etc., the Roman notation may be used in writing any combination of numbers, as a horizontal line placed directly above any symbol adds to its value one thousand times. Thus, while V. is the symbol for 5, $\overline{V}$. stands for one thousand times 5, or 5,000.

																		Now the first Constellation—The Fishes. D. B. d 199″.

EXPLANATION: To ascertain when any Star or Constellation will be on the upper meridian add the number opposite in the column "For Meridian Passage" to the figures in the calendar pages, column "Sidereal Noon," taking note whether such figures be "Morn." or "Eve." If Morn. and the Sun is more than 12h. the result will be Eve. of same day; if "Eve." and the Sun is more than 12h. the result will be Morn. of the next day. Having found the time of meridian passage, for the rising subtract and for the setting add the numbers opposite the Star in the column headed "For Rising and Setting" and observe the direction as to Morn. and Eve. given for the meridian passage. Those marked (.....) in the last column are circumpolar and do not rise or set in the latitude of New York City. Stars having an asterisk (*) in the last column are only to be seen in the far south and then when near the meridian, as the vapors of the horizon will prevent seeing them when they rise or set. To tell how high up from the nearest point of the horizon a star will be at its meridian passage, subtract the Star's declination from 90° and if the result is less than the latitude of the place of the observer that star will neither rise nor set, but is circumpolar, and the difference between that result and the latitude shows the star's altitude above the north point of the horizon or below the southern horizon. Or (90°—Dec.) —Lat.=Alt. or elevation of the star above the nearest point of the horizon at Meridian passage for stars of a south. dec.

EXAMPLES: Sidereal Noon, Oct. 30, 1903, 9 27 P.M.
Fomalhaut "In Merid." col. 22 48

	32	15
Subtract	24	
	8	15 P.M. of the 31st=time of Meridian passage.
Fomalhaut Ris. and Set. col.	4	0
	12	15 =0.15 A.M. of Nov. 1, the time of setting.

Fomalhaut Dec. =30° S. 90°—30°=60°— 40°= 20°=Altitude of Fomalhaut in Lat. 40° at its meridian passage. To measure celestial distances with the eye, keep in mind that one-third of the distance from the zenith to the horizon is 30°. For smaller measurements use the "Pointers" in the "Big Dipper," which are nearly 5° apart—a convenient celestial yardstick because always to be seen. In the case of a Star whose dec. is such as to bring it nearer to the zenith than to a horizon at meridian passage, it will be more convenient to use its zenith distance as a means of locating it. The difference between the Lat. and Dec. is this zenith distance. If the Dec. is greater than the Lat. then such difference is to be counted northward: otherwise southward from the zenith.

NOTE OF EXPLANATION:

The azimuths, applied properly to the magnetic bearing of Polaris at the time of its greatest elongation east or west, will give the variation of the magnetic needle from a true north direction, and will be of great use to all surveyors and engineers. When the elongation is east the azimuth will be east, and vice versa. At the present time the line of "No Variation" of the needle runs southeasterly from near Toledo, Ohio, to a point on the Atlantic coast about fifty miles southwest of Cape Fear, N. C. East of that line the north end of the needle points west of a true north, and west of that line, east of the true north. The country may therefore be divided into eastern and western magnetic regions. In the "Eastern Region" the bearing of Polaris at its western elongation, if eastward, added to the azimuth, gives the desired variation west; but if westward, the bearing taken from the azimuth gives the variation west. The bearing of Polaris at its eastern elongation will be eastward, and the azimuth subtracted therefrom gives the variation west. In the "Western Region" the bearing of Polaris at its eastern elongation, if westward, added to the azimuth, gives the variation east; but if eastward, the bearing taken from the azimuth gives the variation east. The bearing of Polaris at its western elongation will be westward, and diminished by the azimuth gives the variation east. The azimuths in the table, given for two-degree zones, are practically sufficient for all the United States except Alaska. For intermediate latitudes, and dates, the azimuths may be found by proportion sufficiently correct, or exactly by the formula: log-sine azimuth equal log-sine Polar Distance of Polaris, minus log-cosine latitude. The surveyor or engineer is on the line of "No Variation" when the bearing of Polaris at greatest elongation is the same as the azimuth.

TO FIND THE TIME OF GREATEST ELONGATION OF POLARIS.

34 00	5 55 38	39 30	5 54 53	45 00	5 54 00

By adding the numbers in the annexed table for any given latitude to the time of the upper meridian passage of Polaris (the Pole Star), given in another table, the time of its great western elongation is found. If the same number be subtracted instead of added, we get the time of greatest eastern elongation. At the time of either elongation the magnetic bearing may be taken with the compass, using that elongation which occurs at night. The eastern elongations occur at night from April 1 to October 11, and the western elongations occur at night all the rest of the year. Correct local time is to be used, and bearings taken on the star promptly on time; but an error of half a minute or even a minute in the timepiece will not invalidate the bearing, as Polaris then moves nearly vertically.

* When the lower transit is used, subtract these constants from 11 hours 58 minutes 2 seconds, reversing the rule of application to the meridian passage given above for the time of elongations, subtracting the constants obtained from the meridian passage for western and adding for eastern elongations.

The tides are placed in the order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The time used is Eastern Standard. 75th meridian W.; 0^h is midnight, 12^h is noon; all hours less than 12 are in the forenoon (a. m.), all greater are in the afternoon (p. m.), and when diminished by 12 give the hours after noon; for instance, 15:42 is 3:42 p. m. The heights, in feet and tenths, are reckoned from mean low water, which is the datum of soundings on the Coast and Geodetic Survey charts for this region, and which is 2.2 feet below mean sea level.

Symbols and abbreviations relating to the moon: ●, new moon; ☽, 1st quar.; ○, full moon; C, 3d quar.; E, moon on the equator; N, S, moon farthest north or south of the equator; A, P, moon in apogee or perigee.

The tables on page 44 give time of tide at local points.

Mohammedan Calendar.

The Mohammedan year 1321 is the first year of the forty-fifth cycle of thirty years, and contains 355 days, beginning March 30 and ending March 17, 1904.

Year	No.	Month Name.	Begins, 1903.	Lasts. Days.
1321	10	Schawall	Jan. 1	29
1321	11	Dulkaeda	Jan. 30	30
1321	12	Dulheggee	Mar. 1	29
1322	1	Muharram	March 30	30
	2	Saphar	April 29	29
	3	Rabia I.	May 28	30
	4	Rabia II.	June 27	29
	5	Jomhadi I.	July 26	30
	6	Jomhadi II.	Aug. 25	29
1321	7	Rajeb	Sept. 23	30
1321	8	Shaban	Oct. 23	29
1321	9	Ramadan (Fasting)	Nov. 21	30
		Feast of Bairam	Dec. 21	
1321	10	Schawall	Dec. 21	29
			Begins 1904.	
1321	11	Dulkaeda	Jan. 19	30
1321	12	Dulheggee	Feb. 18	29
1322	1	Muharrem	March 18	30

The tables on page 44 give time of tide at local points.

Mohammedan Fasts and Festivals.

The Mohammedan era begins with the evening of the 16th of July, 622 A. D., the date of the Hegira, or flight of Mohammed from Mecca to Medina.

The Mohammedan year is a pure lunar year and does not conform in any way to the solar year of the Christian, or Julian and Gregorian calendar. Every month begins with the appearance of the crescent or new moon.

A cycle of thirty years is observed by Arabian astronomers. Of these eleven, namely, the 2d, 5th, 7th, 10th, 13th, 16th, 18th, 23d, 24th, 26th and 28th years of the cycle, are leap years of 355 days each. The common years have 354 days.

There are twelve months, as in the Gregorian calendar, named Moharrem, Safer, Rebi ul-Evel, Rebi ul-Ahir, Djemasi ul-Evel, Djemasi ul-Ahir, Redsheb, Shaban, Ramadan, Sheval, Zilkide and Zilhidje. The even months have twenty-nine days and the odd months thirty days, except in leap years, when a day is added to the last month.

The months of the Mohammedan calendar are not stationary, but within thirty-three years run through all the seasons, retrograding eleven to twelve days every year. As each year begins with the new moon there are always great variations in the respective length of months. Since observations as to the exact time of the advent of a new month depend for their correctness upon accidents or localities, there is also often great discrepancy in the calculations of two astronomers. It is not infrequently the case that the same *month* begins later or earlier in one city than in another. The difference is sometimes as much as three days. This fact makes it almost impossible to determine with any degree of exactness the dates of historical events.

The Mohammedan Sabbath is Friday, and, besides this, three great holidays are observed. The entire month of Ramadan, the ninth month of the Turkish year, is a time of abstinence from eating, drinking or physical enjoyment during the hours of sunlight. The close of the time of fasting is indicated by a cannon shot or by the chants of priests. Ramadan is ended by the Bairam feast, the great Bairam occuring the first day of the new moon following the Ramadan. This lasts three days, and it is the time of great public rejoicing and festivities, rich and poor alike giving themselves over to the pleasures of eating. Charity, the chief virtue of Islam, is practised extensively.

The little Bairam, the third great holiday, is celebrated seventy days after and lasts four days. It is a religious holiday and is observed with more solemnity.

The tables on page 44 give time of tide at local points.

Jewish or Hebrew Calendar.

Jewish Era, year 5663-5664, is the first of the 299th cycle of nineteen years, and contains 353 days. In a cycle of nineteen years seven leap years occur, and are intercalated between Adar and Nissan, where a month is added called Ve-Adar. Such years are called embolismic, and the added month Ve-Adar is always of thirty days. The third, sixth, eighth, eleventh, fourteenth, seventeenth and nineteenth years of every cycle are embolismic, and contain thirteen months. The year 5663 is a common year of twelve lunar months, and began October 2, 1902, and ends August 24, 1903, as shown in the following table. The era dates from the supposed time of Creation.

Hebrew Year.	No. Month.	Hebrew Name of Month.	Gregorian Date of Beginning.	Duration—days.	Hebrew Year.	No. Month.	Hebrew Name of Month.	Gregorian Date of Beginning.	Duration—days.
5663	4	Tebet	Dec. 30-31, 1902....	29	5663	12	Elul	Aug. 23-24, 1903....	29
	5	Sh 'vat.....	Jan. 29, 1903....	30	5664	1	Tishri	Sept. 22, or at sunset	
	6	Adar.....	Feb. 27-28, 1903....	29				Sept. 21.....	30
	7	Nissan	Mch. 29, 1903	30	5664	2	'Chesvan	Oct. 21-22, 1903....	29
	8	Iyar	Apr. 27-28, 1903....	29	5664	3	Kislev.....	Nov. 20, 1903....	29
	9	Sivan	May 27, 1903....	30	5664	4	Tebet	Dec. 19-20, 1903....	29
	10	Tammuz	June 25-26, 1903....	29	5664	5	Sh 'vat.....	Jan. 18, 1904....	30
	11	Ab or Av.....	July 25, 1903....	30					

Where two dates are given for the beginning of a month in the preceding calendar and in the table of feasts and fasts on the next page the last one is always reckoned as the date of beginning (Rosh-Chodesh), except Tishri, which is always counted from the first.

Hebrew Fasts and Festivals.

Year 5663.
Tebet 10—Fast of Tebet.....Friday, Jan. 9
Sh'vat 1—Rosh-Chodesh.....Thurs., Jan. 29
Adar 1—Rosh-Chodesh.....Fri.-Sat., Feb. 27-28
Adar 13—Fast of Esther.....Thursday, March 12
Adar 14—Purim.....Friday-Saturday, March 13-14
Nissan 1—Rosh-Chodesh.....Sunday, March 29
Nissan 15—First day of Passover....Sunday, April 12
Iyar 1—Rosh-Chodesh...Monday-Tuesday, April 27-28
Iyar 18—Lag B'Omer (33d Omer)....Friday, May 15
Sivan 1—Rosh-Chodesh.....Wednesday, May 27
Sivan 6—First Day of Pentecost...Monday, June 1
Tammuz 1—Rosh-Chodesh....Thurs.-Fri., June 25-26
Tammuz 17—Fast of Tammuz.....Sunday, July 12
Ab or Av. 1—Rosh-Chodesh.....Saturday, July 25
Ab or Av 9—Fast of Av.....Sunday, August 2

Year 5663.
Elul 1—Rosh-Chodesh....Sunday-Monday, August 23-24
Year 5664.
Tishri 1—First Day of New Year.....Tues., Sept. 22
Tishri 3 Fast of Gedaliah .....Thursday, Sept. 24
Tishri 10—Yom-Kippoor.....Thursday, Oct. 1
Tishri 15—First Day of Tabernacle...Tues., Oct. 6
Tishri 21—Hoshannah-Rabbah.....Monday, Oct. 12
Tishri 22—Sh'Mini-Atseres.....Tuesday, Oct. 13
Tishri 23—Simchas-Torah.....Wednesday, Oct. 14
Chesvan 1—Rosh Chodesh.....Wed.-Thurs., Oct. 21-22
Kislev 1—Rosh-Chodesh.....Friday, Nov. 20
Kislev 25—First day of Chanukah.....Mon., Dec. 14
Tebet 1—Rosh-Chodesh.....Sat., Sun., Dec. 19-20
Tebet 10—Fast of Tebet.....Tuesday, Dec. 29

While the Jewish year is Solar-Lunar and may consist of 353, 354, 355, 383, 384 or 385 days, its calendar is further complicated in order that their fixed feasts may not fall upon certain days and thus avoid an interference with the peculiar ceremonies of each. Hence the Jewish year must not begin on the first day of the week, Sunday. If the new moon falls on that day the next must be the first day of the year. For instance, Tishri 10 must always be celebrated as a Sabbath and must not, therefore, fall on a Sabbath (Saturday), as the ceremonies would interfere. For this reason the Jewish New Year's Day must not fall on Sunday, Wednesday or Friday. To keep the year in its place, however, changes are made in the two months, Marchesvan (Chesvan) and Cisley (Kislev) in the same manner as we intercalate in February. Sometimes each of these months have 30 and 29 days, and sometimes Chesvan has 29 and Kislev 30. When one of them contains only 29 days, that one is Chesvan, making 14 different kinds of years to keep track of.

The tides are placed in the order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The time used is Pacific Standard, 120th meridian W.; 0h is midnight, 12h is noon; all hours less than 12 are in the forenoon (a. m.), all greater are in the afternoon (p. m)., and when diminished by 12 give the times after noon; for instance, 15:42 is 3:42 p. m. The heights, in feet and tenths, are reckoned from mean lower low water, which is the datum of soundings on the Coast and Geodetic Survey charts for this region, and which is 2.2 feet below mean sea level.

Symbols and abbreviations relating to the moon: ●, new moon; ☽, 1st quar.; ○, full moon; ☾, 3d quar.; E, moon on the equator; N, S, moon farthest north or south of the equator; A, P, moon in apogee or perigee.

The tables on page 44 give time of tide at local points.

Chinese Calendar, Year 4600.

THE JAPANESE YEAR.

The Japanese year begins at the same time as the Chinese year. There is much uncertainty among English chronologers about the actual time of the beginning of this era, and therefore of the numbers of the cycles; also as to the time of beginning of the year. The intercallory month must always begin between the 20th and 23d of the month, and at about the same time of year, and run until the following new moon.

Chinese Fasts and Festivals.

(The information regarding the Chinese Calendar, fasts and festivals, was obtained from the Chinese Legation, Washington, D. C.)

The Chinese year of 4600, corresponding most closely to 1903, will contain 383 days, and will begin on the first day of the first moon, or January 29. The Chinese, as do most Eastern people, observe a lunar month, each month beginning with the advent of the new moon. In order to provide for the difference between the lunar and solar year, one month is added in every thirty, so that the Chinese year may begin any time between the 21st of January and the last of February.

New Year's Day is celebrated as a festival of great importance by Chinamen throughout the world. Its observance usually lasts three or four days, according to the wealth of the individual. Work is suspended and the time given over to receiving and paying visits. All debts are cleared at that time. When a Chinaman becomes insolvent he appears before his creditors at New Year's time, announces that he has no money, and, by a solemn ceremony, his debts are declared discharged. New Year's is also the time when charity is most practised, and the custom of giving presents faithfully observed. Among the wealthier classes and in the towns there are usually street celebrations, with parades and fireworks.

The fifth day of the fifth moon, falling in 1903 on May 31, is celebrated as the Dragon Festival, and upon this occasion, in China, the day is devoted to water sports and excursions. The holiday usually ends with processions of illuminated boats.

The fifteenth day of the eighth month, falling in 1903 on October 5, is the great mid-Autumn festival, when everybody in China makes "moon cakes" and worships the moon. This is the time of the American Harvest moon, which shines with marked brilliancy in the East. The Winter solstice, December 21, by the Christian calendar, is an official holiday, and upon this occasion it is the duty of all officials to visit the Temple, kneel to the North and worship the Emperor.

The Emperor's birthday is an anniversary which every one is compelled to celebrate as a festival of rejoicing. In 1903 this date falls upon the 26th day of the sixth moon, or August 18. The birthday anniversary of the Dowager Empress, which falls upon the tenth day of the tenth moon, November 28, is also celebrated, but only as an official holiday.

The tables on page 44 give time of tide at local points.

Greek Church and Russian Calendar.

The Russians have never adopted the new style of marking the divisions of the year, but cling to the old style, which brings all their dates thirteen days later than ours.

Following is the list of holy days for A. D., 1903; A. M., 8012:

New Style.		Holy Days.	Old Style.
January	14	Circumcision	January 1
January	19	Theophany (Epiphany)	January 6
February	9	Carnival Sunday	January 27
February	4	Ash Wednesday	February 19
March	8	First Sunday in Lent	February 28
March	15	Hypapante (Purification)	February 2
March	28	Great Friday (Good Friday)	March 15
March	7	Annunciation of Theotokos	March 25
March	12	Palm Sunday	March 30
April	19	Holy Pasch (Easter)	April 6
April	6	St. George	April 23
May	22	St. Nicholas	May 9
May	14	Coronation of the Emperor*	May 14
May	28	Ascension Day	May 15
May	7	Pentecost (Whit Sunday)	May 25

New Style.	Holy Days.	Old Style.
June 7	Holy Ghost	May 25
July 12	Peter and Paul, Chief Apostles	June 29
August 14	First Day of Fast of Theotokos	August 1
August 19	Transfiguration	August 6
August 28	Repose of Theotokos	August 15
September 12	St. Alexander Nevsky*	August 30
September 21	Nativity of Theotokos	September 8
September 27	Exaltation of the Cross	September 14
October 14	Patronage of Theotokos	October 1
November 28	First Day of Fast of Nativity	November 15
December 4	Entrance of Theotokos	November 21
December 21	Conception of Theotokos	December 8
1904.		
January 7	Nativity (Christmas)	December 25

*Peculiar to Russia.

The day set apart for the commemoration of the crowning of the Emperor, refers, of course, to the coronation of the present Czar. When his successor is crowned the date will be changed. September 12, the feast day of St. Alexander Nevsky, is in honor of a former ruler of the nation. He was born at Vladimir, Russia, in 1219, and died November 14, 1263. He is a national hero, and was patron saint of St. Petersburg. Prince of Novgorod and Grand Duke of Vladimir. He defeated the invading Swedes in 1240 in a great battle on the Ishova, a southern affluent of the Neva (whence his surname Nevsky), and the Livonian knights on the ice of Lake Peipus in 1242. His memory is also honored by the cloister or monastery of Alexander Nevski, a famous foundation of Peter the Great at St. Petersburg.

The tables on page 44 give time of tide at local points.

Greek Church Fasts and Festivals.

The Greek Church, being an offshoot of the Roman Catholic Church, its holy days are practically the same as those of the latter. A principal difference is in the time for keeping Easter. The Asiatic Church, deriving its customs from the ceremonies of the Jewish passover, had originally kept its Easter on the actual day of the full moon, no matter on what day of the week it occurred. The Church of Rome spent her direst anathemas on this practice, for she kept her Easter on the first Sunday between the 16th and 22d days of the moon. Engaging as weapons ridicule and calumny, she styled the Asiatic practice that of quartoderimans, or fortnighter, because they had Easter on the 14th day of the month, and called the members of the church Jews, because their festival coincided in time with the Jewish passover. The Greeks, however, insisted on their own ideas of Easter, and still, in spite of opposition, retain the date as it has been for many centuries of the past, believing in keeping to the custom of their fathers, whatever force may be brought in opposition. The history of the Roman and Greek Churches is one of growing estrangement from the fifth to the eleventh century, and of a series of abortive attempts at reconciliation since the latter date. Leo IX. having, in 1054, excommunicated the entire Eastern Church. Theotokos, alluded to in the table, is the Virgin Mary. The Council of Ephesus, the third occumenical, had insisted upon applying the term Theotokos to the Virgin Mary, and this was repeated in the symbol of Chaladan, which says that Christ was born of the Virgin Mary, the Theosophons, "according to the manhood." The same symbol also declares that Christ is "to be acknowledged in two natures, individually and inseparably."

There are two holy days which are observed by Russians alone, the members of the Church outside that country paying no attention to them. These are the anniversary of the crowning of the Czar and the day of St. Alexander Nevsky, the latter commemorating the victory of Prince Alexander over the Swedish troops on the banks of the Neva, whence the Nevsky.

There have been repeated efforts in recent years to adopt the modern style of rating time to accord with the methods used by all the rest of Europe and America, but owing to the opposition of the more conservative classes, it has so far proved unavailing. The change will undoubtedly be made in time, however, greatly to the benefit of the business classes having relations with Russia.

Weather Bureau Signals.

Storm signals are displayed by the Weather Bureau of the United States Department of Agriculture at 141 stations situated on the Atlantic and Gulf coasts of the United States, from Eastport, Me., to Brownsville, Tex. The stations at Capes Henry and Jupiter are equipped for signalling by the international code and are prepared to transmit by telegraph the messages of passing vessels. In addition the department furnishes daily forecasts, which are telegraphed to all stations of the bureau, to railway officials, postmasters and others, through whom they are communicated to the public by means of the flag signals or the system of steam whistles adopted for this purpose.

The Weather Bureau's system of flag signals is as follows:

EXPLANATION OF FLAG SIGNALS.

No. 1. White Flag.

Clear or fair weather.

No. 2 Blue Flag.

Rain or snow.

No. 3. White and Blue Flag.

Local rain or snow.

No. 4. Black Triangular Flag.

Temperature signal.

No. 5. White Flag with black square in centre

Cold wave.

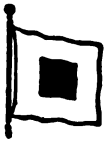
No. 1, when hoisted alone, indicates fair weather, with stationary temperature.
No. 2, hoisted alone, indicates rain or snow and stationary temperature.
No. 3, hoisted alone, indicates local rain and stationary temperature.
No. 1, with No. 4 below it, indicates fair, but colder, weather.
No. 1, with No. 4 above it, indicates fair, but warmer, weather.
No. 2, with No. 4 below it, indicates colder weather, with rain or snow.
No. 2, with No. 4 above it, indicates warmer weather, with local rains.
No. 3, with No. 4 below it, indicates colder weather, with local rains.
No. 3, with No. 4 above it, indicates warmer weather, with local rains.
No. 1, with No. 5 above it, indicates fair weather and a cold wave.
No. 2, with No. 5 above it, indicates wet weather and a cold wave.

During the late Spring and early Fall anticipations of frost are also indicated by the cold wave signal.

WIND DIRECTION AND STORM SIGNALS.

The following signals denoting wind directions and storm warnings are in use on the coast and the Great Lake ports:

Storm signal.

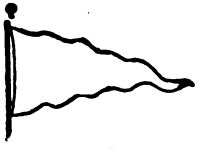


Red Flag, Black Centre

Easterly winds.

Red Pennant.

Westerly winds.



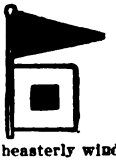
White Pennant.

They are cautionary against a wind velocity that will be dangerous to all classes of vessels.

EXPLANATIONS.

The appearance of the storm signal alone indicates that a storm of great violence may be expected.

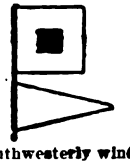
If the red pennant is hoisted above the storm signal it indicates that the wind will be easterly, probably from the northeasterly quadrant; if it is displayed below the storm signal it indicates that the wind will be southeasterly. The white pennant hoisted above the storm signal indicates a northwesterly wind; below the storm signal, a southwesterly wind. Thus:



Northeasterly winds.

Southeasterly winds.

Northwesterly winds.



Southwesterly winds.

By night the warnings are given by means of lights, a red light indicating easterly winds; a red and white light westerly winds.

In cases of the approach of a hurricane or of particularly severe and dangerous storm winds in the vicinity of the lakes or coast the warning is indicated by two red flags with black centres, hoisted one above the other. Thus:

Hurricane Signal.

EXPLANATION OF WHISTLE SIGNALS.

The first blast of the whistle, which is from fifteen to twenty seconds in duration, is sounded to attract attention, after which the regulation system of signals is followed:

The longer blasts—four to six seconds in duration—refer to the weather; the shorter blasts—one to three seconds in duration—refer to the temperature.

WEATHER SIGNALS.		TEMPERATURE SIGNALS.	
Blasts.	Indicates.	Blasts.	Indicates.
One long	Fair weather.	One short	Lower temperature.
Two long	Rain or snow.	Two short	Higher temperature.
Three long	Local rain or snow.	Three short	Cold wave.

HOW TO OBTAIN FORECASTS.

The Weather Bureau is anxious that its forecasts and weather charts shall have as wide publicity as possible, and is especially desirous that some person in every town in the United States shall publish its warnings for the benefit of the public. As far as practicable, therefore, the messages will be sent at the expense of the bureau, but when this is impracticable they will be telegraphed "collect" at regular commercial rates. Moreover, if forecasts are already sent to one person in a town they will not be furnished to a second applicant except at his own expense.

If any person desires to display these signals the necessary arrangements may easily be made upon application to the official in charge of the climate and crop service in the State in which he resides.

How to Foretell the Weather.

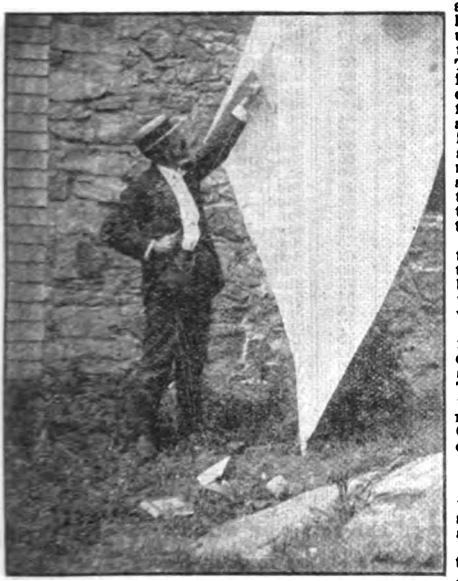
By WILLIAM A. EDDY, Inventor of Meteorological Kites.

Let chance observers of any flying kite notice the extent to which it veers from side to side, the sudden uprushes toward the zenith made by the kite and its equally sudden decline with the wind and they can safely forecast rain, severe local storms and high wind within twelve hours, and without consulting other instruments which may be inaccessible.

Probably the most important forecast to be made by any citizen who may be his own forecaster is that pertaining to the cessation of a death-dealing hot wave. The clouds may indicate cooler conditions, which have already arrived aloft, but which have not yet reached the earth, and since relief from a hot wave comes from the upper air the cool wave predictions from clouds may be more certain than some of those made by the Weather Bureau forecasters, though not covering as long a period of time. The arrival of cold air aloft during a hot wave causes a decided change in the appearance of the sky. The thin mist or haze, like very thin steam vapor, which has been present during many days of intense heat, is replaced by a sky of a clearer and darker blue, with films of cirrus, or high white feathery clouds, shutting out about half of the azure. The heat at the earth is still oppressive. This sky condition indicates a break in the heat wave within twenty-four hours preceded by a thunderstorm and a fall of about ten degrees, followed by another fall of ten degrees on the following day.

A new indication of rain and coming coolness which I have just discovered is that the clouds increase in speed and descend to a lower altitude. During steady rain all day I have found the clouds at times to be less than 600 feet above the earth, and I have demonstrated this by cloth kites, flown during rain for this purpose, by measuring the altitude of the kite just as it faded out in the cloud. The kite appeared and disappeared, depending on the varying height of the cloud.

The high white pinnacles known as thunderheads are of two types, and are very important indicators of coming weather. Some of these clouds are relatively small in diameter and show a tendency to fade away. They are known as heat clouds, and generally appear about three days before the expiration of a sustained hot wave. They indicate no relief near at hand. The other type of thunderhead is large in volume, accumulates, piles up in pinnacles, narrow at the top with stratified bases, with misty lower edges. They indicate relief before night or early in the evening, with a further fall in temperature the following day and the end of the hot wave. If lightning flashes from cloud to cloud and rarely to the earth the cool air is rushing in aloft, causing different electric strains in adjacent clouds. These thunderheads, which are about to break up a hot wave, have a perceptible rapidity of motion from the southwest, and form all around the horizon. If after several days of a hot wave the humidity exceeds 80 per cent. and if the temperature at 9 a. m. approaches 90 degrees, then a break in the heat is practically certain to occur before sundown.



William A. Eddy and His Weather Kite.

At certain times when a region of heavy rain or intense cold or heat extends for over a thousand miles to the westward of the point for which a forecast has been made by the Weather Bureau, it is then that the forecast is almost certain to be verified. But when storm centres and barometric high pressure are feeble or lack intensity to show little progressive motion, then the Weather Bureau forecast may be defeated by dissolution of the storm or by the slowness, swiftness or other incalculable characteristics of it. Then cloud forecasting comes into play, and will do the work well if careful records or observations are made of what resulted from previous like conditions. Cloud indications are superior for short forecasts because they denote conditions actually at hand.

BAROMETRIC OBSERVATIONS.

The following rules are those which are used by the Seawanhaka-Corinthian Yacht Club in their very successful attempts to forecast the weather with the aid of the barometer.

A Rising Barometer.—A rapid rise indicates unsettled weather. A gradual rise indicates settled weather. A rise with dry air and cold increasing in Summer indicates wind from the northward; and if rain has fallen, better weather may be expected. A rise with moist air and a low temperature indicates wind and rain from the northward. A rise with southerly winds indicates fine weather.

A Steady Barometer.—With dry air and seasonable temperature indicates a continuance of very fine weather.

A Falling Barometer.—A rapid fall indicates stormy weather. A rapid fall with westerly wind indicates stormy weather from the northward. A fall with a northerly wind indicates storm, with rain and hail in Summer, and snow in Winter. A fall with increased moisture in the air and heat increasing indicates wind and rain from the southward. A fall with dry air and cold increasing in Winter indicates snow. A fall after very calm and warm weather indicates rain with squally weather. The barometer rises for northerly winds, including from northwest by north to the eastward for dry or less wet weather, for less wind, or for more than one of these changes, except on a few occasions, when rain, hail, or snow comes from the northward with strong wind. The barometer falls for southerly wind, including from southeast by south to the westward, for wet weather, for stronger wind or for more than one of these changes, except on a few occasions, moderate wind, with rain or snow, comes from the northward.

The general movement of storms in the United States is from west to east, and those who have access to the maps published by the United States Weather Bureau may follow the course of these storms, which appear upon these maps like a series of atmospheric waves, of which the crests are designated as "Highs," and the troughs or depressions as "Lows." These alternating "Highs" and "Lows" have an average easterly movement of about 600 miles per day.

With these maps as a guide, therefore, and with the barometer and the thermometer as assistants, comparatively successful prognostication of the weather ought not to be an impossibility.

In the absence of a barometer a strip of sea weed which is kept in a room warmed artificially will often prove a practical substitute. During fair weather it will remain dry and have a somewhat dusty feeling to the touch, while as the moisture increases it will become more and more limp and sticky, which may be taken as an indication of probable rain.

A rosy sky at sunset, whether clouded or clear; a gray sky in the morning, or a low dawn, are said to indicate fair weather. A red morning sky presages bad weather. Soft looking clouds indicate fair weather, with moderate breezes; hard-edged clouds indicate wind; rolled or ragged clouds, strong wind. A pale yellow sky at sunset is indicative of rain.

The Summer of 1902.

The year 1902 will figure in the local history of New York City as the year without a Summer. During the thirty-two years of the existence of the United States Weather Bureau no such record for even and moderate temperature in the months of June, July and August has appeared upon the books of the local bureau here as during that year. There was practically no hot weather, the highest temperature reached being 91 deg., and there were but two days altogether when it reached 90 deg. The daily average ranged from 62 deg. on June 9 to 82 deg. on July 9. There were but two days when the average was 80 deg. or more, and only five other days which showed an average as high as 78 deg. The average temperature of the entire season was actually the average of the season for the past thirty-two years. The monthly averages for 1902 were: June, 68 deg.; July, 74 deg.; August, 71 deg. For the period of thirty-two years they are: June, 69 deg.; July, 74 deg.; August, 73 deg. In addition to the evenness and moderation of the temperature during the Summer of 1902 there was remarkable freedom from that high degree of humidity which, combined with even a moderately high temperature, makes the weather oppressive. As compared with the Summer of 1901 that of 1902 presents some striking similarities, together with some sharp contrasts. June opened even cooler in the earlier year than in the later, but the daily average rose and fell at about the same intervals and to nearly the same extremes during the first twelve days. The largest contrast in the record of the two years is found between June 22 and July 3, when the average daily temperature ranged from 76 deg. to 90 deg. in 1901, and from 63 deg. to 74 deg. in 1902. The highest daily averages in 1901 were 84 deg. in June, 90 deg. in July, and 80 deg. in August; in 1902 they were 78 deg. in June, 82 deg. in July, and 77 deg. in August. The lowest daily averages in 1901 were 59 deg. in June, 68 deg. in July, and 68 deg. in August; in 1902 they were 62 deg. in June, 67 deg. in July, and 65 deg. in August. During the Summer of 1901 there were fifteen days which had an average temperature of less than 70 deg., against twenty-nine days in 1902; and there were only seventeen days during the latter Summer which had a higher average than 75 deg., against forty-five days in 1901. The evenness of temperature during the Summer of 1902 is shown by the fact that the extreme daily averages for June were 62 deg. and 78 deg., a range of 16 deg.; for July, 68 deg. and 82 deg., a range of 14 deg.; for August, 65 deg. and 77 deg., a range of 12 deg.; the range for the entire season being only 20 deg. The Summer was remarkable also for the prevalence of gloomy weather. There were only 27 clear days during the entire season; 47 days were partly cloudy, and 28 were cloudy. There was rainfall on 36 days, amounting to 0.01 inch or more, and the total amount was slightly above the normal for the season. June, however, was extremely wet, the rainfall of 5.91 inches being 2.78 inches above the normal for that month. The total for the three months was 12.32 inches, the normal for the entire season being 12.09 inches.

Highest and Lowest Altitudes in the United States.

Windstorms and Tornadoes in the United States.

The difference between tornadoes, cyclones and hurricanes should be generally known. The ordinary windstorms which visit the United States are properly cyclones, and come usually from the northwest or southwest. Hurricanes never come from the northwest, but usually enter the United States from the south or southeast. They occur in late Summer or early Autumn, and are very violent, the wind often reaching the velocity of 60 miles an hour. Tornadoes are much smaller in size and much more dangerous than hurricanes, over limited areas. A tornado may be only a mile or so wide at the top and much less at the bottom. They occur most frequently in the Mississippi and Ohio valleys. The chief characteristics of the tornado are a pendant funnel and violent rotary winds over a well marked but narrow path. In the attached tables only storms meeting the requirements of this definition are included.

Mr. Harvey Watts gives the following description of a tornado, which will aid in understanding fully the peculiarities of this class of phenomena. "The tornado is a purely local storm of great intensity and concentrated energy, whose main destructive effects are the results of almost incredible velocity of the rotary winds that blow spirally into and about its vortex. Though terrible to life and property, it is at the same time the smallest of local wind disturbances, being limited in duration, the width of path and extent of its track. In one case it may last but a few minutes along a track of a few hundred feet wide and a mile or so in length; in another it may persist for hours, its path several hundred yards in width and extending from fifty to one hundred miles in length. Its forward motion on its track may vary from fifteen to sixty miles an hour, but its speed is insignificant compared to the velocity of the rotary winds, which may have a speed from 100 to 500 miles an hour."

Numerous attempts have been made to construct a list of tornadoes and tornado losses in this country for a long period of years, but owing to the difficulty in obtaining data, and the general disregard of the difference between tornadoes and ordinary windstorms, many of the lists are without value. As will be seen by the table, the Pacific Coast has suffered least from tornadoes, while the Middle States stand first in the list of losses. The loss by hurricanes, not given in the tables, is greatest on the Gulf and South Atlantic coasts, though New England has felt the effects of these violent southern storms. Cyclones are most destructive along the upper Atlantic coast, and the valley of the St. Lawrence and the Great Lakes.

PROPERTY LOSS BY TORNADOES IN THE UNITED STATES, 1889-1898.

Loss of Life by Lightning in the United States.

For about eleven years statistics have been collected by the United States Weather Bureau, to show the relative number of fatalities from lightning. Most interesting results have followed from this work, and some remarkable facts have been noted. It is obvious that the number of fatalities from lightning must depend partly upon the frequency of lightning strokes per unit area, partly upon the density of population and partly upon the character of thunderstorms that traverse the region. In the United States thunderstorms occur with considerable frequency over all the territory east of the one hundredth meridian, save a narrow strip along the northern border. West of this meridian, except in the Rocky Mountain region, the frequency steadily diminishes until it reaches practically zero on the Pacific coast.

In the Gulf States the average number of deaths due to lightning per unit area is but one, though the average thunderstorm frequency is quite high. In the New England States, where the storm frequency is much lower, the average is two per unit area. Of course, this is directly dependent upon the density of population. The greatest mortality by lightning, considering both unit area and density of population, is in the Ohio Valley and Middle Atlantic States. If density of population only is considered, the greatest mortality is in the Upper Missouri Valley and the Rocky Mountain region. The very large mortality in the mountainous States of Colorado, Montana, Wyoming and the two Dakotas, emphasizes the necessity of persons residing in these States taking extraordinary precautions to avoid the danger of lightning strokes.

The modern city building, with its metallic roof and steel frame is a fairly good conductor of electricity, and the multiplication of telegraph, telephone and electric light wires also adds to the effectiveness of silent discharges in relieving the tension during a thunderstorm.

To avoid danger of lightning stroke, it is not judicious to stand near trees during thunderstorms, in the doorway of barns, close to cattle, near chimneys and fireplaces or near the terminus of a wire clothesline. Covering oneself up, or seeking the insulation of a feather bed does not seem to be of any use. Small articles of steel do not have the power to "attract" lightning, or to determine the path of the discharge.

The following statistics of loss of life by lightning are compiled from the special report of the United States Weather Bureau:

States and Territories by Districts.	Fatal cases in 5 years, 1896-1900.	In 1900. Rural population	In 1900. Total population.	Average deaths annually per unit area of 10,000 sq. m.	Rate per Million. Fatal.	Rate per Million. Injured.

Transcontinental Triangulation.

One of the most important works which the United States Coast and Geodetic Survey has recently completed is the measuring of an arc of the 39th parallel of latitude from the Atlantic to the Pacific Oceans. The work was under way for more than thirty years and cost more than half a million dollars. Its successful completion has placed the United States ahead of all other nations in its efforts for the advancement of the science of geodesy. It remains now for European scientists to complete the measurements by extending the system of transcontinental triangulation by measuring the parallel extending from Ireland to Poland. When this is finally done the exact shape of the earth can be determined, something about which scientists have been wondering for a great many years.

The measurement of an arc of latitude by transcontinental triangulation, however, would not in itself contain the data necessary to determine the true shape of the earth. In conjunction with the former work, just completed even more recently, the Eastern Oblique Arc of the United States, from Maine to Louisiana, has been taken. By this the dimensions of a spheroid, which corresponds most nearly with the existing geoid within the area covered by triangulation, may be determined. This work is unique in that it is the first which utilizes on a grand scale a measure oblique to the meridian.

The peculiar power of the Oblique Arc for determining the compression of the earth was pointed out by Tobias Mayer, but the first practical application of such an arc to geodesy was made by Bessel. This was before the introduction of telegraphic longitudes made it possible to utilize such an arc to its fullest extent.

The immediate object of the main triangulation was to secure uniformity and systematic treatment for with the astronomic and geodetic measures in the preparation of the geographic position of the trigonometric stations to be established for use of the Coast and Geodetic Survey work.

The long period of time occupied in the general work of transcontinental triangulation, nearly seventy years in all, does not mean continuous work on this alone, but was supplemented by all the other work of the department, which covers the entire coast pretty thoroughly.

United States Postal Rates and Regulations.

(Revised for American Almanac for 1903 by the New York Post Office.)

CLASSIFICATION OF DOMESTIC MAIL MATTER.

Domestic mail matter includes all matter deposited in the United States mails for transmission within the United States or passing between the United States and Porto Rico, Guam, the Philippines, Tutuila and Hawaii. (For special rates applying to Canada and Mexico, see below.)

Domestic mail matter is divided into four classes, as follows:

FIRST-CLASS MATTER.

Definition of First-Class Matter.—All written matter, including letters, postal cards, "post cards," or other matter, either wholly or partly in writing, whether sealed or unsealed, except manuscript copy accompanying proof sheets or corrected proof sheets of the same. All matter sealed or otherwise closed against inspection is also of the first class.

Note.—Typewriting is held to be the equivalent of handwriting and is classed as such, as is also carbon or letter press copies thereof.

Rates of Postage—Letters.—The rate of postage on letters, wholly or partly in writing, whether sealed or unsealed, or on any other matter closed against inspection, is two cents an ounce or fraction thereof; except on "drop letters," when the rate is one cent for each ounce or fraction thereof, when mailed at offices where free delivery by carriers is not established. The rate on "drop letters," when mailed at letter carrier post offices, is the same as on ordinary letters.

Regulation Postal Cards.—The postage on such cards is one cent each, which is paid by the stamp already printed on the cards, no other postage being necessary.

Folding or Double Postal Cards.—These cards consist of two attached cards, one of which may be detached by the receiver and used without further postage for reply. The original sender may write his name and address on the reply card and any message which he wishes the one originally addressed to fill in. The price of these cards is two cents.

Private Mailing Cards (Post Cards).—Private mailing cards bearing messages, either written or printed, may be transmitted by mail at the postage rate of one cent by conforming to the following conditions: 1. Each card must be an unfolded piece of cardboard, not exceeding 9 9-16x5 9-16 inches, and not less than 2 15-16x4⅛ inches in size. 2. The quality and weight must be substantially that of the Government postal card of like size. 3. They may be of any color which does not interfere with the legibility of the address and postmark. 4. Each card must bear the words "Post Card" at the top of the address side unobstructed by any other matter; said words to be placed thereon in conspicuous letters and in such manner as not to interfere with a perfectly distinct address and postmark. The address may be in writing, printing, or by means of a hand-stamp, or adhesive label of not more than ¾ of an inch by 2 inches in size, and the sender may, in the same manner, place his name and address on the back or the face of the card. The message may be in writing or in print. 5. Cards conforming to the foregoing conditions are transmissible in the domestic mails (including the island possessions), and to places in Cuba, Canada and Mexico, at the postage rate of 1 cent each, and in the mails of the Postal Union at the postage rate of 2 cents each, prepaid by stamps affixed. 6. Any card of foreign origin which, from its title in any language, appears to be a "Post Card" and conforms to the requirements of this order as to size, form, quality and weight, shall be admissible to the mails (domestic or international) when prepaid in United States postage stamps. 7. When post-cards are prepared by printers and stationers for sale, they should, in addition to conformity with the requirements of this order, also bear in the upper right-hand corner of the face an oblong diagram containing the words "Place postage stamp here," and across the bottom the words "This side for the address." 8. Advertisements and illustrations in any color may be printed upon either or both sides of a post-card, provided they do not, when placed upon the face thereof, interfere with a perfectly distinct address and postmark. 9. The words "Post Card" are authorized only on cards which conform to the conditions prescribed by this order; other cards bearing these words, or otherwise purporting to be issued under authority of the Act of May 19, 1898, are unmailable as "Post Cards," and, whether the message be written or printed, are subject to postage at the letter rate. 10. The privilege given by the Act is not intended to work a discontinuance of the Government postal cards. These will be issued and sold the same as heretofore; and in all correspondence will be designated "Postal Cards" to distinguish them from "Post Cards." 11. Cards issued under the order of November 18, 1899, and bearing the words "Private Mailing Card," will continue to be transmissible in the mails, as heretofore.

Notes.—Prepayment of amount in postage by stamps affixed is required except as follows: 1. First-class matter of not more than four pounds in weight will be dispatched to its destination if two cents in stamps be affixed and the residue of the postage will be collected of the addressee before delivery. 2. In the case of letters from soldiers, sailors and marines in the service of the United States, letters will be transmitted if marked "Soldier's letter," "Sailor's letter," or "Marine's letter," as the case may be, and the postage will be collected upon delivery from the addressee.

SECOND-CLASS MATTER.

Definition of Second-Class Matter.—All newspapers, magazines and other publications which are issued periodically, at stated intervals, at least as frequently as four times a year. Such publications must be numbered consecutively, must be issued from a known office of publication and must consist of printed paper sheets, without board, cloth, leather or other substantial binding. This class includes only such publications issued for the dissemination of information of public character or which are devoted to literature, science, art or some special industry. Circulars or any other publications issued primarily for the purpose of advertisement or which are circulated free or at nominal rates are excluded from this class.

Rates of Postage.—The rate of postage on second-class matter when sent by the publisher, and from the office of publication, or when sent from a news agency to actual subscribers, or to other news agents, is one cent a pound or fractional part thereof.

The free use of the mails is given when one copy only is sent to each actual subscriber residing in the county where same is printed, excepting when directed to letter-carrier offices.

The rate of postage on newspapers (excepting weeklies) and on periodicals not exceeding two ounces in weight, when deposited in a letter-carrier office by the publisher or by news-agents for delivery by carriers, is one cent each; on periodicals weighing more than two ounces, two cents each; when deposited for general or box delivery the rate is one cent a pound.

Newspapers and periodicals when deposited by other than publishers or news-agents are subject to postage at the rate of one cent for each four ounces or fraction thereof.

Postage on second-class matter must be prepaid, in money when sent at the pound rate, by stamps affixed when deposited for delivery by carriers or by others than the publishers or news-agents.

Sample copies are allowed the privileges of second-class matter. Publishers of matter of the second class may, without extra postage, fold within their regular issues a supplement which must be germane to the publication which it supplements.

THIRD-CLASS MATTER.

Definition of Third-Class Matter.—Books, almanacs, calendars, circulars, engravings, photographs, pamphlets and other matter wholly in print (and not included in second-class matter) are classified as third-class matter. "Printed matter" is defined as "the reproduction upon paper, by any process except that of hand or typewriting, or letter-press, or manifold copies thereof, of any words, letters, characters, figures, or images, or of any combination thereof, not having the character of an actual and personal correspondence."

Seeds, bulbs, roots, scions, plants and samples of wheat or other grain in its natural condition are mailable at the third-class rate of postage, but flour, rolled oats, pearled barley, or other cereals which can

Digitized by Google

only be used as articles of food are classified as fourth-class matter. Although seeds, bulbs, etc., are mailable at third-class rate of postage, they fall under the conditions imposed upon fourth-class matter.

The rate of postage on third-class matter is one cent for each two ounces or fractional part thereof sent to a single address.

Postage must be fully prepaid by means of stamps affixed.

No package, except single books, which weigh more than four pounds, will be admissible to the mails.

FOURTH-CLASS MATTER.

Definition of Fourth-Class Matter.—All mail matter not included in the first, second or third class and which is not liable to deface or otherwise damage the contents of the mail bag, or harm the person of any one engaged in the postal service, is held as fourth-class matter. No package is admitted as fourth-class matter weighing over four pounds. This class includes such things as artificial flowers, cards, blankbooks, samples of merchandise and other merchandise when properly wrapped and complying with conditions stated below. Poisons, inflammable articles, explosives, live animals or substances exhaling a foul odor will not be accepted as mailable matter.

The rate of postage on fourth-class matter is one cent an ounce or fraction thereof sent to a single address, to be prepaid by ordinary stamps affixed.

REGISTRATION OF MAIL MATTER.

All classes of mailable matter, including drop or local letters, may be registered at a cost of eight cents, in addition to the regular postage.

The sender of an article accepted for registration is entitled to a receipt at the time of its acceptance and is also entitled to a receipt signed by the person to whom delivery is made, which is returned to the sender. If the sender fails to receive the return receipt, by applying to the Fourth Assistant Postmaster-General the matter will be investigated with the view of recovering the lost article where possible, or its value, when the loss is due to culpable negligence on the part of postal officials. The amount collectible for such a loss is the value of the contents, up to twenty-five dollars.

FORWARDING MAIL MATTER.

The matter which can be forwarded to the addressee without additional charge of postage, is as follows: Letters prepaid at full rate of at least two cents, parcels prepaid at first-class rates, postal cards, "post cards," official matter, free county publications (within county), and matter from the Postal Union countries.

Any other matter than the above requires an additional postage at the same rate at which it was originally mailed, which postage must be prepaid, in order to be forwarded. For each time forwarded an additional postage must be paid.

In the case of matter forwarded free of charge, the direction may be changed and the matter forwarded as many times as is necessary to reach the addressee.

Matter which has been opened inadvertently upon delivery may be forwarded without additional charge of postage.

RETURNING UNCLAIMED MATTER.

When a letter is sent on which the postage is prepaid and the sender indorses his name and address upon the envelope, such letter when remaining unclaimed for any time which the writer may direct, up to thirty days, will be returned to him without additional charge of postage. The sender may, by a subsequent written direction to the postmaster at the office of destination, lengthen or shorten the time which the letter is to be held as originally named on the envelope. Double postal cards will be returned to the sender if undelivered. Unclaimed written single postal cards and "post cards" are sent to the Dead Letter office.

Application must be made to the postmaster at the post office where the article was mailed accompanied by a fac-simile of the address and money sufficient to pay for telegraphing to the post office of delivery.

All other mail matter, other than first class, may be returned, but is subject to an additional charge for postage, fully prepaid, for the return of same.

THE WITHDRAWAL OF MAIL MATTER.

After mail matter has been deposited, but not yet dispatched, it can be withdrawn by the writer or sender if he can show to the satisfaction of the postmaster that he is such. After matter has been dispatched from the office where mailed, its delivery may be prevented and its return secured, if the sender can properly identify the letter and can state reasons sufficient for its withdrawal at the office where mailed.

UNMAILABLE MATTER.

The following articles will be refused the use and privilege of the United States mails:

Matter insufficiently prepaid to entitle it to be forwarded. Incorrectly or illegibly directed matter. Any matter which, on account of its destructive or harmful nature, might do injury to other mail or postal employes. (See under fourth-class matter.) Any matter such as coin, jewelry or precious articles, which by special agreement with foreign countries are not allowed to be sent to those countries. Packages which exceed the weight limit of four pounds imposed upon third and fourth-class matter. Any scurrilous, indecent, threatening, or defamatory matter upon the outside of a letter or package, or upon a postal card will exclude it. Lottery matter or schemes which are intended to deceive or to defraud. Indecent or immoral matter in form of book, picture, printing or any other publication.

WRAPPING OF MAIL MATTER.

Second-Class Matter.—Newspapers must be dried and inclosed in proper wrappers, which can be easily removed without destroying them or injuring their inclosures.

Third-Class Matter must be placed under band, upon a roller, between boards, or in an unsealed envelope, or closed so as not to conceal the nature of the packet or its contents, or it may be so tied with a string as to be easily unfastened. Address cards and all printed matter in the form of an unfolded card may be mailed without band or envelope.

Fourth-Class Matter must be so wrapped that the contents may be easily and thoroughly examined by postmasters, both as to reference to the safety of the mails and postal employes, and to the exclusion of matter chargeable as of the first class.

Different Classes of Mail Matter in Same Package.—Whenever mail of different classes is inclosed in one package, the full contents of that package must be paid for at the rate which would apply if the entire contents were of the class on which the highest rate is payable. However, a blank or printed card may be placed in a package of third-class matter for reply without paying a higher rate of postage on the package, but no written address can be placed on such card.

FOREIGN MAIL MATTER.

Articles for or from foreign countries, except Canada, Mexico and Cuba, do not come under the United States classification of mail matter, but are designated as: 1. Letters. 2. Post cards. 3. Newspapers and other printed matter. 4. Commercial or business papers. 5. Samples of merchandise.

PROHIBITED ARTICLES—FOREIGN MAILS.

To Belgium.—1. Articles of miscellaneous merchandise not bona fide trade samples.

To France.—1. Tobacco in any form. 2. Samples of tea weighing more than 20 grains.

To Great Britain.—1. Packages of manufactured tobacco of any kind whatever, including cigars, cigarettes and snuff; all packages of unmanufactured tobacco exceeding four ounces. 2. Printed matter which relates to bets.

To Hungary.—1. Any article of clothing.

Digitized by Google

To Italy.—1. Living plants or vegetables. 2. Samples of tobacco. 3. Samples of silk in excess of 100 grams weight. 4. Correspondence relating to lotteries.

To Luxemburg.—1. Meats, in sealed boxes, and sausages.

To Mexico.—1. Articles other than letters in their usual and ordinary form which are wrapped so that their contents cannot be easily examined. 2. Merchandise other than bona fide trade samples, unless sent by Parcels Post. 3. Bank notes, drafts payable to bearer; money, jewelry, precious stones, subject to a fine of twenty per cent of the value of the articles.

To Russia.—1. Newspapers and other political publications, unless addressed to members of the reigning imperial family, ministers of the empire, or members of the diplomatic corps or subscribed for at Russian post. 2. Non-political publications, except those subscribed for at Russian post offices, or addressed to the Public Imperial Library, the Academy of Sciences, the higher educational establishments, or established book stores. 3. Books in the Russian language published elsewhere than in Russia, or prints, except periodical publications, in the Polish language. 4. Pasteboard drawing models. 5. Russian paper money.

To Spain.—1. Missals, breviaries and other liturgical books pertaining to the Catholic religion. 2. Samples of cloths, textile fabrics, felt and colored paper which measure more than 16 inches square, and which have not cuts at least 8 inches long across their width.

FOREIGN RATES OF POSTAGE.

Countries or Places of Destination.	Letters, per Half Ounce.	Post Cards		Registration Fee.	Printed Matter of All Kinds, per 2 ozs.	Commercial Papers, per 2 ozs.	Samples of Merchandise, per 2 ozs.
		Single, Each.	With Paid Reply, Each.				
All the countries and colonies of the Universal Postal Union, except Canada and Mexico	5c.	2c.	4c.	8c.	1c.	The same as for "Printed matter," except that the lowest charge on any package is 5 cents.	The same as for "Printed matter," except that the lowest charge on any package, whatever its weight, is 2 cents.
Canada.—See "Special Rates and Conditions" below.	U. S. Domestic Rates.	U. S. Domestic Rates.	U. S. Domestic Rates.	U. S. Domestic Rates.	U. S. Domestic Rates.		
Mexico.—See "Special Rates and Conditions" below.							
Cuba.—See "Special Rates and Conditions" below.							
At least one rate of postage of two cents must be prepaid on ordinary letters.							

The rates of the Universal Postal Union apply to the following countries, which are not in the Universal Postal Union:

Africa.—Abyssinia; Bechuanaland Protectorate, including Kange, Macloutsie, Molepolole, Palache, Shoshong and Tati River; Rhodesia, including Mashonaland, Matabeleland, British Nyasseland, Barotse, Lake Moero, Tanganyika and Upper Zambesi; Morocco, except European post offices in Niger Coast Protectorate, including Benin, Bonny, Brass, Calabar, Opobo and Warree or Forcados; West Coast (native possessions).

Asia.—Afghanistan; China; *Shanghai, U. S. Postal Agency at ——.

Oceania.—Friendly or Tonga Islands; Navigators' Islands or Samoa (except United States Island of Tutuila), Pitcairn Islands; Society Islands; other islands in the Southern Pacific Ocean.

*Articles of every kind which are admitted to the U. S. domestic mails are admitted to the mails exchanged between the United States and the United States Postal Agency at Shanghai, China; but such are subject to the following rates of postage, which must be prepaid in United States postage stamps on all articles except official correspondence in "penalty" envelopes:

First-class matter, 5c. per half oz. or fraction thereof; postal cards, single 2 cents, double 4 cents; second and third class matter and samples of merchandise not exceeding 12 ozs. in weight, 1 cent for each 2 ozs. or fraction thereof; fourth-class matter, 1 cent per oz. or fraction thereof.

Articles addressed to the following places in China, viz:

Cheefoo,	Foo-Chow,	Ichang,	Kinkiang,	Ningpo,	Shanghai,	Wenchow,	Yentai,
Chin Kiang,	Hankow,	Kaipling,	Nanking,	Ourga,	Taku,	Wuhu,	
Chung King,	Hung Chow,	Kalgan,	Newchwang,	Pekin,	Tien-Tsin,	Wuchang,	

are transmissible in the mails for the U. S. Postal Agency at Shanghai, but at places other than Shanghai additional charges for postage may be collected of the addressees upon the delivery of the articles.

CUSTOMS DUTIES.

Articles are not excluded from mails for foreign countries because they are liable to customs duties in the country to which they may be directed. However, it is the privilege of any country to exclude such articles. Customs duties cannot be prepaid by the senders of articles, but if delivered will be collected of the addressees.

Newspapers and other periodical publications received in the mails from abroad under the provisions of postal treaties or conventions, and packages addressed to foreign consuls in the United States which bear the official seal of the consul's government, are free from customs duty.

Dutiable books forwarded to the United States from foreign countries will be delivered to the addressee upon the payment of the duty levied thereon.

Whenever letters or packages the wrappers of which cannot be removed without destroying them are received in the United States from a foreign country, and the postmaster has reason to believe they contain dutiable articles, it is his duty to notify the addressee that such letter or package has been received and that he must appear at the post office and open such letter or package in the presence of an officer of the customs.

SPECIAL RATES AND RULINGS FOR CANADA, MEXICO AND CUBA.

CANADA.

Articles of every kind or nature which are admitted to the domestic mails of either country are admitted at the same postage rates and under the same conditions to the mails exchanged between the two countries; except that plants, seeds, etc., are subject to postage at the rate of one cent an ounce; that "commercial papers" and samples of merchandise are transmissible at the same rate and under the same conditions as would apply to them in mails to other foreign countries; and that articles other than letters in their usual and ordinary form are excluded from the mails unless they are so wrapped or enclosed as to permit their contents to be easily examined by postmasters or customs officers; and except also the following articles, the transmission of which is absolutely prohibited under any circumstances, viz:

All sealed packages, which, from their form and general appearance, evidently are not letters.

Publications which violate the copyright laws of the country of destination; packages (except single volumes of printed books and second-class matter) which exceed 4 pounds 6 ounces in weight; poisons, explosives or inflammable substances, live or dead (not dried) animals, insects (except bees) and reptiles, fruits and vegetables which quickly decompose, and substances which exhale a bad odor, lottery tickets or circulars, Police Gazettes, all obscene or immoral matter, and all articles which may destroy or damage the mails or injure the persons handling them.

All articles are required to be fully prepaid with postage stamps, except letters on which only one rate of postage has been fully prepaid, which must be stamped "T" and marked upon the cover with amount of postage due and dispatched.

Digitized by Google

Articles (except sealed packages which are not letters) mailed in either country which are likewise entitled to pass in the domestic mails of that country free of postage are also entitled to transmission free of postage to the other country.

Articles may be registered at the same charge and in the same manner as for domestic mail. However, if a "return receipt" is desired, the article must be indorsed on the outside with the words, "Return Receipt Demanded."

MEXICO.

Articles of every kind and nature which are admitted to the domestic mails of either country are admitted to the mails exchanged between the two countries, except as follows: 1. Articles of miscellaneous merchandise (fourth-class matter) not sent as bona fide trade samples are required to be sent by Parcels Post. 2 Commercial papers and bona fide trade samples are transmissible at the postage rate and subject to the conditions of the Postal Union mails. 3. See also under "Prohibited Articles—Foreign Mails."

All articles are required to be fully prepaid with postage stamps, except letters on which one full postage has been prepaid will be forwarded and the amount due collected upon delivery.

Articles (except sealed packages which are not letters) mailed in either country which are entitled to pass in the domestic mails free of postage are also entitled to be transmitted free of postage to the other country. Articles may be registered upon the payment of the domestic rate, but if a "return receipt" is desired they must be indorsed with the words, "Return Receipt Demanded."

CUBA.

All mail matter passing between the United States and Cuba is subject to the domestic classification, conditions and rates of postage.

Railroad Distances and Time of Mail Transit.

(Prepared expressly for The American Almanac by A. P. Johnston, of the Southern Railway Company.)

The following table of railroad distances and time of mail transit between the larger cities of the United States, gives the number of miles by railroad, compiled from schedules showing the actual running distance of the average trains, and the time taken in transit. As New York, Chicago and San Francisco are the three principal objective points in the United States, the distances have been computed from these places, but by simple calculations one can readily determine the approximate distance between any other cities.

The time of mail transit gives the actual time it takes from city to city on mail trains, but does not take into consideration the time consumed by the post offices. This can be almost eliminated in the case of the larger cities, where mail trains are frequent, and so one can easily determine how long it will take for a letter mailed in New York to reach Chicago.

Both tables are computed for the shortest practicable routes.

To—	New York.			Chicago.			San Francisco.

How to Procure a Patent.

(Revised for The American Almanac by the United States Patent Office.)

Any person who has discovered or invented any new or useful art, any machine or manufacture, or any new and useful improvement upon a prior invention is entitled to a patent. Of course, it is specified that this invention or discovery shall not have been patented or described in any publication in the United States, or elsewhere, and that it shall have been unknown to others in this country for more than two years before the date of the application. If the invention is proved to have been abandoned, however, the fact of prior existence does not prevent the issuance of the patent, while the positive proof of an invention or production of any new ornamental and original design for manufacture or other valuable discovery, entitles the inventor to receive patent protection, upon the payment of the requisite fees, after due procedure in accordance with the law.

The application for a patent must be made in writing to the Commissioner of Patents, at Washington, D. C., and, at the same time, the applicant must deposit with the Patent Office a written description of his invention or discovery in which he must set forth clearly, concisely and fully, the manner and process of making, constructing, compounding, and using the new discovery. In the case of a machine, its principle must not only be explained, but the inventor must demonstrate how he intends to apply that principle in order to distinguish it from other inventions, and he must be particular to point out each and every part, improvement or combination which makes this invention different from those that may already have been patented. These specifications and claims must be signed before two attesting witnesses, and the applicant must make oath that he believes himself to be the inventor or discoverer of some art, machine, or composition of matter that has hitherto been unknown and unused. He must also make oath that the invention has not been patented to himself or others, within his knowledge, anywhere in the world for more than two years prior to his application, or that an application for a patent has not been filed in any foreign country by himself, or by others with his consent, more than seven months prior to this application in this country. If, by chance, application for patent has been filed in some other country, the inventor must state the countries in which the application has been filed, giving the date of application, and must specify that the discovery has been unknown and unused in the United States.

The receipt of letters patent from a foreign government will not prevent the inventor from obtaining a patent in the United States unless the article on which the foreign patent was granted had been in use seven months prior to the application in this country, in which case no patent shall be granted in this country.

If the applicant is a citizen of this country the oath may be taken before any person authorized by law to administer such oaths, but if the applicant is a resident of a foreign country the oath may be administered before a minister, charge d'affaires, consul or commercial agent who holds a commission under the Government of the United States or before some public notary who is authorized to administer oaths by the nation of which the inventor is a resident.

When this preliminary step has been taken, and the fees required by law have been paid, an examination of the invention will be made by the Patent Office, and, if it is shown that the applicant is entitled to patent protection, such a patent will be issued by the Commissioner.

Patents, as well as all interest therein, are assignable in law, and the patentee or his legal representatives are entitled to dispose of exclusive rights under such patent for any specified part of the country. Each patent is granted to the patentee, his heirs or assigns, for the term of seventeen years, and during this period he possesses the exclusive right to make, use, or dispose, of the invention or discovery in all parts of the United States. Joint inventors are entitled to joint patent, but neither can claim one separately. Inventors who discover and invent, independently, improvements on the same machine are not entitled to a joint patent for such independent inventions, but when one person furnishes the capital which enables another person to complete an invention they are entitled to protection as joint patentees.

If an application for foreign patent has been filed more than seven months prior to the application for patent in the United States protection in this country will be denied, but if it appears that an inventor believes himself to be the sole discoverer of his invention at the time of his application for a patent, the fact that his invention, or any part of it, had been known or used in some foreign country before his application was filed will not prevent the issuance of patent protection by the United States.

If by reason of a defective or insufficient specification, or on account of the patentee claiming more than he had any right to claim as his own invention, the patent had become inoperative or void, a reissue may be granted, unless it is shown that the error was not the result of accident or mistake, but was made with fraudulent and deceptive intent. In cases of reissue the applications must again be sworn to by the inventors, if living.

If any citizen of the United States is satisfied that he has made a new invention or discovery, and yet desires to have further time in which to perfect his work, he may file a caveat in the Patent Office, as the result of which he may obtain protection for his labor for the term of one year. Caveats may also be renewed to the extent of one year, and during the two years the papers will be filed in the confidential archives of the Patent Office, where they will be preserved in secrecy. The original application, however, must contain all possible specifications and facts setting forth the distinguishing characteristics and purpose of the new discovery. When possible, drawings showing the application of the invention or improvement should be provided. The cost of caveat protection is $10.00 for the first year, and the same amount in cases of renewal.

The other fees, all of which must be paid in advance, are as follows:

For each original application for a patent, $15.00; for each original patent issued, $20.00; in design cases: for three years and six months, $10.00; seven years, $15.00; fourteen years, $30.00; for each application for the reissue of a patent, $30.00; filing each disclaimer, $10.00. Certified copies of patents and other material in manuscript will be furnished by the Patent Office on the payment of ten cents per 100 words and twenty-five cents for the certificate; for certified copies of printed patents eighty cents, but uncertified printed copies of any specifications or drawings will be provided at the cost of a few cents. The office is also prepared to furnish photographic copies of any drawing, foreign or domestic, in the possession of the department, at prices ranging from fifteen to twenty-five cents in accordance to the size of the photograph. If patents are assigned each assignment must be recorded; if 300 words or under, $1.00; if less than 1,000 words, $2.00; if more than 1,000 words, $5.00. The payment of these fees must be made in cash or by money order.

How to Secure Copyright Registration.

The following rules for copyright procedure have been approved by the Librarian of Congress for The American Almanac for 1903:

There are three classes of people who are entitled to copyright protection under the laws of the United States: (1) the author of any literary, musical, dramatic or artistic work, who is a citizen of the United States; or, (2) a subject of a foreign country to whose citizens the privilege of copyright in the United States has been extended, and (3) any person to whom an author entitled as above to copyright protection for his works has assigned his copyright rights, in which case the registration is entered for the "proprietor." Of course editors, translators, dramatizers and compilers have equal rights under the law, but they are regarded as "authors."

In making application for copyright protection the first step to be taken is to transmit to the Librarian of Congress a printed copy of the title of the book or other article for which such protection is desired. The application blanks, which must be signed before registration can be made, are furnished, free of charge, by the Librarian upon written request. In sending the title of the book, or other article, however, it must be remembered that the law distinctly stipulates that printed titles only may be accepted, and while it is permissible to typewrite the title in its proper place on the blank furnished by the Librarian of Congress, such titles are accepted only at the risk of the sender and printed titles are always preferable.

If a musical composition is to be copyrighted the printed title page of the music should be sent, but the transmission of a typewritten title applies to this case as it does to that of the literary composition. Songs without music are not copyrightable as musical compositions, but as "books."

If a painting, drawing, statue or a model or design for any work of the fine arts is to be copyrighted a full description of it must be filed with the title, if there be one, as well as a photograph taken directly from the work of art itself.

It is absolutely necessary that the titles or descriptions for record should be sent before any copies of the articles which they are to protect have been distributed, for the law states explicitly that such titles must be deposited in the mail within the United States, addressed to the Librarian of Congress, at Washington, D. C., on or before the day of publication in this or any other country.

In the case of works published in parts or volumes the title of each part must be entered as if it was an independent work, while newspapers, magazines or other periodical publications must record the title of each number distinguished by its proper volume, number, and date. The same rule applies in the case of engravings, photographs or other works of art published with variations, or music in different arrangements. In each instance each case, or other characteristic of difference must be entered with its distinguishing mark clearly differentiated.

The second step in securing copyright entry is the act of depositing two copies of the article for which title has been recorded in the mail within the United States, not later than the day of publication in this or any other country. If it is a book, map, dramatic or musical composition, two copies of the composition itself are necessary. If it is a painting, drawing, statue or model for a work of the fine arts a photograph of the original work complies with the requirements of the law. In every case, however, the final deposit must be in addition to the printed title. Sending two copies of a book or other articles is not sufficient. The law stipulates that a title and two copies must be sent, and the only exception is in the case where three complete copies are sent, each copy bearing the printed title in its entirety.

The two copies which are deposited must be complete copies of the best edition issued, and for each new edition a deposit of one copy must be made. When a book is published serially in a periodical, two copies of each number of the magazine containing it must be deposited, and if afterward it is published in book form two copies of this volume must also be deposited. If these deposits are not made a penalty of $25.00 is incurred.

In the case of dramatic compositions it has been the practice of the Copyright Office to accept two typewritten copies of the drama, but the courts have recently decided that such typewritten copies do not comply with the law, and, under these circumstances printed copies only should be filed. For the same reason manuscripts, original drawings, paintings, statuary, etc., are not accepted as copyrightable. The general title of a newspaper, or periodical, apart from the contents, is not entitled to protection under the copyright law. In the case of periodical publications, however, application for entry may be made in advance by sending the printed title heading with the proper variations as to volume, number and date in advance of a number of issues, and the completion of the entry may be made by the deposit of two copies of the periodical on its day of publication. Owing to the difficulty of insuring the receipt of these copies by the Librarian of Congress "on or before the day of publication," as required by law, the publisher may obtain a receipt from the Postmaster in his city, or town, showing in case of need, that the necessary copies were mailed within the limit of time specified.

The third and last step necessary to secure a valid copyright is the printing of a copyright notice on each copy of the article protected, for if such notice does not appear upon every copy produced, infringement of the copyright cannot be prosecuted. The wording of the notice is determined by the copyright statute and must be one of these two forms:

a. **Entered according to Act of Congress, in the year.....,**
(Here insert date.)

by....., in the Office of the Librarian of Congress,
(Here insert full name of claimant.)

at Washington; or,

b. **Copyright,....., by.....**
(Here insert the year.) (Here insert full name of claimant.)

A penalty of $100.00 is imposed upon any person who shall insert the notice of copyright, or words of the same purport, upon any book or article which has not been copyrighted, whether such article be subject to copyright or not; or who shall knowingly issue or sell any article bearing such notice which has not been copyrighted, or who shall import any book or article bearing the notice of copyright when the requirements of the law have not been complied with.

The copyright fees, as prescribed by law, are as follows:

For recording the title of a book, or other article, the production of a citizen or resident of the United States, fifty cents; for a certificate of copyright, as evidence of the entry of the title, fifty cents; for recording the title of a book or other article, the production of a person not a citizen or resident of the United States, $1.00, and this fee is required to be paid whether the applicant for protection be the author who is not a citizen, or the proprietor who may be a citizen of the United States. In this case, also, a fifty cent fee is charged for certificate. For every copy under seal of the record of entry of any title, fifty cents; for a certified receipt for the deposit of the two copies required by law, fifty cents; for recording and certifying any instrument of writing for the assignment of a copyright, $1.00; for each copy of such assignment, $1.00.

All remittances should be made by money or express order, and, while currency will be accepted, postage stamps must not be sent as fees.

The term of copyright is for twenty-eight years, but, within six months before the expiration of that period, the author, or, if he be not living, his widow or his children may have the copyright extended for a further term of fourteen years, but this renewal requires the filing of the title a second time, the deposit of the two copies and the payment of the regulation fees. In addition to this the certificate of extension of copyright must be published, for four weeks, in one or more newspapers printed in the United States, and this publication must take place within two months from the date of the renewal of copyright.

Copyrights are assignable in law by any instrument of writing in which the name of the assignee and assignor and the title of the book or article assigned appears. It should also contain a statement of "valuable consideration" and must be recorded in the copyright office within sixty days after its execution, "in default of which it shall be void as against any subsequent purchaser or mortgagee for a valuable consideration, without notice."

Copyright cannot be obtained for the same book or article under different titles, for ideas, methods, schemes and systems, for blank books or books, like score cards, in which blank spaces have been left to be filled in later, advertising novelties or devices, coats of arms, coined words or names, coupon systems, engravings or manufactured articles or cuts for advertisements, games, letter heads, names of companies or corporations, or products or substances, stage scenery or titles, as such, are among some of the many things for which copyright protection is denied.

International Copyright Protection.

By an act of Congress which went into effect on July 1, 1891, the United States Government removed the limitation of the privilege of copyright to citizens of the United States, thus making it possible for foreign authors to obtain protection in this country upon the same terms as native authors, except that they are required to pay a double fee. At the same time Congress stipulated that this copyright protection should only apply to a citizen of a foreign state or nation when such foreign state or nation permitted citizens of the United States to enjoy the benefits of copyright on substantially the same basis as its own subjects, or when such foreign state or nation should become a party to an international agreement providing for reciprocity in the granting of copyyright. Under the operation of this amendment of the copyright law, therefore, the privileges of copyright in the United States have been extended, by Presidential proclamation, to the authors of Belgium, Chili, Costa Rica, Denmark, France, Germany, Great Britain and her possessions (Australia, Canada, India, etc.), Italy, Mexico, Netherlands, Portugal, Spain and Switzerland, and, as the result, the artists, composers and authors of these nations are now entitled to receive copyright protection from the United States, and American authors and makers of works of art may demand the same privilege for their production under the laws of the other countries.

How to Protect a Trade Mark.

(Revised for the American Almanac by the United States Patent Office.)

The following rules for trade mark procedure have been approved by the Commissioner of Patents for the American Almanac for 1903.

A trade mark may be registered by any person, firm, or corporation domiciled in the United States or located in any foreign country which, by treaty, convention, or law, affords similar privileges to citizens of the United States, and who is entitled to the exclusive use of any trade mark and uses the same in commerce with foreign nations, or with Indian tribes. Also, by any citizen or resident of this country desiring the protection of his trade mark in any foreign country the laws of which require that registration in the United States shall be a prior condition to registration in that country.

Application for the registration of a trade mark must be made to the Commissioner of Patents and must be signed by the applicant. Accompanying this application, which should be in the form of a brief letter of advice requesting registration, there must be a statement or specification which must give the name, domicile, location and citizenship of the party applying; the class of merchandise, and a particular description of goods comprised in the class to which the particular trade mark has been appropriated, as well as a clear statement of discrimination between the essential and non-essential features of the trade mark. If the applicant be a corporation it must be specified under the laws of what State or nation it was incorporated.

(2.) There must also be a declaration or oath to the effect that the applicant has at the time a right to the use of the trade mark and that no other person, firm, or corporation has the right to use it, and that the description and facsimile presented for registry are a true representation of the trade mark sought to be registered.

(3.) There must be a drawing made with India ink alone, on pure white paper, the thickness of three sheets of Bristol board and containing a calendared and smooth surface. All drawings must be made with pen only and every line and letter, signature and shading, must be absolutely black. The size of the sheet must be exactly 10x15 inches, and there must be an inch margin on each side, leaving the "sight" exactly 8x13 inches. When the view is longer than the width of the sheet it may be turned on its side, while the signature of the proprietor of the trade mark must be placed at the lower right hand corner and the signature of the witnesses at the lower left hand corner, but, in no instance, shall they encroach upon the drawing. Drawings must be rolled for transmission to the Patent Office—not folded.

(4.) The letter of advice, statement and oath must be written in the English language and on one side of the paper only.

(5.) A fee of twenty-five dollars must be enclosed.

All applications for registration are carefully considered by the trade mark examiner and if, for any reason, the application is refused, the applicant will be notified, and the reasons for refusal will be given. During this examination all matters pertaining to the application are preserved in secrecy, but, if the application is granted, all papers and drawings are then filed in the Patent Office.

Certificates of registry remain in force for thirty years from date, except in cases where the trade mark is claimed for and applied to articles not manufactured in this country and upon which it receives protection under the laws of a foreign country for a shorter period, in which case it ceases to have force in this country when it ceases to be exclusive property elsewhere. Under other conditions a patent may be renewed for thirty years additional on the same terms by an application at any time during the six months prior to the expiration of the original registry.

A trade mark is assignable by an instrument in writing providing it is recorded in the Patent Office, for which a fee of $1 to $3 is charged.

The governments with which conventions for the reciprocal registration and protection of trade marks have been entered into by the United States are: Austria-Hungary, Belgium, Brazil, Denmark, France, Germany, Great Britain, Italy, Japan, Netherlands, Russia, Servia, Spain and Switzerland.

Customs Duties of the United States.

(Abridged from the United States Tariff Act of 1897.)

Albums, photograph, scrap and autograph, 35 p. c. ad val.
Alcohol, amylic, 1-4c. per lb.
Alcohol, medicinal preparations, 55c. per lb., or not less than 25 p. c. ad val.
Animals, for breeding purposes, free.
Apparel, wearing, 50 p. c. ad val., to 44c. per lb. and 60 p. c. ad val.
Apparel, theatrical, free, under certain conditions specified by the Secretary of the Treasury.
Arms, muskets, muzzle-loading shotguns, rifles, etc., 35 p. c. ad val.
Barley, bushels of 48 lbs., 30c. per bushel.
Beads, 35 p. c. ad val.
Beef, mutton, pork, 2c. per lb.
Beer and ale not in bottles, 20c. per gal.
Beers, porter and ales in bottles, 40c. per gal.
Binding, cotton, 45 p. c. ad val.
Binding, silk, 50 p. c. ad val.
Binding, wool, 60c. per lb. and 50 p. c. ad val.
Birds and land and water fowl, free.
Birds, stuffed, not suitable for millinery, free.
Birds, skins and feathers not dressed or colored, 15 p. c. ad val. When dressed, colored, or otherwise manufactured, 50 p. c. ad val.
Blankets, from 22c. p. lb. and 30 p. c. ad val. to 33c. p. lb. and 35 p. c. ad val.
Bond Paper, from 2c. p. lb. and 10 p. c. ad val. to 31-2c. p. lb. and 15 p. c. ad val. When ruled, bordered, decorated or printed, 10 p. c. ad val. additional.
Bonnets, Hats or Hoods for male or female wear, from $2 to $7 p. doz. and 20 p. c. ad val.
Bonnets, Hats or Hoods composed of straw, 35 p. c. ad val. When trimmed, 50 p. c. ad val.
Bonnet or Hat Pins not classified as jewelry, 35 p. c. ad val.
Books, maps, charts, etc., 25 p. c. ad val.
Books, when printed more than 20 years, free.
Books, printed in other languages than English, free.
Botanical specimens, when not for sale, free.
Bottles, toilet, 45 or 60 p. c. ad val.
Bronzes, Manufactures of, 45 p. c. ad val.
Butter and substitutes, 6c. p. lb.
Buttons, collar and cuff, 50 p. c. ad val.
Cameos, unset, 10 p. c. ad val.
Cameos, set or in frames, 60 p. c. ad val.
Candy, from 4c. p. lb. and 15 p. c. ad val. to 50 p. c. ad val.
Caps. See bonnets.
Carpets, treble ingrain, 22c. p. sq. yard and 40 p. c. ad val.
Carpets, two-ply, 18c. p. sq. yd. and 40 p. c. ad val.
Carpets, Axminster, Wilton, velvet, 60c. p. sq. yd. and 40 p. c. ad val.
Carpets, Brussels tapestry, 28c. p. sq. yd. and 40 p. c. ad val.
Carpets, druggets, 22c. p. sq. yd. and 40 p. c. ad val.
Carving Knives and Forks, not less than 45 p. c. ad val.
Cattle, less than one year old, $2 p. head.
Cattle, more than one year old, $3.75 p. head or 27 1-2 p. c. ad val.
Cheese, 6c. p. lb.
Chinaware, decorated, 60 p. c. ad val.
Cigars and Cigarettes, $4.50 p. lb. and 25 p. c. ad val., with internal revenue tax.
Clocks, 40 p. c. ad val.
Clothing. See apparel.
Coal, anthracite, free.
Coal, bituminous, 67c. p. ton.
Coffee, free.
Copper, manufactures of, 45 p. c. ad val.
Coral manufactures of, 50 to 60 p. c. ad val.
Cosmetics, 50 p. c. ad val.
Cotton Handkerchiefs, plain or hemstitched, 45 p. c. ad val.
Cotton Handkerchiefs, hemstitched, 55 p. c. ad val.
Cotton Handkerchiefs, embroidered, 60 p. c. ad val.
Cotton Hose, 30 p. c. ad val.
Cotton Laces, 60 p. c. ad val.
Cotton Clothing, ready made, 50 p. c. ad val.
Crayons, 30 p. c. ad val.

How to Meet the Customs Officer.

(From suggestions furnished by the Treasury Department.)

Residents of the United States returning from abroad will be met at Quarantine by a Government official to whom they will make a declaration under oath, stating the number of trunks in their possession, their dutiable contents, etc. If all people were honest this formality would be sufficient, but under existing conditions it is necessary to examine the contents of these trunks and packages at the pier. Those who heed the following suggestions, however, will make their annoyance as slight as possible:

(1) Prepare a detailed list of all articles purchased, or otherwise obtained, abroad, as well as the prices paid therefor, or the value thereof, specifying separately articles of wearing apparel, personal adornment, toilet, and other personal effects, all of which will be appraised at the market price in the country where purchased. (2) If possible, keep the original receipted bills for purchases of any importance where they may be easily referred to at the time of appraisement. (3) In packing trunks place all articles purchased abroad in such a position that they may easily be found and exhibited for appraisement.

Any personal effects taken abroad as baggage and brought back in the same condition will be admitted free; but if improved in condition they are dutiable. From the aggregate value of all articles purchased abroad (unless they are intended for other persons or for sale) goods to the value of $100 will be deducted, for that amount of personal property is admitted free of duty.

Persons who have been abroad for the purposes of study, restoration of health, or for other specific objects, and have had a fixed foreign abode for one year or more, are considered non-residents within the meaning of this exemption. Persons who have been abroad for two years or more, but not for the reasons above, and who have had during that time a fixed place of abode for one year or more, will be also considered as non-residents within the meaning of this law. The distinction is this: Non-residents are permitted to bring all wearing apparel and other articles in actual use that are appropriate to the journey without regard to value, but are entitled to no exemptions on new and unused wearing apparel or other articles, while residents are entitled to an exemption of $100 on appropriate articles, whether in use or not.

A failure to declare any dutiable goods renders the same liable to seizure and confiscation, and yourself to the full penalties of the law.

The law expressly forbids the importation into the United States of garments made in whole or in part of the skins of prohibited fur seals, unless the owner is able to establish by competent evidence and to the satisfaction of the collector either that the garment was purchased prior to December 29, 1897, or that the animal was taken elsewhere than in prohibited waters. Residents who desire to take sealskin garments abroad should have the same registered with the collector. A failure to do this will cause no end of annoyance and is likely to result in the confiscation and destruction of the garment.

Upon the request of any lady for a private examination of her baggage, the same will be granted, provided the steamship company has provided a suitable place therefor.

Government officers are forbidden by law to accept anything but currency in payment of duties, but if requested will retain baggage for twenty-four hours to enable the owner to secure the currency. In case passengers are dissatisfied with the value placed upon dutiable articles, application may be made to the collector in writing, within two days, and the appraisement will be reviewed by a General Appraiser.

Baggage intended for an interior port will be forwarded thereto upon application and without examination at the port of arrival. Any baggage or personal effects in transit through the United States to any foreign country will, on application, be forwarded to port of departure.

No customs official or employe is allowed to accept gratuities or "tips" of any kind under penalty of prompt dismissal.

Rules Governing the Granting of Passports in the United States.

(Prepared by the Department of State.)

1. By Whom Issued.—No one but the Secretary of State may grant and issue passports in the United States.—Revised Statutes, secs. 4075, 4078.

A citizen of the United States desiring to procure a passport while he is temporarily abroad should apply to the diplomatic representative of the United States in the country where he happens to be; or, in the absence of a diplomatic representative to the consul-general of the United States; or, in the absence of both, to the consul of the United States. The necessary statement may be made before the nearest consular officer of the United States.

2. To Citizens Only.—The law forbids the granting of a passport to any person who is not a citizen of the United States.—Revised Statutes, sec. 4076.

A person who has only made the declaration of intention to become a citizen of the United States cannot receive a passport.

3. Applications.—A citizen of the United States in this country in order to procure a passport must make a written application, in the form of an affidavit, to the Secretary of State.

The affidavit must be attested by an officer authorized to administer oaths, and if he has an official seal it must be affixed. If he has no seal, his official character must be authenticated by certificate of the proper legal officer.

If the applicant signs by mark, two attesting witnesses to his signature are required.

The applicant is required to state the date and place of his birth, his occupation, and the place of his permanent residence, and to declare that he goes abroad for temporary sojourn and intends to return to the United States with the purpose of residing and performing the duties of citizenship therein.

The applicant must take the oath of allegiance to the Government of the United States.

The application must be accompanied by a description of the person applying, and should state the following particulars, viz.: Age, —— years; stature, —— feet —— inches (English measure); forehead, ——; eyes, ——; nose, ——; mouth, ——; chin, ——; hair, ——; complexion, ——; face, ——.

The application must be accompanied by a certificate from at least one credible witness that the applicant is the person he represents himself to be, and that the facts stated in the affidavit are true to the best of the witness's knowledge and belief.

4. Native Citizens.—An application containing the information indicated by rule 3 will be sufficient evidence in the case of native citizens.

5. A Person Born Abroad Whose Father Was a Native of the United States.—In addition to the statements required by rule 3, his application must show that his father was born in the United States, has resided therein and was a citizen at the time of the applicant's birth. The Department may require that this affidavit be supported by that of one other citizen acquainted with the facts.

6. Naturalized Citizens.—In addition to the statements required by rule 3, a naturalized citizen must transmit his certificate of naturalization, or a duly certified copy of the court record thereof, with his application. It will be returned to him after inspection. He must state in his affidavit when and from what part he emigrated to this country, what ship he sailed in, where he has lived since his arrival in the United States, when and before what court he was naturalized, and that he is the identical person described in the certificate of naturalization. The signature of the application should conform in orthography to the applicant's name as written in the naturalization paper, which the Department follows.

7. The Wife or Widow of a Naturalized Citizen.—In addition to the statement required by rule 3, she must transmit for inspection her husband's naturalization certificate, must state that she is the wife or widow of the person described therein, and must set forth the facts of his emigration, naturalization, and residence, as required in the rule governing the application of a naturalized citizen.

8. The Child of a Naturalized Citizen Claiming Citizenship Through the Naturalization of the Father.—In addition to the statements required by rule 3, the applicant must state that he or she is the son or daughter, as the case may be, of the person described in the naturalization certificate, which must be submitted for inspection, and must set forth the facts of his emigration, naturalization, and residence, as required in the rule governing the application of a naturalized citizen.

9. Expiration of Passport.—A passport expires two years from the date of its issuance. A new one will be issued upon a new application, and if the applicant be a naturalized citizen, the old passport will be accepted in lieu of a naturalized certificate, if the application upon which it was issued is found to contain sufficient information as to the emigration, residence, and naturalization of the applicant.

10. Wife, Minor Children and Servants.—When an applicant is accompanied by his wife, minor children, or servant, being an American citizen, it will be sufficient to state the fact, giving the respective ages of the children and the citizenship of the servant, when one passport will suffice for all. For any other person in the party a separate passport will be required. A woman's passport may include her minor children and servant under the above-named conditions.

11. Professional Titles.—They will not be inserted in passports.

12. Fee.—By act of Congress approved March 23, 1888, a fee of one dollar is required to be collected for every citizen's passport. That amount in currency or postal money order should accompany each application. Orders should be payable to the Disbursing Clerk of the Department of State. Drafts or checks will not be received.

13. Blank Forms of Application.—They will be furnished by the Department to persons who desire to apply for passports upon their stating whether they are native or naturalized citizens or claim through the naturalization of husband or father. Forms are not furnished, except as samples, to those who make a business of procuring passports.

14 Rejection of Application.—The Secretary of State may refuse to issue a passport to any one who, he has reason to believe, desires it for an unlawful or improper purpose, or who is unable or unwilling to comply with the rules.

Passport Regulations of Foreign Countries.

The following summary, which contains both the passport regulations of foreign countries and the laws relating to the return of naturalized American citizens to their native land, was specially prepared for The American Almanac from information furnished by the Department of State.

AUSTRIA-HUNGARY.

A former subject now a naturalized citizen of the United States is treated upon his return as a citizen of the United States. If he violated any criminal laws before the date of emigration he remains liable to trial and punishment, unless the right to punish has been lost by lapse of time as provided by law. A naturalized American citizen formerly a subject of Austria-Hungary may be arrested and punished under the military laws (1) if he was accepted and enrolled as a recruit in the army before the date of emigration, although he had not been put in service; (2) if he was a soldier when he emigrated, either in active service or on leave of absence; (3) if he was summoned before his emigration to serve in the reserve or militia, and failed to obey the call; (4) if he emigrated after war had broken out. A naturalized American citizen of Austro-Hungarian origin on arriving in that country should at once show his passport to the proper authorities, and if it is found that his name is on the military rolls, he should request that it be struck off, calling attention to the treaty of September 20, 1870, between this country and Austria-Hungary. The laws require every stranger to declare a passport. They do not ordinarily require to be vised or indorsed.

BELGIUM.

Under the terms of the convention between the United States and Belgium, a Belgian naturalized as a citizen of the United States is considered as a citizen of the United States, but upon return to Belgium he may be prosecuted for crime or misdemeanor committed before naturalization, saving such limitations as are established by law. A naturalized American formerly a Belgian, who has resided five years in this country, cannot be held to military service in Belgium, or to incidental obligation resulting therefrom, in the event of his return, except in cases of desertion from organized or embodied military or naval service. Passports are not usually required.

DENMARK.

When one whose name has been, or should have been, entered on the conscription lists emigrates without reporting his intended departure to the local authorities he is liable to a fine of from 25 to 100 kroner. A person

Digitized by Google

above the age of twenty-two years entered for military service must obtain a permit from the Minister of Justice to emigrate. Non-compliance with this regulation is punishable by a fine of from 20 to 200 kroner. The treaty of naturalization between the United States and Denmark provides that a former subject of Denmark naturalized in the United States shall, upon his return to Denmark, be treated as a citizen of the United States; but he is not thereby exempt from penalties for offences committed against Danish law before his emigration. A naturalized American, formerly a Danish subject, is not liable to perform military service on his return to Denmark, unless at the time of emigration he was in the army and deserted, or, being twenty-one years old at least, had been enrolled for duty and notified to report and failed to do so. He is not liable for service which he was not actually called upon to perform. Passports are not required to secure admission to Denmark.

FRANCE.

There is no naturalization treaty between the United States and France. If released from all military obligations in France, or if the authorization of the French Government was obtained beforehand, naturalization of a former French citizen in the United States is accepted by the French Government; but a Frenchman naturalized abroad without the consent of his Government, and who at the time of his naturalization was still subject to military service in the active army, or the reserve, is held to be amenable to the French military laws. Long absence from France and old age do not prevent this action. A Frenchman naturalized abroad, after having passed the age of service in the active army and the reserve, nevertheless continues on the military list until he has had his name struck from the rolls, which may usually be done by his sending his naturalization certificate through the United States Embassy to the proper French authorities. The French Government rarely gives consent to a Frenchman of military age to throw off his allegiance. Application on the subject may, however, be addressed to the Minister of Justice at Paris, accompanied by a full statement of the particulars and a fee of 675 francs. If the request is granted the name of the person concerned is erased from the military list and he may return.

GERMANY.

A German who emigrates before he is seventeen years old, or before he has been actually called upon to appear before the military authorities, may, after a residence in the United States of five years and after due naturalization, return to Germany on a visit, but his right to remain in his former home is denied by Germany, and he may be expelled after a brief sojourn on the ground that he left Germany merely to evade military service. A person who has completed his military service and has reached his thirty-first year and become an American citizen may safely return to Germany. But a naturalized American of German birth is liable to trial and punishment upon return to Germany for an offence against German civil or military law committed before emigration, saving always the limitations of the laws of Germany. He may, however, petition the sovereign of his native state for relief, but the United States Government cannot act as intermediary.

ALSACE-LORRAINE AND WURTEMBERG.

Alsace-Lorraine having become a part of Germany since our naturalization treaties with the other German States were negotiated, American citizens, natives of that province, under existing circumstances, may be subjected to inconvenience and possible detention by the German authorities if they return without having sought and obtained permission to do so from the Imperial Governor at Strassburg.

The authorities of Wurtemberg require that the evidence of the American citizenship of a former subject of Wurtemberg which is furnished by a passport shall be supplemented by a duly authenticated certificate showing five years' residence in the United States.

GREECE.

There is no treaty on the subject of naturalized citizens between the United States and Greece. The Greek Government does not, as a general statement, recognize a change of nationality on the part of a former Greek without the consent of the King, and a former Greek who has not completed his military service and who is not exempt therefrom under the military code may be arrested upon his return to Greece. The practice of the Greek Government is not, however, uniform, but American citizens of Greek origin are advised to find out before returning what status they may expect to enjoy. Information should be sought directly from the Greek Government.

ITALY.

There is no treaty between the United States and Italy defining the status of former Italian subjects who have become American citizens. Naturalization of an Italian subject in a foreign country without consent of the Italian Government is no bar to liability to military service. A former Italian subject may visit Italy without fear of molestation when he is under the age of twenty years; but between the ages of twenty and thirty-nine he is liable to arrest and forced military service, if he has not previously reported for such service. After the age of thirty-nine he may be arrested and imprisoned, but will not be compelled to do military duty unless he has been pardoned. Such pardons may only be obtained by direct petition to the Italian Government.

Passports are not required from foreign travellers, but they are useful in establishing identity and often prevent interference with departure from Italy. They need not be vised or endorsed.

NETHERLANDS.

No military service is required of one who became a citizen of the United States before the calendar year in which he became nineteen years of age, and a Netherlands subject who becomes a citizen of the United States when he is nineteen and between January 1 and August 31 may have his name removed from the register by applying to the Queen's commissioner of the province in which he was registered. If he does not have his name removed from the register, or if he becomes a citizen of the United States after the register is closed (August 31), and his name is drawn for enlistment, his naturalization does not affect his military obligations to the Netherlands, and if he returns he is liable (1) to be treated as a deserter, if he did not respond to the summons for service, or (2) to be enlisted if he is under forty. Former Netherlands subjects are advised to ascertain by inquiry from the Netherlands authorities what status they may expect to enjoy if they return to the Netherlands.

PERSIA.

There is no naturalization treaty between the United States and Persia. Permission to be naturalized in a foreign country is not granted by the Persian Government to a Persian subject if he is under charge for a crime committed in Persia, or is a fugitive from justice, or a deserter from the Persian army, or is in debt in Persia, or fled to avoid pecuniary obligations. If a Persian subject becomes a citizen of another country without the permission of the Government he is forbidden to re-enter Persian territory, and if he had any property in Persia he is ordered to sell or dispose of it.

Passports are required of foreigners desiring to enter Persia, and they should bear the vise or endorsement of a Persian consular officer.

PORTUGAL.

There is no naturalization treaty between the United States and Portugal. If a Portuguese leaves Portugal without having performed the military duty to which he was liable and becomes naturalized in a foreign country, his property is subject to seizure, and that of the person who may have become security for him when he left the Kingdom is equally liable.

Passports are not required to enter Portuguese dominions. Travellers are, however, required to establish their nationality when they depart, and for this purpose a passport is the most effective document.

ROUMANIA.

There is no naturalization treaty between the United States and Roumania. American citizens formerly Roumanian subjects are not molested upon their return to Roumania, unless they infringed Roumanian law before emigrating. One who did not complete his military service in Roumania, and cannot prove that he performed military service in the United States, is subject to arrest, or fine, or both, for evasion of military duty.

Passports are absolutely necessary in Roumania and must be vised by a Roumanian consul. If not so vised the holder may be sent back from the frontier to the nearest place where there is a Roumanian consul. An American who intends to remain in Roumania for a longer period than eight days must have his passport vised by the United States consul at Bucharest and obtain a permit of residence, valid for one year, from the prefecture of police.

Digitized by Google

RUSSIA.

There is no naturalization treaty between the United States and Russia. A Russian who becomes a citizen of another country without imperial consent is liable under Russian laws to the loss of all his civil rights and to perpetual banishment from the Empire. If he returns he is liable to deportation to Siberia. When a Russian emigrates before he is fifteen years old, and subsequently becomes a citizen of another country, he is equally liable to punishment, unless when he attained the age of twenty-one years he took steps necessary to obtain the consent of the Emperor to his expatriation.

Naturalized Americans of Russian birth, of the Jewish race, are not allowed to enter Russia except by special permission. For this they may apply to the Minister of the Interior.

No one is admitted to Russia without a passport. It must be vised by a Russian diplomatic or consular representative. Upon entering Russia it should be shown at the first Government house, and the holder will be given another passport or permit of sojourn. At least twenty-four hours before departure from Russia this permit should be presented and a passport of departure will be granted and the original passport returned. A fresh permit to remain in Russia must be obtained every six months.

SERVIA.

There is no naturalization treaty between the United States and Servia. If a subject of Servia emigrates before he has fulfilled his military obligations, the Servian Government does not recognize a change of nationality made without the consent of the King, and upon his return he may be subject to molestation. If, however, he performed his military service before emigration his acquisition of naturalization in the United States is recognized by the Servian Government.

Passports are rigorously required of all persons who desire to enter Servia.

SWEDEN AND NORWAY.

Under the treaty between the United States and Sweden and Norway, a naturalized citizen of the United States formerly a subject of Norway is recognized as an American citizen upon his return. He is liable, however, to punishment for an offence against the laws of Norway committed before his emigration, saving always the limitations established by law. Emigration itself is not an offence, but nonfulfillment of military duty and desertion from a military force or ship are offences. A naturalized American who performed his military service or emigrated when he was not liable to it and who infracted no laws before emigrating may safely return to Norway, but he must report to the conscription officers in order to prove his American citizenship. If he remains as long as two years in Norway he is obliged, without being summoned, to present himself for enrollment since he is then deemed by Norway to have renounced his American citizenship.

SWITZERLAND.

There is no naturalization treaty between the United States and Switzerland. If a Swiss citizen renounces Swiss allegiance in the manner prescribed by the Swiss law of July 3, 1876, and his renunciation is accepted, his naturalization in another country is recognized, but without such acceptance it is not recognized, and is held to descend from generation to generation. Before he returns to Switzerland an American citizen of Swiss origin should file with the Cantonal authorities his written declaration of renunciation of his rights to Communal, Cantonal, and in general Swiss citizenship, with documents showing that he has obtained foreign citizenship for himself, wife, and minor children, and receive the sealed document of release from Swiss citizenship through the Direction of Justice of the Canton of his origin. If he neglects this and is within the ages when military service may be required, he is liable to military tax, or to arrest and punishment in case of nonpayment of the tax.

Passports are not required for admission to Switzerland, but are usually demanded from persons sojourning in that country. They need not be vised or indorsed.

TURKEY.

There is no naturalization treaty between the United States and Turkey, and the Turkish Government denies the right of a Turk to become a citizen of any other country without the authority of the Government. His naturalization is, therefore, regarded by Turkey as void with reference to himself and his children and he is forbidden to return to Turkey. The consent of the Turkish Government to the naturalization in another country of a former Turk is given only upon condition that the applicant shall stipulate either never to return, or, returning, to regard himself as a Turkish subject. Therefore, if a naturalized American citizen of Turkish origin returns to Turkey he may expect arrest and imprisonment or expulsion.

Jews are prohibited from colonizing in Turkish Dominions.

Passports are required from all persons entering Turkish Dominions (Egypt excepted), and persons who enter without passports are liable to fine or imprisonment. The passports should, if possible, be vised by a Turkish consular officer in the United States.

The Military Service Term of Europe.

The laws governing military service in Europe are as follows:

Austria-Hungary.—All male subjects are liable between the ages of nineteen and forty-two years.

Belgium.—Every male subject must register during the calendar year in which he reaches the age of nineteen years to take part in the drawing of lots for the raising of the necessary military contingent. Any one who has drawn a number which designates him for military service, or, in case of his absence, has had a number drawn for him by the proper authority, is punishable if he does not answer the call.

Denmark.—Military service becomes compulsory to a subject of Denmark during the calendar year in which he reaches the age of twenty-two years. In November or December of the year in which he becomes seventeen years old, he is expected to report for enrollment on the conscription lists. If he neglects to do so, he may be fined from 2 to 40 kroner; but if his neglect arises from a design to evade service he may be imprisoned.

France.—All Frenchmen who are not declared unfit or excused may be called upon for military duty between the ages of twenty and forty-five years. They are obliged to serve three years in the active army, ten in the reserve of the active army, six in the territorial army, and six in the reserve of the territorial army.

Germany.—A German subject is liable to military service from the time he has completed the seventeenth year of his age until his forty-fifth year, active service lasting from the beginning of his twentieth year to the end of his twenty-sixth year.

Great Britain.—Military service is not compulsory.

Italy.—Italian subjects between the ages of twenty and thirty-nine years are liable for the performance of military duty under Italian law, except in the case of an only son; or where two brothers are so nearly of the same age that both would be serving at the same time, in which event only one is drafted; or where there are two sons of a widow, when only one is taken.

Netherlands.—A subject of the Netherlands is liable to military service from his nineteenth to his fortieth year. He must register to take part in the drawing of lots for military service between January 1 and August 31 of the calendar year in which he reaches the age of nineteen. He is exempt, however, from service if he is an only son or is physically disabled; and in the case of a family half of the brothers are exempt, or the majority if the number is uneven.

Portugal.—All male subjects who are not disqualified by age or conditions of health are liable to be called upon for military service, which is obligatory.

Roumania.—All male inhabitants if not disqualified by age or conditions of health are liable to military duty between the ages of twenty-one and thirty years.

Russia.—A Russian is enrolled for military service at the beginning of the twenty-first year of his age, and remains on the rolls to the end of his forty-third year; but at the age of fifteen he is considered to be among those who are liable to military duty, and he cannot, after reaching that age, ask for permission to become a citizen of a foreign country, unless he has performed such service.

Servia.—Ordinarily, all subjects of Servia are expected to perform at least two years' military service.

Spain.—Three years' service is ordinarily required.

Sweden and Norway.—Subjects of Norway are liable to performance of military duty in and after the calendar year in which they reach their twenty-second year.

Switzerland.—Every Swiss citizen is liable, under Swiss law, to military service from the beginning of the year in which he becomes twenty years of age until the end of the year when he becomes forty-four.

The Federal Civil Service.

The present Civil Service Commissioners are: John R. Procter, of Kentucky, President; William Dudley Foulke, of Indiana, and James R. Garfield, of Ohio. The office of the Civil Service Commission is at Washington, D. C.

CHANGES IN THE CIVIL SERVICE IN 1902.

(Prepared for the American Almanac for 1903 by A. R. Serven, Chief Examiner.)

During the year 1902 a number of important changes and additions have been made to the civil service rules and regulations, and several important Executive orders affecting the entire civil service of the Government have been issued. Among these are the following: (1) An Executive order was issued on January 17 providing that "whenever the needs of the service will justify it, and the law will permit, preference shall be given alike in appointment and retention to honorably discharged veterans of the Civil War who are able and well qualified." (2) The rule governing transfers was amended on January 23 so as to limit them to positions requiring the performance of the same class of work. (3) On January 24 the rule concerning the certification of eligibles was amended so that where there are less than three names of persons eligible upon a particular register (a choice from among three names is permitted appointing officers by the civil service rules), and the appointing officer declines to make a permanent appointment from the incomplete list furnished him, he shall, in the absence of reasons deemed by the Commission satisfactory, be required to appoint temporarily the one eligible or one of the two eligibles, until an examination can be held which will make a complete certification of three eligibles possible. (4) An Executive order was issued on January 31 forbidding officers or employes in the Executive Departments and offices from influencing or attempting to influence legislation in their favor, on penalty of dismissal from the service. (5) A system of regulations to govern transfers and reinstatements was adopted by the Civil Service Commission on March 10. (6) An Executive order was promulgated on July 3, directing that the appointment of unclassified laborers throughout the Government service (the Civil Service Act forbids making unskilled laborers subject to its provisions) should henceforth be made in accordance with regulations similar to those which obtain in navy yards. (7) Upon the same day Civil Service Rule XI. was amended by adding a section forbidding the consideration of recommendations for promotion unless made by the officers under whose supervision service is rendered. (8) By special rule, also approved July 3, the President made provision for the transfer to positions in the United States of such of the civilian employes of the War Department in Cuba during the military occupancy of the island as were specially commended for transfer by their chiefs.

It is estimated that there are about 123,000 positions in the classified civil service, of which number about 110,000 are subject to competitive examination and, approximately, 13,000 are not so subject. Something less than 20,000 of the positions are in Washington, D. C. About 113,000 positions in the civil service of the Government remain unclassified. More than 72,000 of these are filled by fourth-class postmasters.

Examinations for the civil service are held in every State and Territory at fixed times and places. Pains are taken to have them relate as nearly as possible to the duties to be performed, and, wherever practicable, they include experience and practical tests. No one is certified for appointment whose standing in any examination is less than 70 per cent, except soldiers and sailors granted preference, who need obtain but 65 per cent. A certificate is given to each person examined stating whether he passed or failed to pass. A Manual of Examinations is published, in which all necessary information is given concerning examinations, the method of appointment, the apportionment of appointments, etc.

CIVIL SERVICE RULES AND REGULATIONS.

(Revised for the American Almanac for 1903 by James R. Garfield, of the United States Civil Service Commission.)

The Civil Service Act, or the act "To Regulate and Improve the Civil Service of the United States," was passed on January 16, 1883. The purpose of the act was the establishment of a system of examinations to ascertain the fitness of applicants for performance of the public duties which they desired to assume.

Prior to the passage of this act appointments to positions in the public service had been based on official favor and social and official influence, and those who obtained such appointments were liable to be removed on the occasion of the slightest change in political conditions. Upon the adoption of the new law, however, all this was changed. A merit system of competitive examinations was substituted for that of patronage, and positions under the civil service are now open to all citizens of the United States subject to certain limitations as to age, character, etc., irrespective of religious or political opinions.

How the Civil Service Law Is Applied.—The Executive civil service of the United States is divided into branches as follows: The Departmental Service, the Custom House Service, the Post Office Service, the Government Printing Service and the Internal Revenue Service.

Persons employed merely as laborers, or workmen, and persons whose appointments are subject to confirmation by the Senate, are not classified.

The Custom House Service includes all persons who are serving in any customs district.

The Post Office Service includes all officers and employes in free delivery post offices, and in the free rural delivery service. The transfer of carriers from the rural free delivery to any other branch of the service is prohibited.

The Government Printing Service includes all officers and employes of the Government Printing Office.

The Departmental Service includes all officers and employes not included in the other four branches.

The Internal Revenue Service includes all officers and employes in any Internal Revenue District who may be subject to classification under the Civil Service law.

The following positions in the Government service are not subject to any of the provisions of the civil service rules, except sections 1, 2 and 3 of Rule II. (in which it is provided that no person in the employ of the Government shall violate any provisions of the Civil Service act; shall use his official authority or influence for the purpose of interfering with an election, or shall dismiss or cause to be dismissed from the service any person because of his political or religious opinions): Any person who devotes part of his time only to the Government service and receives for such personal services not more than $300 per annum; any person in the military or naval service of the United States who is detailed for the performance of civil duties; any person employed in a foreign country under the State Department, or who is temporarily employed in a confidential capacity under any Executive department or other office; any position the duties of which are of a quasi-military or quasi-naval character, and for the performance of which a person is enlisted for a term of years; or positions in the revenue cutter service where the persons enlist for the season of navigation only; any local physician employed temporarily as acting assistant surgeon in the marine hospital service; any person employed as quarantine attendant at certain stations, or temporarily employed as attendant, acting assistant surgeon, or sanitary inspector on quarantine vessels, or for temporary duty in preventing contagious diseases; any person in a national military park employed as commissioner, assistant in historical work, agent for purchases of land, historian, secretary, rodman, chainman, chief guardian, guardian, guard, assistant superintendent, inspector, carpenter, steam engineer, or painter; any person employed as office or field deputy in the office of a United States Marshal; all persons employed as pension examining surgeons, whether organized in boards or working individually under the direction of the Commissioner of Pensions, except medical examiners in the Pension Office; Indians in the Indian service, except those employed as teachers, superintendents and physicians; temporary clerks employed in United States local land offices and not paid from Government funds, and temporary clerks in the office of Surveyors-General not paid from Government funds.

Exemptions from Examinations.—The following persons or positions which are classified under the Civil Service act are excepted from examinations or registration:

Executive Departments.—Two private secretaries or confidential clerks to the President; not exceeding two private secretaries to the head of each of the eight Executive departments; not exceeding one private

Digitized by Google

secretary to the assistant heads of each Executive department; not exceeding one private secretary to each of certain enumerated heads of bureaus appointed by the President and confirmed by the Senate, and to each of others not enumerated if authorized by law; all persons appointed by the President without confirmation by the Senate, and attorneys, assistant attorneys and special assistant attorneys.

Treasury Department.—All shipping commissioners; all Chinese interpreters; not exceeding one cashier in each customs district; not exceeding one chief deputy or assistant collector at each customs port or subport; not exceeding one deputy naval officer and one deputy surveyor of customs at each customs port; not exceeding one private secretary to the collector of each customs district in which the receipts for the last fiscal year amounted to as much as $500,000; not exceeding one private secretary to each of the appraisers at the ports of Boston, New York and Philadelphia; not exceeding one counsel before the Board of General Appraisers; not exceeding one paymaster in the New York customs district; all positions in the customs and internal revenue service in Alaska; all deputy collectors of internal revenue who are borne on the rolls as such; storekeepers and gaugers whose compensation does not exceed $3 per day, when actually employed, and whose aggregate compensation does not exceed $500 per annum; officers in charge of the Bureau of Statistics; not exceeding one chief clerk in each assay office and one private secretary to the superintendent, one cashier, one deposit weight clerk, one assistant coiner, one assistant melter and refiner, and one assistant assayer in each mint or assay office.

War Department.—All paymasters' clerks in the War Department.

Department of Justice.—Wardens, chaplains and physicians in the United States penitentiaries; not exceeding one private secretary to each United States District-Attorney and all examiners in the department.

Post Office Department.—The Assistant Attorney-General for the department; one private secretary to the Assistant Attorney-General; not exceeding one private secretary to the postmaster at each post office where the receipts for the last fiscal year amounted to $350,000; one chief assistant to the postmaster at each post office; one auditor at the New York City post office; one finance clerk, when authorized by law; one cashier at each first-class post office; one cashier and one finance clerk at each post office where the receipts for the last fiscal year amounted to $500,000; one cashier and two finance clerks at offices where the receipts were $1,000,000, and one cashier and three finance clerks at offices showing receipts amounting to $2,000,000; one physician at each first-class office to examine applicants for sick leave.

Department of the Interior.—The superintendent of the Hot Springs Reservation; one special land inspector and two special inspectors; inspectors of coal mines in the Territories; special agents employed for the protection of public lands; the inspector of surveyor-general and district land offices; superintendents of irrigation in the Indian service; superintendents of logging in the Indian service; five special Indian agents; special agents for the allotment of land to the Indians; commissioners appointed upon special missions to negotiate with the Indians; engineers to make surveys of reservation boundary lines; examiners of Indian timber lands; one financial clerk at each Indian agency; all positions in the Alaska school service; five special pension examiners to investigate fraudulent and other claims of a criminal nature; one clerk at each pension agency, and not exceeding one private secretary to the superintendent of the Government Hospital for the Insane.

Department of Agriculture.—Agents and experts temporarily appointed to investigate and furnish information for the department, and one statistical agent in each State and Territory.

Smithsonian Institution.—The assistant secretary of the institution in charge of the United States National Museum.

Age Limitations.—The age limitations for admission to positions in the different branches of Government service are as follows:

Departmental Service:	Minimum.	Maximum.
Page, messenger boy, apprentice (other than apprentice in mints and assay offices), or student	14	20
Apprentice in mints and assay offices	18	24
Printer's assistant and messenger	18	No limit.
Positions in the Railway Mail Service	18	35
Interns and hospital stewards in the Marine Hospital Service and acting second assistant engineer in the Revenue Cutter Service	21	30
Keeper, assistant keeper, and officers of light-house tenders and light vessels in the Light House Service	18	50
Cadet in the Revenue Cutter Service and aid, deck officer, and junior captain's clerk in the Coast and Geodetic Survey	18	25
Surfman in the Life Saving Service	18	45
Superintendent, physician, supervisor, day-school inspector, disciplinarian, matron and assistant matron in the Indian Service; inspector and assistant inspector of hulls and inspector and assistant inspector of boilers in the Steamboat Inspection Service	25	55
Observer in the Weather Bureau Service	18	30
Watch officer in the Coast and Geodetic Survey	21	36
Chief engineer in the Coast and Geodetic Survey	25	45
All other positions	20	No limit.
(The age limitation shall not apply in the case of the wife of the superintendent of an Indian school who applies for examination for the position of teacher or matron.)		
Custom House Service: All positions	20	No limit.
Post Office Service:		
Rural letter carrier	17	55
All other positions	18	45
(The age limitations shall not apply in the case of an honorably discharged United States soldier or sailor of the Civil War or of the Spanish-American war who applies for the position of rural letter carrier.)		
Government Printing Service:		
All positions (male)	21	No limit.
All positions (female)	18	No limit.
Internal Revenue Service: All positions	21	No limit.

In cases where no maximum age limitations are fixed the Commission, upon consultation with the proper head of the department or office, may determine and fix such limitations.

Applications Under the Civil Service.—Any citizen of the United States, whether by nativity or naturalization, is entitled to make application for a position in any branch of the service to which civil service rules apply.

Applications must be made under oath, upon a form provided by the Commission, and be accompanied by such certificates as may be prescribed.

In order to secure a sufficient number of eligibles to meet the needs of the service, foreign born persons who have declared their intentions to become citizens may be admitted to examinations for the position of copper plate map engraver.

No application for examination will be received from any person serving in the Army, Navy or Marine Corps of the United States, unless the written consent of the head of the department under which the applicant is serving is filed with his application.

No person who is addicted to the habitual use of intoxicating liquors to excess will be appointed or employed under the Civil Service Law, and the Commission may, in its discretion, refuse to examine an applicant or certify an eligible who has been guilty of a crime or of infamous or notoriously disgraceful conduct, or who has been dismissed from the service for delinquency or misconduct within one year next preceding the date of his application, or who has intentionally made a false statement in any material fact or practised or attempted to practise any fraud in securing his registration or appointment.

Physical disability is also a sufficient cause for refusal to examine or certify.

Digitized by Google

No application for a position which belongs to one of the recognized mechanical trades will be accepted unless it shall be shown that the applicant has served as apprentice or journeyman at said trade for such a period as the Commission may prescribe.

Examinations Under the Civil Service Law.—No person shall be employed in any position classified under the Civil Service Act until he has passed the examination provided therefor, unless he is specially exempt from examination by the provisions of the law.

Examinations under the civil service are of two classes: Competitive and non-competitive.

Wherever competent persons can be found who are willing to compete, no non-competitive examinations shall be given, except to test the fitness for transfer, or for promotion in a part of the service to which promotion regulations have not been applied; to test fitness for appointment of Indians to the Indian service, and to test the fitness of a person whom the head of an Executive department or the secretary of the Smithsonian Institution shall nominate for appointment to a position in the classified service.

Boards of Examiners are appointed by the Commission and examinations are held at such places and upon such dates as the Commission may deem most practicable.

No question in any examination will be so framed as to elicit information concerning the political or religious opinions or affiliations of any applicant and no discrimination will be exercised because of such opinions or affiliations.

A person holding a position on the date said position is classified under the Civil Service act is entitled to all the rights and benefits possessed by persons of the same class or grade who have been appointed upon examination, but no such person may be transferred from any branch to another branch of the service until he has first passed the examination prescribed for original entrance to the position to which transfer is desired.

Examination papers shall be rated on a scale of 100, and each subject will be given the relative weight that the Commission may prescribe.

Every competitor who attains an average percentage of 70 or over is eligible for appointment to the position for which he was examined. According to the provisions of Section 1754 of the Revised Statutes, however, persons honorably discharged from the military or naval service by reason of disability resulting from wounds or sickness incurred in the line of duty are given precedence over all other eligibles. A percentage of 65 renders them eligible under the rules.

The term of eligibility is one year from the date of registration, but this term may be extended for another year in the discretion of the Commission, and if a registered person should be mustered into the military or naval service of the United States in time of war the term of eligibility will be suspended until such time as the more important services shall have been completed.

Method of Filling Vacancies.—Whenever a vacancy occurs in any position classified under the Civil Service act the nominating officer asks for a list of eligibles, and the Commission, from the proper register, certifies the three names which stand at the head of the list, provided they have not already been three times certified to the same department. From these names the nominating officer may select one, or if he objects to an eligible named and states that because of some physical defect, mental unsoundness or moral disqualification the eligible would be incompetent or unfit to fill the vacant position, the Commission, if such objections are sustained, may certify the eligible who may be next on the list below those already certified.

The person selected for appointment is notified by the appointing officer, and upon his acceptance he receives a certificate of appointment for a probationary period of six months. At the end of this period his retention in the service will be equivalent to an absolute appointment. If for any reasons his services are not satisfactory he will be so notified by the appointing officer.

The time during which an employe serves as substitute counts as part of the probationary period, but that served under a temporary appointment is not so counted.

Temporary appointments may be made under special provision of the Civil Service rules in cases of emergency without approval of the commission, for such part of thirty days as will permit appointment to be made in the usual manner, or with the approval of the commission, in periods of three months each, until eligibles can be provided; or in case of temporary job employment, for not more than six months, in periods of three months each, with the approval of the commission. Substitutes may also be appointed in departments in which they are not directly prohibited by law.

All appointments to the public service, so far as the conditions of good administration will warrant, are apportioned among the several States and Territories and the District of Columbia upon the basis of population as ascertained by the last preceding census.

Promotions, Removals and Reinstatements.—It is a requirement of the Civil Service act that fitness for promotion shall be established by competitive tests or examinations, and, while promotions may be made from one class to another class upon any test of fitness not disapproved by the Commission, such promotions may not be made if the duties of the new position are so different from those of the old position as to make an examination absolutely necessary.

No recommendation for promotion may be considered by any officer in the service unless it be made by the officer under whose supervision the applicant is serving, and the recommendation of any other person, with the consent of the applicant, shall be sufficient to debar him from promotion.

Any person who has left the service through no delinquency or misconduct may be reinstated if any vacancy occurs within one year of the date of his withdrawal, but any person who has served in the Army or Navy of the United States in the War of the Rebellion or the Spanish-American War, and was honorably discharged therefrom, or the widow of any such person, an army nurse in either of the wars, or any person who has become separated from the service by reason of the discontinuance of the free delivery service at any post office or any reduction of force required by law, may be reinstated without regard to the length of time which may have elapsed since their withdrawal.

No removal shall be made from the competitive classified service except for just cause and for reasons given in writing, a copy of which shall not only be furnished to the person whose removal is sought, but he shall also be given time and opportunity to answer the same in writing. According to a recent Executive decision, however, the term "just cause," as applied by the Civil Service law, is intended to mean any cause which will promote the efficiency of the service, and is not supposed to have either a political or religious construction. It has also been decided by the President that nothing contained in this rule of the civil service shall be construed to require the examination of witnesses or any trial or hearing except in the discretion of the officer making the removal.

Wilful violation of the provisions of the Civil Service act, interference in elections, and discrimination against an employe on account of his political or religious opinions are sufficient causes for removal.

Special Rules and Recent Executive Orders.—Persons who were in the employ of the United States during the military government in Cuba, and who, while not eligible for retention in the classified service, have been specially recommended by the chiefs of their departments, may be retained and appointed to positions of a grade corresponding to that which they held in the classified service, always, of course, with the approval of the Commission.

All officers and employes of the United States are forbidden, either directly or indirectly, individually or through associations, to solicit an increase of pay or to influence or attempt to influence in their own interests any other legislation whatever, on penalty of dismissal from the Government service.

Whenever there are already two or more members of a family in the public service in the grades covered by the Civil Service act, no other member of that family may be considered eligible to appointment.

Frauds and Political Assessments.—The following provisions apply to cases of fraud and the violation of sections of the act regarding the levying of political assessments:

Any commissioner, examiner, copyist, or messenger, or any person in the public service, who shall wilfully and corruptly, by himself or in co-operation with one or more other persons, defeat, deceive, or obstruct any person in respect of his or her right of examination, or who shall falsely mark or report upon the examination or proper standing of any person, or aid in so doing, or who shall make any false representations concerning the same or concerning the person examined, or furnish to any person any special or secret information for the purpose of either improving or injuring the prospects or chances of any person

Digitized by Google

so examined, to be examined, being appointed, employed, or promoted, shall for each such offense be deemed guilty of a misdemeanor, and upon conviction be punished by a fine of not less than one hundred dollars, nor more than one thousand dollars, or by imprisonment for not less than ten days, nor more than one year, or by both fine and imprisonment.

No Senator, or Representative, or Territorial Delegate of the Congress, or Senator, Representative, or Delegate elect, or any officer or employe of either of said Houses, and no executive, judicial, military, or naval officer of the United States, and no clerk or employe of any department, branch, or bureau of the executive, judicial, or military or naval service of the United States, shall, directly or indirectly, solicit or receive, or be in any manner concerned in soliciting or receiving, any assessment, subscription, or contribution, for any political purpose whatever, from any officer, clerk, or employe of the United States, or any department, branch, or bureau thereof, or from any person receiving any salary or compensation from moneys derived from the Treasury of the United States.

No person shall, in any room or building occupied in the discharge of official duties by any officer or employe of the United States, or in any navy yard, fort, or arsenal, solicit, or receive, any contribution of money or any other thing of value for any political purpose whatever.

No officer or employe of the United States shall discharge, or promote, or degrade, or in any manner change the official rank or compensation of any other officer or employe, or promise or threaten so to do, for any political purpose.

No person in the service of the United States shall, directly or indirectly, give or hand over to any other person in the service of the United States, or to any Senator or member of the House of Representatives, or Territorial Delegate, any money or other valuable thing to be applied to any political object whatever.

Any person who shall be guilty of violating any provision of the four foregoing sections shall be deemed guilty of a misdemeanor, and shall, on conviction thereof, be punished by a fine not exceeding five thousand dollars, or by imprisonment for a term not exceeding three years, or by such fine and imprisonment both, in the discretion of the court.

Civil Service in the United States.

State Civil Service laws have been adopted in four States. In New York the system has been in practice since 1883, in Massachusetts since 1884, and in Illinois and Wisconsin since 1895. In New York and Massachusetts every city in the State is included within the act, but in Wisconsin it applies only to cities of the first class, while in Illinois it may be adopted or not, according to the vote of the people. Local Civil Service systems, applying only to the particular cities, are in force in San Francisco, Seattle, Wash.; Portland, Ore.; Columbus, O.; New Haven, Conn., and Louisville, Ky., but in nearly every case even these rules affect only certain branches of the municipal service.

National Bankruptcy Law.

The National Bankruptcy Act of July 1, 1898, makes the following provisions for the relief of those who are compelled to become bankrupt:

Sec. 4. **Who May Become Bankrupts.**—(a) Any person who owes debts, except a corporation, shall be entitled to the benefits of this act as a voluntary bankrupt.

(b) Any natural person (except a wage-earner or a person engaged chiefly in farming or the tillage of the soil), any unincorporated company, and any corporation engaged principally in manufacturing, trading, printing, publishing, or mercantile pursuits, owing debts to the amount of one thousand dollars or over, may be adjudged an involuntary bankrupt upon default or an impartial trial, and shall be subject to the provisions and entitled to the benefits of this act. Private bankers, but not national banks or banks incorporated under State or Territorial laws, may be adjudged involuntary bankrupts.

Sec. 7. **Duties of Bankrupts.**—(a) The bankrupt shall (1) attend the first meeting of his creditors, if directed by the court or a judge thereof to do so, and the hearing upon his application for a discharge, if filed; (2) comply with all lawful orders of the court; (3) examine the correctness of all proofs of claims filed against his estate; (4) execute and deliver such papers as shall be ordered by the court; (5) execute to his trustee transfers of all his property in foreign countries; (6) immediately inform his trustee of any attempt, by his creditors or other persons, to evade the provisions of this act, coming to his knowledge; (7) in case of any person having to his knowledge proved a false claim against his estate, disclose that fact immediately to his trustee; (8) prepare, make oath to, and file in court within ten days, unless further time is granted, after the adjudication, if an involuntary bankrupt, and with the petition if a voluntary bankrupt, a schedule of his property, showing the amount and kind of property, the location thereof, its money value in detail, and a list of his creditors, showing their residences, if known (if unknown that fact to be stated), the amount due each of them, the consideration thereof, the security held by them, if any, and a claim for such exemptions as he may be entitled to, all in triplicate, one copy of each for the clerk, one for the referee, and one for the trustee; and (9) when present at the first meeting of his creditors, and at such other times as the court shall order, submit to an examination concerning the conducting of his business, the cause of his bankruptcy, his dealings with his creditors and other persons, the amount, kind, and whereabouts of his property, and, in addition, all matters which may affect the administration and settlement of his estate; but no testimony given by him shall be offered in evidence against him in any criminal proceedings.

Provided, however, that he shall not be required to attend a meeting of his creditors, or at or for an examination at a place more than one hundred and fifty miles distant from his home or principal place of business, or to examine claims except when presented to him, unless ordered by the court, or a judge thereof, for cause shown, and the bankrupt shall be paid his actual expenses from the estate when examined or required to attend at any place other than the city, town, or village of his residence.

The Arrest of a Bankrupt.—A bankrupt is exempt from arrest upon civil process except when such process is issued from a court of bankruptcy for contempt, or disobedience of its lawful orders; or on occasions when issued from a State Court having jurisdiction and served within such State, on the ground that the claim or debt was one from which a discharge in bankruptcy would not be a release.

Death of a Debtor.—In case of the death or insanity of a debtor proceedings will not be abated, but will be conducted and concluded, as far as possible, as though he had not died or become insane.

Settlements with Creditors.—Terms of settlement may be offered after, but not before, a bankrupt has been examined in open court or at a meeting of his creditors and filed in court the schedule of his property and list of his creditors. If it is accepted by a majority of all the creditors whose claims have been allowed it may be confirmed by the court. Settlements, however, may be set aside for fraud.

Discharge of a Debtor.—An application for a discharge in bankruptcy may be filed after the expiration of one month and within the next twelve months subsequent to being adjudged a bankrupt, or, if it is shown that the bankrupt was unavoidably prevented from filing his application within said time, the court may permit him to file it within the next six months. At the hearing for a discharge the bankrupt will be discharged unless it can be shown that he has committed offences punishable by imprisonment under the provisions of the act; has concealed his true financial condition with fraudulent intent, or, in contemplation of bankruptcy, has concealed, destroyed or failed to keep books of account or record in order that his true condition might not be ascertained. Discharges may be revoked on the ground of fraud.

What Discharge Implies.—Discharge in bankruptcy releases the bankrupt from all his provable debts, except they be in the nature of taxes levied by the United States, or the State, county, district or municipality in which he resides; judgments in actions for fraud; for obtaining property under false pretences, or for wilful or malicious injuries to the person or property of another; debts which have not been scheduled in time for proof and allowance, with the name of the creditor, when known, unless such creditor had notice or actual knowledge of the proceedings in bankruptcy, or debts created by the fraud, embezzlement, defalcation or misappropriation of the bankrupt, while acting as an officer in any judiciary capacity.

The Process of Naturalization.

According to the census of 1900 there were 2,862,546 naturalized foreigners in the United States as compared with 2,545,753 in 1890. The total number of foreign born of the voting age in 1900 was 5,102,334, and in 1890 the number was 4,348,459. This apparent lack of proportion between those naturalized before 1890 and those made citizens during the decade ending with 1900 is explained by the large increase in immigration during the last few years of the decade just passed. This is shown by the fact that in 1900, 316,793 foreign born had taken out first papers. The record for speedy declaration of intentions of becoming a citizen of the United States was made by a young Irishman in 1901, who appeared to declare his intentions within ten minutes after landing in New York.

The process by which an alien may be admitted to become a citizen of the United States is prescribed by Sections 2165-74 of the Revised Statutes of the United States.

Who May Apply for Citizenship.—Any alien of good moral character and who is attached to the principles of the Constitution is entitled to declare his intentions to become a citizen of the United States.

The Declaration of Intentions.—To declare his intentions an alien must appear before a Circuit or District Court of the United States, or a District or Supreme Court of the Territories, or a court of record in any of the States having common law jurisdiction and a seal and a clerk, two years, at least, prior to his admission, and there he must make declaration under oath that it is his bona fide intention to become a citizen of the United States and to renounce forever all allegiance and fidelity to any foreign prince or State, and particularly to the one of which he may be at the time a citizen or subject.

Time Required for Citizenship.—No person may become a citizen of the United States unless he has resided continuously within this country for at least five years, and within the State or Territory in which he files his application for at least one year. At least two years must also elapse between the filing of the first declaration and the taking of the final oath of citizenship.

The Oath for Admission to Citizenship.—On the occasion of his application to be admitted as a citizen of the United States the alien must appear before one of the courts already designated and there must take oath "that he will support the Constitution of the United States, and that he absolutely and entirely renounces and abjures all allegiance and fidelity to every foreign prince, potentate, State, or sovereignty, and particularly (by name) to the prince, potentate, State, or sovereignty of which he was before a citizen or subject." This oath must be recorded by the Clerk of the Court.

Conditions for Citizenship.—Before the rights of citizenship are granted the alien must prove to the satisfaction of the court that he made a declaration of intentions (that is, obtained his first papers) at least two years prior to the filing of the present application; that he has resided within the United States continuously for at least five years, and within the particular State or Territory in which the court may be held for at least one year. He must also prove that during this time he has behaved himself as a man of good moral character, and that he not only fully understands the principles of the Constitution of the United States, and is acquainted with its various provisions, but that he is attached to these principles and is "well disposed to the good order and happiness of the same." If all these conditions are satisfactorily complied with, and the alien formally expresses his renunciation of any hereditary title or order of nobility that he may have borne at the time of the filing of his application, he will be admitted to citizenship and will receive his final papers from the court.

Soldiers Who Desire to Become Citizens.—Any alien who is twenty-one years of age, or more, who has been in the armies of the United States and who has been honorably discharged therefrom, may become a citizen of the United States upon the filing of his application and without any prior declaration, provided that he can prove that he is of good moral character and that he has resided within the United States at least one year prior to the filing of the application. The Supreme Court has decided that the residence for one year within one particular State is a condition that does not apply to soldiers desiring to become citizens.

Chinese Not Admitted.—The naturalization of Chinese persons is positively and expressly prohibited by Section 14, Chapter 126, of the Laws of 1882.

Aliens Who Are Minors.—Any alien who is less than twenty-one years of age, and who has resided within the United States for at least three years preceding his arrival at that age, and who may continue to reside therein up to the time of the filing of his application for citizenship, may, after his arrival at the age of twenty-one, and upon proof that he has resided for five years in the United States, including the three years of his minority, be admitted to citizenship; but he must make declaration under oath and prove to the satisfaction of the court that for two years prior to the filing of his application it has been his bona fide intention to become a citizen of the United States, and shall in all respects comply with the naturalization laws.

Children of Naturalized Citizens.—The naturalization of an alien applies equally to his children, provided they are under the age of twenty-one at the time of the naturalization of the parent and that they continue to dwell in the United States.

Children Who Are Born Abroad.—The fact that a child of a citizen of the United States is born abroad does not affect his citizenship in the United States.

Citizenship of American Women Marrying Aliens.—The question of the citizenship of an American woman who marries an alien is by no means clearly settled. Courts have decided that a wife's political status follows that of her husband and that in marrying a foreigner she loses her citizenship and domicile in this country, while there have been other decisions which have assumed directly to the contrary. However, it is generally regarded as extremely doubtful if an American woman is entitled to the protection of the United States Government as its citizen against the exercise of jurisdiction over her by some foreign government which claims her as its subject because of her marriage to one of its sujects and her continued residence within its boundaries with him, and while it may be admitted that, so long as the authority of the foreign government is not involved, this Government may hold that such a woman is entitled to the rights of citizenship here, as, for example, in respect to the inheritance of property, it is questioned if the theory that expatriation cannot be accomplished without the consent of the sovereign goes to the extent of justifying the original sovereign in interfering or taking any action in the case of a person who has chosen to become a citizen of another country, even if that choice has been indicated through marriage.[1]

Protection to Citizens When Abroad.—It is provided by Section 2000 of the Revised Statutes of the United States that "all naturalized citizens of the United States while in foreign countries are entitled to and shall receive from this Government the same protection of person and property which is accorded to native born citizens." Naturally, however, there is a limit to the protection which even a great nation like the United States may offer its naturalized citizens when abroad, as may be seen by reference to the "Passport Regulations."

Citizenship as Applied to the Insular Possessions.—The Act of 1900, under which Hawaii became a Territory of the United States, distinctly provided that the inhabitants of Hawaii became citizens of the United States by virtue of annexation. In regard to the inhabitants of the Philippines and Porto Rico, the Supreme Court has decided that while they are entitled to the protection of the United States under the Constitution they cannot enjoy the privileges of citizenship until Congress sees fit to admit them to the Union as States, or organizes them under a territorial form of government.

Citizenship and Suffrage.—Under the Constitution the right of citizenship and the right of suffrage are two distinctly different privileges, neither of which is dependent upon the other. Naturalization is a Federal gift and the National Government possesses the right to say who may and who may not be naturalized. On the other hand, the right of suffrage is a matter between the voter and the State, and as the right to vote is distinctly a State gift, each State has the authority to stipulate who may and who may not vote at its elections. As the result, therefore, there is little harmony between the election laws of various States of the Union. In some States, for example, an alien who has been but six months in the country may vote if he has merely declared his intentions to become a citizen, while despite the fact of naturalization, and the five years residence which it requires, no person can vote if the laws of the State in which he resides do not confer that privilege upon him. (For further particulars see the table of "Voting Qualifications.")

MARRIAGE LAWS OF THE UNITED STATES.—Continued.

States and Territories.	Prohibited marriages.	Voidable marriages.	Criminal marriages.	Age limit. Male.	Age limit. Female.
Rhode Island	Same as Pennsylvania; except as to cousins; marriage with lunatics.	*——	Those prohibited	21	21
South Carolina	Ascendants or descendants by consanguinity and affinity, brothers and sisters, step-parents and step-children; whites with negroes or Indians; marriage of lunatics or idiots; bigamous marriages.	*——	Those prohibited	21	16
South Dakota	Same as Illinois. Marriage with step-relatives.	Physical or mental disability; marriage induced by force or fraud; bigamous marriages innocently contracted.	Those prohibited, except those of step-relatives; marriage of a female compelled by force, menace or duress	18	15
Tennessee	Ascendants and descendants; their wives or husbands; ascendants and descendant of wife or husband; brothers and sisters; uncles and nieces; aunts and nephews. Marriage of whites with negroes; bigamous marriages.	*——	Those prohibited; marriage of a female compelled by force, menace or duress	16	16
Texas	Same as New York, except marriage of whites and colored persons; ascendants or descendants of wife.	*Physical disability.	Those prohibited; marriage of female compelled by force, menace or duress	16	14
Utah	Ascendants and descendants; brothers and sisters; uncles and nieces; aunts and nephews; first cousins; uncles and great-nieces; aunts and great-nephews; parents by adoption or their children; bigamous marriages; marriage between whites and negroes or whites and Mongolians; marriage of lunatics or idiots.	*Under 16 for male and 14 for female; under 21 and 18 without parents' consent.	Those prohibited; marriage by false impersonation; marriage of a female compelled by force	21	18
Vermont	Ascendants and descendants, their wives or husbands; ascendants or descendants of wife or husband; brothers and sisters; uncles and nieces; aunts and nephews; bigamous marriages.	Below age limit; mental or physical disability; marriage induced by fraud.	Those prohibited; marriage within three years of person from whom divorce has been granted	21	18
Virginia	Same as West Virginia.	Physical disability; below age limit; pre-nuptial pregnancy without husband's knowledge.	Those prohibited; marriage compelled by force	14	12
Washington	Marriage of those nearer than second cousins; ascendants or descendants of wife or husband; wife or husband of ascendants or descendants; bigamous marriages.	*——	Those prohibited	21	18
West Virginia	Same as Alabama, with the additional prohibition of daughter of wife's daughter or son of husband's son.	Those prohibited; insanity; physical disability; below age limit.	Those prohibited and those compelled by force	18	16
Wisconsin	Ascendants or descendants; brothers and sisters; marriages contracted less than one year after divorce of either party; bigamous marriages.	Below age limit; marriage induced by fraud or force; when the parties do not live together afterward; physical disability.	Those prohibited	18	15
Wyoming	Same as Illinois.	Insanity; mental or physical disability at time of marriage; below age limit.	Those prohibited; marriage of female compelled by force.	21	18
Hawaii	Ascendants and descendants; brothers and sisters; uncles and nieces; aunts and nephews; first cousins; uncles and great-nieces; aunts and great-nephews; parents by adoption or their children; murderers of the spouse of either; bigamous marriages.	Same as Wyoming, and marriage induced by force or fraud.	Same as Wyoming	21	18
Philippines	Same as Hawaii.	Below age limit; mental or physical disability at time of marriage; compulsion or intimidation.	Those prohibited; marriage of a minor without consent of parents; marriage of a widow before 30 days after the death of her husband; marriage of a woman by false impersonation	14	12
Porto Rico	Same as Hawaii.	Same as Philippines.	Same as Philippines	14	12

*At common law, consent was necessary for marriage, and this is the rule to-day in the various States. Thus when a person is under age or is insane, or consent is obtained by force or fraud, there is, in the eyes of the law, no consent, and the marriage entered into under these conditions is voidable.

Oregon	1 year	Violation of marriage vow; physical incapacity; wilful desertion for one year; habitual drunkenness; felony; cruelty; indignities sufficient "to render life burdensome."
Pennsylvania	1 year	Violation of marriage vow; physical incapacity; wilful desertion for two years; habitual drunkenness; felony; cruelty; fraud; indignities sufficient "to render life burdensome," or "where wife by cruel and barbarous treatment renders condition of husband intolerable."
Rhode Island	1 year	Violation of marriage vow; physical incapacity; wilful desertion for five years (5); living apart (10 years); habitual intoxication from liquor or drugs; felony; cruelty; failure to provide; gross misbehavior or wickedness.
South Carolina		Has no divorce laws.
South Dakota	6 months	Violation of marriage vows; physical incapacity; wilful desertion or neglect for one year; felony; cruelty; habitual intemperance.
Tennessee	2 years	Violation of marriage vow; physical incapacity; wilful desertion for two years; habitual drunkenness; felony; outrages or excesses; attempt to murder wife or husband; turning wife out of doors; cruel and inhuman treatment; pregnant at time of marriage without husband's knowledge.
Texas	1 year	Violation of marriage vow; wilful desertion for three years; felony; cruelty; excesses; impotency.
Utah	1 year	Violation of marriage vow; physical incapacity; wilful desertion for one year; habitual drunkenness; felony; cruelty; failure to provide; inability "to live in peace and union."
Vermont	2 years	Violation of marriage vow; wilful desertion for three years; felony; cruelty; failure to provide; fraud; absence without being heard from (7 years).
Virginia	1 year	Violation of marriage vow; physical incapacity; wilful desertion for three years; felony; fugitive from justice; insanity; pregnancy of wife at time of marriage.
Washington	1 year	Violation of marriage vow; physical incapacity; wilful desertion for one year; habitual drunkenness; felony; cruelty; failure to provide; fraud; indignities sufficient "to render life burdensome;" insanity (10 years); any cause that may seem sufficient to the court.
West Virginia	1 year	Violation of marriage vow; physical incapacity; wilful desertion for three years; habitual drunkenness; felony; "husband notoriously immoral before marriage unknown to wife;" cruelty; abandonment.
Wisconsin	1 year	Violation of marriage vow; physical incapacity; wilful desertion for one year; habitual drunkenness; felony; cruelty; failure to support; fraud; voluntary living apart of husband and wife for 5 years.
Wyoming	1 year	Violation of marriage vow; physical incapacity; wilful desertion for one year; habitual drunkenness; felony; cruelty; failure to support (1 year); indignities sufficient to make life burdensome; vagrancy of the husband; pregnancy of wife at time of marriage without husband's knowledge.
Alaska	6 months	Violation of marriage vow; physical incapacity; wilful desertion for one year; habitual drunkenness; felony; cruelty; indignities sufficient to render life intolerable.
Hawaii	2 years	Violation of marriage vow; wilful desertion for three years; Chinese leprosy; imprisonment for more than seven years.
Philippines (6)		Violation of marriage vow; grave insults or personal violence actually inflicted; violence to wife to force her to change her religion; proposal to prostitute wife or to corrupt or prostitute children; condemnation of either party to chains or hard labor.
Porto Rico		Same as Philippines.

(1) It is the decision of the courts of Alabama that the Legislature cannot grant divorces.
(2) Condonation of a violation of the marriage vow, or any collusion or connivance bar a divorce.
(3) The concurrent verdict of two juries, at different terms of court, must be obtained before an absolute divorce can be secured in Georgia.
(4) If both parties to the action are not residents of the State, five years are required.
(5) It is within the discretion of the court to issue a decree for desertion of a shorter period.
(6) Article 104, of statute, provides: "Divorce only procures the suspension of the life in common of the spouses."
(7) Limited divorce is also granted in Alabama, Arkansas, Delaware, District of Columbia, Georgia, Kentucky, Louisiana, Maryland, Michigan, Nebraska, New Jersey, New York, North Carolina, Rhode Island, Vermont, Virginia, West Virginia and Wisconsin, and, in favor of the wife only, in Minnesota, Pennsylvania and Tennessee.
(8) Divorces granted by the Probate Court prior to 1895 have been legalized, but they can now be had only through the District Court. (9) Except in cases of adultery.
(10) If the cause for divorce occurred out of the State, two years' residence is required.
(11) In case of desertion, two years. (12) When for desertion, three years.

A FEDERAL DIVORCE LAW.

Of late years the question of a Federal divorce law, or some unification of State divorce laws, has been agitated by churchmen, judges, lawyers and legislators. Bills have been presented to Congress on this subject and amendments to the Federal Constitution have been suggested. So far nothing definite has been done either toward settling upon a satisfactory code to be adopted by the several States, or in obtaining legislation upon the subject. The present conflicting laws in force in the several States have the effect, it is said, of affording opportunity for fraud and abuse of privileges and often result in serious legal difficulties for persons innocent of any ill intent.

In some States, South Carolina in particular, it is almost impossible for one to secure a legal divorce without being in danger of arrest and conviction for bigamy if a second marriage takes place. Again, in other States, the divorce laws are so lax that it is possible to receive an absolute decree on the simplest grounds and with but a few months' residence in the State.

A few years ago a commission on uniform State laws, meeting in Buffalo, adopted a divorce code to be submitted to the Legislatures of the various States. It amounted to nothing, however, for each State felt that it has its right to decide on the question as seemed best, and, there being so much difference of opinion as to what constituted grounds for divorce, no unification could be reached. Hon. Robert W. Taylor, Representative from Ohio, has been particularly active in agitating the movement for a Federal law, believing that unified State laws would not meet the question fully and would still offer too much opportunity for fraud, or offer too many difficulties to people seeking divorce honestly. A Federal law would be more effective, for under its provisions action for divorce would be heard in the district in which the defendant lived, and would settle the question of uniformity once for all. It has been questioned whether Congress has the power to pass such a law, but it has been suggested that the Constitution might be amended by inserting the word "divorce" in the bankruptcy clause, which would give Congress authority to pass a divorce law that would be binding upon all States.

What Constitutes a Deed.

A deed is a writing under seal whereby the title to real property is conveyed from one person to another.

A deed must be written, and sealed, signed and witnessed in accordance with the provisions of the law of the State in which it is made, and must also conform to the law of the place where the property is situated.

To legally deed property there must be a consideration: the grantor, or maker of the deed, must be the rightful owner, and both parties to the contract must be of legal age and of sound mind.

If the grantor has a wife her signature and acknowledgment are necessary, even in the absence of a statute to that effect. In the case of a deed to a homestead the wife's failure to acknowledge makes the deed void, while, in any case, her failure to acknowledge entitles her, after her husband's death, to claim the use of one-third of the property during her life. A wife's acknowledgment must also be of her own free will and the officer before whom the document is acknowledged must certify to this fact.

A deed made by several grantors should be acknowledged by each party to the contract; when made by an attorney the power of attorney should be acknowledged by the principal.

A deed to be effectual as to third parties must be recorded upon acknowledgment of its execution.

When a State or Territory prescribes a certain form to be followed in the acknowledgment of deeds it is advisable to comply with the provisions of the statutes.

The Making of a Will.

Any person of sound mind and legal age may arrange for the final disposition of his property after death by making a will, although in some States married women are not permitted to make wills without the consent of their husbands, and in other States the will of an unmarried woman is revoked by her subsequent marriage unless she takes such legal steps before the marriage as will enable her to retain the right to dispose of her property after that event.

The form or wording of a will is immaterial so long as the intent of the testator is clearly expressed. To secure its probate, however, a will should be in writing, and should be signed by the testator, or by some other person in his presence and by his direction, and should be witnessed by the number of persons required by law, all of whom must sign their names in the presence of the testator, and at his request, and the testator must at the time tell them that it is his last will.

As a will is not in force until after the death of a testator he may cancel or change it any time, or he may change or modify his former bequests in a codicil, which should be executed with as great care as the will itself. Naturally, the last will annuls all former documents unless it be an addition to them, but it is advisable for the testator to clearly state his purpose to revoke all former wills by him made, if such is his intention.

In making a will the testator should first provide for the payment of all his just debts and funeral expenses, after which the various bequests should be enumerated clearly and concisely. If the property bequeathed is in any way encumbered with debts these must be paid before the balance can be distributed among the beneficiaries in accordance with the provisions of the will.

While no husband can deprive a wife of her "dower right" in his estate, which is a life estate in "one-third of the husband's real estate," he may make additional bequests to her, or may will her a certain amount in place of her "dower," specifying this to be his intention. Even this, however, does not deprive her of her "dower," provided she prefers the right of dower to the stipulated bequest.

The age at which persons are lawfully able to make a will differs in the various States. In most of the States and Territories a person must be twenty-one years of age. In California, Connecticut, Hawaii, Idaho, Montana, Nevada, North Dakota, Oklahoma, South Dakota and Utah both males and females who are eighteen years old may make wills disposing of all their property; in Colorado, District of Columbia, Illinois, Maryland, Missouri and Wisconsin females may only dispose of real estate by will when eighteen years of age.

The laws in regard to the disposal of personal property, however, are different. In Alabama, Arkansas, Missouri, Oregon, Rhode Island, Virginia and West Virginia persons eighteen years old may dispose of personal property only, while in Georgia any one over fourteen years, in Louisiana any one over sixteen, in Colorado those over seventeen, and in New York males of eighteen and females of sixteen years of age are legally competent to dispose of personal property by will.

In nearly all the States the law requires that wills shall be witnessed by two persons. The variations from this rule, however, are as follows: Connecticut requires 3; District of Columbia, 3 or 4, and Maine, Massachusetts, Mississippi, New Hampshire, South Carolina and Vermont, 3 each.

Pardon and Parole in the Various States and Territories.

Pardons to persons convicted of crimes are granted at the discretion of the Governor in Alabama, Arizona, Arkansas, California, Florida, Indiana, Kentucky, Maryland, Mississippi, Nevada, New Hampshire, New York, North Carolina, North Dakota, Ohio, Pennsylvania, Rhode Island, South Carolina, South Dakota, Virginia, Wisconsin and Wyoming.

In Connecticut, Georgia, Idaho, Illinois, Kansas, Louisiana, Maine, Massachusetts, Michigan, Montana, New Jersey, Tennessee, Texas, Utah, Vermont and West Virginia applications for pardon must first be considered by a Board or Court of Pardons, from which recommendations are made to the Governor.

In New Mexico pardons are granted only to restore citizenship after a prisoner has served full sentence, with good time allowance. In Iowa the Governor may grant pardons except in the case of life prisoners. In Nebraska the right to pardon is in the hands of the Governor, but in recent years the Governor has exercised only the right to grant paroles. The State Board of Pardons was abolished in Washington in 1899 and the Governor now grants paroles.

WHEN EXECUTIVE CLEMENCY IS EXERCISED.

In Arizona notices of applications for pardons must be published in a newspaper in the county where the crime was committed for at least two weeks prior to its consideration, and all applications must be signed by twenty-five citizens and be accompanied by recommendations for clemency from at least two-thirds of the Grand Jury indicting and two-thirds of the jury before whom the case was tried, as well as the District Attorney and Judge.

In California notice of application for pardons must be published in a newspaper in the county where the crime was committed for at least two weeks before its consideration.

In Iowa applications for pardon of life prisoners must be presented to the Legislature.

In Kansas, Vermont and West Virginia only conditional pardons are granted and those who receive such pardons are required to report monthly to the Governors.

In Montana notices of hearings upon applications for pardons must be published in a newspaper in the county in which the crime was committed.

PARDON OF FEDERAL PRISONERS.

All applications for pardon from United States prisoners serving terms in the various States prisons of the country or in Federal prisons must be sent to the Department of Justice at Washington. A pardons attorney, employed by the department, then examines the applications and the President acts upon his reports of the cases.

Parole and Indeterminate Sentence.

Parole laws are in force in Alabama, Arizona, California, Colorado, Connecticut, Idaho, Illinois, Indiana, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Jersey, New York, North Dakota, Ohio, Oregon, Utah, Vermont, Washington and Wisconsin. In Alabama, Arizona, Colorado, Nebraska, Ohio, Oregon and Wisconsin paroles are granted by the Governor; in Connecticut, Idaho, Illinois, Minnesota, New Jersey and Washington they are issued by the Board of Pardons; in California, Indiana, Michigan, North Dakota and Vermont, by the Boards of Prison Control; in Missouri parole is granted by the trial courts, and in Utah by the management of the prisons.

Prisoners may be committed under indeterminate sentence in Massachusetts, Minnesota, Connecticut and New York. In Iowa and Kansas prisoners are released under suspended sentence, or the reformatory plan.

Every-Day Law.

By CHARLES GOLDZIER, of the firm of House, Grossman & Vorhaus.

[Note.—The following facts are based upon the laws of the State of New York and may differ in many particulars from those in force in other parts of the United States.—Ed.]

LANDLORD AND TENANT.

(a) A lease for not more than one year need not be in writing. Where nothing is stated as to the term of the hiring such hiring is either at will or by the month, in which case a notice of one month must be given to terminate the contract, but in the city of New York where no term is specified the hiring is until the 1st of May following.

(b) Taxes are payable by the landlord, unless otherwise agreed upon.

(c) The tenant is bound to leave the premises in the same state of repair in which he received them, reasonable wear and tear excepted.

(d) Where the tenant agrees to repair he must rebuild the premises if they are destroyed

(e) A landlord has no lien upon the property of his tenant for rent due.

(f) The landlord does not guarantee that the premises are tenantable, and the tenant is bound to pay rent even though the house should be destroyed, but where the premises become untenantable in case of fire the tenant may move and the lease becomes abrogated.

(g) The landlord is not liable for damages sustained by one tenant through the negligence of another, but if any part of the premises is retained by the landlord, such as halls, the roof, entries and stairs, he is liable for negligence in not keeping them in proper repair.

HUSBAND AND WIFE.

(a) The real estate of the wife is her own property free from every claim of her husband, and she can dispose of it without her husband. The husband's property is subject to the wife's right of dower, which is one-third interest after his death during her lifetime. The personal property of the wife is her own, and can be disposed of without the husband. The wife can enter into contracts to the same effect as if unmarried.

(b) The husband is not liable for the debts of his wife incurred prior to her marriage, nor for any debts incurred by her in any separate business carried on by her, but he is liable for reasonable debts incurred by her for her support if he fails to furnish it.

(c) The wife is entitled to the control of the children equally with the husband.

(d) In case of death without a will the husband takes all the wife's personal property; the wife takes one-third where there are children and one-half where there are none.

(e) If there are children the husband is entitled to a life estate in his wife's real property upon her death, but if there are no children he has no rights to real estate.

(f) Either wife or husband may be disinherited by will, except that the wife cannot be deprived of her dower.

FINDING.

(a) Property which is found belongs to the person who finds it, unless the real owner is discovered and claims it. The finder need not search for the owner or advertise the property.

(b) Property found in a store or public conveyance may be retained by the finder until the owner claims it, irrespective of any regulation to the contrary.

(c) If property is found under such circumstances that the finder has knowledge as to who the real owner is, and the owner is present, it would be larceny not to return it.

(d) The finder is not entitled to a reward unless it was offered before the surrender of the property, but he is entitled to reasonable expenses incurred in taking care of the property.

BIRTHS AND DEATHS.

(a) It is the duty of any physician or midwife attending at a birth, or if none attends, of the parent or custodian of the child within 30 days to file in the office of the local health board a certificate showing the name of the child, the date of birth and the name of the parents.

(b) Bodies may not be removed from one city to another or buried without leave from the Board of Health, which can be had only upon the certificate of the Coroner or an attending physician, or upon an affidavit of some credible person as to the name of the deceased and the time and circumstances attending his death.

Failure to comply with these provisions is punishable as a misdemeanor.

(c) It is a crime for a mother to conceal the birth and death of a child.

INFECTIOUS DISEASES.

(a) It is the duty of every doctor attending a patient affected with an infectious disease to report to the Board of Health the nature of such disease. The Board of Health may quarantine any person affected with such disease, and may destroy any property thus affected without compensation.

(b) Where a landlord lets premises knowing them to be infected without disclosing that fact to the tenant he is liable for damages sustained by reason of such infection.

(c) Persons infected may be forcibly removed to a hospital and there detained.

(d) It is a misdemeanor for a person willfully to expose himself or another in any public place when infected with a contagious disease, except to be removed in a manner not dangerous to the public.

VACCINATION.

Vaccination is not compulsory, but persons who are not vaccinated may be quarantined if they attempt to enter the State, and children may be prevented from attending school unless they are vaccinated.

DOING BUSINESS UNDER AN ASSUMED NAME.

It is necessary for the person or persons who desire to do business under assumed names to file in the office of the clerk of the county where the principal place of business is conducted a certificate acknowledged before a Notary or Commissioner of Deeds, stating the name of the person or persons who intend to carry on the business, their residence and post office address, the name under which the assumed business is to be carried on and the place of business. It is a penal offence to carry on such business without these prerequisites.

MASTER AND SERVANT.

(a) A contract of employment not to be performed within one year from its date must be in writing; where no time of employment is specified the employe may leave or be discharged at any time, even though the compensation be at so much a year or a week; eight hours constitute a day's labor, but a longer or shorter time may be fixed by express agreement; an employer is liable to arrest upon execution in an action brought in the Municipal Court of the city of New York for wages amounting to $50 or less; if an employe is discharged for cause he is entitled to his wages to the day of his discharge.

(b) An employer is bound to furnish his employes with a safe place to labor, with safe appliances and sufficient instructions in their use, and is liable for damages for injury sustained by his failure in that regard, but he is not liable for the negligence of a co-employe, unless he employs him with notice of his incompetency; where the employe stands in the position of a foreman or superintendent in directing work or furnishing appliances the employer is liable in that case; notice of the accident must be given within 120 days, and the action must be brought within one year.

(c) An employer is liable to a stranger for negligent acts of his employe within the scope of his employment, but not for wilfully malicious acts; an employer is bound by the contracts of his employe made within the scope of his employment; a contract made by an employe may be satisfied by the employer, although originally not made in his behalf.

The Hunting and Fishing Laws.

THE NATIONAL GAME LAW.

The following is the text of the Lacey Law, which gives the Department of Agriculture power to act in matters pertaining to the preservation and restoration of game:

That the duties and powers of the Department of Agriculture are hereby enlarged so as to include the preservation, distribution, introduction and restoration of game birds and other wild birds. The Secretary of Agriculture is hereby authorized to adopt such measures as may be necessary to carry out the purposes of this act, and to purchase such game birds and other wild birds as may be required therefor, subject, however, to the laws of the various States and Territories. The object and purpose of this act is to aid in the restoration of such birds in those parts of the United States adapted thereto, where the same have become scarce or extinct, and also to regulate the introduction of American or foreign birds or animals in localities where they have not heretofore existed.

The Secretary of Agriculture shall make and publish all needful rules and regulations for carrying out the purposes of this act, and shall expend for said purposes such sums as Congress may appropriate therefor.

Sec. 2. That it shall be unlawful for any person or persons to import into the United States any foreign wild animal or bird except under special permit from the United States Department of Agriculture: Provided, That nothing in this section shall restrict the importation of natural history specimens for museums or scientific collections, or the importation of certain cage birds, such as domesticated canaries, parrots, or such other species as the Secretary of Agriculture may designate.

The importation of the mongoose, the so-called "flying foxes" or fruit bats, the English sparrow, the starling, or such other birds or animals as the Secretary of Agriculture may from time to time declare injurious to the interest of agriculture or horticulture is hereby prohibited, and such species upon arrival at any of the ports of the United States shall be destroyed or returned at the expense of the owner. The Secretary of the Treasury is hereby authorized to make regulations for carrying into effect the provisions of this section.

Sec. 3. That it shall be unlawful for any person or persons to deliver to any common carrier, or for any common carrier to transport from one State or Territory to another State or Territory, or from the District of Columbia or Alaska to any State or Territory, or from any State or Territory to the District of Columbia or Alaska, any foreign animals or birds, the importation of which is prohibited, or the dead bodies or parts thereof of any wild animals or birds, where such animals or birds have been killed in violation of the laws of the State, Territory, or District in which the same were killed: Provided That nothing herein shall prevent the transportation of any dead birds or animals killed during the season when the same may be lawfully captured, and the export of which is not prohibited by law in the State, Territory, or District in which the same are killed.

Sec. 4. That all packages containing such dead animals, birds, or parts thereof, when shipped by interstate commerce, as provided in Section 1 of this act, shall be plainly and clearly marked, so that the name and address of the shipper and the nature of the contents may be readily ascertained on inspection of the outside of such packages. For each evasion or violation of this act the shipper shall, upon conviction, pay a fine of not exceeding $200; and the consignee knowingly receiving such articles so shipped and transported in violation of this act shall, upon conviction, pay a fine of not exceeding $200; and the carrier knowingly carrying or transporting the same shall, upon conviction, pay a fine of not exceeding $200.

Sec. 5. That all dead bodies, or parts thereof, of any foreign game animals, or game or song birds, the importation of which is prohibited, or the dead bodies, or parts thereof, of any wild game animals, or game or song birds transported into any State or Territory, or remaining therein for use, consumption, sale or storage therein, shall upon arrival in such State or Territory be subject to the operation and effect of the laws of such State or Territory enacted in the exercise of its police powers, to the same extent and in the same manner as though such animals or birds had been produced in such State or Territory, and shall not be exempt therefrom by reason of being introduced therein in original packages or otherwise. This act shall not prevent the importation, transportation or sale of birds or bird plumage manufactured from the feathers of barnyard fowl.

GAME LAWS FOR NEW YORK STATE.

The following is a summary of the laws governing hunting and fishing in the State of New York, with all amendments to June, 1902: (All Dates Are Inclusive.)

Close Season for Animals.

Deer, Nov. 16-Aug. 31. Sullivan Co., Nov. 16-Oct. 31; Ulster, Greene, Delaware and Putnam Cos., protected until Sept. 1, 1907. Moose, elk, caribou, antelope, protected all times. Squirrel, Dec. 16-Sept. 15; Greene Co., Dec. 16-Sept. 30; Rensselaer Co., Dec. 1-Sept. 30. Rabbits, Livingston, Wyoming, Erie, Orange, Schoharie, Monroe, Orleans, Steuben, Albany, Ulster, Dutchess and Columbia Cos., Dec. 16-Aug. 31; Richmond and Richland Cos., Dec. 31-Oct. 31; Oneida and Sullivan Cos., Feb. 15-Sept. 15; Greene Co., Dec. 16-Sept. 30; Fulton Co., Feb. 1-Oct. 31. Beaver protected all time. Mink, skunk, muskrat and foxes: Cattaraugus, Chautauqua, Oneida, Madison, Otsego, Wayne, Cayuga, Livingston, Jefferson, Chemung, Chenango, Genesee and Wyoming Cos., May 1-Oct. 31. Muskrat houses may not be injured at any time. Foxes in same counties (except Cayuga), May 1-Sept. 30. Game limit: 2 deer a season.

Close Season for Birds.

Quail, Dec 16-Oct. 31. There shall be no open season for quail in the counties of Cayuga, Wyoming, Niagara, Monroe, Saratoga, Chattaraugus, Chautauqua, Erie, Richmond, Genesee and Montgomery prior to the year 1903. (Protected in Renssaelaer to 1903.) (Grouse, Dec. 16-Sept. 15; Ulster, Sullivan and Greene Cos., Dec. 16-Sept. 30; Westchester Co., protected until 1905.) Genesee, Wyoming, Erie, Niagara, Orleans, Livingston, Rockland, Cayuga and Monroe Cos. protected until 1903. Woodcock, Dec. 16-Sept. 15; Ulster and Greene Cos., Dec. 16-Sept. 30; Oneida Co., Nov. 16-Aug. 31; Clinton, Essex, Warren, Hamilton and Fulton Cos., Dec. 16-Aug. 15. Protected in Rensselaer Co. to 1903. Plover, rail, mudhen, curlew, water chicken, yellow legs, surf birds, May 1-Aug. 31. Pheasants protected until 1905 in all counties except Suffolk; Suffolk, Jan. 1-Oct. 31. Wild duck, geese, brant, swan, April 30-Aug. 31; web-footed fowl, Jefferson Co., Feb. 1-Aug. 31. Limit: 36 grouse; 36 woodcock. In addition to the ordinary legislation protecting other wild birds the statutes provide that no part of the plumage, skin or body of any protected bird may be sold or had in possession for sale.

Close Season for Fish.

Trout, Sept. 1-April 15. Spring Brook, Sept. 1-Mar. 28; Gilboa and Conesville (except Schoharie River), Aug. 1-April 30. Lake trout, land-locked salmon, ouananiche, Oct. 1-April 30 (except in Lakes Erie and Ontario, where there is no close season, and Dutchess, Ulster, Sullivan, Orange, Rockland, Putnam, Westchester and Richmond Cos., July 1-Mar. 31). Black bass, Jan. 1-June 15; St. Lawrence River and waters of Jefferson Co., Jan. 1-June 9; Lake George and Schroon Lake, Dec. 16-July 31; Saimon and St. Regis rivers, Nov. 15-May 1. Pickerel, pike, Mar. 1-April 30; St. Lawrence River, Jan. 1-June 9. Muskallonge, Mar. 1-May 30. Salmon, Aug. 15-Mar. 1. Salt water striped bass, by net in Hudson River, Mar. 31-July 1. Size limit: Trout, 6 in.; lake trout, land-locked salmon, etc., 15 in.; black bass, 10 in.; salt water striped bass, 8 in. Limit of catch: Black bass, 24; two persons in one boat, 36; in St. Lawrence River, 12; two persons in one boat, 24. Frost fish, white fish, etc., may be taken with nets from inland lakes not inhabited by trout.

Other Important Regulations.

In Westchester Co. game may not be taken in a public highway, on railway lands, or lands purchased or condemned for the Croton aqueduct. Fish may not be taken in fresh water inhabited by trout except by angling. Trout must not be disturbed while spawning, and fishing through the ice in waters inhabited by trout or lake trout is forbidden. When use of nets is permitted the meshes must not be less than one and one-eighth inch bar. Fishing within 50 rods of any fishway; taking fish by drawing off water and the use of explosives are prohibited. The use of ferrets or any other improper method of hunting or fishing is prohibited.

Close Season for Animals.	Close Season for Birds.	Close Season for Fish.	Other Important Regulations.
Deer, first two Wednesdays and first two Fridays after the first Tuesday in November; hare, rabbits, squirrels, Jan. 1-Oct. 31.	Quail, grouse, Jan. 1-Oct. 31; woodcock, Jan. 1-July 31; plover, curlew, snipe, yellow legs, killdeer, dowitcher, rail, shortnecks, sand piper, ringnecks and oxeyes, Jan. 1-June 30. Wild Ducks, geese, swan, brant, May 1-Sept. 30. Meadow hens, mudheds, gallinule, Dec. 31-Aug. 15.	Trout, Aug. 31-Mar. 28; lake trout, Oct. 1-Mar. 31; black bass, Jan. 1-May. 29.	Ducks, etc., may be taken by aid of floating devices in Long Island Sound, in Shinnecock, Gardiner and Peconic bays, and, except from Sept. 30 to Oct. 19, in Great South Bay west of Smiths Point. Sail boats may also be used in Long Island Sound, Gardiner and Peconic bays.

The Game and Fish Laws of the United States.

NOTE.—Practically all the States and Territories prohibit the export of game; hunting or fishing for commercial purposes; hunting big game with dogs, or the use of any but ordinary methods in the taking of game, birds, or fish. In most of the States and Territories, however, there are special provisions permitting the use of unlawful methods in hunting and fishing in cases where the game or fish to be taken are to be used for scientific purposes, and there are few States that do not permit the netting of minnows for bait.

When no close season is recorded in this table none is provided by law. The possession of fish or game during a close season is always unlawful, but a few States permit possession for a few days after the season closes.

The killing of harmless, song and insectivorous birds is forbidden by the laws of nearly all the States and Territories, but these statutes do not apply to birds like the hawk, crow, owl, blackbird, English sparrow, etc.

(All Dates Are Inclusive.)

State or Territory.	Close Season for Animals.	Close Season for Birds.	Close Season for Fish.	Other Important Regulations.
Alabama[1]	Deer, Jan. 1-Aug. 31; squirrel, Feb. 1-June 30.	Game birds, March 2-Nov. 14; pheasants, until February, 1904.

[6]Birds or small animals may be killed for protection of crops.

The Game and Fish Laws of Canada.

The Customs Department of Canada has decided that duties levied on sportsmen's outfits carried into the provinces must be returned when the property is taken back to the United States, but all duties on ammunition and provisions are collectible

All persons other than British subjects desiring to fish in Canadian waters shall first obtain a permit, the fee for which is $5 for three months, or $10 for six months, but foreigners temporarily domiciled in Canada may be exempt from this regulation if they employ Canadian boats and boatmen. Anglers' permits are not required in the Thousand Islands waters of the St. Lawrence River.

The exportation of game is forbidden by the Canadian Tariff Act, but trout to an extent not exceeding one package of twenty-five pounds in one season may be exported.

Province.	Close Season for Animals.	Close Season for Birds.	Close Season for Fish.	Other Important Regulations.

Chinese Exclusion Act.

In spite of the efforts of Chinese ministers in the United States, diplomats of that country who used all their abilities for the benefit of their people, and in spite of the eloquence of Wu Ting Fang, the Fifty-seventh Congress re-enacted the Chinese Exclusion Law, keeping from this country Chinese laborers who might compete with American workmen. When the question of the re-enactment of this law, which was about to become null by statute, came before Congress, the old cry of "the Chinese must go" was raised with a new emphasis, for the colonies of Hawaii and the Philippines had to be considered. In these latter the Chinese laborer seemed to be a factor almost necessary to the cultivation of the products indigenous to the soil, and the Governor of Hawaii, in his report for 1901, asked that the law be made inactive in Hawaii, at least until commercial conditions were placed on a firmer basis. Minister Wu Ting Fang brought all his diplomatic powers to bear on the question, arguing the right of his people to have as free entry into the United States as those of any other nation. From the Pacific Coast, however, there came a demand that could not be resisted for the re-enactment of the exclusion law and for the preservation of American labor. The Governor of California was particularly strong in opposing any change in the conditions, claiming that a free entry of Chinese coolie labor would mean a fatal competition for the American who demanded and deserved higher wages for ordinary work. After some debate, in which several of the most prominent statesmen of Congress took active part, the exclusion law was re-enacted by a large vote.

While there seemed to be but little question as to the unique aptitude of Chinese coolies for the sort of field work demanded in Hawaii, there was thought to be no constitutional way of preventing laborers in these islands from becoming citizens, or their children being born into suffrage rights.

The Chinese Exclusion Act provides "that from and after the passage of this act . . . . . the coming of Chinese laborers to the United States be, and the same is hereby suspended, and during such suspension it shall not be lawful for any Chinese laborer to come from any foreign port or place, or, having so come, to remain in the United States."

Those Who Are Exempt and Those Who Are Not.—Any registered Chinese laborer who has a lawful wife (to whom he has been married at least one year), child, or parent, in the United States, or property of the value of $1,000, or debts of like amount due him and pending settlement, may return to this country, provided that, before leaving the United States, he shall have deposited with the Collector of Customs of the district from which he departed, a full description, in writing, of the qualifications entitling him to return. This right of return must be exercised within one year, except in cases when, by reason of sickness or other cause of disability, he was unable to avail himself of the privilege, but these facts must be fully reported to the Chinese Consul at the port of departure and by him certified to the satisfaction of the Collector at the proposed port of arrival. In order to enjoy the benefits of these conditions a Chinese person who proposes to leave the country must apply to the Collector of Customs of the district from which he wishes to depart at least one month prior to the time of his departure, and if the certificate he may obtain be transferred it shall not only become void, but the person to whom it was issued shall forfeit his right to return to the United States.

Chinese officials, teachers, students, merchants or travellers for curiosity or pleasure, may still come to the United States and may continue in this country, but even those of the exempt classes, and their wives and children, must present the certificates prescribed by law. Such certificates must be issued by the Chinese Government, or the Government under which the subject last resided, and must be vised by the diplomatic or consular representative of the United States in the country or port whence they departed. Mexican functionaries and Chinese consular officials, either here or in China, have no right to issue such certificates.

The word "laborer" is legally construed to mean both skilled and unskilled manual laborers, including Chinese employed in mining, fishing, huckstering, peddling; laundrymen, or those engaged in taking, drying, or otherwise preserving shell or other fish for home consumption or exportation. Similarly, the term "merchant" has a mandatory meaning, which is: "A person engaged in buying and selling merchandise, at a fixed place of business, which business is conducted in his name, ... and who does not engage in the performance of any manual labor, except such as is necessary in the performance of his business."

No law on the Federal Statutes is more rigidly enforced than that which applies to Chinese exclusion, and in 1898 the Attorney General decided that the true theory of the law was not that all Chinese persons might enter this country who were not specifically forbidden, but that only those are entitled to enter who are expressly permitted to do so. As the result, Chinese persons known as "traders" have been forbidden to enter this country, even when they presented the prescribed certificates, and admission has been denied to all persons described as "salesmen," "clerks," "buyers," "bookkeepers," "accountants," "managers," "storekeepers," "apprentices," "agents," "cashiers," "interpreters," "physicians," "proprietors of restaurants," etc. The law definitely provides that only "officials, teachers, students, merchants or travellers for curiosity or pleasure" may be admitted to the country, and all persons not coming under one of these classifications are excluded, while the fact that a man may be the employer of a large number of persons, as in the case of the owner of several laundries, does not change his status as a laborer. Chinese persons entering the United States as "students" or "merchants" and soon becoming laborers, have no right to remain, and the fact that a Chinese person is naturalized under the laws of another country does not entitle him to enter the United States. Long residence in this country does not entitle a Chinaman to visit China, even for a short period, but a merchant in this country may return to China without loss of rights in this country provided he establishes by the testimony of two creditable witnesses other than Chinese, the fact that he has conducted the business of a "merchant" as defined by law, and has not engaged in the performance of manual labor for at least one year before his departure. The requirement that a "merchant" must conduct his business in his own name is fulfilled if the Chinaman can prove that he is, or was, an actual bona fide partner of a legitimate mercantile firm, even if his name is not a part of the firm name.

Chinese laborers who left the country prior to the promulgation of this treaty with China cannot now return, and those who go out of the country under the present treaty cannot be permitted, upon their return, to bring their wives with them.

Chinese persons employed on board American or other vessels, whether in the United States Navy or in the merchant service, may enter port, but they cannot land in the United States; but Chinese persons shipping at a United States port on an American vessel and returning in the same capacity on the same vessel are not affected by the provisions of the Exclusion Act.

The Supreme Court has decided that children born in this country of Chinese parents are of right citizens of the United States, and as such are entitled to return to this country after a temporary absence, provided the fact of their birth here is established.

Naturalization papers obtained by Chinese subjects subsequent to May 6, 1882, were illegally issued and cannot be recognized.

A Chinese laborer possessing a return certificate may be admitted only at the port from which he departed, and no Chinese person, except diplomatic or consular officers and their attendants, are permitted to enter the United States except at the ports of San Francisco, Portland, Ore.; Boston, New York, New Orleans, Port Townsend, Richford, St. Albans, Plattsburg, Niagara Falls, Buffalo, Key West, Tampa, Mobile, Eagle Pass, Laredo, El Paso, Nogales, San Diego, Astoria, Pembina and Honolulu.

A Chinese person who has clandestinely entered this country cannot acquire a right to remain here, or to return to the United States, by qualifying as a "merchant," and any Chinese person found unlawfully in the United States will be imprisoned at hard labor for a period not exceeding one year, and, afterwards, deported, while any person who aided in bringing him into the United States will be held liable for all necessary expenses incurred in the investigation and removal. If any Chinaman is found who is unable to produce his certificate of registration, or satisfactory evidence of his status as prescribed by law, he must be reported to the proper authorities for the determination of his right to remain in the country.

The importation of opium into the United States is forbidden to Chinese subjects and all opium so imported will be seized and forfeited.

COMMERCIAL LAWS OF STATES AND TERRITORIES.—Continued.

States and Territories.	Days of Grace. Time Drafts.	Sight Drafts.	Demand Drafts.	Damage in Protested Bills.
California	None	None	None	In State, 2%; in U. S., 5%; outside U. S., 15%.
Colorado	None	None	None	Inland and foreign, 10%.
Connecticut	None	None	None	In N. Y. City, 2%; in Middle Atlantic States, Dist. of Col., or New England (except Conn.), 3%; in N. C., S. C., Ill., Ind., Ohio, Ga., Ky., Mich., 5%; elsewhere in U. S., 8%.
Delaware	None	None	None	If "beyond seas," 20%.
Dist. of Columbia	None	None	None	———
Florida	None	None	None	5% on foreign bills.
Georgia	3	None	None	Outside State, but in U. S., 5%; outside U. S., 10%
Idaho	None	None	None	Same as California.
Illinois	None	None	None	Same as Georgia.
Indiana	3	3	3	Same as Georgia.
Indian Territory	3	3		Same as Arkansas.
Iowa	3	3	None	If not in State, but in U. S., 3%; outside U. S., 5%.
Kansas	None	None	None	If outside State, 6%.
Kentucky	3	3	None	No damage except when drawn on person outside U. S. within 18 months; then 10%.
Louisiana	None	None	None	Same as Georgia.
Maine	3	3	None	1% if 75 miles distant; if in N. Y. or any State north of N. Y. (except Maine), 3%; south of N. Y. and north of Fla., 6%; elsewhere in U. S., 9%.
Maryland	None	None	None	If outside State, but in U. S. 3%; outside U. S., 15%.
Massachusetts	None	3	None	If bill is $100, payable in Mass., not over 75 miles distant, 1%; elsewhere in New England or N. Y., 2%; in N. J., Pa., Del., Md., 3%; in Va., W. Va., N. C., S. C., D. C. or Ga., 4%; elsewhere in U. S., or outside U. S., 5%.
Michigan	3	3	None	If in Wis., Ill., Ind., Pa., Ohio, N. Y., 3%; in Mo., Ky., Me., N. H., Vt., Mass., R. I., Conn., N. J., Del., Md., Va., D. C., 5%; elsewhere in U. S., 10%; outside U. S., 5%.
Minnesota	3	3	None	Same as Georgia.
Mississippi	3	3	3	Same as Georgia.
Missouri	3	None	3	If in State, 4%; in U. S., 10%; outside U. S., 20%.
Montana	None	None	None	If in State, 2%; in U. S., 5%; outside U. S., but in North America or Europe, 10%; elsewhere 15%.
Nebraska	3	3	None	If outside State, but in U. S., 6%; outside U. S., 12%.
Nevada	3	None	3	If in any State east of Rocky Mountains, 15%; outside U. S., 20%.
New Hampshire	3	3	None	———
New Jersey	None	None	None	———
New Mexico	3	3	3	If in U. S., 6%; outside U. S., 12%.
New York	None	None	None	———
North Carolina	3	3	None	If outside State, but in U. S., 3%; in North America (except N. W. Coast), West India or Bahama Islands, 10%; Europe or South Am., 15%; elsewhere, 20%.
North Dakota	None	None	None	If in State, 2%; in Neb., Ia., Minn., Wis., Ill., Mo., Mont., S. Da., 3%; elsewhere in U. S., 5%; outside U. S., 10%.
Ohio	None	None	None	———
Oklahoma	3	3	3	Same as North Dakota.
Oregon	None	None	None	Same as Georgia.
Pennsylvania	None	None	None	Anywhere in U. S., except Cal., N. M. or Ore., 5%; elsewhere in North Am., Europe or east coast of So. Am., 10%; west coast So. Am., 15%; Asia or Africa, 20%.
Rhode Island	3	3	3	Same as Georgia.
South Carolina	3	3	None	Outside State, but in U. S., 10%; any part North Am. or West Indies, 12½%; elsewhere, 15%.
South Dakota	3	3	3	Same as North Dakota, except read "N. Da." for "S. Da."
Tennessee	None	None	None	Outside of State, but in U. S., 3%; in North Am., West Indies or countries on Gulf of Mexico, 15%; elsewhere, 20%.
Texas	3	3	None	Same as Arizona.
Utah	None	None	None	———
Vermont	None	None	None	———
Virginia	None	None	None	Same as Iowa.
Washington	None	None	None	Same as Georgia.
West Virginia	None	None	None	Outside the State, but in U. S., 3%; outside U. S., 10%.
Wisconsin	None	None	None	Outside the State, 5%.
Wyoming	3	3	3	———

*While the facts contained in this tabulation were obtained from the most reliable sources, the commercial laws are liable to be amended by legislatures. Time of Planting, Quantity of Seed, etc., for Several Regions.

The information contained in the following table is from the latest reports of the United States Department of Agriculture:

NEW ENGLAND.

Kind of crop.	Date of planting.	Best soil.	Amount of manure per acre.	Amount of seed per acre. (1)	Weeks to mature
Corn	May 10 to 30	Sandy or clay loam	8 to 12 tons	8 to 12 qts	14-17
Wheat	Fall or Spring	Clay loam	18 tons	2 bush	20
Oats	Apr. to May	Strong loam	6 to 8 tons	2 to 3 bush	11-15
Barley	Apr. to June 20	....do	7 to 8 tons	....do	10-15
Rye	Apr. to May. Sept.	Medium loam	....do	5 to 6 pecks	40
Buckwheat	June 1 to 20	Light loam	4 to 6 tons	1 to 1¼ bush	10-15
White beans	May to June	Sandy loam	7 to 8 tons	8 to 16 qts	8-14
Potatoes	Apr. 15 to May 1	Rich loam	15 to 20 tons	8 to 20 bush	12-20
Turnips	July 1 to Aug. 3	Sandy loam	10 tons	1 lb	10
Mangels	Apr. 15 to May 5	Strong heavy loam	8 to 15 tons	4 to 6 lbs	17-22
Tobacco	Seed bed Apr	Sandy loam	8 to 12 tons		9-12
Hay					

MIDDLE STATES.

Corn	Apr 20 to May 30	Medium loam	8 to 12 tons manure	6 to 8 qts	16-18
Wheat	Sept. 20 to Oct. 20	Loam	8 tons; 300 lbs. fer	2 bush	41-43
Oats	Mar. to May	Moist clay loam	....do	2 to 2½ bush	16-17
Barley	Mar. to May	Clay loam	....do	....do	13-16
Rye	Sept. 1 to Oct. 1	Sand or gravel loam	....do	1½ bush	40-43
Buckwheat	June to July	Loam	5 tons	½ to 1½ bush	8-16
White beans	May to June	Sandy loam	8 tons	1¼ bush	13-14
Potatoes	Mar to May	Loam	10 to 18 tons	8 to 15 bush	14-22
Sweet potatoes	May to June	Sandy loam		10 to 12 bush	10-15
Cabbage	Mar. to July	Clay or sandy loam	300 to 600 lbs. fer	4 to 8 oz	8-15
Turnips	July	Loam		2 to 5 lbs	10-12
Mangels	May	....do	10 to 20 tons	10 to 15 bush	15-18
Flax	May	Limestone loam		20 qts	8-10
Tobacco	Seed bed, Mar	Sandy loam	Commercial fer		15-20
Hay, timothy	Aug. to Oct	Clay loam		6 to 8 qts	
Hay, clover	Feb. to Apr	....do		6 qts	

CENTRAL AND WESTERN STATES.

Corn	Apr. 1 to June 1	Black or sandy loam	5 to 10 tons	6 qts	16-20
Wheat	Fall or Spring	Strong loam	8 tons	2 bush	40-42
Oats	Apr. 1 to May 1	Clay loam	....do	2 to 3 bush	12-14
Barley	Fall or Spring (1)	....do	....do	2 bush	11-13
Rye	Sept. 1 to 30	Light loam	....do	1 to 2 bush	35-40
Buckwheat	June	Clay loam	5 tons	....do	10-12
White beans	May 10 to June 10	....do	8 tons	1½ bush	12
Potatoes	Mar. 15 to June 1	Sandy loam	5 to 10 tons	5 to 10 bush	10-20
Turnips	July 15 to Aug. 30	Loam or muck	8 to 10 tons	1 to 6 lbs	10-16
Mangels	Apr. 1 to May 15	Sandy loam	8 to 12 tons	6 to 8 lbs	22-24
Flax	Mar. 15 to May 15	Loam	10 to 15 tons	2 to 3 pecks	15-20
Tobacco	Seed bed, Mar	Sandy loam	8 to 10 tons	Oz. to 6 sq. rd	15-18
Hay	Apr. to May	Clay loam	10 tons	8 to 15 lbs	

SOUTHERN STATES.

Cotton	Feb. to May 15	Sandy loam (2)		1 to 3 bush	20-30
Corn	Feb. to June	Rich loam	10 bush. cot. seed	8 qts	18-20
Wheat	Sept. to Nov	Clay loam (2)	8 tons	2 bush	42
Oats	Feb., May, Sept	....do	8 to 10 tons	2½ bush	17
Barley	Apr. to May	....do	....do	....do	17
Rye	Sept. to Oct	....do	10 tons	1½ bush	43
White beans	Mar. to May	Light loam	8 tons	1 to 2 bush	7-8
Cabbage	Oct., Mar. to May	....do	6 to 10 tons	¼ to ½ lb	14
Watermelons	Mar. 1 to May 10	Rich, light loam	5 tons; 300 lbs. fer	2 to 7 lbs	16-20
Onions	Feb. 1 to Apr. 10	Loam or muck			16-24
Potatoes	Jan., Feb. to Apr	Light loose loam	8 to 12 tons	8 to 10 bush	11-15
Sweet potatoes	May to June	Sandy loam		10 to 12 bush	12-15
Pumpkins	Apr. 1 to May 1	Rich, light loam		4 to 7 lbs	17-20
Tomatoes	Jan. 1 to Feb. 19	Rich, sandy loam		4 to 9 oz	14-20
Turnips	Feb., Aug., Apr	Rich, light loam		2 to 6 lbs	8-12
Tobacco	Seed bed, Mar	Sandy loam	8 to 15 tons	Oz. to 6 sq rd	18-20
Cow peas	May 1 to July 15	....do	200 to 300 lbs. phos	2 to 5 pecks	6-8

(1) The standard varieties of seed planted in the several sections of the United States are as follows: Corn: New England, leaming, sanford, flint; Middle States, leaming, white dent, yellow dent; Central and Western States, leaming, sanford, flint, white dent; Southern States, hickory king, goardseed, Cox prolific. Wheat. Middle States, fultz; Central and Western States, fultz, poole, fife; Southern States, fulcaster. Oats: New England, white; Middle States, white, black; Central and Western States, gray Norway, silver mine, Russian; Southern States, Texas rustproof. Barley: Middle States, mansbury; Southern States, Tennessee winter. Rye: New England, white; Middle States, white, winter; Central and Western States, winter; Southern States, excelsior winter. Buckwheat: Middle States, silver hull; Central and Western States, silver hull. White Beans: Middle States, Central and Western States, Southern States, navy. Potatoes: New England, green mountain, carmen 3, rose; Middle States, rose, carmen 3, rural 2; Central and Western States, hebron, rural, early rose, early Ohio. Turnips: New England, yellow; Middle States, purple top; Southern States, purple top. Mangels: New England, Middle States, long red. Tobacco: Central and Western States, yellow prior, Spanish, white burley. Hay, clover: Middle States, medium red. Sweet Potatoes: Middle States, yellow Jersey; Southern States, yellow Jersey. Cabbage: Middle States, Dutch; Southern States, wakefield, flat Dutch, Charleston. Flax: Middle States, rega, white blossom, Dutch. Cotton: Southern States, Texas stormproof. Cow peas: Southern States, black, whippoorwill. Watermelons: Southern States, Jones, rattlesnake. Spring wheat is to some extent grown in Ohio, Indiana, Illinois and many other States. It matures in eighteen to twenty weeks.

(2) In Texas the black loam is a good soil for cotton, corn, wheat, and most other field crops.

What to Do Before the Doctor Comes.

By JOHN J. M'MAHON, M. D.

Many times lives have been lost in cases of drowning, poisoning, etc., when they might have been saved if assistance had been rendered pending the arrival of a medical man. Keep cool; remember that any help given to be useful must be carefully and quickly rendered, especially in drowning and poisoning cases. Too much attention, turning and moving by a crowd of excited people will probably do as much harm as too little. All cannot do the same thing at the same time. Let one take charge and let the others assist him. Keep the crowd of curious persons that always gather away from the patient. He will get more air and those helping him will be freer to work. Always send for a physician in serious accidents. If one cannot be at hand immediately, as is often the case, help may be given pending his arrival if the suggestions below are remembered. They have been written as simply and concisely as possible, with the hope that they may be remembered and acted upon in time of need.

POISONS.

In all cases of poisoning there should be no avoidable delay in summoning a physician. The most important thing is the the stomach should be emptied at once. If the patient is able to swallow, this may be accomplished by emetics, such as mustard and water, a teaspoonful of mustard to a glass of water, salt and water, powdered ipecac and copious draughts of luke-warm water. Vomiting may also be induced by tickling the back of the throat with a feather. When the patient begins to vomit care should be taken to support the head in order that the vomited matter may be ejeceed at once, and not swallowed again or drawn into the wind pipe.

Acids.—When acids have been taken, use alkalies—lime water, magnesia and chalk water—follow with mucilaginous drinks—flour and water, flaxseed tea, etc.

Opium and Other Narcotics.—Cold water should be dashed over the face and head, the body flicked with a wet towel and an emetic given such as mustard and water, and the patient must be kept awake. This may be accomplished by walking the patient and giving doses of strong coffee. If necessry artificial respiration as described in the treatment of drowning persons, should be used.

Alcoholic Poison.—Use emetics—ipecac, mustard and water, sulphate of zinc and water—after which use strong coffee and keep the body warm.

Strychnine.—After emetics have been given the patient should be disturbed as little as possible, for the least thing induces a convulsive attack. The most important thing is to keep the person warm and quiet. Bromide of potassium may be given, twenty grains at a dose, repeated every hour.

Salts of Mercury and Arsenic.—These are commonly used as bug poisons, and are powerful irritants, very often fatal, and when taken the whites of eggs and milk should be freely given, or flour and water, followed by an emetic.

Carbolic Acid.—Oleaginous substances, olive oil, sweet oil, etc., alcohol and water, lime water, sulphate of soda and magnesia, followed by emetics should be administered at once. Stimulants should be given, as there is always shock.

Oxalic, Sulphuric, Hydrochloric and Nitric Acids.—Use the oleaginous drinks described for carbolic acid, and follow with flaxseed tea.

Chloroform, Chloral and Ether.—Use cold applications on the head and chest and artificial respiration.

Iodine and Antimony.—Use flour and water or starch and water, followed by an emetic.

Nitrate of Silver.—Use salt and water.

DROWNING.

Handle the body gently. Loosen any clothing. Carry the body face downward, with the head slightly raised. No time should be lost in following out the instruction given below, which should be continued for hours without ceasing, or until a physician, who should be summoned immediately, shall arrive. The body should be stripped of all clothing, rubbed dry and placed in bed in a warm room. Warmth should be supplied to the body with hot water bottles or some other appliances. Cleanse the mouth of any dirt or mucus that may be in it, and draw the tongue forward with a handkerchief, holding it with the finger and thumb. This is most important, as it opens the windpipe, and should not be neglected. The patient should be turned upon his back, with head and shoulders slightly elevated. The operator, standing behind his head, should grasp the arms just above the elbow and draw them steadily and gently upward until they meet above the head, then bring them down to the side of the chest slowly and persistently at the rate of twenty times to the minute. These movements imitate expiration and inspiration. The trunk and limbs should be rubbed when breathing commences, and brandy and water may then be given.

BURNS AND SCALDS.

In severe cases the patient will suffer a great deal from shock. A stimulant should be given and the patient kept warm, wrapped in a blanket. The parts burned should be wrapped in common white wadding after an application of lime water and linseed oil, equal parts; castor oil, flour and treacle, baking soda and water or lotion of carbolic, consisting of a teaspoonful of carbolic to a quart of water, has been applied

LIME IN THE EYE.

Use a lotion of sugar and water or vinegar and water.

FAINTING.

Lay the person flat upon the back, loosen the clothing, allow plenty of fresh air, apply cold applications to the face and warmth to the feet.

FITS AND APOPLEXY.

Raise the head, loosen the clothing and apply cold applications to the head.

BLEEDING AT THE NOSE.

This may usually be arrested by putting a plug of lint into each nostril and cold applications to the forehead and nape of the neck. Hot water or powdered alumn may also be used, snuffed up the nostrils, or the vapors of turpentine.

BONES IN THE THROAT.

If a fish or other bone lodges in the throat insert the fore-finger and press upon the root of the tongue. This will induce vomiting.

Another simple method is to get upon all fours and cough, or else take emetic of mustard and water.

CONTUSIONS AND BRUISES.

Cold is the best application, either an ice bag or a piece of lint soaked in a solution of lead or boracic acid. If of a severe nature keep the lint moistened continuously. Tincture of arnica and witch hazel are also good remedies.

CUTS AND WOUNDS.

In bleeding from wounds or recent amputations press the finger or hand over the bleeding point, pressing on the main artery supplying blood to the wound. If this is not possible, apply a bandage as tightly as possible above the wound. By tying a handkerchief loosely around the limb, thrusting a short stick through it and twisting it tightly an excellent tourniquet may be improvised.

The blood from an artery which has been severed is a bright red, and comes in spurts with each beat of the heart. The color of the blood from an ordinary cut is of a dark purplish shade, and flows in a steady stream. All cuts should be washed out with warm water, to which one or two drops of carbolic acid has been added. The edges of the wound should then be brought together and held in position by strips of plaster, then bound up tightly with clean bandages.

Newspapers of the World.

Although the exact number of newspapers published in the world is not known statisticians estimate that there are about 50,000, about half of which are printed in the English language. Besides the 22,839 publications printed in the United States and Canada, Great Britain prints about 9,500; Germany, 7,000; France, 4,500; Japan, 2,000; Italy, 1,500; Austria-Hungary, 1,200; Asia, outside of Japan, 1,000; Spain, 850; Australia, 800; Russia, 800; Greece, 600; Switzerland, 450; Belgium, 300; Holland, 300, and all other countries, about 1,000.

The World's Fair at St. Louis.

By WALTER B. STEVENS, Secretary of the Louisiana Purchase Exposition.

The Louisiana Purchase Exposition, which is to be held at St. Louis in 1904, had its beginning assured by an Act of Congress, which on March 3, 1901, not only appropriated $5,000,000 in aid of it, but extended Government national supervision and patronage over it. In the eighteen months that have elapsed since that date organization has been perfected for all branches of the work of preparation. The site, embracing 1,190 acres, has been secured; most of the grading necessary to prepare it has been done; two of the fourteen exhibit buildings are approaching completion; four others are under construction, and contracts for the remaining buildings are being let as rapidly as specifications can be prepared.

The expenditures to date exceed $2,000,000; the contracts let exceed $5,000,000, and there is in the treasury of the company $5,500,000. The Government's appropriation of $5,000,000 has not yet been drawn upon and will not be until the company has expended $10,000,000. In addition to its general appropriation in aid of the Exposition, the Government has up to date appropriated $1,308,000 for its building and exhibits. The site for this government building has already been graded, and the contract for its construction will be let at once. This building is to be twice the length of the United States Treasury Department at Washington.

The fourteen exhibit palaces have an average width of about 550 feet, and vary in length from 750 feet to 1,500 feet. The Agricultural Building will be the largest erected up to this time for a single exposition department. The exhibit palaces will provide 200,000 acres of covered space for exhibits and will be located in a semi-circle a mile and one-half long, fronting upon terraces and cascades. An intramural system of transportation will have a length of between seven and eight miles. The World's Fair site at St. Louis is twice as large as that of the Columbian Exposition, and four times the space occupied by the Paris Exposition of 1900.

Up to the present time the legislatures of eighteen States and Territories have appropriated over $2,622,500 for their participation. Twelve other States and Territories have World's Fair organizations formed and popular funds started which will aggregate $1,450,500, which assures a total of $4,073,000 for buildings and exhibits of States and Territories alone. Twenty-five legislatures will meet in the Winter of 1902-3, and in all of them bills providing for World's Fair appropriations will be introduced. The best information obtainable from the States which have not yet had opportunity to act indicates that the fund for State and Territorial participation will reach $7,500,000, a sum about 50 per cent greater than the amount similarly expended at Chicago. Thirty-one States and Territories now have commissions appointed and organized to represent them at the fair, and in five other States legislation has been enacted authorizing commissions which have not yet been appointed.

The participation by the possessions of the United States will constitute an entirely new feature of international expositions. The Philippines, Porto Rico, Hawaii, Guam and Samoa have already under way preparations for representation. The Governor of Alaska is asking for $40,000 to properly exhibit the resources of that Territory; Porto Rico has made her appropriation; Hawaii has an organization; the Governors of Guam and of the Samoan Islands under the American Flag are preparing to send exhibits, and Governor Taft, of the Philippines, recently visited St. Louis and developed plans which will be carried out at once for participation by the Archipelago.

Foreign nations have acted even more promptly, and in nearly every instance on a more elaborate scale than in 1893. The Commissioners General of these countries have visited St. Louis, have held conferences with the officers and have asked for their building sites. France has received her site, and her representative has announced that the six acres will be utilized by the reproduction of the historic Petit Trianon, of Versailles, in the midst of a typical French garden. Mexico, Canada and Japan have asked for sites to be reserved for buildings, and Japan's appropriation alone will be twice that expended at Chicago. The plans of Siam for exhibits have been submitted. China has accepted and the Government has issued instructions to the provinces to prepare exhibits.

Cuba has also accepted, as have all the Central and South American Republics, with four exceptions, and from these favorable action is anticipated when Congresses meet during the coming Winter. Through diplomatic channels, Great Britain and Germany have informed the Government of the United States that in short time their commissioners will be prepared to take charge of their participation. Greece has already accepted, and in Italy, Switzerland and Belgium movements have been inaugurated which look to favorable government action. Declinations by other nations have been very few, and in most instances have been based on the shortness of time for preparation. This reason has been removed through the postponement of the Exposition by Congress to 1904, and reconsideration is now promised in nearly every case of early declination.

The dedication of buildings, however, will take place under the auspices of the National Commission on April 30, 1903, on which occasion the President of the United States, the Cabinet, Senators and Representatives, the Diplomatic Corps and Governors of States, as well as the foreign and State and Territorial Commissioners will be present.

SUNDAY-SCHOOLS IN THE UNITED STATES.

(Compiled by the American Sunday-School Union.)

These statistics do not include Roman Catholic, Hebrew, nor non-Evangelical Church schools (except in Maryland). There are about 750,000 scholars in Roman Catholic Sunday-Schools, and about 225,000 in others not counted. This would leave from 7,000,000 to 9,000,000 youths, between four and sixteen years, in the United States, not in Sunday-Schools of any denomination.

Circulation of the Bible.

According to publishers whose houses make a specialty of issuing Bibles, the circulation of this book is steadily increasing, and more copies are being sold each year than during the year preceding. The American Bible Society alone issued more than 1,500,000 Bibles last year, while the British and Foreign Bible Society turned out more than 5,000,000 copies. A little more than one-half of the Bibles published in this country are sold within the United States, most of the cheaper kind for use in mission schools. The American Bible Society has succeeded in publishing an entire Bible to be sold as low as 15 cents, and a New Testament for 5 cents. In England a Bible may be bought for sixpence and a New Testament for one penny. The American Society sells at cost, and the British Society at below cost. Since the American occupation of the Philippines the Bible has reached a circulation of nearly 80,000 copies, where scarcely one copy was used before. The British and Foreign Bible Society prints the Bible in 400 languages and dialects, but about 30 per cent of the issue is in English. The Oxford University Press is noted for publishing the most popular and the finest edition of the Bible—the Bagster. The output of Oxford Bibles is rated at 20,000 copies a week, and although a premium of one guinea is offered to any person who can point out a printer's error in any edition, the bill for printer's errors has never averaged more than five guineas a year. In the public libraries in New York the call for Bibles is mostly for old texts, though at the time of Jewish holidays Hebrew Bibles are in great demand.

How the Pope Is Elected.

On the eleventh day following the death of the Pope the Cardinals hold religious services in the Church of St. Peter at Rome and then adjourn to the Vatican, where they meet in conclave to elect the late Pope's successor. The Cardinal-Dean opens the proceedings by administering the oath of secrecy concerning their proceedings, and then the Cardinals are permitted to receive their friends until evening, when they are shut up in their cells. These cells are carefully guarded and no person is allowed near them, except they be on business connected directly with the conclave, in order that no intruder may communicate with the occupants or obtain information which might be of value to the outside world or to persons interested in swaying the action of the Cardinals.

The Cardinals, however, are not permitted to suffer for lack of comforts while in their cells. They are allowed two servants each to attend to all their wants, and are served with such food as they desire. Their meals are passed into the place in hampers, but even these are searched at the entrance to make sure that nothing of contraband character is smuggled in. Besides the servants, four barbers, two sacristans, two masters of ceremonies, a carpenter, a mason and several other persons are permitted to remain in the household.

In the morning the Cardinal-Dean sings the mass of the Holy Ghost, at which all the Cardinals receive communion, after which the voting begins. Each Cardinal approaches the altar, and after taking an oath prescribed for the ceremony, places his ballot in a receptacle prepared for it. Three Cardinals who act as tellers count the ballots when all have been deposited. A two-thirds vote is necessary to elect the Pope, and, if a choice is not made on the first ballot, the Cardinals continue to vote until a candidate receives the requisite number, but only one ballot is taken in one day. Upon the announcement that no candidate has been elected, the Cardinals return to their cells until the following morning, when another ballot is taken. Thus the election may be prolonged many days, or it may be decided in a single sitting.

When it is found that an election has been obtained the Cardinal-Deacon announces the name of the successful candidate; the Junior Cardinal-Deacon rings a bell, and the master of ceremonies enters the chapel with the secretary. The Cardinal-Dean and two Cardinals approach the successful one and ask him if he accepts the great office, and upon his signifying that he does accept it, all canopies except that over his seat are removed. The new Pope then announces to the Cardinal-Dean the name which he has selected and he is then led behind the altar, where he dons the pontifical robes in preparation for his reception of the Cardinals. The ring of the Fisherman is then placed upon his finger, after which the Senior Cardinal-Deacon, followed by musicians and singers, proceeds to the balcony and makes official announcement of the election of the new Pope as well as the name by which he will be known. This terminates the electoral proceedings.

The A B C of Electricity.

Electricity.—The name given to the unknown cause of electric phenomena.

Ampere.—(1) The practical unit of electric current. (2) A rate of flow of electricity transmitting one coulomb per second. (3) The current of electricity which would pass through a circuit whose resistance is one ohm, under an electro-motive force of one volt.

Volt.—(1) The practical unit of electro-motive force. (2) Such an electro-motive force as is induced in a conductor which cuts lines of magnetic flux at the rate of 100,000,000 per second. (3) Such an electro-motive force as would cause a current of one ampere to flow against a resistance of one ohm.

Ohm.—(1) The practical unit of electric resistance. (2) Such a resistance as would limit the flow of electricity under an electro-motive force of one volt to a current of one ampere, or one coulomb per second.

Ohm's Law.—The strength of a continuous electric current in any circuit is directly proportional to the electro-motive force acting on that circuit, and inversely proportional to the resistance of the circuit.

Watt.—(1) A unit of electric power. (2) A volt ampere. (3) The power developed when 44.25 foot pounds of work are done in a minute, or, 0.7375 foot pounds of work is done in a second.

Dynamo.—A dynamo-electric machine or generator.

Motor Electric.—A device for transforming electric power into mechanical power.

Magneto.—(1) A magneto generator. (2) A small magneto-electric dynamo machine.

Galvanometer.—An apparatus for measuring the strength of an electric current by the deflection of a magnetic needle.

Transformer.—An induction coil employed either for raising or for lowering electric pressure.

Regulating Box.—A rheostat inserted in the field circuit of a generator or motor for regulating the current passing through the field magnetic coils.

Safety Fuse.—A wire, bar, plate, or strip of readily fusible metal, capable of conducting without fusing the current ordinarily employed on the circuit, but which fuses and thus automatically breaks the circuit on the passage of an abnormally strong current.

Short Circuit.—(1) A shunt or by-path of negligible or comparatively small resistance placed around any part of an electric circuit through which so much of the current passes as to virtually cut out the parts of the circuit to which it acts as a shunt. (2) An accidental direct connection between the mains or main terminals of a dynamo or system producing a heavy overload of current.

Phase.—The fractional part of a period which has elapsed since a vibrating body last passed through the extreme point of its path in the positive direction.

Direct Current.—A current whose direction is constant, as distinguished from an alternating current.

Alternating Currents.—(1) Currents which flow alternately in opposite directions. (2) Currents whose directions are periodically reversed.

Multiple Circuit.—A circuit in which a number of separate sources or separate devices, or both, have all their positive poles connected to a single positive lead or conductor, and all their negative poles connected to a single negative lead or conductor.

Series Circuit.—A circuit in which the separate sources or separate electro-receptive devices, or both, are so placed that the circuit produced in it or passed through it passes successively through the entire circuit from the first to the last.

School Savings Banks in the United States.

The system of school savings banks was inaugurated in this country in March, 1885, with the sole aim of imparting to school children the business characteristic of thrift, without atttempting to teach them a business form. J. H. Thiry, of Long Island City, was the first to systematize the idea and make it practical for use in the public schools, and he has been the general director of the system ever since. There is no association among the schools, but entirely independent methods are used in the different places where the idea has been adopted.

The system suggested by Mr. Thiry, and generally used, with local modifications, is very simple. School boards do not require authorization of the State or nation to enable them to introduce the banking system into their schools. The first thing to be done on the part of the one introducing the system, after receiving permission from the School Board, is to secure the co-operation of a savings bank near the school, to receive the weekly deposits and arrange matters pertaining to them.

In most of the schools where the system has been adopted it is made a part of the regular programme. Deposits are received on Mondays at the beginning of the morning session, the pupils making their deposits as they answer to roll call. The teacher checks the amount of each deposit and credits it on a card held by the pupil.

It is calculated that more than $2,000,000 have been saved by American school children since the introduction of the system in 1885. On January 1, 1902, there were 1,479 schools in the United States where the system had been adopted, and of the 370,457 pupils enrolled, 166,578 were the depositors of $1,309,611, of which $869,878.48 had been withdrawn, leaving a balance of $439,732.52 due to depositors on the 1st of January.

China.—The money of China is in a very chaotic condition. The only coin which has any real intrinsic worth is the tael or liang, and even this varies in value in different parts of the country. It is the monetary unit and is of silver. The other coins in use are the 10 cash or li, 1 candareen, 10 candareens or fun, or fen, 1 mace and 10 mace or tsien.

The following table shows the value, in gold, of the taels in use throughout the country:

Amoy tael	.65,1	Haikwan tael	.66,3	Shanghai tael	.59,5
Canton tael	.64,9	Hankau tael	.60,9	Swatow tael	.60,2
Chefoo tael	.62,3	Hong Kong tael.....	(*)	Takao tael	.65,5
Chinkiang tael	.63,6	Ningpo tael	.62,6	Tientsin tael	.63,1
Fuchau tael	.60,2	Niuchwang tael	.61,1		

*The "British dollar," which has the same legal value as the Mexican dollar in Hong Kong.

Paraguay.—Paraguay has no gold or silver coins of its own stamping. The silver peso of other South American republics circulates there, and has the same value as in the countries that issue it.

Philippine Islands.—By an act of the Fifty-seventh Congress, the coins of the Philippines are to be of silver, ranging from 10 cents to 50 cents in value, and of copper, ranging from one-half cent to five cents in value. Prior to this the coins in use were the old Spanish moneys, almost entirely of silver, and Mexican dollars.

Siam.—The moneys of Siam are as follows: Eight hundred cowries equal 1 fuang; 2 fuango, 1 salung; 4 salungo, 1 bat or tical; 4 bats, 1 tambling; 20 tambling, 1 chang; 50 chang, 1 hap, and 100 hap, 1 tara. Cowries (also called bia in Siam) are the well-known shells used in many parts of Asia and Africa as a medium of exchange for small values. In Siam about 219 or 220 are reckoned equal to 2 cents. The bat or tical is rated at 60 cents. Small pewter and copper coins have of late been introduced as a substitute for the cowrie shell. The pewter coins are called lot and at; they are small flat bits of pewter; 2 lots equal 1 at. The copper coin 2 ats, and about the same size as the English halfpenny, only a little thicker, is called song pels. Two song pels equal 1 fuang; 2 fuango equal 1 salung; 4 salungo equal 1 bat or tical. The fuang and salung are flat pieces of silver. They represent simply a certain weight of the metal. It is the same with the bat.

NOTES.—(a) The valuations given in this table are in United States gold coin, for the gold coins only. Other coins are compared with silver, in United States silver dollar. (b) While the Argentine Republic is considered a double standard country it has in reality the gold standard, the law of 1881 restricting the coinage and use of silver as legal tender. (c) The actual currency of Haiti is an irredeemable paper. The metallic gourdes rarely ever circulate. (d) Mexico, while a bimetallic country, is practically a monometallist one, as silver is almost entirely used. (e) The valuation of the kran is in gold.

American Women Who Have Married Titles.

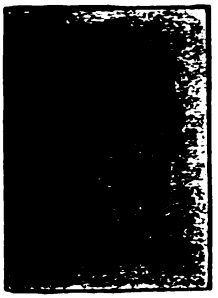
By CHOLLY KNICKERBOCKER.

The number of American women who have married into the noble families of the Old World may be enumerated by hundreds, one of them, indeed, Miss Alice Heine, of New Orleans, La., having actually secured a seat upon a European throne by becoming the full fledged consort of the now reigning Prince of Monaco, from whom she is, however, now legally separated. Miss Lee, of Brooklyn, now Countess Waldersee, is the widow of a royal prince, Frederick of Schleswig-Holstein, the uncle of the present Emperor of Germany, while Miss Elsie Hensler, of Boston, was recognized as the morganatic wife of Prince Ferdinand of Saxe-Coburg-Gotha, when he was King of Portugal. Miss Patterson, of Baltimore, was legally the wife of Prince Jerome Bonaparte before he was King of Westphalia. Miss Hamel, of New York, married a royal personage, Prince Louis of Bourbon, and Prince Yturbide, the husband of Miss Green, of Georgetown, was the adopted son of the late Emperor Maximilian of Mexico.

The following list of American women who have married titled foreigners is more complete than any yet published:

A.

Abbott, Miss Ellen F., of Philadelphia, to Count Cerati di Calry, 1890.
Allen, Miss, of New York, to Count Sanza de Loba.



Lady Curzon.

The Duchess of Marlborough.

Allen, Miss Anne Russell, of St. Louis, to Duke of Montelettro.

Walker, Miss Mary, of Philadelphia, to Comte de Cibo.
Ward, Miss Adele, to Baron A. von Bulow, 1885.
Ward, Miss Clara, of Detroit, Mich., to the Prince Joseph de Caraman de Chimay. (Divorced.)
Warden, Miss Juliet, to The Hon. Sir William H. P. Carrington.
Wheeler, Miss, of Philadelphia, to Count Maximilian Pappenheim. (Divorced.)
Whitcomb, Miss Audrie, of California, to Baron Lepic, 1902.
Whitney, Pauline, to Almeric Paget.
Whittier, Miss Susan, of Boston, to Prince Serge Belosselsky-Belozersky.
Wickershaw, Miss, of New York, to Count Kessler
Wickershaw, Miss, of New York, to Marquis de Tiffini.
Wiggin, Miss Catherine, to The Hon. Charles Lawrence.
Williams, Miss Harriet, of Georgetown, to Count de Bodisco, 1845.
Willing, Miss Annie, of Philadelphia, to Mungo Murray, 1841.
Willis, Miss Catherine, of Virginia, to Prince Achille Murat.
Wilson, Miss Belle, of New York, to the Hon. Sir Michael Henry Herbert, 1888.
Wilson, Miss Lily, to Count Loewenhaupt.
Woerishoffer, Miss Antoinette, of New York, to Count Charles Sellern.
Work, Miss Frances, of New York, to The Hon. James B. Burke Roche, 1880.
Wyman, Miss Ethel Louise, of New York, to Count Lerchenfeld zu Kofering, 1902.

Y.

Yohe, Miss May, of New York, to Lord Francis Hope. (Divorced.)
Yznaga, Miss Consuelo, of New York, to the eighth and late Duke of Manchester, 1876.
Yznaga, Mrs. Fernando (nee Miss Mabel Wright), of New York, to Count Bela Zichy.

Countess of Craven.

Countess of Essex.

Yznaga, Miss Natica, of Louisiana,, to Sir John P. Lister-Kaye, 1881.

Z.

Zerega, Miss Lizzie, of New York, to Charles Pelham Clinton, 1886.
Zimmerman, Miss Helena, of Cincinnati, Ohio, to the present Duke of Manchester.

Weights and Measures.

THE INTERNATIONAL METRIC SYSTEM.

By HENRY D. HUBBARD, Secretary of the National Bureau of Standards.

Forty-two nations of the world have adopted the metric system of weights and measures, so that now more than two-thirds of the civilized world is using the meter, liter and kilogram, instead of the yard, quart and pound. In all of those countries which have not yet adopted the metric system the movement for its adoption is very strong. Russia uses the metric system largely in its departments, its statistics and its engineering work. A decree making its use universal in Russia has been prepared by the Minister of Finance and awaits the signature of the Czar.

In England over 292 members of Parliament have signified their intention to vote for the adoption of the metric system.

The present Premier of England strongly favors the system, and the recent conference of Colonial Premiers has emphatically urged its adoption by the mother country.

In Denmark a bill providing for the exclusive use of the system in that country has passed the Upper House, and it is thought it will soon pass the Lower Chamber.

In the United States the system is legalized in the whole country, and is the only legal system in Porto Rico and the Philippines. The metric system is also widely used in the Government departments, in our coinage, in the postal service, Coast and Geodetic Survey, and in the scientific work of all departments. Progressive manufacturers in this country are providing metric sized tools and other export products, and issuing catalogues giving dimensions of their standard tools and products in metric units.

From the above it will be seen that the present indications are that the yard, quart and the pound will soon pass out of use, and be replaced by the international system.

THE REASONS FOR THE ADOPTION OF THE METRIC SYSTEM.

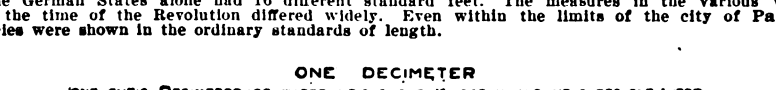
The reasons for the adoption of the metric system are:

1. The old systems are entirely unsatisfactory and inadequate for modern needs.
2. The metric system is the only complete international system of weights and measures ever adopted.
3. It is the simplest and most perfect system ever planned.
4. Its standards are constructed upon the best scientific principles and preserved with the greatest care.

MULTIPLICITY OF THE OLD SYSTEMS.

Until the metric system was developed each locality and each industry had its own system of weights and measures; each had developed independently and unrelated. There was a measure for beer and a measure for milk; a measure for wine and capacity measure for dry articles. These standards were not even of the same size in adjoining localities, and, as it has been pointed out, not even the same on different market days (in Shropshire).

More than 235 values have been found for the pound; more than 50 for the mile; more than 30 for the pint. The German States alone had 16 different standard feet. The measures in the various wards of Paris at the time of the Revolution differed widely. Even within the limits of the city of Paris large divergencies were shown in the ordinary standards of length.



The Standard Metric Measure.

Nor do we need to go back. At the present day the city of Philadelphia uses three different standards of length for the city survey. Brooklyn uses at least four, and a similar state of affairs can easily be shown in other cities.

Our United States gallon differs from the British gallon by nearly 20 per cent; our bushel differs from theirs by 68 cubic inches, and even our pounds or our yards are not identical as legally defined in these two countries.

In the different industries—the jewellers use one set of weights to measure gold, and another to measure lead. The avoirdupois pound is the larger, but the troy is the larger ounce, so that while an ounce of gold is heavier than an ounce of lead, a pound of lead is heavier than a pound of gold.

Similarly, there are systems of measures for stone and timber, another to measure drugs, one to measure liquids, and one for dry commodities; there is a diamond measure, a troy (jewellers' measure), and there are land measures and nautical measures. At least twelve systems of weights and measures are now in use in the United States, not including the various special measures used in the various industries, such as dents, beers, porties, runs, cuts, hanks, bolts, lees, spindles and nails, which are used in the textile industry alone. Other industries could furnish similar lists of special units, in all making a bewildering aggregate of terms.

CONFUSION OF EXISTING SYSTEMS.

These various systems are not simply related. The surveyor's link is 7.92"; while some surveyors use the foot as the unit, dividing it into tenths, making still greater confusion.

The gallon is used as a weight in the wholesale oil business, and the volume of such weight does not correspond to the capacity measure of which it is supposed to be an equivalent. The United States bushel is a capacity measure, but it is usually determined by weight, and the weights of the legal bushel differ in the various States. These are a few of the many instances of confusion now existing.

THERE ARE TOO MANY UNITS IN THE OLD SYSTEM.

At least 64 names are in common use, making an enormous tax on the memory to remember them, and a still greater labor to know them well enough for practical use.

Long names are necessary in order to be explicit, as a "pound" may be either an "avoirdupois pound" or a "troy pound." A "quart" may be either a "U. S. liquid quart" or a "U. S. dry quart," or an "English liquid quart."

The "mile" may be either the "land mile," or a "nautical mile"; the latter being 1.158 land miles, and these land miles differ in various countries by sometimes as much as 100 per cent of our own mile.

THERE ARE TOO MANY RATIOS IN THE OLD SYSTEM.

More than 60 different ratios are used in the old system of weights and measures, many of which are fractional. The metric system uses simply the decimal ratio of 10.

THE UNITS OF THE OLD SYSTEM ARE AMBIGUOUS.

The pint has two values in the United States; the line has two values; the link may be the surveyor's link or the engineer's link. There is a linear foot (12 inches), a board foot (144 cubic inches), the timber foot (1,728 cubic inches), and the cord foot (16 cubic feet). The chain may be the surveyor's of 66 feet, or the engineer's of 100 feet. The perch is used as a length measure, also for stone containing 24 3-5 cubic feet. There is the avoirdupois ounce of 437.5 grains; the troy and apothecaries' ounce of 480 grains, and the silk troy ounce of 360 grains.

Digitized by Google

There are at least three tons; the 2,000 pound short ton; 2,240 pound long ton, and the 2,260 gross ore ton; and besides these the miner's ton, which varies from 2,500 to 3,000 pounds. It is needless to say that the above ambiguities result in much fraud and deception and loss through misunderstandings and intentional misrepresentations.

THE OLD SYSTEM HAS TOO MANY FRACTIONAL RELATIONS.

In translating troy to avoirdupois pounds we find the ratio 144/175, and the troy ounce equals 188/175 avoirdupois ounces. The avoirdupois ounce contains 437½ grains. A square acre has a side of 69.67 feet. The link, 7.92", was devised to measure the acre more conveniently, and yet the side of a square acre is 316.22 links.

THE ENGLISH SYSTEM IS ENTIRELY DIFFERENT FROM OUR OWN.

One of the most common mistakes is to suppose that the English system of weights and measures is our own. This is not true in a single instance. The legal ratio between the yard and the international meter has been fixed by act of Parliament and independently by Congress. These two legal values differ, and as the same international meter is used for both comparisons, it makes the legal value of the United States yard differ by at least 2½ microns, this difference being 250 times the present limit of length measure.

Likewise the United States legal avoirdupois pound differs from the English pound by 5 milligrams, a quantity 5,000 times greater than the present limit of accurate weight.

The Imperial English bushel of Great Britain is 68 cubic inches larger than ours, and their gallon is 19 per cent larger than the United States gallon.

These inequalities in the various kinds of units extend to all their subdivisions and multiples, and while these differences in the case of the pound and the yard are not important in common transactions, they are such that they must be recognized in all work of precision. But in the case of the gallon and bushel the differences are confusing and a great obstacle to trade.

UNSATISFACTORY STANDARDS OF THE OLD SYSTEM.

The United States has no satisfactory standards of the old system. The brass standard yard, obtained by this country from England, is not capable of furnishing precise measurement, inasmuch as the lines indicating the subdivisions are so broad and poorly made that the most accurate measurement is impossible. As a matter of fact, for many years the only yard recognized in this country by the Government has been derived from a copy of the International Meter, and a more accurate yard has been thus obtained than could be obtained from the old yard standard itself.

THE METRIC SYSTEM.

In view of the great diversity of systems of weights and measures in use throughout the world, the Constituent Assembly of France invited the governments of the world to join in establishing an international system of weights and measures. Ten nations joined in passing upon the details of the metric system, so that the metric system had a distinctly international character from its start, and it can be justly said that the metric system is the only system which has been adopted by any two countries. The aim was to secure the utmost simplicity, combined with precision of terminology and perfection of standards, and to provide for the international custody of such standards.

THE SIMPLEST OF ALL SYSTEMS.

The twelve systems of weights and measures in this country are replaced in metric countries by one simple system. Sixty-four terms now in use are replaced by **three simple names**—the meter, gram, liter—with the **seven numerical prefixes**, which constitute the entire essential vocabulary of the metric system. In place of the more than 60 ratios, many of which are fractional, and about 20 of which are indivisible by two, the metric system contains **but one ratio, viz.**, the decimal ratio of ten. In place of the nineteen ambiguous terms in common use in this country, we find that there is never a question as to the value of the meter, gram and liter, that is, these terms can never mean but one thing, as they always refer to the single ultimate standards preserved in the International Bureau of Weights and Measures at Paris.

THE SIMPLICITY OF THE METRIC SYSTEM.

The entire metric system could be stated in one sentence: State lengths in meters, weights in grams, volumes in liters, using decimal fractions only. If desired, use prefixes deci for tenths, centi for hundredths, milli for thousandths, deka for tens, hecto for hundreds, kilo for thousands, and myria for ten-thousands.

The above sentence takes the place of compound or denominate numbers in our arithmetic. It has been testified in this country by representatives of the United States Department of Education, and in England by similar representatives, that two-thirds of a full school year may be saved in the school life of every child. It is estimated that two-thirds of a year now so devoted may be replaced by one week if the metric system is adopted.

There need be no special teaching at all, because being decimal, it is the same as the system of counting, and having but ten or twelve terms to remember, which we are already obliged to learn, there will be nothing new to be taught. For the ordinary purposes of domestic trade it will be sufficient to understand the value of the three principal units—the meter, about 40 inches; the kilo, about 2 pounds; and the liter, about a quart.

ADVANTAGES OF THE METRIC SYSTEM.

1. THE DECIMAL BASE, counting by ten, as we already are doing in our system of numbers and our coinage. All commercial calculations will be on the same decimal base, economizing according to the best estimates, at least 50 per cent in all problems, and in some cases much more than this. Considering that there are many billion transactions involving weights and measures in this country annually, the time saving alone will be very large.

2. INTERRELATION OF UNITS: A cubic decimeter of cold water weighs one kilogram, and measures one liter. This relates in the simplest possible manner the tables of lengths, weights and volumes, and enables them to be interchanged without calculation.

To illustrate: If the capacity of a tank is 3.04 cubic meters, the weight of that much water is 3.04 cubic tons.

If the depth of water in a tank is 8 meters, the pressure on the bottom is 8 metric tons per square meter, or 8 kilograms per square decimeter, or 8 grams per square centimeter.

If a vessel displaces 6,742 cubic meters, then the vessel weighs 6,742 metric tons.

Each of these problems would involve considerable calculation under the old system.

3. SIMPLE NOMENCLATURE.—Three terms—the meter, gram and liter—replace the entire vocabulary (some 5,000 terms) of weights and measures in the world, and by the use of several numeral prefixes the terms are made more explicit, adding but slightly to the extra work required in learning.

4. PERFECTION OF STANDARDS.—Over twenty nations have joined in establishing the International Bureau of Weights and Measures, which has constructed for each of the countries represented two copies of each of the fundamental standards, the meter and kilogram, preserved in Paris. These standards are of the most perfect material, iridio-platinum alloy, the heaviest and hardest known, which will not rust or deteriorate. The material alone in each set of the standards is valued at more than $1,000, and many years of scientific research were spent in securing the requisite purity of materials, determining the most perfect form to be given to the standards, and the most perfect methods of ruling and measuring them. As a consequence the International Meter, and the copies of it represent greater perfection than had ever been attained in standards of measure.

FREEDOM FROM AMBIGUITY.

The meter, the liter and the kilogram are definite and unequivocal, and are rapidly becoming the world-wide standards. The many valued pound, gallon, ton, bushel and mile cause endless confusion, and the fact that the same names are used renders error, fraud and litigation inevitable. The meter, liter

Digitized by Google

and gram are rapidly replacing the 5,000 terms and units which constitute the world's extensive vocabulary of weights and measures. As stated above, over 100 distinct values of the foot have been used as measures, whereas the meter has but one single value, and all measures in the world stated in meters refer to the length of the one International Meter, preserved at the International Bureau at Paris. There have been 53 distances called "miles," but the kilometer means but one single length in all countries and for all time. Likewise, 235 different weights have been denominated "pound," but the kilogram is the weight of a piece of metal whose mass is a definite and invariable quantity everywhere.

The one fundamental feature which should characterize standards of weights and measures is that they should be absolutely unequivocal, and that each term should have but one meaning throughout the entire world and for all time. This freedom from ambiguity is not found in any other system of weights and measures, but is pre-eminently the characteristic of the metric system. Ambiguity is being replaced by certainty wherever the metric system has been adopted, as it has already been in more than forty countries in the world, and among progressive manufacturers, engineers and scientific men throughout the entire world.

EASE OF LEARNING AND REMEMBERING.

The essentials of the metric system can be learned in a few minutes. Any length, weight, or volume may be expressed by use of the three simple terms—meter, gram and liter—and as these are interrelated they can be derived one from the other. A committee of German school teachers have testified that school children could be taught the metric system very well within a single hour. In the time thus saved a thorough business course could be given to every school child in the country. Arithmetics would be reduced to two-thirds of their present size by the omission of the complicated work of denominate numbers. The testimony is unanimous that the strain on the memory will be greatly lessened, as the system is so quickly learned, easily applied and persistently remembered.

THE METRIC SYSTEM IS INTERNATIONAL.

An international system of weights is as important as an international system of longitude and time, and is the next step in the development of international intercourse. The metric system was from the beginning, in its origin and development, and in its final adoption essentially an international system, and it is the only one which can be truly called an "international system."

The metric system of weights and measures is already the universal language of weights and measures in scientific work of all kinds, and for all other purposes it is the standard system of more than forty countries of the world. In those few countries in which it has not yet been fully adopted, the necessary legislation is pending which will extend its use around the entire world.

International intercourse has been the keynote of the century, and as railroads facilitate the interchange of commodities, so the adoption of the international system of weights and measures will facilitate the interchange of scientific and engineering knowledge, and the manufacture of machinery and other products which should be of uniform standard and based upon an international system of interchangeable parts or upon directly comparable dimensions.

FLEXIBILITY AND APPLICABILITY.

The metric system, with its three fundamental units, furnishes easily convertible and suitable units for every conceivable magnitude used in science, industry or ordinary life. The choice of units covers a wider range and affords immediate intercomparisons between any sets of measurements. New units may be created in perfect consonance with the system by continued decimal subdivision. Its flexibility is further increased by the perfect interrelation of the units, the units of weight and capacity being derived from the unit of length. The metric units of length, weight and capacity used by all branches of trade, manufacturing and science may be intercompared without reduction, whereas in our old system the dimensions of wire are given in mils, of pipe in inches, plots in links, depths in fathoms, heights in feet, distances in miles—all units which cannot be compared without considerable calculation. All the metric units, however, may be instantly compared. The milli-micron of the physicist may be directly compared with the kilometer of the geodesist, the centimeter of the machinist with the meter of the surveyor, the milligram of the analyst with the metric ton of the shipper and tradesman.

EASE OF COMPUTATION.

As a labor-saving invention, the metric system is unrivalled as far as relates to computations. The simplicity of its relations makes computation a matter of minutes instead of hours in many lines, and entirely avoids many of the problems inseparably connected with our present system.

Our Consuls have for years recommended the adoption of the metric system in order to reduce the computations of trade to a minimum. The adoption of the metric system in scientific work long ago resulted in an incalculable saving of time in the elaborate computations which accompany all kinds of scientific research.

With our decimal arithmetic and our decimal coinage, the decimal system of weights and measures alone is needed to place all commercial calculations on the decimal basis and place them within the reach of all familiar with the simplest arithmetic.

FIXING THE METER.

The fixed length of the meter was obtained from a most careful calculation of the distance from the equator to the North Pole along the meridian passing through the city of Paris. The length of the distance being determined, it was divided into 10,000,000 equal parts, and this subdivision constituted the meter. Hence a meter is one ten-millionth of the distance from the equator to the pole, or one forty-millionth of the short circumference of the earth. So accurate were the first measurements, that when subsequent calculations were made with improved instruments, it was found that the first and last measurements coincided so nearly that the difference was not appreciable. Since the shape of the earth changes so slightly, if at all, the measure is as lasting as the world.

The liquid measure and the unit of weight are as constant, for a cubic centimeter of distilled water at 4 degrees, centigrade, normal barometric pressure, weighs the same the world over, and hence the gram is as fixed as the meter, or the liter, which is, as stated above, a cubic decimeter.

SUMMARY.

The adoption of the metric system by two-thirds of the world, and the added perfection which the metric system has recently attained, renders all the more emphatic the words of President John Quincy Adams, written nearly a century ago, when he said:

"The single standard, proportional to the circumference of the earth; the singleness of the units for all the various modes of mensuration; the universal application to them of decimal arithmetic; the unbroken chain of connection between all weights, measures, moneys and coins; and the precise, significant, short and complete vocabulary of their denominations, altogether forming a system adapted equally to the use of all mankind, afford such a combination of the principle of uniformity for all the most important operations of the intercourse of human society; the establishment of such a system so obviously tends to that result, the improvement of the physical, moral and intellectual condition of man upon earth, that there can be neither doubt nor hesitancy in the opinion that the ultimate adoption and universal, though modified, application of that system is a consummation devoutly to be wished."

With the adoption of the metric system, certainty will replace ambiguity and ignorance, precision will take the place of inaccuracy, dictionaries of weights and measures will be relegated to the cloister, uniformity and definiteness will emerge from the present chaotic diversity, and scientific and commercial calculations will be simplified, the transactions of every-day life will be made easier, international intercourse will be furthered, and the next grand step in human progress will be taken. This result will be reached when the United States joins the forty progressive nations which have accepted the gift of France to the world—a gift which with sublime faith they resolved should be "A tous les temps, a tous les peuples."

10 hectograms	=	1 kilogram
10 kilograms	=	1 myriagram
10 myriagrams	=	1 quintal
10 quintals	=	1 ton (metric)

LINEAR MEASURE.

10 millimeters	=	1 centimeter.
10 centimeters	=	1 decimeter.
10 decimeters	=	1 meter
10 meters	=	1 decameter.
10 decameters	=	1 hectometer.
10 hectometers	=	1 kilo.

CUBIC & CAPACITY MEASURE.

10 milliliters	=	1 centiliter
10 centiliters	=	1 deciliter
10 deciliters	=	1 liter
10 liters	=	1 decaliter
10 decaliters	=	1 hectoliter
10 hectoliters	=	1 kiloliter

SURFACE MEASURE.

The surface units are the linear units squared, and for land measures 100 square meters are called the "Ar" (for area).

100 ars	=	1 hectar

TABLE FOR CONVERTING UNITED STATES WEIGHTS AND MEASURES.

(Prepared by Henry S. Pritchett, of the U. S. Bureau of Statistics.)

Since 1893 the Office of Standard Weights and Measures has been authorized to derive the yard from the meter, using for the purpose the relation legalized in 1866: namely, 1 yard $= \frac{3600}{3937}$ meter.

The customary weights are likewise referred to the kilogramme. This action fixes the values, inasmuch as the reference standards are as perfect and unalterable as it is possible for human skill to make them at this period.

The length of the nautical mile given above and adopted by the U. S. Coast and Geodetic Survey many years ago, is defined as that of a minute of arc of a great circle of a sphere whose surface equals that of the earth (Clarke's Spheroid of 1866).

The U. S. gallon contains 231 cubic inches, and the bushel 2150.42 cubic inches.

The value of these tables are based upon the legal equivalents adopted by Congress in 1863.

DOMESTIC WEIGHTS AND MEASURES.

APOTHECARIES WEIGHT.

20 grains	= 1 scruple
3 scruples	= 1 dram
8 drams	= 1 ounce
12 ounces	= 1 pound

LIQUID MEASURE.

4 gills	= 1 pint
2 pints	= 1 quart
4 quarts	= 1 gallon
31½ gallons	= 1 barrel
2 barrels	= 1 hogshead

NUMERICAL.

12 articles	= 1 dozen
13 articles	= 1 dozen (long)
12 dozen	= 1 gross
12 gross	= 1 great gross
20 articles	= 1 score

PAPER MEASURE.

24 sheets	= 1 quire
20 quires	= 1 ream
2 reams	= 1 bundle
5 bundles	= 1 bale

DRY MEASURE.

2 pints	= 1 quart
8 quarts	= 1 peck
4 pecks	= 1 bushel

AVOIRDUPOIS WEIGHT.

(Short ton.)

27 11-32 grains	= 1 dram
16 drams	= 1 ounce
16 ounces	= 1 pound
25 pounds	= 1 quarter
4 quarters	= 1 cwt.
20 cwt.	= 1 ton (2,000 pound

(Long ton.)

27 11-32 grains	= 1 dram
16 drams	= 1 ounce
16 ounces	= 1 pound
112 pounds	= 1 cwt.
20 cwt.	= 1 ton (2,240 lbs.).

TROY WEIGHT.

24 grains	= 1 pennyweight
20 pennyweights	= 1 ounce
12 ounces	= 1 pound

CIRCULAR MEASURE.

60 seconds	= 1 minute
60 minutes	= 1 degree
30 degrees	= 1 sign
12 signs	= 1 circle or circumference.

LONG MEASURE.

12 inches	= 1 foot
3 feet	= 1 yard
5½ yards	= 1 rod or pole
40 rods	= 1 furlong
8 furlongs	= 1 mile
3 miles	= 1 league

NAUTICAL MEASURE.

6 feet	= 1 fathom
608 feet	= 1 cable length
10 cable lengths	= 1 nautical mile (6,080 feet)

MARINERS MEASURE.

6 feet	= 1 fathom.
120 fathoms	= 1 cable length.
7½ cable lengths	= 1 mile.

OBSOLETE NAUTICAL MEASURE.

There is an old table of nautical measure which gives 120 fathoms as equivalent to one cable, and 7½ cables as equal to 1 nautical mile, but as this only makes a nautical mile equal to 5,400 feet, it can hardly be used in any computations of measure.

Digitized by Google

CUBIC MEASURE.

1,728 cubic inches = 1 cubic foot.
1 cubic foot (27 cubic in.) = 1 cubic yard.

SQUARE MEASURE.

144 square inches = 1 square foot
9 square feet = 1 square yard
30¼ square yards = 1 square rod or perch.
40 square rods = 1 square rood
4 roods = 1 acre
640 acres = 1 square mile

MEASURES OF TIME.

60 seconds = 1 minute
60 minutes = 1 hour
24 hours = 1 day
7 days = 1 week
4 weeks = 1 lunar month
30 days = 1 commercial month
12 months = 1 year
365 days = 1 common year
366 days = 1 leap year

In 400 years there are 97 leap years. Leap year is omitted every 100 years, as in 1900, to balance the calendar every century.

SURVEYORS AND LAND MEASURE.

7.92 inches = 1 link
25 links = 1 rod
4 rods = 1 chain
10 square chains = 1 acre
640 acres = 1 square mile

In California, Texas, Arizona, New Mexico and Mexico the following almost obsolete system of land measure is still used:

26,000,000	square varas	(square of 5,099	varas) = 1	league and 1 labor	=	4,605.5 acres.
1,000,000	square varas	(square of 1,000	varas) = 1	labor	=	177 136 acres.
25,000,000	square varas	(square of 5,000	varas) = 1	league	=	4,428.4 acres.
12,500,000	square varas	(square of 3,535.5	varas) = ½	league	=	2,214.2 acres.
8,333,333	square varas	(square of 2,886.7	varas) = ⅓	league	=	1,476.13 acres.
6,250,000	square varas	(square of 2,500	varas) = ¼	league	=	1,107.1 acres.
7,225,600	square varas	(square of 2,688	varas)		=	1,280 acres.
5,419,200	square varas	(square of 2,328	varas)		=	960 acres.
3,612,800	square varas	(square of 1,900.8	varas) = 1	section	=	640 acres.
1,806,400	square varas	(square of 1,344	varas) = ½	section	=	320 acres.
903,200	square varas	(square of 950.44	varas) = ¼	section	=	160 acres.
451,600	square varas	(square of 672	varas) = ⅛	section	=	80 acres.
225,800	square varas	(square of 475	varas) = 1-16	section	=	40 acres.
5,645,376	square varas	(square of 75.137	varas) = 4,840	square yards	=	1 acre.
			43,560	square feet	=	1 acre.

To find the number of acres in any number of square varas, multiply the latter by 177 (or to be more exact, by 177⅓), and cut off six decimals.

1 vara = 33⅓ inches. 1,900.8 varas = 1 mile.

WEIGHTS AND MEASURES USED IN THE HOLY BIBLE AND THEIR EQUIVALENTS.

WEIGHTS.

One Gerah = 12 grams
One Bekah = 5 dwts.
One Shekel = 10 dwts.
One Maneh (60) shekels) = 2 lbs., 6 oz
One Talent (50 Manehs) = 125 lbs.

LIQUID MEASURE.

1 Caph = 0.625 pints
1 Log = 0.833 pints
4 Logs (1 Cab) = 3.333 pints
3 Cabs (1 Hin) = 1 gal. 2 pints
3 Hins (1 Seah) = 2½ gals.
3 Seahs (1 Bath, 1 Ephah, 1 Firkin) = 7 gals., 4½ pints.
10 Baths (1 Kor, 1 Chorus, 1 Homer) = 75 gals., 5¼ pints

DRY MEASURE.

1 Gachal = 0.141 pints
20 Gachals (1 Cob) = 2.833 pints
1.8 Cobs (1 Omer) = 5.1 pints
3.3 Omers (1 Seah) = 1 peck, 1 pint
3 Seahs (1 Ephah) = 3 pecks, 3 pints
3 Ephahs (1 Letech) = 4 bushels
2 Letechs (1 Homer, 1 Kor) = 8 bushels, 1 pint

CAPACITY OF CISTERNS AND WATER TANKS, 10 INCHES IN DEPTH.

25 feet in diameter holds 3,059 gallons.	10 feet in diameter holds 489 gallons.	3 feet in diameter holds 44 gallons.
20 feet in diameter holds 1,958 gallons.	7 feet in diameter holds 239 gallons.	2 feet in diameter holds 19 gallons.
15 feet in diameter holds 1,101 gallons.	5 feet in diameter holds 122 gallons.	
12 feet in diameter holds 705 gallons.	4 feet in diameter holds 99 gallons.	

MEASUREMENTS FOR TIMBER AND LUMBER.

The number of cubic feet in round timber can be found by adding the circumference of the small and large ends together and dividing by 2; multiply the square of one-fourth of this (average circumference) by the length in feet; the result gives four-fifths of the real contents in cubic feet. One-fifth is customarily allowed for waste in sawing.

For square timber multiply the width by the thickness in inches, and this product by the length in feet, and divide by 12, which will give the result in feet.

To measure sawed boards one inch thick, multiply length in feet by breadth in inches and divide by 12, which gives the number of feet contained.

For 1¼ and 1½ inch thicknesses calculate the same as for one inch, but add one quarter, for each additional quarter inch in thickness, to the quotient. For 2-inch thickness divide 6 and for 3 inch, divide 4, instead of 12.

WEIGHTS OF VARIOUS PRODUCE.

Apples, dried	26 lbs. to bushel	Flax Seed	56 lbs. to bushel	Potatoes (white)	60 lbs. to bushel
Barley	48 lbs. to bushel	Hair, Plastering	8 lbs. to bushel	Potatoes (sweet)	55 lbs. to bushel
Beans	60 lbs. to bushel	Hemp Seed	44 lbs. to bushel	Rye	56 lbs. to bushel

The Principal Industrial Companies of America.

(Corrected to date by Richard H. Portsmore, financial statistician for Henry Clews & Co.)

The four hundred or more companies included in the following table have been selected from among nearly 5,000 such corporations, not because they have the largest capitals, but because together they present a striking illustration of the varied character of American commercial life.

THE INDUSTRIAL CORPORATIONS.

Name of Company and Where Incorporated.	Date Incorp.	Common Stock.	Preferred Stock.	Bonds.	Due.	President.	Main Office.
Abbey Effervescent Salt, N. J.	1898	$800,000	.....	.....	....	H. D. Good	11 Murray st., New York.
A. Booth & Co., Ill. (fish packing)	1898	3,000,000	$2,500,000(8)	.....	....	W. Vernon Booth	Chicago, Ill.
Acker, Merrall & Condit Co., N. Y.	1893	700,000	.....	$650,000(6)	1915	William J. Merrall	62 Warren st., New York.
Adams Express Co.	1854	20,000,000(4)	.....	12,000,000(4)	1948	Levi C. Weir	59 Broadway, New York.
Allis-Chalmeis Co., N. J. (heavy mach'y)	1901	12,000,000	16,250,000(7)	.....	....	Charles Allis	Broad Exchange Bldg., New York.
Aluminum Plate & Press Co., W. Va.	....	1,500,000	.....	.....	....	John Mullaly	87 Nassau st., New York.
Amalgamated Copper Co., N. J.	1899	153,888,000(2½)	.....	.....	....	Henry H. Rogers	52 Broadway, New York.
American Agr. Chemical Co., Conn.	1899	16,715,600	17,153,000(6)	.....	....	John F. Gibbons	26 Broadway, New York.
American Alkali Co., N. J.	1899	24,000,000	6,000,000(8)	.....	....	W. W. Gibbs	Philadelphia, Pa.
American Automatic Loom Co., N. J.	1899	1,200,000	.....	.....	....	W. P. T. Hollingsworth	Paterson, N. J.
American Aut. Weighing Mach.Co.,Eng.	1899	£135,000	£135,000(6)	.....	....	Robert Milburn	62 Murray st., New York.
American Axe & Tool Co., Ky.	1889	$2,000,000	.....	.....	....	C. W. Hubbard, Jr	Pittsburg, Pa.
American Bank Note Co., N. Y.	1858	3,600,000(6)	.....	.....	....	Augustus D. Shepard	78 to 86 Trinity pl., New York.
American Beet Sugar Co., N. J.	1899	15,000,000	$4,000,000(6)	.....	....	Henry T. Oxnard	32 Nassau st., New Yqrk.
American Book Co., N. J.	1890	5,000,000	.....	.....	....	H. T. Ambrose	100 Washington Square E., New York
American Bicycle Co., N. J.	1899	17,701,500	9,294,900	9,500,000(5)	1919	R. L. Coleman	13 Park row, New York.
American Brake, Shoe&F'd'y Co., N.J.	1902	1,500,000	3,000,000(7)	1,000,000(6)	....	W. D. Sargent	170 Broadway, New York.
American Brass Co., Conn.	1900	10,000,000	.....	.....	....	C. F. Brooker	Waterbury, Conn.
American Can Co., N. J.	1901	41,233,300	41,233,300(7)	.....	....	F. A. Assmann	11 Broadway, New York.
American Caramel Co., Penn.	1898	1,000,000(6)	1,000,000(8)	575,000(6)	1920	W. L. Blair	York, Pa.
American Car & Foundry Co., N. J.	1899	30,000,000(2)	30,000,000(7)	.....	....	Frederick H. Eaton	St. Louis, Mo.
American Cement Co., N. J.	1899	2,000,000(8)	.....	895,000	1914	R. W. Lesley	Philadelphia, Pa.
American Cereal Co., Ohio	1891	3,400,000(8)	.....	1,187,300(6)	1911	H. P. Crowell	Akron, Ohio.
American Chicle Co., N. J.	1899	6,000,000(8)	3,000,000(6)	.....	....	W. J. White	13 Park Row, New York.
American Cigar Co., N. J.	1901	10,000,000	.....	5,000,000(4)	1911	J. B. Cobb	111 Fifth ave., New York.
American Clay Mfg. Co., N. J.	1900	7,582,000	.....	1,548,000	1920	.....	Pittsburg, Pa.
American Coal Co., Md.	....	1,500,000(10)	.....	.....	....	W. De L. Walbridge	1 Broadway, New York.
American Coal & Ry. Co., N. J.	1902	75,000,000	.....	.....	....	.....	.....
American Cotton Oil Co., N. J.	1889	20,237,100(6)	10,198,600(6)	3,000,000(4½)	1915	George A. Morrison	27 Beaver st., New York.
American Felt Co., N. J.	1899	1,625,000	1,625,000(6)	500,000(5)	1919	Charles L. Lovering	110 East 13th st., New York.
American Ginning Co., N. J.	1899	5,000,000	.....	.....	....	Howard Sinn	133 East 23d st., New York.
American Glue Co., N. J.	1894	800,000(2)	1,600,000(8)	.....	....	Daniel Webster King	419 Atlantic ave., Boston, Mass.

Note—The greatly increased mileage since 1880 is principally due to the fact that in 1881 the Western Union Telegraph Company absorbed by purchase all the lines of the American Union and the Atlantic and Pacific Telegraph companies, the former having previously in operation over 12,000 miles of lines, and the latter 8,706 miles.

THE TELEGRAPH.

Telegraphy has been known since the days of the Roman Empire, when its generals spelled words by means of fires of different substances. Through all ages since then there have been different ways of sending messages, even the North American Indians having made use of regular stations over the Western country for such signals. The modern means of telegraphing by means of electricity was first put into practicable shape by Professor Morse, who sent a dispatch from Washington to Baltimore May 27, 1844. His system, with certain modifications and improvements, is the one now in use in this country. The local circuit gave to the Morse system its great importance of value. Various efforts at bettering this system have been tried, but none of them has been entirely successful. Among them were the fac-simile, the printing and the dial. It is thought that the Marconi system of wireless telegraphy will revolutionize the system as at present practised, but until it shall be perfected this remains a matter of conjecture. All nations are watching the progress of his experiments with much interest. They are conducting extensive experiments and testing the claims of rival systems. No less progress has been made in the commercial application of wireless telegraphy than on its experimental and theoretical side, and companies for long-distance wireless communication are being considered as financial propositions in several instances.

Declaration of Independence of the Thirteen United States of America.

When, in the course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect for the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident: that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty and the pursuit of happiness. That to secure these rights governments are instituted among men, deriving their just powers from the consent of the governed, that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles and organizing its powers in such form as to them shall seem most likely to effect their safety and happiness. Prudence, indeed, will dictate that governments long established should not be changed for light and transient causes; and accordingly all experience hath shown that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same object, evinces a design to reduce them under absolute despotism, it is their right, it is their duty, to throw off such government, and to provide new guards for their future security. Such has been the patient sufferance of these Colonies, and such is now the necessity which constrains them to alter their former systems of government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute tyranny over these States. To prove this, let facts be submitted to a candid world.

He has refused his assent to laws, the most wholesome and necessary for the public good.

He has forbidden his governors to pass laws of immediate and pressing importance, unless suspended in their operation till his assent should be obtained; and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other laws for the accommodation of large districts of people, unless those people would relinquish the right of representation in the legislature, a right inestimable to them, and formidable to tyrants only.

He has called together legislative bodies at places unusual, uncomfortable, and distant from the depository of their public records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved representative houses repeatedly for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected, whereby the legislative powers, incapable of annihilation, have returned to the people at large for their exercise; the State remaining, in the meantime, exposed to all the dangers of invasion from without and convulsions within.

He has endeavored to prevent the population of these States; for that purpose obstructing the laws for naturalization of foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new appropriations of lands.

He has obstructed the administration of justice by refusing his assent to laws for establishing judiciary powers.

He has made judges dependent on his will alone for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of new offices, and sent hither swarms of officers to harass our people and eat out their substance.

He has kept among us, in time of peace, standing armies, without the consent of our legislatures.

He has affected to render the military independent of and superior to the civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution and unacknowledged by our laws; giving his assent to their acts of pretended legislation:

For quartering large bodies of armed troops among us;

For protecting them, by a mock trial, from punishment for any murders which they should commit on the inhabitants of these States;

For cutting off our trade with all parts of the world;

For imposing taxes on us without our consent;

For depriving us, in many cases, of the benefits of trial by jury;

For transporting us beyond seas to be tried for pretended offenses;

For abolishing the free system of English laws in a neighboring province, establishing therein an arbitrary government, and enlarging its boundaries, so as to render it at once an example and fit instrument for introducing the same absolute rule in these colonies;

For taking away our charters, abolishing our most valuable laws, and altering fundamentally the forms of our governments;

For suspending our own legislatures, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated government here, by declaring us out of his protection, and waging war against us.

He has plundered our seas, ravaged our coasts, burnt our towns, and destroyed the lives of our people.

He is, at this time, transporting large armies of foreign mercenaries to complete the works of death, desolation and tyranny, already begun, with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the head of a civilized nation.

He has constrained our fellow-citizens, taken captive on the high seas, to bear arms against their country, to become the executioners of their friends and brethren, or to fall themselves by their hands.

He has excited domestic insurrections amongst us, and has endeavored to bring on the inhabitants of our frontiers the merciless Indian savages whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions.

In every stage of these oppressions we have petitioned for redress in the most humble terms; our repeated petitions have been answered only by repeated injury. A prince whose character is thus marked by every act which may define a tyrant is unfit to be the ruler of a free people.

Nor have we been wanting in attentions to our British brethren. We have warned them, from time to time, of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They, too, have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity which denounces our separation, and hold them, as we hold the rest of mankind, enemies in war, in peace friends.

We, therefore, the Representatives of the United States of America, in General Congress assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions, do, in the name and by authority of the good people of these Colonies, solemnly publish and declare, That these United Colonies are, and of right ought to be, free and independent States; that they are absolved from all allegiance to the British crown, and that all political connection between them and the State of Great Britain is, and ought to be, totally dissolved; and that as free and independent States they have full power to levy war, conclude peace, contract alliances, establish commerce and to do all other acts and things which independent States may of right do. And for the support of this declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our lives, our fortunes, and our sacred honor.

Constitution of the United States.

Preamble.

We, the people of the United States, in order to form a more perfect Union, establish justice, insure domestic tranquillity, provide for the common defence, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Constitution for the United States of America.

ARTICLE I.

Legislative powers.

Section I. All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

House of Representatives.

Section II. 1. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

Qualifications of Representatives.

2. No person shall be a Representative who shall not have attained the age of twenty-five years, and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

Apportionment of Representatives.

3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose 3; Massachusetts, 8; Rhode Island and Providence Plantations, 1; Connecticut, 5; New York, 6; New Jersey, 4; Pennsylvania, 8; Delaware, 1; Maryland, 6; Virginia, 10; North Carolina, 5; South Carolina, 5, and Georgia, 3.*

Vacancies.

4. When vacancies happen in the representation from any State, the Executive Authority thereof shall issue writs of election to fill such vacancies.

Officers.

5. The House of Representatives shall choose their Speaker and other officers, and shall have the sole power of impeachment.

Senate.

Section III. 1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

Classification of Senators.

2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the expiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year; and if vacancies happen by resignation, or otherwise, during the recess of the Legislature of any State, the Executive thereof may make temporary appointment until the next meeting of the Legislature, which shall then fill such vacancies.

Qualifications of Senators.

3. No person shall be a Senator who shall not have attained to the age of thirty years, and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State for which he shall be chosen.

President of Senate.

4. The Vice-President of the United States shall be President of the Senate, but shall have no vote unless they be equally divided.

Other Officers.

5. The Senate shall choose their other officers, and also a President pro tempore, in the absence of the Vice-President, or when he shall exercise the office of President of the United States.

Senate to try impeachments.

6. The Senate shall have the sole power to try all impeachments. When sitting for that purpose, they shall be on oath or affirmation. When the President of the United States is tried, the Chief Justice shall preside; and no person shall be convicted without the concurrence of two-thirds of the members present.

Judgment upon conviction.

7. Judgment in cases of impeachment shall not extend further than to removal from office, and disqualification to hold and enjoy any office of honor, trust, or profit under the United States; but the party convicted shall nevertheless be liable and subject to indictment, trial, judgment, and punishment, according to law.

Elections.

Section IV. 1. The times, places, and manner of holding elections for Senators and Representatives shall be prescribed in each State by the Legislature thereof; but the Congress may at any time by law make or alter such regulations, except as to places of choosing Senators.

Meeting of Congress.

2. The Congress shall assemble at least once in every year, and such meeting shall be on the first Monday in December, unless they shall by law appoint a different day.

Organization of Congress.

Section V. 1. Each House shall be the judge of the elections, returns, and qualifications of its own members, and a majority of each shall constitute a quorum to do business; but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members in such manner and under such penalties as each House may provide.

Rule of proceedings.

2. Each House may determine the rules of its proceedings, punish its members for disorderly behavior, and with the concurrence of two-thirds expel a member.

Journals of each House.

3. Each House shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may in their judgment require secrecy; and the yeas and nays of the members of either House on any question shall, at the desire of one-fifth of those present, be entered on the journal.

Adjournment of Congress.

4. Neither House, during the session of Congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Compensation and privileges.

Section VI. 1. The Senators and Representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same, and for any speech or debate in either House they shall not be questioned in any other place.

Other offices prohibited.

2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Revenue bills.

Section VII. 1. All bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments, as on other bills.

Bills and laws.

2. Every bill which shall have passed the House of Representatives and the Senate shall, before it become a law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two-thirds of that

*See Article XIV., Amendments.

Digitized by Google

House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return; in which case it shall not be a law.

Approval and veto powers of the President.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States, and before the same shall take effect shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

Powers vested in Congress.

Section VIII. 1. The Congress shall have power

To lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defence and general welfare of the United States, but all duties, imposts, and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States, and with the Indian tribes.

4. To establish an uniform rule of naturalization and uniform laws on the subject of bankruptcy throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post-roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offences against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

16. To provide for organising, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dry-docks, and other needful buildings.

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers, and all other powers, vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Immigrants, how admitted.

Section IX. 1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

Habeas corpus.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

Attainder.

3. No bill of attainder or ex post facto law shall be passed.

Direct taxes.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

Regulations regarding customs duties.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties in another.

Moneys, how drawn.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

Titles of nobility prohibited.

8. No title of nobility shall be granted by the United States. And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

Powers of States defined.

Section X. 1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States, and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

Executive power, in whom vested.

Section I. 1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and, together, with the Vice-President, chosen for the same term, be elected as follows:

Electors.

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative or person holding an office of trust or profit under the United States shall be appointed an elector.

Proceedings of electors.

3. [The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat

Digitized by Google

of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice-President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice-President.]*

Proceedings of House of Representatives.

Time of choosing electors.

4. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

Qualifications of the President.

5. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

Provision for disability.

6. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

Salary.

7. The President shall, at stated times, receive for his services a compensation, which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States, or any of them.

Oath.

8. Before he enter on the execution of his office he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Duties.

Section II. 1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offences against the United States except in cases of impeachment.

May make treaties, appoint officials, etc.

2. He shall have power, by and with the advice and consent of the Senate, to make treaties, provided two-thirds of the Senators present concur; and he shall nominate, and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

May fill vacancies.

3. The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

May convene Congress and make recommendations.

Section III. He shall from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient; he may, on extraordinary occasions, convene both Houses, or either of them, and in case of disagreement between them with respect to the time of adjournment, he may adjourn them to such time as he shall think proper; he shall receive ambassadors and other public ministers; he shall take care that the laws be faithfully executed, and shall commission all the officers of the United States.

May be impeached.

Section IV. The President, Vice-President, and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery, or other high crimes and misdemeanors.

ARTICLE III.

Judicial power.

Section I. The judical power of the United States shall be vested in one Supreme Court, and in such inferior courts as the Congress may from time to time ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall at stated times receive for their services a compensation which shall not be diminished during their continuance in office.

To what cases it extends.

Section II. 1. The judicial power shall extend to all cases in law and equity arising under this Constitution, the laws of the United States, and treaties made, or which shall be made, under their authority; to all cases affecting ambassadors, other public ministers, and consuls; to all cases of admiralty and maritime jurisdiction; to controversies to which the United States shall be a party; to controversies between two or more States, between a State and citizens of another State, between citizens of different States, between citizens of the same State claiming lands under grants of different States, and between a State, or the citizens thereof, and foreign States, citizens, or subjects.

Jurisdiction of the Supreme Court.

2. In all cases affecting ambassadors, other public ministers, and consuls, and those in which a State shall be party, the Supreme Court shall have original jurisdiction. In all the other cases before-mentioned the Supreme Court shall have appellate jurisdiction both as to law and fact, with such exceptions and under such regulations as the Congress shall make.

Rules respecting trials.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trial shall be held in the State where the said crimes shall have been committed; but when not committed within any State the trial shall be at such place or places as the Congress may by law have directed.

Treason defined.

Section III. 1. Treason against the United States shall consist only in levying war against them, or in adhering to their enemies, giving them aid and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act, or on confession in open court.

How punished.

2. The Congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attained.

ARTICLE IV.

Rights of States.

Section I. Full faith and credit shall be given in each State to the public acts, records, and judicial proceedings of every other State. And the Congress may by gen-

*This clause is superseded by Article XII., Amendments.

Digitized by Google

eral laws prescribe the manner in which such acts, records, and proceedings shall be proved, and the effect thereof.

Privileges of citizens. Section II. 1. The citizens of each State shall be entitled to all privileges and immunities of citizens in the several States.

Executive requisitions. 2. A person charged in any State with treason, felony, or other crime, who shall flee from justice, and be found in another State, shall, on demand of the Executive authority of the State from which he fled, be delivered up, to be removed to the State having jurisdiction of the crime.

Laws regulating labor. 3. No person held to service or labor in one State, under the laws thereof, escaping into another shall, in consequence of any law or regulation therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

New States, how admitted. Section III. 1. New States may be admitted by the Congress into this Union, but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress.

Disposal of public lands. 2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

Republican government guaranteed. Section IV. The United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion, and, on application of the Legislature, or of the Executive (when the Legislature cannot be convened), against domestic violence.

ARTICLE V.

Constitution, how amended. The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress; provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

Certain debts valid. 1. All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation.

Supreme law defined. 2. This Constitution and the laws of the United States which shall be made in pursuance thereof and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

Oath: of whom required. 3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

Ratification of Constitution. The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

AMENDMENTS TO THE CONSTITUTION.
(Declared in force December 15, 1791.)

ARTICLE I.

Religion and free speech. Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

ARTICLE II.

Right to bear arms. A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

Soldiers in time of peace. No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

Right of search. The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.

Arrest for capital crimes. No person shall be held to answer for a capital or other infamous crime unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offence to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.

Right to speedy trial. In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defence.

ARTICLE VII.

Trial by jury. In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.

Excessive bail. Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.

Constitutional rights. The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.

Rights of States. The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

Digitized by Google

ARTICLE XI.

(Declared in Force January 8, 1798.)

Judicial power. The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign State.

ARTICLE XII.

(Ratified by all States with the exception of Connecticut, Delaware, Massachusetts and New Hampshire. Declared in Force September 25, 1804.)

Method of choosing President. The electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom at least shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which list they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of a choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. **Vice-President.** The person having the greatest number of votes as Vice-President shall be the Vice-President, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

ARTICLE XIII.

(Ratified by 31 of the 36 States; rejected by Delaware and Kentucky; conditionally ratified by Alabama and Mississippi; Texas refrained from taking action. Proclaimed December 18, 1865.)

Slavery abolished. 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XIV.

(Ratified by 23 Northern States; rejected by Delaware, Kentucky, Maryland and 10 Southern States; California refrained from taking action. The amendment was subsequently ratified by the Southern States and was proclaimed July 28, 1868.)

Citizenship. 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Representation. 2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male members of such State, being of twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Rebellion against the United States. 3. No person shall be a Senator or Representative in Congress, or elector of President and Vice-President, or holding any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid and comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

Public debt. 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.

(Ratified by 30 States; rejected by California, Delaware, Kentucky, Maryland, New Jersey and Oregon; Tennessee refrained from taking action. On January 5, 1870, New York rescinded its ratification. Proclaimed March 30, 1870.)

Right of suffrage. 1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce the provisions of this article by appropriate legislation.

RATIFICATION OF THE CONSTITUTION.

The thirteen original States ratified the Constitution in the following order:

Delaware, December 7, 1787, unanimously; Pennsylvania, December 12, 1787, by vote of 46 to 23; New Jersey, December 18, 1787, unanimously; Georgia, January 2, 1788, unanimously; Connecticut, January 9, 1788, by vote of 128 to 40; Massachusetts, February 6, 1788, by vote of 187 to 168; Maryland, April 28, 1788, by vote of 63 to 12; South Carolina, May 23, 1788, by vote of 149 to 73; New Hampshire, June 21, 1788, by vote of 57 to 46; Virginia, June 25, 1788, by vote of 89 to 79; New York, July 26, 1788, by vote of 30 to 28; North Carolina, November 21, 1789, by vote of 193 to 75; Rhode Island, May 29, 1790, by vote of 34 to 32.

The Presidents of the United States.

No.	Name in Full.	Born.	Birthplace.	Paternal Ancestry.
1.	George Washington	February 22, 1732.	Near Bridges Creek, Westmoreland Co., Va	English.
2.	John Adams	October 30, 1735.	Quincy, Norfolk County, Mass	English.
3.	Thomas Jefferson	April 13, 1743	Shadwell, Albemarle County, Va	Welsh.
4.	James Madison	March 16, 1751	Port Conway, King George County, Va	English.
5.	James Monroe	April 28, 1758	Head of Monroe's Creek, Westmoreland Co., Va	Scotch.
6.	John Quincy Adams	July 11, 1767	Quincy, Norfolk County, Mass	English.
7.	Andrew Jackson	March 15, 1767	Near Cureton's Pond, Union County, N. C.†	Scotch-Irish.
8.	Martin Van Buren	December 5, 1782.	Kinderhook, Columbia County, N. Y	Dutch.
9.	William Henry Harrison	February 9, 1773.	Berkeley, Charles City County, Va	English.
10.	John Tyler	March 29, 1790	Greenway, Charles City County, Va	English.
11.	James Knox Polk	November 2, 1795.	Near Pineville, Mecklenburg Co., N. C	Scotch-Irish.
12.	Zachary Taylor	November 24, 1784	Near Orange C. H., Orange County, Va	English.
13.	Millard Fillmore	January 7, 1800	Summerhill, Cayuga County, N. Y	English.
14.	Franklin Pierce	November 23, 1804	Hillsborough, Hillsborough County, N. H.	English.
15.	James Buchanan	April 23, 1791	Cove Gap, Franklin County, Pa	Scotch-Irish.
16.	Abraham Lincoln	February 12, 1809.	Near Hodgenville, Larue County, Ky	English.
17.	Andrew Johnson	December 29, 1808	Raleigh, Wake County, N. C	English.
18.	Ulysses Simpson Grant	April 27, 1822	Point Pleasant, Clermont County, O	Scotch.
19.	Rutherford Birchard Hayes	October 4, 1822	Delaware, Delaware County, O	Scotch.
20.	James Abram Garfield	November 19, 1831	Orange Township, Cuyahoga County, O	English.
21.	Chester Alan Arthur	October 5, 1830	Fairfield, Franklin County, Vt	Scotch-Irish.
22. 24.	Grover Cleveland	March 18, 1837	Caldwell, Essex County, N. J	English.
23.	Benjamin Harrison	August 20, 1833	North Bend, Hamilton County, O	English.
25.	William McKinley	January 29, 1843	Niles, Trumbull County, O	Scotch-Irish.
26.	Theodore Roosevelt	October 27, 1858	New York City, N. Y	Dutch.

† Jackson claimed to be a native of South Carolina, and Kendall, his biographer, said that he was born in Lancaster County, S. C. Parton, however, claims that he was born in Union County, N. C., which is very near the South Carolina line.

§ Widows. Their maiden names are in parentheses.

¶ She was the divorced wife of Captain Robards.

(a) The present Democratic party claims to be the lineal successor of the first Republican party, and to have been founded by President Jefferson.

(b) There was little party organization at the time of the election of John Quincy Adams. He claimed to be a Republican, but was really a Federalist. His opponents adopted the name of Democrats and later elected Jackson President.

Name.	Died.	Age.	Cause of Death.	Place of Death.	Place of Burial.

McKinley	Sept. 14, 1901	57	Assassination	Buffalo, N. Y.	Cemetery, Canton, O.
Roosevelt					

Washington was first inaugurated in New York. His second inauguration took place in Philadelphia. John Adams was inaugurated in Philadelphia. Jefferson and each succeeding President elected by the people were inaugurated in Washington. Grant was christened Hiram Ulysses, but changed his name to Ulysses Simpson. Cleveland was christened Stephen Grover, but dropped the Stephen.

W. H Harrison was the oldest man elected President, and Grant the youngest, but Roosevelt was the youngest to become President. Cleveland was the only President who was married in the White House.

WAR RECORDS OF THE PRESIDENTS.

Revolutionary War—Washington, Monroe and Jackson.

War of 1812-15—Jackson, W. H. Harrison, Tyler, Taylor and Buchanan.

Black Hawk War—Lincoln.

Mexican War—Taylor, Pierce and Grant.

Civil War—Grant, Hayes, Garfield, Arthur, Benjamin Harrison and McKinley.

War with Spain—Roosevelt.

THE PRESIDENTIAL SUCCESSION.

Succession to the Presidency is fixed by the acts of the Forty-ninth Congress, Chapter IV., which provide that in case of the removal, death, resignation or inability of both the President and the Vice-President, then the Secretary of State shall act as President until the disability of the President or Vice-President is removed or a President is elected. If there be no Secretary of State, then the Secretary of the Treasury will act; and the order of succession is: Secretary of War, Attorney-General, Postmaster-General, Secretary of the Navy and the Secretary of the Interior. The Secretary of Agriculture cannot succeed to the Presidency, as his office was created after the passage of this act

This act applies only to such Cabinet officers as shall have been appointed by the consent of the Senate and are eligible under the Constitution to the Presidency.

Upon taking office, the acting President must convene Congress, if it is not at that time in session, in extraordinary session, giving notice of twenty days.

Vice-Presidents of the United States.

	Name.	Born.	Birthplace.	Paternal Ancestry.	Residence.	Qualified.	Politics.	Died.

Platform Adopted by the Democratic Party.

CHICAGO, ILL., JULY 9, 1896.

We, the Democrats of the United States in National Convention assembled, do reaffirm our allegiance to those great essential principles of justice and liberty, upon which our institutions are founded, and which the Democratic party has advocated from Jefferson's time to our own—freedom of speech, freedom of the press, freedom of conscience, the preservation of personal rights, the equality of all citizens before the law, and the faithful observance of constitutional limitations.

During all these years the Democratic party has resisted the tendency of selfish interests to the centralization of governmental power and steadfastly maintained the integrity of the dual scheme of government established by the founders of this Republic of republics. Under its guidance and teachings the great principle of local self-government has found its best expression in the maintenance of the rights of the States and in its assertion of the necessity of confining the General Government to the exercise of powers granted by the Constitution of the United States.

The Constitution of the United States guarantees to every citizen the rights of civil and religious liberty. The Democratic party has always been the exponent of political liberty and religious freedom, and it renews its obligations and reaffirms its devotion to these fundamental principles of the Constitution.

The Money Question.—Recognizing that the money question is paramount to all others at this time, we invite attention to the fact that the Constitution names silver and gold together as the money metals of the United States, and that the first coinage law passed by Congress under the Constitution made the silver dollar the money unit of value and admitted gold to free coinage at a ratio based upon the silver dollar unit.

Demonetization Act of 1873 Condemned.—We declare that the Act of 1873 demonetizing silver without the knowledge or approval of the American people has resulted in the appreciation of gold and a corresponding fall in the prices of commodities produced by the people; a heavy increase in the burden of taxation and of all debts, public and private; the enrichment of the money-lending class at home and abroad; the prostration of industry and impoverishment of the people.

Opposed to Gold Monometallism.—We are unalterably opposed to monometallism which has locked fast the prosperity of an industrial people in the paralysis of hard times. Gold monometallism is a British policy, and its adoption has brought other nations into financial servitude to London. It is not only un-American, but anti-American, and it can be fastened on the United States only by the stifling of that indomitable spirit and love of liberty which proclaimed our political independence in 1776 and won it in the War of the Revolution.

Free Silver Coinage.—We demand the free and unlimited coinage of both silver and gold at the present legal ratio of 16 to 1 without waiting for the aid or consent of any other nation. We demand that the standard silver dollar shall be a full legal tender equally with gold for all debts, public and private, and we favor such legislation as will prevent for the future the demonetization of any kind of legal tender money by private contract.

We are opposed to the policy and practice of surrendering to the holders of the obligations of the United States the option reserved by law to the Government of redeeming such obligations in either silver coin or gold coin.

The Bond Issues.—We are opposed to the issuing of interest-bearing bonds of the United States in time of peace and condemn the trafficking with banking syndicates which in exchange for bonds and at an enormous profit to themselves, supply the Federal Treasury with gold to maintain the policy of gold monometallism.

National Bank Currency Opposed.—Congress alone has the power to coin and issue money, and President Jackson declared that this power could not be delegated to corporations or individuals. We, therefore denounce the issuance of notes intended to circulate as money by National banks as in derogation of the Constitution, and we demand that all paper which is made a legal tender for public and private debts, or which is receivable for duties to the United States shall be issued by the Government of the United States, and shall be redeemable in coin.

The Tariff.—We hold that tariff duties should be levied for purposes of revenue, such duties to be so adjusted as to operate equally throughout the country and not discriminate between class or section, and that taxation should be limited by the needs of the Government, honestly and economically administered. We denounce as disturbing to business the Republican threat to restore the McKinley law, which has twice been condemned by the people in National elections, and which, enacted under the false plea of protection to home industry, proved a prolific breeder of trusts and monopolies, enriched the few at the expense of the many, restricted trade, and deprived the producers of the great American staples of access to their natural markets.

The Supreme Court Criticized.—Until the money question is settled we are opposed to any agitation for further changes in our tariff laws, except such as are necessary to meet the deficit in revenue caused by the adverse decision of the Supreme Court on the income tax. But for this decision by the Supreme Court, there would be no deficit in the revenue under the law passed by a Democratic Congress in strict pursuance of the uniform decisions of that court for nearly 100 years, that court having in that decision sustained constitutional objections to its enactment which had previously been overruled by the ablest judges who have ever sat on that bench. We declare that it is the duty of Congress to use all the Constitutional power which remains after that decision, or which may come from its reversal by the court as it may hereafter be constituted, so that the burdens of taxation may be equally and impartially laid, to the end that wealth may bear its due proportion of the expenses of the Government.

Regulation of Immigration.—We hold that the most efficient way of protecting American labor is to prevent the importation of foreign pauper labor to compete with it in the home market, and that the value of the home market to our American farmers and artisans is greatly reduced by a vicious monetary system which depresses the prices of their products below the cost of production, and thus deprives them of the means of purchasing the products of our home manufactories; and as labor creates the wealth of the country, we demand the passage of such laws as may be necessary to protect it in all its rights.

Arbitration in Railway Labor Disputes.—We are in favor of the arbitration of differences between employers engaged in interstate commerce and their employes, and recommended such legislation as is necessary to carry out this principle.

Trusts and Pools.—The absorption of wealth by the few, the consolidation of our leading railroad systems, and the formation of trusts and pools require a stricter control by the Federal Government of those arteries of commerce. We demand the enlargement of the powers of the Inter-State Commerce Commission and such restrictions and guarantees in the control of railroads as will protect the people from robbery and oppression.

Economy in Public Expenditures.—We denounce the profligate waste of money wrung from the people by oppressive taxation and the lavish appropriations of recent Republican Congresses, which have kept taxes high, while the labor that pays them is unemployed and the products of the people's toil are depressed in price till they no longer repay the cost of production. We demand a return to that simplicity and economy which befit a democratic Government and a reduction in the number of useless offices, the salaries of which drain the substance of the people.

Federal Intervention in Local Affairs.—We denounce arbitrary interference by Federal authorities in local affairs as a violation of the Constitution of the United States, and a crime against free institutions, and we especially object to government by injunction as a new and highly dangerous form of oppression by which Federal judges, in contempt of the laws of the States and rights of citizens, become at once legislators, judges, and executioners, and we approve the bill passed at the last session of the United States Senate, and now pending in the House of Representatives, relative to contempts in Federal Courts and providing for trials by jury in certain cases of contempt.

The Pacific Railroad.—No discrimination should be indulged by the Government of the United States in favor of any of its debtors. We approve of the refusal of the Fifty-third Congress to pass the Pacific

Digitized by Google

Railroad Funding Bill, and denounce the efforts of the present Republican Congress to enact a similar measure.

Soldiers' Pensions.—Recognizing the just claims of deserving Union soldiers, we heartily indorse the rule of the present Commissioner of Pensions that no names shall be arbitrarily dropped from the pension roll; and the fact of enlistment and service should be deemed conclusive evidence against disease and disability before enlistment.

Admission of Territories.—We favor the admission of the Territories of New Mexico, Oklahoma, and Arizona into the Union as States, and we favor the early admission of all the Territories having the necessary population and resources to entitle them to Statehood, and, while they remain Territories, we hold that the officials appointed to administer the government of any Territory, together with the District of Columbia and Alaska, should be bona fide residents of the Territory or District in which the duties are to be performed. The Democratic party believes in home rule and that all public lands of the United States should be appropriated to the establishment of free homes for American citizens.

We recommend that the Territory of Alaska be granted a delegate in Congress, and that the general land and timber laws of the United States be extended to said Territory.

The Monroe Doctrine.—The Monroe Doctrine, as originally declared and as interpreted by succeeding Presidents, is a permanent part of the foreign policy of the United States, and must at all times be maintained.

Sympathy for Cuba.—We extend our sympathy to the people of Cuba in their heroic struggle for liberty and independence.

Rotation in Office.—We are opposed to life tenure in the public service. We favor appointments based upon merit, fixed terms of office, and such an administration of the civil service laws as will afford equal opportunities to all citizens of ascertained fitness.

Presidential Third Term.—We declare it to be the unwritten law of this Republic, established by custom and usage of 100 years and sanctioned by the examples of the greatest and wisest of those who founded and have maintained our Government, that no man should be eligible for a third term of the Presidential office.

Improvement of Waterways.—The Federal Government should care for and improve the Mississippi River and other great waterways of the Republic, so as to secure for the interior States easy and cheap transportation to tide water. When any waterway of the Republic is of sufficient importance to demand aid of the Government, such aid should be extended upon a definite plan of continuous work until permanent improvement is secured.

Confiding in the justice of our cause and the necessity of its success at the polls, we submit the foregoing declarations of principles and purposes to the considerate judgment of the American people. We invite the support of all citizens who approve them and who desire to have them made effective through legislation for the relief of the people and the restoration of the country's prosperity.

Platform Adopted by the Republican Party.

ST. LOUIS, MO., JUNE 18, 1896.

The Republicans of the United States, assembled by their representatives in National Convention, appealing for the popular and historical justification of their claims to the matchless achievements of thirty years of Republican rule, earnestly and confidentially address themselves to the awakened intelligence, experience, and conscience of their countrymen in the following declaration of facts and principles:

The Democratic Administration.—For the first time since the Civil War the American people have witnessed the calamitous consequences of full and unrestricted Democratic control of the Government. It has been a record of unparalleled incapacity, dishonor, and disaster. In administrative management it has ruthlessly sacrificed indispensable revenue, entailed an unceasing deficit, eked out ordinary current expenses with borrowed money, piled up the public debt by $262,000,000 in time of peace, forced an adverse balance of trade, kept a perpetual menace hanging over the redemption fund, pawned American credit to alien syndicates, and reversed all the measures and results of successful Republican rule. In the broad effect of its policy it has precipitated panic, blighted industry and trade with prolonged depression, closed factories, reduced work and wages, halted enterprise, and crippled American production while stimulating foreign production for the American market. Every consideration of public safety and individual interest demands that the Government shall be rescued from the hands of those who have shown themselves incapable to conduct it without disaster at home and dishonor abroad, and shall be restored to the party which for thirty years administered it with unequalled success and prosperity. And in this connection we heartily indorse the wisdom, patriotism, and the success of the Administration of President Harrison.

The Tariff.—We renew and emphasize our allegiance to the policy of protection as the bulwark of American industrial independence and the foundation of American development and prosperity. This true American policy taxes foreign products and encourages home industry; it puts the burden of revenue on foreign goods; it secures the American market for the American producer; it upholds the American standard of wages for the American workingman; it puts the factory by the side of the farm and makes the American farmer less dependent on foreign demand and price; it diffuses general thrift and founds the strength of all on the strength of each. In its reasonable application it is just, fair, and impartial, equally opposed to foreign control and domestic monopoly, to sectional discrimination, and individual favoritism.

We denounce the present Democratic tariff as sectional, injurious to the public credit, and destructive to business enterprise. We demand such an equitable tariff on foreign imports which come into competition with American products as will not only furnish adequate revenue for the necessary expenses of the Government, but will protect American labor from degradation to the wage level of other lands. We are not pledged to any particular schedules. The question of rates is a practical question, to be governed by the conditions of the time and of production; the ruling and uncompromising principle is the protection and development of American labor and industry. The country demands a right settlement, and then it wants rest.

Reciprocity and Protection.—We believe the repeal of the reciprocity arrangements negotiated by the last Republican Administration was a national calamity, and we demand their renewal and extension on such terms as will equalize our trade with other nations, remove the restrictions which now obstruct the sale of American products in the ports of other countries, and secure enlarged markets for the products of our farms, forests, and factories.

Protection and reciprocity are twin measures of Republican policy, and go hand in hand. Democratic rule has recklessly struck down both, and both must be re-established. Protection for what we produce; free admission for the necessaries of life which we do not produce; reciprocal agreements of mutual interests which gain open markets for us in return for our open market to others. Protection builds up domestic industry and trade and secures our own market for ourselves; reciprocity builds up foreign trade and finds an outlet for our surplus.

Protection for Sugar Growers.—We condemn the present Administration for not keeping faith with the sugar producers of this country. The Republican party favors such protection as will lead to the production on American soil of all the sugar which the American people use, and for which they pay other countries more than $100,000,000 annually.

Wool and Woollens.—To all our products—to those of the mine and the field as well as those of the shop and the factory—to hemp, to wool, the product of the great industry of sheep husbandry, as well as to the finished woollens of the mills, we promise the most ample protection.

The Merchant Marine.—We favor restoring the early American policy of discriminating duties for the upbuilding of our merchant marine and the protection of our shipping in the foreign carrying trade, so that American ships—the product of American labor employed in American shipyards, sailing under the Stars and Stripes, and manned, officered and owned by Americans—may regain the carrying of our foreign commerce.

The Currency Question.—The Republican party is unreservedly for sound money. It caused the enactment of the law providing for the resumption of specie payments in 1879; since then every dollar has been as good as gold. We are unalterably opposed to every measure calculated to debase our currency or impair

Digitized by Google

the credit of our country. We are therefore opposed to the free coinage of silver except by international agreement with the leading commercial nations of the world, which we pledge ourselves to promote, and until such agreement can be obtained the existing gold standard must be preserved. All our silver and paper currency must be maintained at parity with gold, and we favor all measures designed to maintain inviolably the obligations of the United States, and all our money, whether coin or paper, at the present standard, the standard of the most enlightened nations of the earth.

Liberal Pensions for Soldiers.—The veterans of the Union armies deserve and should receive fair treatment and generous recognition. Whenever practicable they should be given the preference in the matter of employment, and they are entitled to the enactment of such laws as are best calculated to secure the fulfilment of the pledges made to them in the dark days of the country's peril. We denounce the practice in the Pension Bureau, so recklessly and unjustly carried on by the present Administration, of reducing pensions and arbitrarily dropping names from the rolls, as deserving the severest condemnation of the American people.

Foreign Relations.—Our foreign policy should be at all times firm, vigorous, and dignified, and all our interests in the Western Hemisphere carefully watched and guarded. The Hawaiian Islands should be controlled by the United States, and no foreign power should be permitted to interfere with them; the Nicaraguan Canal should be built, owned, and operated by the United States, and by the purchase of the Danish islands we would secure a proper and much-needed naval station in the West Indies.

The Armenian Massacres.—The massacres in Armenia have aroused the deep sympathy and just indignation of the American people, and we believe that the United States should exercise all the influence it can properly exert to bring these atrocities to an end. In Turkey, American residents have been exposed to the gravest dangers and American property destroyed. There and everywhere American citizens and American property must be absolutely protected at all hazards and at any cost.

The Monroe Doctrine.—We reassert the Monroe Doctrine in its full extent, and we reaffirm the right of the United States to give the doctrine effect by responding to the appeal of any American States for friendly intervention in case of European encroachment. We have not interfered, and shall not interfere, with the existing possessions of any European power in this hemisphere, but these possessions must not, on any pretext, be extended. We hopefully look forward to the eventual withdrawal of the European powers from this hemisphere, and to the ultimate union of all of the English-speaking part of the continent by the free consent of its inhabitants.

Sympathy for Cuba.—From the hour of achieving their own independence the people of the United States have regarded with sympathy the struggles of other American peoples to free themselves from European domination. We watch with deep and abiding interest the heroic battle of the Cuban patriots against cruelty and oppression, and our best hopes go out for the full success of their determined contest for liberty.

The Government of Spain, having lost control of Cuba, and being unable to protect the property or lives of resident American citizens, or to comply with its treaty obligations, we believe that the Government of the United States should actively use its influence and good offices to restore peace and give independence to the island.

Enlargement of the Navy.—The peace and security of the Republic and the maintenance of its rightful influence among the nations of the earth demand a naval power commensurate with its position and responsibility. We therefore favor the continued enlargement of the navy and a complete system of harbor and seacoast defences.

Foreign Immigration.—For the protection of the quality of our American citizenship, and of the wages of our workingmen against the fatal competition of low-priced labor, we demand that the immigration laws be thoroughly enforced, and so extended as to exclude from entrance to the United States those who can neither read nor write.

Civil Service Reform.—The Civil Service law was placed on the statute book by the Republican party, which has always sustained it, and we renew our repeated declarations that it shall be thoroughly and honestly enforced and extended wherever practicable.

Free and Unrestricted Ballot.—We demand that every citizen of the United States shall be allowed to cast one free and unrestricted ballot, and that such ballot shall be counted and returned as cast.

Lynchings.—We proclaim our unqualified condemnation of the uncivilized and barbarous practice, well known as lynching or killing of human beings, suspected or charged with crime, without process of law.

Labor Arbitration.—We favor the creation of a National Board of Arbitration to settle and adjust differences which may arise between employers and employed engaged in interstate commerce.

Free Homesteads.—We believe in an immediate return to the free homestead policy of the Republican party, and urge the passage by Congress of a satisfactory free homestead measure such as has already passed the House and is now pending in the Senate.

Admission of Territories.—We favor the admission of the remaining Territories at the earliest practicable date, having due regard to the interests of the people of the Territories and of the United States. All the Federal officers appointed for the Territories should be selected from bona fide residents thereof, and the right of self-government should be accorded as far as practicable.

Alaska in Congress.—We believe the citizens of Alaska should have representation in the Congress of the United States, to the end that needful legislation may be intelligently enacted.

The Liquor Traffic.—We sympathize with all wise and legitimate efforts to lessen and prevent the evils of intemperance and promote morality.

Woman's Rights.—The Republican party is mindful of the rights and interests of women. Protection of American industries includes equal opportunities, equal pay for equal work, and protection to the home. We favor the admission of women to wider spheres of usefulness, and welcome their co-operation in rescuing the country from Democratic and Populistic mismanagement and misrule.

Such are the principles and policies of the Republican party. By these principles we will abide, and these policies we will put into execution. We ask for them the considerate judgment of the American people. Confident alike in the history of our great party and in the justice of our cause, we present our platform and our candidates in the full assurance that the election will bring victory to the Republican party and prosperity to the people of the United States.

Platform Adopted by the Democratic Party.

KANSAS CITY, MO., JULY 5, 1900.

Declaration of Principles.—We, the representatives of the Democratic party of the United States, assembled in National Convention on the anniversary of the adoption of the Declaration of Independence, do reaffirm our faith in that immortal proclamation of the inalienable rights of man, and our allegiance to the Constitution framed in harmony therewith by the fathers of the Republic. We hold with the United States Supreme Court that the Declaration of Independence is the spirit of our Government, of which the Constitution is the form and letter. We declare again that all governments instituted among men derive their just powers from the consent of the governed; that any government not based upon the consent of the governed is a tyranny; and that to impose upon any people a government of force is to substitute the methods of imperialism for those of a republic. We hold that the Constitution follows the flag and denounce the doctrine that an Executive or Congress, deriving their existence and their powers from the Constitution, can exercise lawful authority beyond it, or in violation of it. We assert that no nation can long endure half republic and half empire, and we warn the American people that imperialism abroad will lead quickly and inevitably to despotism at home.

Porto Rican Law Denounced.—Believing in these fundamental principles, we denounce the Porto Rican law, enacted by a Republican Congress against the protest and opposition of the Democratic minority, as a bold and open violation of the Nation's organic law and a flagrant breach of National good faith. It imposes upon the people of Porto Rico a government without their consent, and taxation without representation. It dishonors the American people by repudiating a solemn pledge made in their behalf by the commanding general of our army, which the Porto Ricans welcomed to a peaceful and unresisted occupation of

Digitized by Google

their land. It dooms to poverty and distress a people whose helplessness appeals with peculiar force to our justice and magnanimity. In this, the first act of its imperialistic programme, the Republican party seeks to commit the United States to a Colonial policy inconsistent with republican institutions and condemned by the Supreme Court in numerous decisions.

Pledge to the Cubans.—We demand the prompt and honest fulfilment of our pledge to the Cuban people and the world, that the United States has no disposition nor intention to exercise sovereignty, jurisdiction, or control over the island of Cuba, except for its pacification. The war ended nearly two years ago, profound peace reigns over all the island, and still the Administration keeps the government of the island from its people, while Republican carpetbag officials plunder its revenues and exploit the Colonial theory to the disgrace of the American people.

The Philippine Question.—We condemn and denounce the Philippine policy of the present Administration. It has embroiled the Republic in an unnecessary war, sacrificed the lives of many of its noblest sons, and placed the United States, previously known and applauded throughout the world as the champion of freedom, in the false and un-American position of crushing with military force the efforts of our former allies to achieve liberty and self-government. The Filipinos cannot be citizens without endangering our civilization; they cannot be subjects without imperilling our form of government; and as we are not willing to surrender our civilization, or to convert the Republic into an empire, we favor an immediate declaration of the Nation's purpose to give to the Filipinos, first, a stable form of government; second, independence; and third, protection from outside interference such as has been given for nearly a century to the republics of Central and South America. The greedy commercialism which dictated the Philippine policy of the Republican Administration attempts to justify it with the plea that it will pay, but even this sordid and unworthy plea fails when brought to the test of facts. The war of "criminal aggression" against the Filipinos, entailing an annual expense of many millions, has already cost more than any possible profit that could accrue from the entire Philippine trade for years to come. Furthermore, when trade is extended at the expense of liberty the price is always too high.

Territorial Expansion.—We are not opposed to territorial expansion, when it takes in desirable territory which can be erected into States in the Union, and whose people are willing and fit to become American citizens. We favor trade expansion by every peaceful and legitimate means. But we are unalterably opposed to the seizing or purchasing of distant islands to be governed outside the Constitution and whose people can never become citizens. We are in favor of extending the Republic's influence among the nations, but believe that influence should be extended not by force and violence, but through the persuasive power of a high and honorable example.

The Paramount Issue.—The importance of other questions now pending before the American people is in nowise diminished and the Democratic party takes no backward step from its position on them; but the burning issue of imperialism, growing out of the Spanish war, involving the very existence of the Republic and the destruction of our free institutions, we regard as the paramount issue of the campaign.

The Monroe Doctrine.—The declaration of the Republican platform adopted at the Philadelphia Convention, held in June, 1900, that the Republican party "steadfastly adheres to the policy announced in the Monroe Doctrine," is manifestly insincere and deceptive. This profession is contradicted by the avowed policy of that party, in opposition to the spirit of the Monroe Doctrine, to acquire and hold sovereignty over large areas of territory and large numbers of people in the Eastern Hemisphere. We insist on the strict maintenance of the Monroe Doctrine in all its integrity, both in letter and in spirit, as necessary to prevent the extension of European authority on these continents and as essential to our supremacy in American affairs. At the same time we declare that no American people shall ever be held by force in unwilling subjection to European authority.

Opposition to Militarism.—We oppose militarism. It means conquest abroad and intimidation and oppression at home. It means the strong arm which has ever been fatal to free institutions. It is what millions of our citizens have fled from in Europe. It will impose upon our peace loving people a large standing army, an unnecessary burden of taxation, and would be a constant menace to their liberties. A small standing army and a well disciplined State militia are amply sufficient in time of peace. This Republic has no place for a vast military establishment, a sure forerunner of compulsory military service and conscription. When the Nation is in danger the volunteer soldier is his country's best defender. The National Guard of the United States should ever be cherished in the patriotic hearts of a free people. Such organizations are ever an element of strength and safety. For the first time in our history and coeval with the Philippine conquest has there been a wholesale departure from our time-honored and approved system of volunteer organization. We denounce it as un-American, undemocratic and unrepublican and as a subversion of the ancient and fixed principles of a free people.

Trusts and Monopolies.—Private monopolies are indefensible and intolerable. They destroy competition, control the price of raw material and of the finished product, thus robbing both producer and consumer. They lessen the employment of labor and arbitrarily fix the terms and conditions thereof; and deprive individual energy and small capital of their opportunity for betterment. They are the most efficient means yet devised for appropriating the fruits of industry to the benefit of the few at the expense of the many, and, unless their insatiate greed is checked, all wealth will be aggregated in a few hands and the Republic destroyed. The dishonest paltering with the trust evil by the Republican party in its State and National platforms is conclusive proof of the truth of the charge that trusts are the legitimate product of Republican policies, that they are fostered by Republican laws, and that they are protected by the Republican Administration in return for campaign subscriptions and political support. We pledge the Democratic party to an unceasing warfare in Nation, State and city against private monopoly in every form. Existing laws against trusts must be enforced and more stringent ones must be enacted providing for publicity as to the affairs of corporations engaged in interstate commerce and requiring all corporations to show, before doing business outside of the State of their origin, that they have no water in their stock, and that they have not attempted and are not attempting to monopolize any branch of business or the production of any articles of merchandise; and the whole constitutional power of Congress over interstate commerce, the mails and all modes of interstate communication shall be exercised by the enactment of comprehensive laws upon the subject of trusts. Tariff laws should be amended by putting the products of trusts upon the free list, to prevent monopoly under the plea of protection. The failure of the present Republican Administration, with an absolute control over all the branches of the National Government, to enact any legislation designed to prevent or even curtail the absorbing power of trusts and illegal combinations, or to enforce the anti-trust laws already on the statute books, proves the insincerity of the high sounding phrases of the Republican platform. Corporations should be protected in all their rights and their legitimate interests should be respected, but any attempt by corporations to interfere with the public affairs of the people or to control the sovereignty which creates them should be forbidden under such penalties as will make such attempts impossible. We condemn the Dingley tariff law as a trust breeding measure skilfully devised to give to the few favors which they do not deserve, and to place upon the many burdens which they should not bear. We favor such an enlargement of the scope of the Interstate Commerce law as will enable the Commission to protect individuals and communities from discrimination and the public from unjust and unfair transportation rates.

American Financial System.—We reaffirm and indorse the principles of the National Democratic platform adopted at Chicago in 1896 and we reiterate the demand of that platform for an American financial system made by the American people for themselves, which shall restore and maintain a bimetallic price level, and as part of such system the immediate restoration of the free and unlimited coinage of silver and gold at the present legal ratio of 16 to 1, without waiting for the aid or consent of any other nation.

Currency Law Denounced.—We denounce the currency bill enacted at the last session of Congress as a step forward in the Republican policy which aims to discredit the sovereign right of the National Government to issue all money, whether coin or paper, and to bestow upon National banks the power to issue and control the volume of paper money for their own benefit. A permanent National bank currency, secured by Government bonds, must have a permanent debt to rest upon, and, if the bank currency is to increase with population and business, the debt must also increase. The Republican currency scheme is, therefore, a scheme for fastening upon the taxpayers a perpetual and growing debt for the benefit of the banks. We are opposed to this private corporation paper circulated as money, but without legal tender qualities, and

Digitized by Google

demand the retirement of National bank notes as fast as Government paper or silver certificates can be substituted for them. We favor an amendment to the Federal Constitution providing for the election of United States Senators by direct vote of the people, and we favor direct legislation wherever practicable. We are opposed to government by injunction; we denounce the blacklist, and favor arbitration as a means of settling disputes between corporations and their employes.

Department of Labor.—In the interest of American labor and the upbuilding of the workingman as the cornerstone of the prosperity of our country, we recommend that Congress create a Department of Labor, in charge of a Secretary, with a seat in the Cabinet, believing that the elevation of the American laborer will bring with it increased production and increased prosperity to our country at home and to our commerce abroad. We are proud of the courage and fidelity of the American soldiers and sailors in all our wars; we favor liberal pensions to them and their dependents; and we reiterate the position taken in the Chicago platform in 1896, that the fact of enlistment and service shall be deemed conclusive evidence against disease and disability before enlistment.

Nicaraguan Canal.—We favor the immediate construction, ownership and control of the Nicaraguan Canal by the United States, and we denounce the insincerity of the plank in the Republican National platform for an Isthmian canal, in the face of the failure of the Republican majority to pass the bill pending in Congress. We condemn the Hay-Pauncefote treaty as a surrender of American rights and interests, not to be tolerated by the American people. We denounce the failure of the Republican party to carry out its pledges to grant Statehood to the Territories of Arizona, New Mexico and Oklahoma, and we promise the people of those Territories immediate Statehood, and home rule during their condition as Territories; and we favor home rule and a Territorial form of government for Alaska and Porto Rico. We favor an intelligent system of improving the arid lands of the West, storing the waters for the purposes of irrigation, and the holding of such lands for actual settlers. We favor the continuance and strict enforcement of the Chinese Exclusion law and its application to the same classes of all Asiatic races.

Alliance with England.—Jefferson said: "Peace, commerce and honest friendship with all nations, entangling alliances with none." We approve this wholesome doctrine and earnestly protest against the Republican departure which has involved us in so-called world politics, including the diplomacy of Europe and the intrigue and land grabbing in Asia, and we especially condemn the ill concealed Republican alliance with England, which must mean discrimination against other friendly nations, and which has already stifled the Nation's voice while liberty is being strangled in Africa.

South African Republics.—Believing in the principles of self-government and rejecting, as did our forefathers, the claims of monarchy, we view with indignation the purpose of England to overwhelm with force the South African Republics. Speaking, as we believe, for the entire American Nation, except its Republican officeholders, and for all free men everywhere, we extend our sympathy to the heroic burghers in their unequal struggle to maintain their liberty and independence.

Republican Appropriations.—We denounce the lavish appropriations of recent Republican Congresses, which have kept taxes high and which threaten the perpetuation of the oppressive war levies. We oppose the accumulation of a surplus to be squandered in such barefaced frauds upon the taxpayers as the Shipping Subsidy bill, which, under the false pretence of fostering American shipbuilding, would put unearned millions into the pockets of favorite contributors to the Republican campaign fund. We favor the reduction and speedy repeal of the war taxes, and a return to the time honored Democratic policy of strict economy in governmental expenditures.

Appeal to the People.—Believing that our most cherished institutions are in great peril, that the very existence of our constitutional Republic is at stake, and that the decision now to be rendered will determine whether or not our children are to enjoy those blessed privileges of free government which have made the United States great, prosperous and honored, we earnestly ask for the foregoing declaration of principles the hearty support of the liberty loving American people, regardless of previous party affiliations.

Platform Adopted by the Republican Party.

PHILADELPHIA, PA., JUNE 20, 1900.

Party Achievements.—The Republicans of the United States, through their chosen representatives, met in National Convention, looking back upon an unsurpassed record of achievement and looking forward into a great field of duty and opportunity, and appealing to the judgment of their countrymen, make these declarations: The expectation in which the American people, turning from the Democratic party, intrusted power four years ago to a Republican Chief Magistrate and a Republican Congress has been met and satisfied. When the people then assembled at the polls, after a term of Democratic legislation and administration, business was dead, industry paralyzed and the National credit disastrously impaired. The country's capital was hidden away, and its labor distressed and unemployed. The Democrats had no other plan with which to improve the ruinous conditions which they had themselves produced than to coin silver at the ratio of 16 to 1. The Republican party, denouncing this plan as sure to produce conditions even worse than those from which relief was sought, promised to restore prosperity by means of two legitimate measures—a protective tariff and a law making gold the standard of value. The people by great majorities issued to the Republican party a commission to enact these laws. This commission has been executed, and the Republican promise is redeemed. Prosperity more general and more abundant than we have ever known has followed these enactments. There is no longer controversy as to the value of any Government obligation. Every American dollar is a gold dollar, or its assured equivalent, and American credit stands higher than that of any nation. Capital is fully employed and labor everywhere is profitably occupied. No single fact can more strikingly tell the story of what Republican government means in the country than this—that while during the whole period of one hundred and seven years, from 1790 to 1897, there was an excess of exports over imports of only $383,028,497, there has been in the short three years of the present Republican Administration an excess of exports over imports in the enormous sum of $1,483,537,094. And while the American people, sustained by this Republican legislation, have been achieving these splendid triumphs in their business and commerce, they have conducted, and in victory concluded, a war for liberty and human rights. No thought of national aggrandizement tarnished the high purpose with which American standards were unfurled. It was a war unsought and patiently resisted, but when it came the American Government was ready. Its fleets were cleared for action. Its armies were in the field, and the quick and signal triumph of its forces on land and sea bore equal tribute to the courage of American soldiers and sailors and to the skill and foresight of Republican statesmanship. To ten millions of the human race there was given "a new birth of freedom," and to the American people a new and noble responsibility.

The Administration Indorsed.—We indorse the Administration of William McKinley. Its acts have been established in wisdom and in patriotism, and at home and abroad it has distinctly elevated and extended the influence of the American Nation. Walking untried paths and facing unforeseen responsibilities, President McKinley has been in every situation the true American patriot and the upright statesman, clear in vision, strong in judgment, firm in action, always inspiring and deserving the confidence of his countrymen. In asking the American people to indorse this Republican record and to renew their commission to the Republican party, we remind them of the fact that the menace to their prosperity has always resided in Democratic principles, and no less in the general incapacity of the Democratic party to conduct public affairs. The prime essential of business prosperity is public confidence in the good sense of the Government and in its ability to deal intelligently with each new problem of administration and legislation. That confidence the Democratic party has never earned. It is hopelessly inadequate, and the country's prosperity when Democratic success at the polls is announced halts and ceases in mere anticipation of Democratic blunders and failures.

Gold Standard Upheld.—We renew our allegiance to the principle of the gold standard, and declare our confidence in the wisdom of the legislation of the LVIth Congress, by which the parity of all our money and stability of our currency upon a gold basis have been secured. We recognize that interest rates are a potent factor in production and business activity, and for the purpose of further equalizing and of further lowering the rates of interest we favor such monetary legislation as will enable the varying needs of the season and of all sections to be promptly met, in order that trade may be evenly sustained,

Digitized by Google

labor steadily employed and commerce enlarged. The volume of money in circulation was never so great per capita as it is to-day. We declare our steadfast opposition to the free and unlimited coinage of silver. No measure to that end could be considered which was without the support of the leading commercial countries of the world. However firmly Republican legislation may seem to have secured the country against the peril of base and discredited currency, the election of a Democratic President could not fail to impair the country's credit and to bring once more into question the intention of the American people to maintain upon the gold standard the parity of their money circulation. The Democratic party must be convinced that the American people will never tolerate the Chicago platform.

Trade Conspiracies Condemned.—We recognize the necessity and propriety of the honest co-operation of capital to meet new business conditions, and especially to extend our rapidly increasing foreign trade, but we condemn all conspiracies and combinations intended to restrict business, to create monopolies, to limit production or to control prices, and favor such legislation as will effectively restrain and prevent all such abuses, protect and promote competition and secure the rights of producers, laborers and all who are engaged in industry and commerce.

Protection.—We renew our faith in the policy of protection to American labor. In that policy our industries have been established, diversified and maintained. By protecting the home market competition has been stimulated and production cheapened. Opportunity for the inventive genius of our people has been secured and wages in every department of labor maintained at high rates, higher now than ever before, and always distinguishing our working people in their better conditions of life from those of any competing country. Enjoying the blessings of the American common school, secure in the right of self-government and protected in the occupancy of their own markets, their constantly increasing knowledge and skill have enabled them finally to enter the markets of the world.

Reciprocity.—We favor the associated policy of reciprocity so directed as to open our markets on favorable terms for what we do not ourselves produce in return for free foreign markets.

Immigration.—In the further interest of American workmen we favor a more effective restriction of the immigration of cheap labor from foreign lands, the extension of opportunities of education for working children, the raising of the age limit for child labor, the protection of free labor as against contract convict labor, and an effective system of labor insurance.

Shipping.—Our present dependence upon foreign shipping for nine-tenths of our foreign carrying is a great loss to the industry of this country. It is also a serious danger to our trade, for its sudden withdrawal in the event of European war would seriously cripple our expanding foreign commerce. The National defence and naval efficiency of this country, moreover, supply a compelling reason for legislation which will enable us to recover our former place among the trade-carrying fleets of the world.

Pensions.—The Nation owes a debt of profound gratitude to the soldiers and sailors who have fought its battles, and it is the Government's duty to provide for the survivors and for the widows and orphans of those who have fallen in the country's wars. The pension laws, founded in this just sentiment, should be liberal, and should be liberally administered, and preference should be given wherever practicable with respect to employment in the public service to soldiers and sailors and to their widows and orphans.

Civil Service.—We commend the policy of the Republican party in maintaining the efficiency of the Civil Service. The Administration has acted wisely in its effort to secure for public service in Cuba, Porto Rico, Hawaii and the Philippine Islands only those whose fitness has been determined by training or experience. We believe that employment in the public service in these territories should be confined as far as practicable to their inhabitants.

Fifteenth Amendment.—It was the plain purpose of the Fifteenth Amendment to the Constitution to prevent discrimination on account of race or color in regulating the elective franchise. Devices of State governments, whether by statutory or constitutional enactment, to avoid the purpose of this amendment are revolutionary and should be condemned.

Public Works.—Public movements looking to a permanent improvement of the roads and highways of the country meet with our cordial approval, and we recommend this subject to the earnest consideration of the people and of the Legislatures of the several States. We favor the extension of the rural free delivery service wherever its extension may be justified. In further pursuance of the constant policy of the Republican party to provide free homes on the public domain, we recommend adequate National legislation to reclaim the arid lands of the United States, reserving control of the distribution of water for irrigation to the respective States and Territories. We favor home rule for and the early admission to Statehood of the Territories of New Mexico, Arizona and Oklahoma.

War Taxes.—The Dingley act, amended to provide sufficient revenue for the conduct of the war, has so well performed its work that it has been possible to reduce the war debt in the sum of $40,000,000. So ample are the Government's revenues and so great is the public confidence in the integrity of its obligations that its newly funded 2 per cent bonds sell at a premium. The country is now justified in expecting, and it will be the policy of the Republican party to bring about, a reduction of the war taxes.

Isthmian Canal.—We favor the construction, ownership, control and protection of an isthmian canal by the Government of the United States. New markets are necessary for the increasing surplus of our farm products. Every effort should be made to open and obtain new markets, especially in the Orient, and the Administration is warmly to be commended for its successful effort to commit all trading and colonizing nations to the policy of the open door in China. In the interest of our expanding commerce we recommend that Congress create a department of commerce and industries in the charge of a secretary with a seat in the Cabinet.

Consuls.—The United States consular system should be reorganized under the supervision of this new department, upon such a basis of appointment and tenure as will render it still more serviceable to the Nation's increasing trade. The American Government must protect the person and property of every citizen wherever they are wrongfully violated or placed in peril.

Women in War.—We congratulate the women of America upon their splendid record of public service in the Volunteer Aid Association, and as nurses in camp and hospital during the recent campaign of our armies in the Eastern and Western Indies, and we appreciate their faithful co-operation in all works of education and industry.

Foreign Affairs.—President McKinley has conducted the foreign affairs of the United States with distinguished credit to the American people. In releasing us from the vexatious conditions of a European alliance for the government of Samoa his course is especially to be commended. By securing to our undivided control the most important island of the Samoan group and the best harbor in the Southern Pacific, every American interest has been safeguarded. We approve the annexation of the Hawaiian Islands to the United States. We commend the part taken by our Government in the Peace Conference at The Hague. We assert our steadfast adherence to the policy announced in the Monroe Doctrine. The provisions of The Hague Convention were wisely regarded when President McKinley tendered his friendly offices in the interest of peace between Great Britain and the South African republics. While the American Government must continue the policy prescribed by Washington, affirmed by every succeeding President and imposed upon us by The Hague Treaty, of non-intervention in European controversies, the American people earnestly hope that a way may soon be found, honorable alike to both contending parties, to terminate the strife between them. In accepting by the Treaty of Paris the just responsibility of our victories in the Spanish war the President and the Senate won the undoubted approval of the American people. No other course was possible than to destroy Spain's sovereignty throughout the West Indies and in the Philippine Islands. That course created our responsibility before the world, and, with the unorganized population whom our intervention had freed from Spain, to provide for the maintenance of law and order, and for the establishment of good government and for the performance of international obligations. Our authority could not be less than our responsibility, and wherever sovereign rights were extended it became the high duty of the Government to maintain its authority, to put down armed insurrection and to confer the blessings of liberty and civilization upon all the rescued peoples. The largest measure of self-government consistent with their welfare and our duties shall be secured to them by law. To Cuba independence and self-government were assured in the same voice by which war was declared, and to the letter this pledge will be performed. The Republican party upon its history, and upon this declaration of its principles and policies, confidently invokes the considerate and approving judgment of the American people.

*Prior to 1804 each elector was entitled to vote for two candidates for President. The candidate receiving the greatest number of votes was declared elected, while the candidate receiving the next highest vote was declared Vice-President. †Three States not voting. ‡It is claimed that the first Republican party was the progenitor of the present Democratic party. §As there was no election the choice was decided by the House of Representatives. ||Owing to the death of Horace Greeley the Democratic electors scattered their vote.

Territorial Expansion of the United States.

(Prepared for The American Almanac for 1903 by the United States Land Office.)

Territory.	Year.	Square Miles.	Price.
Territory of the original Thirteen States as recognized by Great Britain	1783	909,050	....
Louisiana purchase	1803	875,025	$15,000,000
Oregon*	1819	288,689	....
Florida, ceded to Spain	1819	70,107	5,499,768†
Texas, annexed	1845	389,795	....
Mexico, ceded	1848	523,802	18,250,000‡
Gadsden purchase, from Mexico	1853	36,211	10,000,000
Alaska, ceded by Russia	1867	599,446	7,200,000
Hawaii	1897	6,740	....
Porto Rico	1898	3,600	....
Pine Island	1898	882	....
Guam Island	1898	175	....
Tutuila group of the Samoan Islands	1899	73	....
Philippine Islands, ceded by Spain	1899	143,000	20,000,000
Totals	....	3,846,595	$75,949,768

*Oregon was acquired by discovery in 1792; exploration, 1805; by Antonia Settlement, 1811, and by Florida Treaty, in 1819. †Includes all interest payments. ‡$3,250,000 was expended in payment of claims of American citizens against Mexico.

Legal-Tender Currency.

Legal-tender is a term used to designate currency which may lawfully be used in the payment of debts. Gold coin is the one element in the currency of the United States which is legal-tender under all circumstances. It may be lawfully used at the nominal value of each piece when such piece is not below the standard weight and limit of tolerance provided by law, in which case it is still legal-tender at a value determined by its actual weight. Of silver coinage the dollar of 412 1-2 grains is legal-tender for all debts and dues, public or private, unless otherwise stipulated in the contract. The trade dollar, although containing 420 grains of silver, is not legal-tender; nor is any of the commemorative coinage, such as the Columbian and Lafayette issues. Silver half-dollar, quarter-dollar and dime coins are legal-tender in sums not exceeding ten dollars, in payment of all public or private dues. All United States coins of smaller denominations are legal-tender for single payments not exceeding twenty-five cents. United States notes issued under the legal-tender law of 1862, authorizing the issue of greenbacks, are legal-tender for all debts and dues, public or private, except duties on imports, interest on the public debt, and obligations contracted prior to the enactment of the law, with an expressed stipulation for payment in gold or silver. The interest-bearing treasury notes, under the act of March 3, 1863, were legal-tender, for their face value only, and not for the accrued interest, in the payment of all public and private obligations except for duties on imports and interest on the public debt; those issued under the act of June 30, 1864, are further restricted, and are not legal-tender in redemption of bank notes or bankers' notes circulated as money; those issued under the act of July 14, 1890, are a legal-tender in payment of public and private debts, except when contracts stipulate otherwise; when received for customs, taxes and other public dues, they may be reissued. Gold and silver certificates are legal-tender under the same conditions as noted in regard to the coinage, and when received in payment of any public dues they may be reissued. Notes issued for circulation by national banks are legal-tender in payment of taxes, excises, purchase of public lands and all other dues to the United States, except duties on imports, and also for all salaries and other debts and dues owing by the United States to individuals, corporations and associations within the United States, except interest on the public debt and in redemption of the national currency; nor are they legal-tender for any debt or liability to any national banking association, except gold-note banks.

The Latin Union.

The Latin Union, consisting of France, Belgium, Italy, Switzerland and Greece, was formed December 22, 1865, in order to remedy evils resulting from the substitution of gold for silver coins, and to establish a uniform metallic currency system for these countries. The contracting states maintained the double standard and the then existing ratio of 1 to 15½, but limited the silver coins to be stamped to the 5-franc pieces. By the convention of 1865 each of the contracting countries obligated itself to receive into its treasury coins manufactured by the others, without limitation as to value in the case of gold coins and 5-franc silver pieces and to the amount of 100 francs in the case of other silver pieces in any one payment. It was furthr stipulated that the latter should be legal-tender in the country that issued them to the amount of 50 francs between private parties in any one payment, and that they should be taken back by such country and exchanged for gold or 5-franc silver pieces.

The convention of 1865 expired in 1880. A new convention in 1878 prolonged the duration of the Latin Union for five years. The convention now in force is dated November 6, 1885. By its terms the suspension of the coinage of the 5-franc piece is maintained in the countries of the union, but any of the contracting states may resume the free coinage of silver on condition of exchanging, during the entire duration of the convention, the 5-franc silver pieces bearing its stamp and circulating in other states of the union, for gold or silver on demand. It was also stipulated that the union might be terminated at any time after January 1, 1891, by giving one year's notice.

The coins of the Latin Union are: Gold pieces, 100, 50, 20, 10 and 5 francs; silver pieces, 5, 2 and 1 francs, 50 and 20 centimes.

The last meeting of the union was held in 1897 to grant permission to the several countries to increase the coinage of subsidiary coins.

The Presidential Election of 1904.

A general election will be held in all the States of the United States on Tuesday, November 8, 1904, for the choice of electors upon whom will devolve the duty of naming two citizens who are to serve respectively as President and Vice-President of the United States for a term of four years, beginning on March 4, 1905. The number of electors to be thus chosen in each State will correspond with the representation of that State in the two branches of Congress. No Senator, Representative or person holding an office of trust or profit under the United States Government at the time of such election will be eligible as an elector.

The choice of electors will be made by the people direct, voting a general State ticket. In the earlier years of the Government the choice was made by the Legislatures in most of the States, and South Carolina adhered to the practice until the beginning of the Civil War. This matter has been adjusted by the people themselves, acting through their State Legislatures, the Constitution of the United States prescribing that the method of choice shall be determined by those bodies, and requiring only that in all the States the choice shall be made on the same day. The Constitution also directs, in Article XII., the manner in which the electors shall perform the duty for which they are chosen.

A law passed by the Forty-ninth Congress, and known as the "electoral count" act, directs that the time for the meeting of the electors, styled in some States the "Electoral College," shall be the second Monday in January next following their election. The same act specifies the second Wednesday in February succeeding the meeting of the electors as the time when Congress shall be in session to count the ballots cast at that meeting. The manner in which this shall be done is provided for as follows in Article XII. of the Constitution:

"The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted; the person having the greatest number of votes for President shall be President, if such number be a majority of the whole number of electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President, if such number be a majority of the whole number of electors appointed; and if no person have a majority, then from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice."

Under the Constitution only a native born citizen who shall have attained the age of thirty-five years is eligible for the office of President or Vice-President. It is a curious fact, however, that the language of this provision opened both offices to any foreign-born resident of the country who was a citizen at the time when the Constitution was adopted. While it is no longer possible that the United States should ever have any but a native ruler, the possibility existed in the early days of the Republic.

[1] While naturalization is conferred by the United States the right to vote is the gift of the State, and, as the result, in many States aliens who have declared their intentions to become citizens enjoy the right to vote.

The Australian ballot law, or some modification of it, is in force in all the States and Territories except New Mexico, North Carolina, Oklahoma, Oregon, South Carolina and parts of Georgia.

Women are permitted equal suffrage with men in four States: Colorado, Idaho, Utah and Wyoming. In New York they may vote at village elections upon questions of local taxation, providing they are property owners in the village affected, while in Kansas, Massachusetts, Michigan, Montana, New Hampshire, North Dakota, Ohio, Oklahoma, Washington and Wisconsin women may vote at school elections.

[2] Clergymen are required to reside but six months in the precinct. [3] Owners of real estate secure the voting right by one year's residence in the State. [4] Pastors of organized churches and teachers in the public schools require but six months' residence in the State. [5] Only actual residence required by law. [6] The registration of voters is required. [7] Registration required at least four months before election. [8] Registration required in cities or in villages containing a population of more than 5,000. [9] Voters registered by the assessors, but a voter missed by the assessors may swear in his vote. [10] A freeman's oath required before first vote. [11] Registration required in cities of more than 3,500 population. [12] Registration required in cities of more than 7,000 population. [13] Registration required in cities of 3,000 or more population. [14] Registration required in cities of the first and second class, and in Sumner and Montgomery Counties. [15] Registration required in cities of the first and second class only. [16] Registration required in all cities and towns having 500 or more voters. [17] Registration required in cities, towns or villages having a population of 800 or more. [18] Non-taxpayers must register on or before December 31 of the year preceding election. [19] Registration required in cities of 100,000 or more population. [20] Registration required in cities of 10,000 or more inhabitants. [21] If a voter has not registered he must establish his qualifications before he can vote. [22] Registration required in towns or precincts containing 250 or more voters. [23] If a voter proves that he was ill on the day of registration, he may register on election day.

* A residence of one year for general elections and three months in town for town elections is required. Residence is neither gained nor lost by military or naval service for the United States, when stationed in the State, nor by attendance on an institution of learning, nor by those engaged in navigation, nor those in an almshouse or public asylum. In all States persons must be 21 years old before they can vote.

Organizations in the United States.

THE PATRIOTIC SOCIETIES.

SOCIETY OF THE CINCINNATI.

The Society of the Cincinnati is the oldest of the patriotic orders in the United States. Like the Order of Maria Theresa in Austria, it is a military society. Its principles, as formulated by the Continental officers of the Revolution in their cantonments on the Hudson in May, 1783, at the close of hostilities in the war for independence, inculcate not only patriotism, but benevolence. Organization was effected on June 24, 1783, at Saratoga Barracks, on the Hudson (Schuylerville, N. Y.), American and French officers joining in the movement. They declared as the object of the association that it was "to perpetuate as well the remembrance of this vast event as the mutual friendships which have been formed under the pressure of common danger, and, in many instances cemented by the blood of the parties." To this end, the declaration adds, "the officers of the American Army do hereby, in the most solemn manner, associate, constitute and combine themselves into one Society of Friends, to endure as long as they shall endure, or any of their eldest male posterity, and in failure thereof, the collateral branches who may be judged worthy of becoming its supporters and members."

Thirteen State societies were formed, representing the colonies which had won independence; and one was formed in France under the direct patronage of Louis XVI. The right of original membership was restricted to Continental officers who had served with honor and resigned, or who had been honorably discharged, after at least three years' service as officers, and all those who had served as officers in the co-operating army under Count d'Estaing, or in the auxiliary army under Count de Rochambeau, if they had held or attained the rank of colonel for such service, or who had commanded a ship of war along the American coast. The original members were required to contribute a month's pay to the treasury of the society, and this money formed for each State society a permanent fund, which has been so greatly increased from time to time that, in a manner so quiet and unobtrusive that the world outside of the organization knows nothing of it, a large work of benevolence has been carried on. Pensions are paid every year to necessitous descendants of original members, including many old ladies who might otherwise be compelled to depend upon more public charities. The Pennsylvania State Society erected a monument to General Washington in Fairmount Park, Philadelphia, at a cost of $250,000, raised by contributions wholly distinct from the permanent fund. It was dedicated in 1897.

Of the thirteen original State societies several became dormant in the early part of the nineteenth century, and the society in France was dispersed during the reign of terror in 1793. All these, with the exception of those in Georgia and France, have been revived, while these two are in process of reorganization. The general society is composed of the general officers and five delegates from each society. Its meetings are held triennially, and the last was at Hartford, Conn., in May, 1902. The next will be at Richmond, Va., in May, 1905.

Membership descends to the eldest lineal male descendant, if judged worthy, and, in failure of direct male descent, to male descendants through intervening female descendants. It was ruled in 1854 that proper descendants of revolutionary officers who were entitled to original membership, but who never could avail themselves of it, are qualified for hereditary membership if found worthy on application. Provision is made for honorary membership, and under this provision former President Grover Cleveland, Admiral Dewey, Lieutenant-General Miles and Major-General Howard are enrolled with the New York State Society, and Lieutenant-General John M. Schofield with the New Jersey State Society. The total membership at present is 650.

Upon the roll of original members of the Society of the Cincinnati there were borne the names of all the great historic and naval characters of the Revolution, while many of the signers of the Declaration of Independence were honorary members, elected for their own lives only. The following is a list of the general officers from the beginnig of the organization:

PRESIDENTS-GENERAL.

1783—Gen. George Washington, LL. D., Va.
1800—Major-Gen. Alexander Hamilton, LL. D., N. Y.
1805—Major-Gen. C. Cotesworth Pinckney, LL. D., S. C.
1827—Major-Gen. Thomas Pinckney, A. M., S. C.
1829—Major-Gen. Aaron Ogden, LL. D., N. J.
1839—Major-Gen. Morgan Lewis, A. M., N. Y.
1844—Brevet Major William Popham, N. Y.
1848—Brig.-Gen. H. A. Scammell Dearborn, A. M., Mass.
1854—Hon. Hamilton Fish, LL. D., N. Y.
1896—Hon. William Wayne, Pa.

VICE-PRESIDENTS-GENERAL.

1784—Major-Gen. Horatio Gates, LL. D., Va.
1787—Major-Gen. Thomas Mifflin, A. M., Pa.
1790—Major-Gen. Alexander Hamilton, LL. D., N. Y.
1800—Major-Gen. C. Cotesworth Pinckney, LL. D., S. C.
1805—Major-Gen. Henry Knox, A. M., Mass.
1811—Brig.-Gen. John Brooks, M. D., LL. D., Mass.
1825—Major-Gen. Aaron Ogden, LL. D., N. J.
1829—Major-Gen. Morgan Lewis, A. M., N. Y.
1839—Major the Hon. William Shute, N. J.
1844—Hon. Horace Binney, LL. D., Pa.
1848—Hon. Hamilton Fish, LL. D., N. Y.
1854—Hon. Charles Stewart Davies, LL. D., Mass.
1866—Mr. James Warren Sever, A. M., Mass.
1872—Hon. James Simons, A. M., S. C.
1881—William Armstrong Irvine, M. D., Pa.
1887—Hon. Robert Milligan McLane, Md.
1896—Hon. Winslow Warren, Mass.

SECRETARIES-GENERAL.

1783—Major-Gen. Henry Knox, A. M., Mass.
1799—Major the Hon. William Jackson, Pa.
1829—Mr. Alexander W. Johnston, Pa.
1857—Mr. Thomas McEwen, A. M., M. D., Pa.
1875—Mr. George Washington Harris, Pa.
1884—Hon. Asa Bird Gardiner, LL. D., R. I.

GENERAL OFFICERS, 1902-1905.

President-General, Hon. Winslow Warren, Massachusetts; vice-president-general, Hon. James Simons, LL.D., South Carolina; secretary-general, Hon. Asa Bird Gardiner, LL.D., L. H. D., Rhode Island; treasurer-general, Hon. Frederick Walcott Jackson, A. M., New Jersey; assistant secretary-general, Hon. Nicholas Fish, A. M., New York; assistant treasurer-general, Hon. John Cropper, A. M., LL.B., Virginia.

PRESIDENTS OF STATE SOCIETIES.

New Hampshire, Hon. John Gardiner Gilman, Exeter. Massachusetts, Hon. Winslow Warren, Boston. Rhode Island, Hon. Asa Bird Gardiner, New York City. Connecticut, Colonel George Bliss Sanford, Litchfield. New York, Hon. Nicholas Fish, New York City. New Jersey, Rev. Frank Landon Humphreys, S. T. D., Morristown. Pennsylvania, Mr. Richard Dale, Philadelphia. Delaware, Hon. Thomas David Pearce, Wilmington. Maryland, Mr. Otho Holland Williams, Baltimore. Virginia, Hon. John Cropper, Washington, D. C. North Carolina, Hon. Wilson Gray Lamb, Williamston. South Carolina, Hon. James Simons, Charleston. Georgia, reorganizing.

SONS OF THE REVOLUTION.

The Society of Sons of the Revolution originated in New York in 1875, when John Austin Stevens and other gentlemen whose ancestors were identified with the American Revolution planned an organization to keep alive among themselves and their descendants "the patriotic spirit of the men who in military, naval or civil service, by their acts or counsel, achieved American independence." The practical work designed for the society includes the collection and preservation of manuscripts, records and other documents relating to the War of the Revolution. Eligibility to membership is confined to male descendants above the age of twenty-one years from an ancestor who as either a military, naval or marine officer, soldier, sailor or marine or official in the service of any one of the thirteen original colonies or States, or of the National Government representing or composed of those colonies or States, assisted in establishing American independence during the War of the Revolution, between April 19, 1775, when hostilities commenced, and April 19, 1783, when they were ordered to cease. The New York society was the parent organization, its institution occurring on February 22, 1876. It was reorganized December 3, 1883, and incorporated May 3, 1884. Other societies were organized as follows: Pennsylvania, April 3, 1888; District of Columbia, March 11, 1889; Iowa, April 19, 1890; New Jersey, January 6, 1891; Georgia, May 22, 1891; Massachusetts, October 1, 1891; Colorado, February 22, 1892; Maryland, April 11, 1892; Minnesota, April 17, 1893; Ohio, May 2, 1893; California, May 8, 1895; Connecticut, May 24, 1893; New Hampshire, June 19, 1893; North Carolina, October 24, 1893; Illinois, December 4, 1893; Missouri, February 22, 1894; Alabama, April 16, 1894; West Virginia, April 19, 1894; Florida, April, 1894; Tennessee, November 24, 1894; South Carolina, September 3, 1894; Kentucky, January 26, 1895; Montana, February 22, 1895; Texas, March 12, 1895; Washington, March 26, 1895; Virginia, June 7, 1895; Michigan, April 17, 1896; Rhode Island, September 26, 1896; North Dakota, February 12, 1897; Indiana, September 30, 1897; Arkansas, February 22, 1901. All of these societies are represented by delegates at the triennial meetings of the General Society Sons of the Revolution, the most recent being held at Mount Vernon, Washington, D. C., on April 19, 1902. The aggregate membership of the societies at that date was 6,087. The list of officers elected follows:

General president, Hon. John Lee Carroll, Ellicott City (Maryland society); general vice-president, Garret Dorset Wall Vroom, Trenton (New Jersey society); second general vice-president, Pope Barrow, Savannah (Georgia society); general secretary, James Mortimer Montgomery, No. 102 Front street, New York City (New York society); assistant general secretary, William Hall Harris, No. 216 St. Paul street, Baltimore (Maryland society); general treasurer, Richard McCall Cadwallader, No. 138 South Twelfth street, Philadelphia (Pennsylvania society); assistant general treasurer, Henry Cadle, Bethany (Missouri society); general chaplain, Rev. Thomas Edward Green, D. D., S. T. D., Cedar Rapids (Iowa society); general registrar, Walter Gilman Page, No. 90 Westland avenue, Boston (Massachusetts society); general historian, Henry Walbridge Dudley, No. 23 Michigan avenue, Chicago (Illinois society).

SONS OF THE REVOLUTION IN THE STATE OF NEW YORK.

Among things undertaken by this society during the two most recent meetings of the general body and reported at the last meeting one of the most important is the purchase of a site on the south side of Fifty-fifth street, between Sixth and Seventh avenues, in New York City, where it is proposed to erect a building for the society, to serve as a museum and library as well as for the purposes of headquarters, meeting place and banquet hall. The lot is 50x100 feet in size, and the price paid was $62,000. The work of raising funds for the erection of the building is being pushed forward vigorously.

Following is the list of officers of the New York society, the total membership of which is 2,035:

President, Frederick Samuel Tallmadge, New York City; vice-president, Charles R. Henderson, New York City; secretary, Morris Patterson Ferris, No. 32 Broadway, New York City; treasurer, Arthur Melvin Hatch, No. 96 Broadway, New York City; registrar, Henry Phelps Johnston, No. 17 Lexington avenue, New York City; historian, Talbot Olyphant, No. 21 Cortlandt street, New York City; chaplain, Rev. Morgan Dix, S. T. D., D. C. L., D. D. Oxon., New York City; assistant chaplain, Rev. Frank L. Humphreys, S. T. D., Morristown, N. J.

SONS OF THE AMERICAN REVOLUTION.

The Society of the Sons of the American Revolution is composed of the lineal male descendants of soldiers, sailors and conspicuous patriots of the American Revolution. Men of collateral descent are not eligible to membership. The society was originally instituted in October, 1875, and was organized July 4, 1876. Its national organization was formed in New York on April 30, 1889. The national society has under its direction and control the various State societies, several of which had been organized before it came into existence. The objects of the Society of the Sons of the American Revolution are to perpetuate the memory and spirit of the men who achieved American independence by the encouragement of historical research in relation to the revolution and the publication of its results; the preservation of documents and relics and of the records of individual services of Revolutionary soldiers and patriots and the promotion of celebrations of all patriotic anniversaries; to carry out the injunctions of Washington in his farewell address to the American people; to promote, as an object of primary importance, institutions for the diffusion of knowledge, thus developing an enlightened public opinion, and affording to young and old such advantages as shall develop in them the largest capacity for performing the duties of American citizens; to cherish, maintain and extend the institutions of American freedom; to foster true patriotism and love of country, and to aid in securing for all mankind the blessings of liberty.

The officers of the National Society, elected at the annual congress held in Washington, D. C., April 30 and May 1 and 2, 1902, are as follows:

President-general, Hon. Edwin Warfield, Baltimore, Md.; vice-presidents-generals, Hon. Cornelius Amory Pugsley, New York; Captain Samuel Eberly Gross, Chicago, Ill.; Hon. Noble D. Larner, Washington, D. C.; Hon. Howard DeHaven Ross, Wilmington, Del.; Colonel Albert J. Logan, Pittsburg, Pa.; secretary-general, Charles Waldo Haskins, New York City; treasurer-general, Nathan Warren, Boston, Mass.; registrar-general, A. Howard Clark, Washington, D. C.; historian-general, George William Bates, Detroit, Mich.; chaplain-general, Rev. Rufus W. Clark, D. D., Detroit, Mich.

EMPIRE STATE SOCIETY, SONS OF THE AMERICAN REVOLUTION.

The Empire State Society of the Sons of the American Revolution was organized February 11, 1899. Its objects are to perpetuate the memory of the men who, by their services or sacrifices during the War of the American Revolution, achieved the independence of the American people; to promote fellowship among their descendants; to inspire a more profound reverence for the principles of government founded by our forefathers; to acquire and preserve the records of the individual services and sacrifices of the patriots of that war, as well as documents, relics and landmarks; to encourage historical research in relation to the American Revolution and the study of America history; to mark the scenes of the Revolution by appropriate memorials; to celebrate the anniversaries of the prominent events of the war; to foster true patriotism; to maintain and extend the institutions of American freedom, and to carry out the purposes expressed in the preamble to the constitution and the injunctions of Washington in his farewell address to the American people.

The total membership of the society, July 31, 1902, was 1,300. The officers elected at the last annual meeting were as follows:

President, William Seth Logan; First Vice-President, Edward Payson Cone; Second Vice-President, William A. Marble; Third Vice-President, Charles W. Wood; Secretary, Louis H. Cornish; Treasurer, Richard T. Davis; Registrar, Tennis D. Huntting; Historian, General Horatio C. King; Chaplain, Rev. Henry Elliott Mott, D. D.

DAUGHTERS OF THE AMERICAN REVOLUTION.

The National Society of the Daughters of the American Revolution was organized in Washington, D. C., October, 11, 1890, "to perpetuate the memory of the spirit of the men and women who achieved American Independence, by the acquisition and protection of historical spots and the erection of monuments; by the encouragement of historical research in relation to the Revolution and the publication of its results; by the preservation of documents and relics, and of the records of the individual services of Revolutionary soldiers and patriots, and by the promotion of celebrations of all patriotic anniversaries." The society was incorporated June 8, 1891, under the Congressional laws applying to the District of Columbia, and on February 20, 1896, it received a national charter, granted by special act of Congress, under which it is authorized to hold real and personal estate necessary to its lawful ends. Under this charter it is required to make an annual report to the Smithsonian Institution, covering its proceedings, and the secretary of that institution is required to communicate to Congress such portions of the report as he may deem of national interest or importance. The headquartes of the society are in Washington, D. C. There are local bodies, designated Chapters, in each of the States of the Union and one in the District of Columbia. The total membership is about 40,000. Membership is open to any woman of acceptable character, above the age of eighteen years, descended from an ancestor who, "with unfailing loyalty rendered material aid to the cause of independence as a recognized patriot, as soldier or sailor, or as a civil officer in one of the several colonies or States, or of the United Colonies or States." All the legislative and judicial power of the society is vested in its Continental Congress, composed of all the active officers of the national society, a State Regent from each State and the Regents and delegates of each organized Chapter in the United States.

NATIONAL BOARD OF MANAGEMENT.

President-General, Mrs. Charles W. Fairbanks, Indianapolis, Ind.; Vice-President-General, in charge of organization of Chapters, Mrs. Miranda Barney Tulloch, Washington, D. C. (there are ten other Vice-Presidents-General, whose term of office expires in 1905, and ten whose term expires in 1904); Chaplain-General, Mrs. William A. Smoot, Alexandria, Va.; Recording Secretary-General, Mrs. Eleanor S. Washington Howard, Virginia; Corresponding Secretary-General, Mrs. Robert Stockwell Hatcher, Lafayette, Ind.; Register-General, Mrs. Ruth M. Griswold Pealer, Washington, D. C.; Treasurer-General, Mrs. Gertrude B. Darwin, Washington, D. C.; Historian-General, Miss Susan Riviere Hetzel, Washington, D. C.; Assistant Historian-General, Mrs. Green Clay Goodloe, Washington, D. C.; Librarian-General, Miss Julia Ten Eyck McBlair, Washington, D. C.. There are also a State Regent and Vice-Regent for every State in the Union, and one for the District of Columbia.

GENERAL SOCIETY OF MAYFLOWER DESCENDANTS.

Lineal descendants of persons who were passengers on the Mayflower on the first trip of that historic vessel to America in 1620 organized a society in New York City December 22, 1894 (Forefathers' Day), which, with similar associations formed subsequently, joined in instituting at Plymouth, Mass., the General Society of Mayflower Descendants. The entire membership of the constituent societies is included in that of the General Society, which holds a congress at Plymouth, Mass., triennially on September 6, O. S., the anniversary of the Pilgrim departure from Plymouth, England. The constituent societies hold their annual meetings and election of officers on December 21, the anniversary of the signing of the "compact" in the cabin of the Mayflower. These societies, with the respective dates of organization and the number of members in each, are as follows: New York (1894), 694 members; Connecticut (1896), 228 members; Massachusetts (1896), 712 members; Pennsylvania (1896), 142 members; Illinois (1897), 92 members; District of Columbia (1898), 145 members; Ohio (1898), 45 members; New Jersey (1900), 34 members; Wisconsin (1901), 40 members; Rhode Island (1901), 41 members; Michigan (1901), 31 members; Minnesota (1901), 20 members; Maine (1901), 25 members. Membership in the several societies is open to both sexes. Every lineal descendant over eighteen years old of any of the Mayflower passengers, or of any signer of the "compact" is eligible. The officers of the General Society are as follows: Governor-general, Hon. Henry E. Howland, New York City; secretary-general, Richard Henry Greene, 235 Central Park West, New York City.

SOCIETY OF MAYFLOWER DESCENDANTS IN THE STATE OF NEW YORK.

This society is, as shown in the sketch of the General Society of Mayflower Descendants, the parent organization of a federation of associations formed by lineal descendants of the Mayflower Pilgrims for the purpose of preserving the memory, records and history of the men, women and children who landed at Plymouth Bay on December 22, 1620. The officers of the society are as follows: Governor, Hon. William Winton Goodrich; deputy-governor, Rev. Roderick Terry, D. D.; captain, J. Bayard Backus; elder, Rev. Daniel F. Warren, D. D.; treasurer, William Lanman Bull; secretary, Ashbel P. Fitch, Jr.; historian, Richard Henry Greene; surgeon, Gorham Bacon.

HUGUENOT SOCIETY OF AMERICA.

Descendants of the Huguenots living in the United States are associated in a patriotic and historic organization under the name of the Huguenot Society of America, which was founded in 1883. It is national in its scope, and maintains headquarters at No. 105 East Twenty-second street, New York City, where there is kept a library for Huguenot books, manuscripts, etc. The objects of the organization as set forth in the amended constitution, adopted January 7, 1901, are as follows: "First, to perpetuate the memory and to foster and promote the principles and virtues of the Huguenots; second, to publicly commemorate the principal events in the history of the Huguenots; third, to discover, collect and preserve all existing documents, monuments, etc., relating to the genealogy or history of the Huguenots of America; fourth, to gather by degrees a library, for the use of the society, composed of all obtainable books, monographs, pamphlets, manuscripts, etc., relating to the Huguenots; fifth, to cause to be prepared and read before the society papers, essays, etc., on questions in the history or genealogy of the Huguenots, their settlements, biographies, public acts, influence on the society, arts, commerce and politics of America especially and of other countries where they settled; sixth, to cause to be prepared and published a series of volumes entitled 'Collections of the Huguenot Society of America;' seventh, to establish branches of this soicety in nots have taker refuge." Eligibility for membership includes four classes, as here specified: First, descendants in the male or female line of the Huguenot families who emigrated to America prior to the promulgation of the Edict of Toleration, November 28, 1787, or who left France for other countries than America prior to that date, may be elected as regular members; second, persons who have made the history, genealogy, principles, etc., of the Huguenots a special subject of study and research and have written and published the same, may be elected as regular members; third, persons who have rendered some conspicuous service in the advancement of Huguenot interests may be elected as honorary members; fourth, persons who are residents of foreign countries may be elected corresponding members. Honorary and corresponding members have no vote. The society has subscribed for several memorial tablets, one of which has been placed on the site of the first French Huguenot Church in New York, now comprised in the ground covered by the Produce Exchange Building. The tablet is on the east wall of that edifice. A second tablet was placed in the present church building known as L'Eglise du St. Esprit in the Fall of 1902, the Bayard family at the same time placing there a tablet in memory of the Huguenot refugee, Rev. Nicolas Bayard; his son, Rev. Lazare Bayard, and the latter's son, Hon. Samuel Bayard, a former Mayor of New York. The officers of the society are as follows:

President, Frederic J. De Peyster; vice-presidents (one for each centre of Huguenot settlement), Colonel William Jay, Manhattan; Henry M. Lester, New Rochelle; Rev. Leo Luquer, Long Island; Hon. A. T. Clearwater, New Paltz; Nathaniel Thayer, Boston; Richard Olney, New Oxford; William Ely, Narragansett; Professor Allan Marquand, New Jersey; Colonel Henry A. Dupont, Delaware; Herbert Du Puy, Pennsylvania; Richard L. Maury, Virginia; Rev. Robert Wilson, South Carolina; secretary, Mrs. James M. Lawton, New York City; assistant secretary, Mrs. L. Holbrook; treasurer, T. J. Oakley Rhinelander.

GENERAL SOCIETY OF THE WAR OF 1812.

The General Society of the War of 1812 was organized on September 14, 1814. What it represents is set forth as follows in the "Preamble" to the constitution which was adopted: "Whereas, In the Providence of God, victory having crowned the forces of the United States of America in upholding the principles of the Nation against Great Britain in the conflict known as the War of 1812; we, the survivors and descendants of those who participated in that contest, have joined together to perpetuate its memories and victories, to collect and secure for preservation, rolls, records, books and other documents relating to that period to encourage research and publication of historical data, including memorials of patriots of that era in our National history; to care for and, when necessary, assist in burying actual veterans of that struggle; to cherish, maintain and extend the institutions of American freedom, and foster true patriotism and love of country." As it exists at present the society was formally organized by the combination of the societies of the States of Pennsylvania and Maryland. At the first meeting held in Philadelphia on June 19, 1895, the States of Pennsylvania, Maryland, Massachusetts and Connecticut were represented. Since that date six other societies have been organized, including one in the District of Columbia. The General Society holds its meetings bi-ennially, while the State societies meet annually, or oftener. Those eligible to membership are male persons above the age of twenty-one who participated in, or are lineal descendants of such as participated in the War of 1812, in the army, navy, revenue marine or privateer service of the United States. In case of the failure of lineal descendants of an actual participant in the war on behalf of the United States one collateral descendant may be admitted; but it is proposed to amend the constitution to provide that such representation of lineal descendants shall be limited to descendants of either brothers or sisters of actual participants in the war.

General Officers, 1902-1904.—President-General, John Cadwalader (Pennsylvania Society). Vice-Presidents-General—Captain Henry Hobart Bellas, U. S. A. (Pennsylvania Society); James Edward Carr, Jr. (Maryland Society); Charles William Galloupe, M. D. (Massachusetts Society); Colonel George Bliss Sanford, U. S. A. (Connecticut Society); George Mitchell Wright (Ohio Society); Hon. Charles Page Bryan (Illinois Society); Marcus Benjamin, Ph. D. (District of Columbia Society); Hon. George Comstock Baker (New York Society); Hon. Appleton Morgan, LL. D. (New Jersey Society); James Griffith Longfellow (Delaware Society). Secretary-General—Henry Randall Webb (District of Columbia Society), Washington, D. C. Assistant Secretary-General—Henry Harmon Noble (New York Society), Albany, N. Y. Treasurer-General—Frederick Bacon Philbrook (Massachusetts Society), Boston, Mass. Assistant Treasurer-General—William Porter Adams (Illinois Society), Chicago, Ill. Registrar-General—Albert Kimberly Hadel, M. D. (Maryland Society), Baltimore, Md. Surgeon-General—George Horace Burgin, M. D. (Pennsylvania Society). Judge Advocate-General—Hon. Aloysius Leo Knott (Maryland Society). Chaplain-General—Right Rev. Leighton Coleman, S. T. D., LL. D., Bishop of Delaware (Delaware Society). Executive Committee—Hon. Robert Adams, Jr. (Pennsylvania Society); James Davidson Iglehart, M. D. (Maryland Society); James Brown Thornton, M. D. (Massachusetts Society); Rev. Alexander Hamilton (Connecticut Society); Daniel Hosmer Gard (Ohio Society); Charles Cromwell (Illinois Society); James Malcolm Henry (District of Columbia Society); Henry Ketchum Averill, Jr. (New York Society); Oscar Halstead Condit (New Jersey Society); Edward Porter Stacey (Delaware Society).

State Presidents and Secretaries.—Pennsylvania—President, John Cadwalader; secretary, Samuel Babcock Crowell, Philadelphia. Maryland—President, John Mason Dulany; secretary, Charles Edward Teale, Govanstown, Md. Massachusetts—President, Charles William Galloupe, M. D.; secretary, Joseph Hiram Starr Pearson, Boston, Mass. Connecticut—President, Hon. Morgan Gardner Bulkeley; secretary, James Barton Bowen, Putnam, Conn. Ohio—President, Orlando W. Aldrich, Ph. D., LL. D., D. C. L.; secretary, Wordsworth Gard, Columbus, Ohio. Illinois—President, William Porter Adams; secretary, Theron Royall Woodward, Chicago, Ill. District of Columbia—President, Marcus Benjamin, Ph. D.; secretary, Henry Randall Webb, Washington, D. C. New York—President, Hon. George Comstock Baker; secretary, Henry Harmon Noble, Albany, N. Y. New Jersey—President, Harry Ferdinand Barrell, Ph. D.; secretary, Adelbert Bancroft Hunt, Ph. D., Bloomfield, N. J. Delaware—President, James Griffith Longfellow; secretary, Fred Holmes Megaw, Wilmington, Del.

THE VETERAN CORPS OF ARTILLERY.

(Military Society of the War of 1812.)

The Veteran Corps of Artillery, constituting the Military Society of the War of 1812, is an association historically connected with the military history of the United States from the beginning of our national existence. The Veteran Corps of Artillery was organized in the city of New York as an independent military organization on November 25, 1790, by officers and soldiers of the War of the Revolution. It was the first organization in the State of New York to volunteer for field service under the Act of Congress of February 24, 1807, and the Act of the State Legislature of March 29, 1809, offering its services on October 19, 1809, in view of the then expected breaking out of hostilities with Great Britain. The Corps entered the military service of the United States June 25, 1812, serving until July 2, the same year, and serving again from September 2, 1814, until March 2, 1815. From 1790 until 1814 the Corps was composed entirely of veterans of the Revolution. Subsequently veterans of the War of 1812 were enrolled, providing they had honorable records. The Military Society of the War of 1812 was instituted in New York City January 3, 1826, by officers of the War of 1812, and was consolidated with the Veteran Corps of Artillery January 8, 1848. The Corps was incorporated as a military society January 8, 1892, under the laws of the State of New York and in conformity with the joint resolution of Congress as to military societies, approved September 25, 1890. Membership is limited by law to acceptable male descendants of either veteran original members or of commissioned officers of honorable records in the War of 1812. Annual meetings are held on the anniversary of the battle of New Orleans, this date being fixed by law. The rolls of the Corps show that since 1790 there have been 734 veteran original members, of whom 71 were veterans of the War of the Revolution. The last surviving original member is Hiram Cronk, of Northwestern, N. Y., who entered the United States service August 2, 1814, as a private in Captain Edward Fuller's company, which was detached from the 157th Regiment of Infantry, 13th Brigade, N. Y. State Militia, and served in a battalion of detached militia under Lieutenant-Colonel Commandant Erastus Cleaveland, in defence of the northern frontier at Sackett's Harbor, then blockaded by a British squadron. Mr. Cronk's term of enlistment expired while he was at this point, but he volunteered to remain, and was honorably discharged, with his regiment and brigade, November 16, 1814. Mr. Cronk was born in Frankfort, N. Y., April 29, 1800, and is therefore 103 years old.

The officers of the Veteran Corps of Artillery constituting the Military Society of the War of 1812 are:

Commandant and ex-officio president, Morgan Dix, S. T. D., D. D. (Oxon.), D. C. L.; vice-commandant and ex-officio vice-president, Asa Bird Gardiner, L.L. D., L. H. D.; adjutant and ex-officio secretary, Howland Pell, room 1001, 25 Broad street, New York City; quartermaster and ex-officio treasurer, Charles Augustus Schermerhorn, 1286 Broadway, New York City; chaplain, Frank Landon Humphreys, S. T. D.; surgeon, George Gregory Shelton, M. D.; paymaster and ex-officio assistant secretary, Charles Isham; commissary and ex-officio registrar, Morris Patterson Ferris; council of administration, Morgan Dix, Asa Bird Gardiner, James Mortimer Montgomery, David Banks, Charles Augustus Schermerhorn, Frederic Gallatin, John Hone, George De Forest Barton, Howland Pell, Thomas Jackson Oakley Rhinelander, Paul Gibert Thebaud, John Butterfield Holland.

NAVAL ORDER OF ST. LOUIS.

This Order was instituted May 1, 1898, off the Island of Martinique, West Indies, by commissioned officers of the U. S. S. St. Louis, with the object of perpetuating the friendships formed during the participation of that ship in the Spanish-American War, and to place on record the story of those events. The Order was incorporated at Albany, N. Y., July 26, 1899. There is a membership at present of thirteen. The officers are:

Senior member, Captain Caspar F. Goodrich, U. S. N.; treasurer, P. A. Paymaster T. Kinsey, late U. S. N.; secretary, P. A. Surgeon R. Lloyd Parker, late U. S. N.

NATIONAL SOCIETY OF COLONIAL DAMES OF AMERICA.

An association of women under the name of the Pennsylvania Society of the Colonial Dames of America was organized in Philadelphia on April 8, 1891, with an understanding that it was to be part of a national organization of similar character, eventually to be formed. This national society was organized on May 19, 1892, by women representing the States of Pennsylvania, Maryland, New Jersey and Delaware, the meeting being held in Wilmington, Del., and adjourned, to be renewed in Washington, D. C., on January 11, 1893, when the States of Virginia and Rhode Island were admitted. State societies were formed in Massachusetts, New York, South Carolina, Connecticut, Georgia, New Hampshire and North Carolina, in time to be admitted in April, 1894. It was decided in April, 1896, to admit societies composed of women of Colonial ancestry, organized in non-colonial States, with the result that at the present time there are societies in every State excepting Arizona, Idaho, Montana, Nevada, North and South Dakota, New Mexico, Nebraska, Oregon, Utah and Washington. The national society is composed of delegates from these societies, which have an aggregate membership of 4,651. The constitution of the society requires that the members shall be women "who are descended in their own right from some ancestor of worthy life who came to reside in an American colony prior to 1750, which ancestor, or some one of his descendants, being a lineal descendant of the applicant, shall have rendered efficient service to his country during the Colonial period, either in the founding of a commonwealth or of an institution which has survived and developed into importance, or who shall have held an important position in the Colonial government, and who, by distinguished services, shall have contributed to the founding of this great and powerful nation."

Among the doings of the various State societies have been the giving of lectures and talks upon American history; the institution of lectures in the public schools, upon Colonial history; inauguration of observances of Flag Day on June 14; the offering of prizes for original pictures upon Colonial subjects, for historical essays by students, etc.; the endowment of lectureships and scholarships in institutions of learning, and the preservation of historic mementos, landmarks, etc. A long list might be made of the historic buildings which this society has saved from obliteration, and of historic sites which it has caused to be suitably marked with tablets. One of these is the old Van Cortlandt mansion, in New York City, built in 1748, which has been restored and suitably furnished as a Colonial museum.

On May 21, 1902, the day after the free Republic of Cuba took her place among nations, there was unveiled at Arlington a beautiful shaft, erected by the society to the memory of the soldiers and sailors who fell in the Spanish-American war. The inscription, written by Mr. Richard Watson Gilder, reads: "To the soldiers and sailors of the United States who gave up their lives for their country in the war of 1898-99, with Spain, this monument is dedicated in sorrow, gratitude and pride by the National Society of Colonial Dames of America in the name of all the women of the nation." The ceremonies, which were most impressive in their character, were presided over by Major-General John R. Brooke, U. S. A., and the address was delivered by President Roosevelt. The society is now preparing a book to be placed at Arlington, which shall contain the record of all those who lost their lives during the conflict. The officers of the society are: Honorary President, Mrs. Howard Townsend, New York; president, Mrs. Herbert A. Claiborne, Virginia; vice-presidents, Mrs. Samuel Colt, Connecticut; Mrs. Henry F. Le Hunte Lyster, Michigan; Mrs. William Reed, Maryland; secretary, Mrs. Joseph R. Lamar, Georgia; assistant secretary, Mrs. Rosa Wright, Smith, Maryland; treasurer, Mrs. Alexander J. Cassatt, Pennsylvania; registrar, Mrs. Emil Richter, New Hampshire; historian, Miss Annie Hollingsworth Wharton, Pennsylvania.

UNITED STATES DAUGHTERS OF 1812.

The United States Daughters of 1812 is an organization banding in fraternal interests women whose lineal ancestors served in the civil government, the army or the navy of the United States during the thirty-two years subsequent to the War of the American Revolution. Eighteen years is the age at which women are eligible to membership, but any girl between ten and eighteen years old, eligible in other respects, can be admitted as a "junior" member, sharing in all privileges except that of voting. There are a national society and a number of State societies, organized or organzing. The New York society was formed in 1892, and that of Louisiana in 1893. For several years these were the only societies. Each of them undertakes some definite work of a patriotic character, and the national society has begun work looking toward the establishing of a home for women, eligible to membership in the organization, helpless and needy in their old age. The insignia of the society consists of a badge of gold and blue enamel, combining in design the star and anchor, and suspended from a gray and blue ribbon, representative of the army and navy.

Headquarters of the National Society of United States Daughters of 1812 are at No. 332 West Thirty-seventh street, New York City. Officers: Charter trustees, Mrs. William Gerry Slade, Mrs. George B. Woodward, Mrs. William Tod Helmuth, Mrs. Jacob George Ullery, Mrs. Edward Roby, chairman; Mrs. William Gerry Slade, New York, president national; Mrs. Western Bascome, Missouri, first vice-president national; Mrs. Sullivan Johnson, Pennsylvania, second vice-president national; Mrs. Nelson V. Titus, Massachusetts, third vice-president national; Mrs. Flora Adams Darling, founder general, director general; Mrs. Leroy Sunderland Smith, New York, recording secretary national; Miss M. Louise Edge, New Jersey, corresponding secretary national; Mrs. Clarence F. Jenne, Vermont, treasurer national; Mrs. Robert C. Barry, Maryland, curator national; Mrs. John B. Richardson, Louisiana, historian national; Mrs. Edward Roby, Illinois, charter trustee national; Mrs. George A. Ludin, New York, special secretary national.

STATE SOCIETIES.

New York, organized 1892, Mrs. William Gerry Slade, president; Louisiana, organized 1893, Mrs. John B. Richardson, president; Michigan, organized 1896, Mrs. John V. Moran, president; Pennsylvania, organized 1896, Mrs. Sullivan Johnson, president; Massachusetts, organized 1897, Mrs. Nelson V. Titus, president; Maine, organized 1900, Mrs. Charles A. Dyer, president; Ohio, organized 1900, Mrs. T. L. A. Grere, president; Maryland, organized 1901, Mrs. Robert C. Barry, president; Wisconsin, organized 1901, Mrs. Charles Catlin, president; Georgia, organized 1901, Mrs. V. A. Arnold, president; Vermont, organized 1901, Mrs. C. F. Jenne, president; Missouri, organized 1901, Mrs. Western Bascome, president; New Jersey, organized 1901, Miss M. Louise Edge, president; Colorado, organized 1902, Mrs. William T. Gauss, president; Mississippi, organizing, Mrs. Mary L. Howe, president; West Virginia, organizing, Mrs. Everett Brosius, president; Illinois, organizing, Mrs. Etta Ayres Read, president; Delaware, organizing, Mrs. Mary F. Ridgeley, president; Washington, organizing, Mrs. Esther Allen Jobes, president; California, organizing, Mrs. Cabell Maddox, president; Texas, organizing, Mrs. Bretton Dans, president.

DAUGHTERS OF LIBERTY.

The Order of Daughters of Liberty is an organization social and patriotic in its character, and including in its work a beneficiary feature for such members as desire to take advantage of it. This feature is in the form of a funeral benefit. In general the objects of the Order are to promote social intercourse and mutual improvement, visit the sick and distressed, and perpetuate American principles in harmony and conjunction with the Order of United American Mechanics and Junior American Mechanics, to which associations it is auxiliary by adoption. Its motto is "Fidelity, Patriotism, Integrity," and it has adopted as its principle that of "America for Americans," taking a strong position in favor of restricting naturalization of foreigners to a more worthy class of emigrants than now avail themselves of it; in favor of compulsory education, in favor of freedom of worship, and in favor of temperance. Sixteen is the age at which a woman is eligible to membership, and she must be a white woman, born in the United States or its Territories, or under its flag. The Order originated with the organization of Liberty Council No. 1, in January, 1875, for the sole purpose of assisting Columbia Council No. 5, O. U. A. M., of Meriden, Conn., in its work. The idea was taken up by other councils of the O. U. A. M., and the new Order spread rapidly. There are at the present time upward of 600 councils, located in twenty-six different States, and having a total membership of more than 50,000. The national officers are:

National councillor, Herman W. Rellstat, Trenton, N. J.; national vice-councillor, Judge H. E. McKenzie, Port Ewen, N. Y.; national secretary, W. V. Edkin, Philadelphia, Pa.; national treasurer, G. H. Burton, New York City.

The State Council of New York was instituted in 1895 at Newburg, and its officers are: State councillor, Hattie M. Bruen, Brooklyn; State vice-councillor, Louisa Van Zandt, Syracuse; State secretary, J. S. Rose, Brooklyn; State Treasurer, Edward J. Bridges, Brooklyn.

GENERAL SOCIETY OF COLONIAL WARS.

The General Society of Colonial Wars, instituted in 1892, is a historical and patriotic association designed to commemorate the early struggles out of which the American nation grew. It aims to collect and preserve manuscripts, rolls and records relative to the events and the men assisting in the establishment, defence and preservation of the American Colonies; to provide suitable commemorations or memorials relating to the Colonial period of the country's history, and to inspire in its members the patriotic spirit of their forefathers. Those who may become members are adult male descendants of men who fought in battle under Colonial authority, from the settlement of Jamestown, Va., in 1607, to the battle of Lexington, in 1775, or who served as Governor, Lieutenant-Governor, member of the Council, or as a military, naval or marine officer in the service of the Colonies, or under the British flag, or was conspicuous in military, official or legislative affairs during the Colonial period. There are State societies in California, Connecticut, Delaware, Iowa, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island and Vermont, and one also in the District of Columbia. The total membership is about 3,000. The fourth triennial assembly will be held at Detroit, Mich., in 1905.

Governor-general, Frederic J. De Peyster; vice-governor-general, Howland Pell; secretary-general, Samuel V. Hoffman; deputy secretary-general, William Bleecker Seaman; treasurer-general, Edward Shippen; deputy treasurer-general, Seymour Morris; registrar-general, George Norbury Mackenzie; historian-general, Rev. Charles E. Stevens; chaplain-general, Right Rev. William Lawrence; surgeon-general, V. Mott Francis, M. D.; chancellor-general, Professor Theodore S. Woolsey.

Deputy Governors-General for the State societies: California, Spencer R. Thorpe; Connecticut, Charles E. Gross; Delaware, Hon. George Gray; District of Columbia, William Thompson; Iowa, Samuel F. Smith; Maine, Colonel John M. Glidden; Maryland, General Joseph L. Brent; Massachusetts, Arthur J. C. Sowdon; Michigan, Samuel T. Douglas; New Hampshire, Professor Charles L. Parsons; New Jersey, General E. Burd Grubb; New York, Walter L. Suydam; Ohio, Achilles C. Pugh; Pennsylvania, Richard M. Cadwalader; Rhode Island, Hunter C. White; Vermont, Robert Noble.

AZTEC CLUB OF 1847.

The Aztec Club of 1847 is a historic association which grew out of the war between the United States and Mexico. Following the capture of the Mexican capital a meeting of officers in the American army of occupation was held on October 13, 1847, with a view to forming a club for the entertainment of its members and their guests while in the city. As no satisfactory plan could be devised for continuing the existence of the club after returning to the United States, it was resolved at a subsequent meeting to continue its organization, as then constituted, for a period of five years, from September 14, 1847. When the army withdrew from Mexico the club had 160 active and two honorary members, General Winfield Scott being one of the latter. New officers were elected in 1852, but the club held no regular meeting until September, 1867, when there was another election of officers, and steps were taken which resulted in a decision to continue the Aztec Club of 1847 in perpetuity, "to preserve for all time some lasting memorial to serve as an additional bond of friendship and brotherhood among its members." As the club is now constituted, those who are eligible to membership are commissioned officers of the army, navy or marine corps who served in Mexico, or the eldest son or nearest blood relative of any such officer. The club was incorporated December 29, 1892, and holds its meetings annually. On July 31, 1902, there had been 309 members enrolled, of whom 216 were still living. The officers are as follows:

President, General W. H. H. Davis, Doylestown, Pa.; vice-president, Dr. John W. Brannan, 11 West Twelfth street, New York City; treasurer, William Turnbull, 24 and 26 Thomas street, New York City; secretary, Macrae Sykes, Kingsbridge, New York City.

SOCIETY OF TAMMANY, OR COLUMBIAN ORDER.

The name "Tammany" is now so generally associated with the organization that plays such an important part in New York's political life that it is often forgotten that, while these Democratic leaders are merely occupants of the Wigwam, the real Society of Tammany is the Columbian Order, a secret society which exerts considerable influence outside of that which is due to its affiliations with politicians or political affairs.

The Columbian Order was organized in 1789, its institution being the result of a popular movement against the so-called "aristocratic" Society of the Cincinnati. William Mooney, its founder and first Grand Sachem, was an upholsterer, an American of Irish parentage, and a strong anti-Federalist in politics. As it was the belief of the time that the new Society of the Cincinnati was nothing more than an attempt to establish an American aristocracy, Mooney found it an easy matter to secure the co-operation of many others who, like himself, believed that the Democratic principles of the nation were threatened. At the first meeting on May 12, 1789, therefore, many of the most prominent anti-Federalists in New York were present, and from that day the society has exerted more or less power in the affairs of the city. The members, who are known as Sons of Liberty, have met frequently as a secret organization, and once a year, on Independence Day, they have held a patriotic meeting to which the public has been invited.

The name Tammany was selected in honor of that wise and friendly Chief of the Delaware tribe of Indians who was canonized by the soldiers during the Revolution as being worthy of the name of America's patron saint, and the officials of the society were a Grand Sachem, who represented the President, and thirteen subordinate Sachems, who typified the Governors of the thirteen original States. From its institution the society has been a charitable and social organization, and its chief connection with the political association which now bears its name is due to the fact that most of those who are high in that body are also members of the Columbian Order and that the political organization could not remain as the occupant of Tammany Hall without the consent of the society. The officers of the order are as follows:

Grand Sachem, James A. O'Gorman; Sachems, Patrick Keenan, John F. Carroll, Daniel F. McMahon, John W. Keller, John J. Scannell, Charles F. Murphy, Randolph Guggenheimer, Maurice Featherston, Asa Bird Gardiner, George W. Plunkitt, George C. Clausen, John Fox and Thomas J. Dunn; Secretary, Thomas F. Smith; Treasurer, Peter F. Meyer; Sagamore, Bryan P. Henry; Wiskinkie, John A. Boyle.

Since the organization of the Columbian Order many men of high standing in the community have held the office of Grand Sachem, as may be seen from the following list of those who have occupied that position:

William Mooney	1789 to 1790	William J. Waldron	1835 to 1837
William Pitt Smith	1790 to 1791	George G. Warner	1837 to 1840
Josiah Ogden Hoffman	1791 to 1793	Samuel Hopkins	1840 to 1844
John R. B. Rogers	1793 to 1794	James Connor	1844 to 1845
William Pitt Smith	1794 to 1795	Daniel E. Delevan	1845 to 1850
John Little	1795 to 1796	Lorenze B. Shepard	1850 to 1856
Peter R. Livingston	1796 to 1797	William D. Kennedy	1856 to 1861
Nicholas Ebertson	1797 to 1798	Nelson J. Waterbury	1861 to 1863
Benjamin Romaine	1798 to 1808	Elijah F. Purdy	1863 to 1864
Clarkson Crollius	1808 to 1811	John A. Dix	1864 to 1866
William Mooney	1811 to 1812	John T. Hoffman	1866 to 1868

GRAND ARMY OF THE REPUBLIC.

The Grand Army of the Republic is a secret order, patriotic in character, composed entirely of men who served in the army and navy of the United States during the civil war of 1861-1865. Only such as were honorably discharged are eligible. In its organization it is composed of "Posts" or local organizations; "Departments," which are the State bodies, some of them including two States or Territories; and the "National Encampment," which is the supreme body. The first Post was organized at Decatur, Ill., on April 6, 1866, and the first National Encampment was held at Indianapolis, Ind., on November 20, 1866. The thirty-sixth meeting of this body was held in Washington, D. C., October 9 and 10, 1902. The reports then presented gave a total membership of 265,212, enrolled in 6,716 posts. Officers were elected and appointed as follows: Commander-in-Chief, General Thomas G. Stewart, Pennsylvania; Senior Vice-Commander-in-Chief, William M. Olin, Massachusetts; Junior Vice-Commander-in-Chief, James M. Averill, Georgia; Surgeon-General, A. W. Atchison, Texas; Chaplain-in-Chief, Rev. D. B. Shuey, Kansas; Adjutant-General, Silas H. Towler, Minneapolis, Minn.

There is also a National Council of Administration composed of one member from each of the forty-five Departments.

The following table gives the number of Posts and the membership embraced in each Department, together with the names and residences of Department commanders and assistant adjutant-generals:

Departments.	Posts	Members.	Department Commanders.	Assistant Adjutant-Generals.
1 Alabama	13	139	E. D. Bacon, Birmingham	Thomas R. Goebel, Birmingham.
2 Arizona	9	209	C. F. Schumacher, Tucson	W. F. R. Schindler, Phoenix.
3 Arkansas	29	471	John H. Avery, Hot Springs	Samuel Hambler, Hot Springs.
4 California and Nevada	98	5,086	W. G. Hawley, San Jose	T. C. Masteller, San Francisco.
5 Colorado and Wyoming	41	1,866	J. W. Huff, Victor, Colo	W. W. Ferguson, Victor, Colo.
6 Connecticut	66	4,537	N. Burton Rogers, Danbury	John H. Thacher, Hartford
7 Delaware	22	658	John C. Garner, Smyrna	J. S. Litzenberg, Wilmington.
8 Florida	21	383	S. Herbert Lancey, Maitland	E. A. Richards, Orlando.
9 Georgia	16	455	W. M. Scott, Atlanta	James P. Averill, Atlanta.
10 Idaho	18	421	George M. Parsons, Boise	George Hoskins, Boise.
11 Illinois	558	22,132	H. M. Trimble, Princeton	C. A. Partridge, Chicago.
12 Indiana	425	15,414	Benjamin Starr, Richmond	R. M. Smock, Indianapolis.
13 Indian Territory	16	234	B. F. Harris, Muskogee	Samuel H. Smith, Muskogee.
14 Iowa	382	16,299	John Lindt, Council Bluffs	George A. Newman, Cedar Falls.
15 Kansas	421	10,784	H. C. Loomis, Winfield	W. W. Denison, Topeka.
16 Kentucky	119	2,497	T. F. Beyland, Bellevue	T. A. Casey, Dayton.
17 Louisiana and Mississippi	46	1,094	Chas. W. Keeting, New Orleans, La	R. B. Baquie, New Orleans, La.
18 Maine	158	6,678	James L. Merrick, Waterville	Silas Adams, Waterville.
19 Maryland	56	2,519	John W. Worth, Baltimore	Hugh A. Maughlin, Baltimore.
20 Massachusetts	211	18,037	Wilmon W. Blackmar, Boston	Edward P. Preble, Boston.
21 Michigan	369	14,608	Edward C. Anthony, Negaunee	Fayette Wyckoff, Lansing.
22 Minnesota	174	6,006	Perry Starkweather, Minneapolis	Orton S. Clark, Minneapolis.
23 Missouri	234	5,802	Ira T. Bronson, Sedalia	Thomas B. Rodgers, St. Louis.
24 Montana	14	307	Alanson N. Bull, Bozeman	W. Y. Smith, Bozeman.
25 Nebraska	250	4,094	C. F. Steele, Fairbury	Mart Howe, Lincoln.
26 New Hampshire	88	3,272	William S. Carter, Lebanon	Frank Battles, Concord.
27 New Jersey	110	5,537	Enos F. Hann, Atlantic City	Levi C. Albertson, Atlantic City.
28 New Mexico	5	83	J. W. Edwards, Albuquerque	W. W. McDonald, Albuquerque.
29 New York	626	30,881	Allen C. Bakewell, N. Y. City	Wilbur F. Brown, Albany.
30 North Dakota	21	424	J. C. Gipson, Valley City	C. W. Barrett, Tower City.
31 Ohio	594	26,108	Walton Weber, Columbus	John W. Chapin, Columbus.
32 Oklahoma	81	1,551	Wesley Taylor, Perry	S. P. Strahan, Perry.
33 Oregon	62	1,852	M. L. Pratt, Portland	J. E. Mayo, Portland
34 Pennsylvania	557	28,572	R. P. Scott, Butler	Chas. A. Snydam, Philadelphia.
35 Potomac	17	2,362	Benj. F. Bingham, Wash'ton, D. C	B. F. Chase, Washington, D. C.
36 Rhode Island	26	1,733	George H. Chenery, Providence.	Philip S. Chase, Providence.
37 South Dakota	90	1,901	T. E. Blanchard, Pierre	S. J. Moore, Mitchell.
38 Tennessee	67	1,502	George W. Patten, St. Elmo	Walter W. French, Chattanooga.
39 Texas	38	811	C. C. Haskell, Denison	H. A. Johnson, Sherman.
40 Utah	4	220	W. M. Bostaph, Ogden	Thomas Maloney, Ogden.
41 Vermont	107	3,585	Ransom E. Hathon, Ludlow	E. A. Howe, Ludlow.
42 Virginia and N. Carolina	50	710	C. D. Grew, Portsmouth, Va	A. A. Hager, Nat. Sol. Home, Vt.
43 Washington and Alaska	85	2,501	B. C. Bedell, Walla Walla, Wash	E. W. Eliot, Walla Walla, Wash.
44 West Virginia	60	1,356	C. C. Mathews, Moundsville	Smith Risinger, Moundsville.
45 Wisconsin	262	9,431	James H. Agen, West Superior	Fred A. Bird, Madison.
Total	6,716	265,212		

SONS OF VETERANS U. S. A.

With a view to perpetuate the memory of the services and sacrifices of Union soldiers in the War of 1861-1865, the organization known as Sons of Veterans, U. S. A., was brought into existence in 1879. Camp No. 1 was organized in Philadelphia on September 20, in that year. The order extended rapidly all over the country, consisting at the present time of twenty-seven divisions, each representing the State or States where its headquarters are located. About 2,000 Camps are included in the several divisions, each having its own officers, the chief being styled Captain. The chief officer of a division bears the title of Commander. The national organization of the order is headed by a Commander-in-Chief, and the headquarters of the Commandery-in-Chief, as the supreme body is designated, are at Washington, D. C. The membership of the order numbers about 100,000. Those eligible to membership are all male descendants, not less than eighteen years old, of soldiers, sailors or marines who served with the Union forces in the Civil War, dying in or receiving honorable discharge from the service, or whose ancestors are or were eligible for admission to the Grand Army of the Republic. No person, however, who has ever borne arms against the United States Government, or whose father has so done, is eligible. The objects of the order are to extend aid and protection to the widows and orphans of Union soldiers, sailors and marines, and to honor the memory of the heroic dead through historical exercises and the proper observance of Memorial Day and Union Defenders' Day. The order also aids and assists its own worthy and needy members.

Commander-in-Chief, E. R. Campbell, Washington, D. C.; senior vice-commander-in-chief, S. S. Horn, Easton, Pa.; junior vice-commander-in-chief, Herbert S. Thompson, Providence, R. I.; adjutant-general, Charles S. Davis, Washington, D. C.; assistant adjutant-general, Clay G. Collette, Washington, D. C.; quartermaster-general, Fred E. Bolton, Boston, Mass.; assistant quartermaster-general, Thomas J. Hannon, Boston, Mass.; judge advocate general, Raphael Tobias, New York City; chaplain-in-chief, Rev. Howard Wilbur Ennis, Brooklyn, N. Y.; council-in-chief, E. F. Buck, Peoria, Ill.; C. J. Post, Grand Rapids, Mich.; James B. Adams, Atlantic City, N. J.

Division Commanders—Alabama and Tennessee, J. F. Ehrhart, Birmingham; California, Frank R. Handley, San Francisco; Colorado, Lathrop M. Taylor, Fort Collins; Connecticut, Frank R. Upson, Southington; Illinois, James E. Seabert, Dwight; Indiana, George F. Ogden, Laketon; Iowa, W. T. Mollison, Ottumwa; Kansas, W. P. Wilcox, Topeka; Kentucky, William H. Kennedy, Newport; Maine, J. Warren Phinney, Cumberland Mills; Maryland, F. T. F. Johnson, Washington, D. C.; Massachusetts, D. Murray Travis, South Framingham; Michigan, Carl A. Wagner, Port Huron; Minnesota, C. E. Casler, St. Paul; Missouri, S. Ed. Blumer, Cape Girardeau; Nebraska, I. E. Young, Lushton; New Hampshire, L. B. Emery, Troy; New Jersey, Frank M. Cunningham, Atlantic City; New York, Isaac H. Smith, Peekskill; Pennsylvania, William P. Baker, Philadelphia; Rhode Island, Charles A. Hammond, Providence; South Dakota, William F. Allison, Brookings; Vermont, Fred J. Spear, Manchester Depot; Washington, Albert T. Bedell, Walla Walla; West Virginia, George M. White, Wellsburg; Wisconsin, Gustav A. Geisler.

AMERICAN SCENIC AND HISTORIC PRESERVATION SOCIETY.

A national organization of men and women, animated by a love of the beautiful in art and nature, added to which is public spirit and pride in the achievements which have made American history, was incorporated by the Legislature of the State of New York, in 1895, as the American Scenic and Historic Preservation Society. Its aims are to protect beautiful features of the natural landscape from disfigurement; to preserve from destruction remarkable geological formations and organic growths possessing an artistic or scientific value; to save from obliteration names, places and objects identified with local, State and national history; to promote the beautification of cities and villages by landscape adornment of open spaces, the creation of new parks, the erection of historical memorials, the bestowal of significant and appropriate names upon new thoroughfares, bridges, parks, reservoirs and buildings; and by free lectures, literature correspondence, etc., to awaken and cultivate popular sentiment in these directions. In pursuance of its objects it is empowered to receive by purchase, gift, or otherwise, and to hold in fee, or trust, real or personal property necessary thereto; and it is required to make to the Legislature an annual report of its affairs. The society has three classes of members—annual, life and a class designated "patrons."

At the instance of the society the State of New York purchased in 1897 a tract of 33 acres included in the historic Stony Point battlefield on the Hudson, placing it in charge of the society. This tract was publicly dedicated as a State Reservation on July 16, 1902, the 123d anniversary of the battle, the Empire State Society of Sons of the American Revolution and a committee of Rockland County citizens co-operating. Another valuable historic reservation created by the State at the suggestion of the society consists of about 35 acres at the head of Lake George, made famous by events during the French-Indian and Revolutionary wars, purchased in 1808 and 1900. The society, at the request of Governor Roosevelt, in 1900, was represented by a commission which, in conjunction with a commission representing the State of New Jersey, secured the creation of the Interstate Palisades Commission, now engaged in preventing further destruction and disfigurement of the grand scenery which makes the Hudson River one of the most beautiful streams in the world. The society was largely instrumental in securing the passage of a bill by the New York Legislature, in 1902, under which the jurisdiction of the Palisades Commissioners is extended so as to include Hook Mountain, and to permit the extension of the Palisades drive to Stony Point Park. This bill, vetoed on a technicality, will doubtless be re-enacted in approvable form and become law. Chiefly through the influence of the society and its women's auxiliary, the Municipal Assembly of New York City, in 1901, passed an ordinance for the creation of a park in the Twelfth Ward, to include the Colonial mansion used by Washington as headquarters during a portion of 1776. While the ordinance, for a technical reason, failed to receive the Mayor's signature, its re-enactment is expected. The beautiful monument marking the site of Fort Washington was donated to the public by Mr. James Gordon Bennett, at the request of the society, and was dedicated on November 16, 1901, under the auspices of this organization and the Empire State Society of Sons of the American Revolution.

In the New York Legislature of 1902 the society made the first definite attempt in the United States to secure legislation to restrain by taxation the disfigurement of urban and rural scenery by posters and billboards. During the same year it called attention to the fact of the gradual disappearance of the island upon which Jamestown, the first American city, was founded; and it secured the introduction in Congress of a bill for the acquisition of the island as a national park; and of a bill to create a Federal Reservation in New York State, embracing the ruins of Forts Frederick, Crown Point and Ticonderoga, on Lake Champlain, all interesting in connection with Colonial and Revolutionary history. In various other ways the society has been active and its attention is at present directed to the matters of preserving Fraunce's Tavern, Alexander Hamilton's Home, Poe's Cottage and the old Hall of Records (Revolutionary prison), in New York City, and the Philipse Manor Hall in Yonkers; of securing the creation of a State Reservation at Watkins Glen, N. Y.; the rescue of the giant sequoias of California from threatened destruction; the maintenance of natural conditions in the Yosemite Valley; the protection of the prehistoric ruins of New Mexico, the creation of an international commission to consider the damage done by diversion of the waters of the great lakes; the identification of historic sites, and a number of others, interesting and valuable. The work of the society has grown to such proportions that it now maintains permanent headquarters in the Tribune Building, New York City.

The officers of the society are: President, Hon. Andrew H. Green, New York; Vice-Presidents, Frederick W. Devoe, New York; Hon. Charles S. Francis, Troy; J. Pierpont Morgan and Walter S. Logan, New York; Treasurer, Edward Payson Cone, No. 314 West Ninetieth street, New York; Counsel, Colonel Henry W. Sackett, Tribune Building, New York; Landscape Artist, Samuel Parsons, Jr., New York; Secretary, Edward Hagaman Hall, Tribune Building, New York; Trustees, Samuel P. Avery, Reginald Pelham Bolton, H. K. Bush-Brown, Edward Payson Cone, Richard T. Davis, Frederick W. Devoe, Hon. Charles S. Francis, Hon. Robert L. Fryer, Hon. Andrew H. Green, Francis Whiting Halsey, Hon. Hugh Hastings, Edward P. Hatch, Hon. Henry E. Howland, George F. Kunz, Frederick S. Lamb, Hon. Francis G. Landon, Walter S. Logan, Colonel Abraham G. Mills, J. Pierpont Morgan, Hon. John Hudson Peck, Mrs. M. Fay Pelree, Hon. George W. Perkins, Edward T. Potter, Thomas R. Proctor, William H. Russell, Colonel Henry W. Sackett, Albert Ulmann, Hon. William Van Valkenburgh, Hon. Thomas V. Welch, Charles F. Wingate, Frank S. Witherbee.

MILITARY AND NAVAL SOCIETY OF THE PORTO RICAN EXPEDITION.

An association to bring into permanent relationship the men connected with those military and naval operations during the Spanish-American War, which led to the acquisition of Porto Rico by the United States, was formed during the year 1900. The preliminary meetings began on April 1, and the first annual meeting of the Military and Naval Society of the Porto Rican Expedition was held in Columbus, Ohio, June 6, 7 and 8. Lieutenant-General Nelson A. Miles was the first president of the organization. Its objects, in addition to the perpetuation of comradeship, are to acquire and preserve the records of individual service; to advance the interests of American soldiers and seamen; to conserve national honor and union through unqualified allegiance to the general Government; and to protect the constitutional rights and liberties of American citizens. There are three classes of members. Active members are those who, as officers and enlisted men in any branch of the United States service were with the Porto Rican expedition, or on the island before or on October 18, 1900, the date of its evacuation by the Spanish soldiers and the raising of the American flag over the capitol at San Juan. The associate members are soldiers or sailors of good reputation belonging to organizations or vessels which composed the expedition, who were detained in the United States by sickness or disability, or on detailed service; and members of the Red Cross Society, volunteer nurses, press correspondents, etc., etc., who served with the army in Porto Rico. The honorary members are such persons as for good and sufficient reasons may be elected by the National or any Department Commandery. In the machinery of the organization provision is made for local commanderies in addition to the Department and National Commanderies. The several Departments are constituted as follows: Department of Ohio—Ohio, Indiana, Michigan and West Virginia; Department of Pennsylvania—Pennsylvania, Maryland, Virginia and Delaware; Department of New York—New York, New Jersey and Canada; Department of Massachusetts—Massachusetts and the other New England States; Department of Illinois—Illinois, Missouri, Iowa, Kansas and Nebraska; Department of Kentucky—Kentucky and all Southern States not otherwise assigned; Department of Wisconsin—Wisconsin, Minnesota, North Dakota, South Dakota and other Western States not otherwise assigned; Department of the District of Columbia—District of Columbia, and all regular officers of the army and navy wherever located, including Cuba, Porto Rico, Philippine Islands and other island possessions.

National Commander, Major General John R. Brooke, U. S. A.; First Vice-Commander, Rear Admiral Winfield S. Schley, U. S. N.; Second Vice-Commander, Brigadier-General Eugene Griffin, New York City; Third Vice-Commander, Captain Charles D. Sigsbee, U. S. N.; Fourth Vice-Commander, Colonel A. B. Colt, Columbus, Ohio; National Secretary, Colonel George B. Donavin, Columbus, Ohio; National Treasurer, Major Malcolm H. Crump, Bowling Green, Ky.; National Registrar, Major James Johnston, M. D., Bradford, Pa.; National Chaplain, Rev. Dr. J. C. Schindel, Newark, Ohio; Advisory Board, Brigadier-General Peter C. Haines, Baltimore, Md.; Brigadier-General John B. Castleman, Louisville, Ky.; Brigadier-General Theo. Schwan, Washington, D. C.; Brigadier-General Albert Sulliday, Watertown, Wis.; Major Edward B. Eckman, Columbia, Pa.

THE SOCIETY OF THE CARIBBEAN.

The extension of American political and commercial influence in the West Indies and among the countries of the old Spanish Main following the Spanish-American war, has given a wonderful impetus to the growth and influence of the Society of the Caribbean, a patriotic organization.

Founded originally by the American war correspondents who participated in the naval and military campaigns in Cuba and Porto Rico, to cherish the memories and associations of that war and to promote the ties of good fellowship between themselves and their brother veterans of the army and navy, it has extended its scope until now it includes not only one hundred and eighteen American newspaper and magazine writers who were in the war, but officers of the army and navy who distinguished themselves by gallantry, and diplomats, scientists, explorers, travellers and others who have added to our knowledge of and interest in the peoples and countries of that region of the earth.

On the night of July 3, 1899, just one year after our victorious squadron had driven Cervera's ships upon the rocky south coast of Cuba, there met at Mouquin's, in Fulton street, this city, a few of the war correspondents who had witnessed that memorable fight. They dined together and then formed the organization which has since grown to such proportions.

The late "Jersey" Chamberlin, of the New York Sun, presided at this first meeting. Colonel Augustus P. Dunlop, a veteran of two wars, acted as secretary. Alexander C. Kenealy was elected treasurer. To Harry Elwood MacNichol was entrusted the task of completing the permanent organization and of drawing up the constitution and by-laws.

On account of the anniversary of the Battle of Santiago coming during the heated season, when New York is deserted by all who can get away, it was decided that the annual meeting and banquet should in the future be held on April 22 of each year, the anniversary of the opening of the war.

Accordingly, on April 22, 1900, the second annual banquet of the society was held. Mouquin's was also the scene of this memorable gathering. This time there was a large attendance and a permanent organization having been effected, the society sprang into a prominent place among the patriotic orders of the country.

The fourth gathering of the war correspondents took place on April 21, 1902, at the annual banquet of the society, held on board the American line steamship St. Paul, at Pier 14, North River, this city. The St. Paul had played a prominent part in the naval campaign as a scout ship off Santiago, and this was also the fourth anniversary of her entry into war service.

This novel war banquet attracted much attention all over the country as well as in naval and military circles abroad. A solemn and imposing feature of the banquet was the investing with honorary membership of an infant daughter of the late Stevens Vail, one of the members of the society who had died within the year.

The officers elected for 1902-1903 were: Colonel Augustus P. Dunlop, president; Walter S. Merriwether, secretary; Carlton T. Chapman, treasurer; H. M. Stegman, registrar; Harry Elwood MacNichol, historian, and these vice presidents: Nicholas Biddle, Richard Harding Davis, James Creelman, E. K. Coulter, Lucien Adkins, Joseph Johnson, Jr., and J. F. McGrath.

The roll call showed that there were 118 war correspondents enrolled as members.

Since the annual meeting there have been elected to associate membership in the society a distinguished company of army and navy officers, scientists and writers who took part in the Dixie expedition to St. Pierre, Martinique.

The constitution of the society now provides for three classes of membership—active, associate and honorary. The active membership consists of the war correspondents themselves. Associate membership is conferred upon officers of the army and navy and marine corps who served in the Cuban and Porto Rican campaigns or who have especially distinguished themselves in the Caribbean since the war. It may also be conferred upon citizens of the United States who have distinguished themselves in "promoting the best interests of the army and navy, who have contributed to the wider knowledge of the history, geography and commercial resources of the West Indies and the Spanish Main, and who have aided in the promotion of American influence and trade in those islands."

Honorary membership is reserved for those: (1) "Citizens of the United States, of military, naval or civil life, who have especially distinguished themselves in promoting those objects for which the Society of the Caribbean was founded;" (2) "Citizens of the nations and colonies of the West Indies and the Spanish Main who have especially distinguished themselves in promoting the cause of good government, in fostering the love of liberty, in stimulating wider knowledge of those lands, in acts of friendship to the United States of America."

Membership in the society is hereditary, and passes, upon the death of any original member, to his oldest son or oldest male descendant in the order of primogeniture.

THE SETTLERS AND DEFENDERS OF AMERICA.

An association, hereditary in its membership, aiming to perpetuate names and the history of events connected with the early settlement of this country, and with the birth of the Republic, was incorporated in 1899, under the name of The Settlers and Defenders of America. Its objects, fully stated, are "to stimulate genealogical, biographical and historical research; to publish patriotic manuscripts and records; to collect Colonial and Revolutionary relics; to preserve tradition; to mark patriotic graves; to locate and protect historic sites; to erect tablets and monuments; to aid in founding and erecting libraries, museums and memorial buildings, and in all other fitting ways, through broad fellowship and co-operation, to perpetuate the memory of the Settlers and Defenders of the nation, and to exemplify and teach in all later generations their spirit of wise patriotism, to the end that we may loyally advance the purpose for which they struggled." The conditions for eligibility to membership involve descent from three classes of ancestors. Both males and females are admitted, the requirements being that the person shall be eighteen years old, or over, and lineally descended (1) from a settler in one of the thirteen original colonies, during the first thirty-three years of its settlement; (2) from one who is also lineally descended from an ancestor who, between May 13, 1697, and April 19, 1775, inclusive, rendered civil or military service in the general government of such colony; and (3) who is likewise lineally descended from an ancestor who, between April 19, 1775, and September 13, 1783, inclusive, rendered actual service to the cause of American Independence, either as a military or naval officer, soldier, seaman, privateer, militia or minute man, associator, signer of the Declaration of Independence, member of a Continental, Provincial or Colonial Congress, or Colonial or State Legislature, or as a recognized patriot who performed or actually counselled or abetted acts of resistance to the authority of Great Britain; but no claim of eligibility through descent from a settler or from an ancestor who rendered Colonial service to be valid unless the descendant of such ancestor in the line of descent of the applicant were patriots of the War of the Revolution. The officers of the society are: President-General, Walter S. Carter, New York; Vice-President-General, Robert D. Benedict, New York; Secretary-General, Grenville B. Winthrop, New York; Treasurer-General, Rodney S. Dennis, New York; Registrar General, Everett V. Abbot, New York; President of Executive Council, Ralph E. Prime, Yonkers, N. Y.

ELEVENTH CORPS ASSOCIATION.

Commemorative of the services of the Eleventh Army Corps in the war for the preservation of the Union, this association was organized at Portland, Me., July 5, 1890. It has about one hundred members, including such distinguished veterans as Generals O. O. Howard, U. S. A.; Carl Schurz, Stewart L. Woodford, Orland Smith, John T. Lochman and Luis P. di Cesnola, with others of minor rank. The officers of the association are:

President, General Orland Smith, Chicago, Ill.; Vice-President, General John T. Lochman, New York; Vice-President to Army of Potomac, Colonel Aug. C. Hamlin, Bangor, Me.; Vice-President of the First Division, General Stewart L. Woodford, New York; Vice-President of the Second Division, Major-Surgeon W. C. Hagen, Newark, N. J.; Vice-President of the Third Division, General Carl Schurz, New York City; Secretary, Captain Francis Ince, New York City; Historian, Colonel Aug. C. Hamlin, Bangor, Me.; Treasurer, Captain Louis Lenbuscher, New York City.

MILITARY ORDER OF THE LOYAL LEGION OF THE UNITED STATES.

The Military Order of the Loyal Legion of the United States was instituted April 15, 1865, by officers and ex-officers of the army, navy and marine corps of the United States who rendered service during the war of 1861-1865. It is composed of State Commanderies and a national body designated the Commandery-in-Chief. True allegiance to the United States of America is one of its fundamental principles; and its objects are to cherish the memories and associations of the war for the preservation of the Union; advance the best interests of the American soldier and sailor, especially of those associated as companions of the order; extend all possible relief to the widows and children of such; foster the cultivation of military and naval science, and enforce unqualified allegiance to the general government. Its membership comprises three classes, but the constitution of the order prohibits the election of any companion of the third class after April 15, 1890. This class consists of gentlemen who, in civil life, during the Civil War, were specially distinguished for conspicuous and consistent loyalty and were active in maintaining the supremacy of the National Government. Companions of the first class are elected from among commissioned officers of the army, navy and marine corps, regular or volunteer, who served during the war, and remain in service or have been honorably discharged, including men who served as non-commissioned officers, warrant officers or enlisted men during the war and have since that period been commissioned as officers in army, navy or marine corps. Companions of the second class are elected from among the eldest male heirs of those who were, or could rightfully have been companions of the first class. The parent commandery represents the State of Pennsylvania. Ten other commanderies, including that of the District of Columbia, had been organized when the Commandery-in-Chief was instituted on October 21, 1885. Its headquarters are in Philadelphia.

Commander-in-Chief, Lieut.-Gen. John M. Schofield; Senior Vice-Commander-in-Chief, Rear-Admiral George Brown: Junior Vice-Commander-in-Chief, Brevet Col. Horatio C. King; Recorder-in-Chief, Brevet Lieut.-Col. John P. Nicholson; Registrar-in-Chief, Brevet Major William P. Huxford; Treasurer-in-Chief, Paymaster George De F. Barton; Chancellor-in-Chief, Brevet Brig.-Gen. William L. James; Chaplain-in-Chief, Brevet Major Henry S. Burrage, D. D.; Council-in-Chief, Brevet Major George W. Chandler, Capt. Roswell H. Mason, Brevet Major Henry L. Swords, Brevet Major A. M. Van Dyke, First Lieut. W. L. Greenleaf.

ROLL OF COMMANDERIES IN ORDER OF SENIORITY.

No.	Commandery of the State of	Headquarters.	Instituted.	Recorders.	Address.
1	Pennsylvania	Philadelphia	Apr. 15, 1865	Brev. Lieut.-Col. J. P. Nicholson	139 South 7th St., Phila.
2	New York	N. Y. City	Jan. 17, 1866	Asst. Paymaster A. N. Blakeman	140 Nassau St., New York.
3	Maine	Portland	Apr. 25, 1866	Brevet Major Henry S. Burrage	Oxford Bldg., Portland.
4	Massachusetts	Boston	Mar. 4, 1868	Col. Arnold A. Rand	19 Milk St., Boston.

SOCIETY OF THE ARMY OF THE POTOMAC.

One of the most inclusive of the associations which grew out of the Civil War of 1861-1865 is the Society of the Army of the Potomac, which was organized in New York City, July 5 and 6, 1869. Its membership is open to every officer and enlisted man who served at any time in that army, receiving an honorable discharge or continuing in service in the regular army; and also to all officers and men who served on vessels which were in active and immediate co-operation with that army, receiving honorable discharge or remaining in regular service. Practically membership is open to all honorable veterans who served east of the Alleghany Mountains. Provision is made for the election to honorary membership of those who served with distinction in any of the other armies or in the navy, and also of persons who have served as orator or poet at the annual reunions. Among the many distinguished officers who have been president of the society were Lieut.-Gen. Philip H. Sheridan, U. S. A., the first on the list; Gen. Ulysses S. Grant, and the present senior officer of the United States Army, Lieut.-Gen. Nelson A. Miles. The objects of the society are to cherish the memories and associations of the Army of the Potomac, perpetuate the name and fame of those who have fallen, either in battle or in the line of duty with that army, and collect and preserve records of its achievements. The membership numbers 2,500.

President, Brevet Brig.-Gen. Henry E. Tremain, U. S. V. Vice-Presidents—First Corps, Capt. Patrick De Lacy, U. S. V.; Second Corps, Gen. Orland Smith, U. S. V.; Third Corps, Chaplain Joseph H. Twichell, U. S. V.; Fourth Corps, Gen. George D. Ruggles, U. S. A.; Fifth Corps, Gen. James G. Grindlay, U. S. V.; Sixth Corps, Gen. J. Ford Kent, U. S. A.; Ninth Corps, Gen. Henry C. Dwight, U. S. V.; Eleventh Corps, Col. Augustus C. Hamlin, U. S. V.; Twelfth Corps, Col. C. W. Boyce, U. S. V.; Eighteenth Corps, Col. George M. Lane, U. S. V.; Nineteenth Corps, Gen. Emory Smith, U. S. V.; Cavalry Corps, Gen. J. P. Cilley, U. S. V.; General Staff, Gen. Martin T. McMahon, U. S. V.; Signal Corps, Col. Samuel T. Cushing, U. S. V. Treasurer, Lieut. Frank S. Halliday, U. S. V., 69 Hicks street, Brooklyn, N. Y. Recording Secretary, Brevet Col. Horatio C. King, U. S. V., 46 Willow street, Brooklyn, N. Y. Corresponding Secretary, Col. William L. Fox, Albany, N. Y.

ARMY AND NAVY UNION, U. S. A.

The Army and Navy Union of the United States is formed of men who have served in any branch of the United States army and navy, and has for its object "to bring together and unite in benevolent and social fellowship those who have served honorably in the army, navy and marine corps of the United States; to provide for the sick and distressed and assist in the burial of the dead, and to extend a helping hand to the family of a deceased comrade or shipmate."

A man of good moral character and who possesses an honorable discharge from the United States service on land or sea, is eligible to membership. The endowment insurance benefit is $100 in case of death. The office of the Adjutant-General is at 401 Pulaski street, Brooklyn, N. Y., and there are garrisons in nearly every city in the country.

The officers of the national corps are: Russel C. Paris, national commander, Sandy Hill, N. Y.; William Budy, Sr., vice national commander, St. Paul, Minn.; Hugh H. Henry, Jr., vice national commander, Phoebus, Va.; John Schumacher, adjutant-general, 401 Pulaski street, Brooklyn, N. Y.; M. J. Hackett, inspector-general, Washington, D. C.; Jacob D. Pennell, judge advocate general, Newburgh, N. Y.; John E. Cox, national chaplain, Providence, Ky.; Grant A. Forbes, special inspector, Manila, P. Isl.

Garrisons of Greater New York: Captain F. M. Gibson Garrison 12, Borough Manhattan; Captain William F. Flanagan Garrison 42, Borough Manhattan; General Franz Siegel Garrison 62, Borough Bronx; General George A. Custer Garrison 2, Borough Brooklyn; Captain Emmet Crawford Garrison 22, Borough Brooklyn; General James Shields Garrison 21, New Rochelle, N. Y.; General Thomas Ewing Garrison 55, Yonkers, N. Y.

SOCIETY OF THE ARMY OF SANTIAGO DE CUBA.

The Society of the Army of Santiago de Cuba is a military association which was projected before the sailing of the expedition which it aims to commemorate. In the camps at Tampa and on the transports which conveyed the troops to the scene of their achievements under the American Flag for the liberation of a people struggling under foreign oppression, the matter was discussed. It was not until the surrender of the city and province, however, that the project took definite form. With the approval of the Commanding General a call was issued by Major-Gen. H. W. Lawton, pursuant to which about seventy-five officers, representing all the troops then in front of Santiago, met in the Governor's Palace on July 31, 1898, and took preliminary steps for organizing the society. The organization was effected August 7, 1898, by electing Major-Gen. William R. Shafter, President; Major-Gen. Joseph Wheeler, First Vice-President, and Major Alfred C. Sharp, Secretary. The organization was completed at Camp Wikoff, Montauk Point, L. I., on September 15, 1898, by the adoption of a constitution and the election of officers provided for therein. The motto of the society, recommended by a committee of which the late Brig.-Gen. William Ludlow, U. S. V., was chairman, is, "As He Died to Make Men Holy, Let Us Die to Make Men Free." Its purpose, as set forth in the constitution is "To record the history and conserve the memory of the events of the campaign which resulted in the surrender on the 17th day of July, 1898, of the Spanish army, the city of Santiago de Cuba and the military province to which it pertained." Persons eligible to membership are all those officers and soldiers of the United States Army, including acting assistant surgeons and authorized volunteer aides who constituted the expeditionary force to Santiago de Cuba, and who worthily participated in the campaign between the dates of June 14 and July 17, 1898. Provision is made for perpetuation of the society through the admission of lineal descendants of persons eligible for original membership, and of those blood relatives of either of these two classes to whom, in the absence of lineal descendants, the right of inheritance to one membership may be devised by a decedent member. Besides the central society there are branches in New York City, Chicago, Detroit, Boston, Worcester, Mass., Washington, D. C., and San Francisco. The total membership is upward of 3,000.

OFFICERS OF THE NATIONAL SOCIETY.

President, Major-Gen. Wm. R. Shafter, U. S. A., retired; First Vice-President, Major-Gen. Joseph Wheeler, U. S. V. (Brigadier-General, U. S. A., retired); Second Vice-President, Major-Gen. J. Ford Kent, U. S. V. (Brigadier-Genral, U. S. A., retired); Third Vice-President, Major-Gen. John C. Bates, U. S. A.; Fourth Vice-President, Major-Gen. Adna R. Chaffee, U. S. A.; Secretary and Treasurer, Major Alfred C. Sharpe, Assistant Adjutant-General, U. S. V. (Major of Infantry and A. A. G., U. S. A.); Historian, Major G. Creighton Webb, Inspector-General, U. S. V.; Registrar-General, Major Philip Reade, Inspector-General, U. S. V. (Lieutenant-Colonel, Twenty-fifth U. S. Infantry); First Division Registrar, Capt. L. W. V. Kennon, Sixth United States Infantry (Major Tenth U. S. Infantry); Second Division Registrar, Capt. James T. Kerr, Seventeenth U. S. Infantry (Lieutenant-Colonel and A. A. G., U. S. A.); Third Division Registrar, Capt. Charles Morton, Third U. S. Cavalry (Lieutenant-Colonel, Eighth U. S. Cavalry); Fourth Division Registrar, Lieut.-Col. John Jacob Astor, Inspector-General, U. S. V. These officers are ex-officio members of a council composed of Major-Generals S. B. M. Young, U. S. A.; H. S. Hawkins, U. S. V., and S. S. Sumner, U. S. V.; Brig.-Gens. Adelbert Ames, U. S V.; Wallace F. Randolph, U. S. V., and Chambers McKibbin, U. S. V.; Col. Theodore Roosevelt, First U. S. Vol. Cavalry; Capt. E. D. Dimmick, Ninth U. S. Cavalry (Lieutenant-Colonel, Second U. S. Cavalry), and Lieut.-Col. Charles Dick, Eighth Ohio Vol. Infantry; one vacancy existing.

OFFICERS OF THE NEW YORK BRANCH.

President, Brig.-Gen. Hamilton S. Hawkins, U. S. V.; First Vice-President, Col. Theodore Roosevelt, U. S. V.; Second Vice-President, Col. Albert L. Mills, U. S. A.; Third Vice-President, Major G. Creighton Webb, U. S. V.; Fourth Vice-President, Capt. Woodbury Kane, U. S .V.; Secretary, Capt. Arthur F. Cosby, U. S. V., 62 William st., New York City; Treasurer, Capt. Anthony J. Bleecker, U. S. V.; Council, Major Stephen Baker, U. S. A.; Capts. William H. Linson, U. S. V., and Stewart M. Brice, U. S. V.; Lieutenants A. L. Robertson, L. W. McLeod, R. M. Ferguson and George H. Wilson, all U. S. V.; Capt. William Astor Chanler, U. S. V.; Lieutenants Alfred H. Abeel, U. S. V., and Harris B. Fisher, U. S. V.; Sergeants Henry Bull, Henry S. Van Schaick and John List, all U. S. V., and Corporal John F. Jenkins, U. S. V.

MEDAL OF HONOR LEGION.

The Medal of Honor Legion is a patriotic social organization composed of officers and enlisted men who have received medals of honor for distinguished conduct in action. The greater number of these medals were awarded to participants in the war for the preservation of the Union, under an act of Congress providing for this recognition. Veterans of the Spanish-American War and of the war in China have also been made recipients of the honor, and to these is open the privilege of membership in the legion. There are 550 members.

Commander, Moses Veale, Philadelphia, Pa.; Senior Vice-Commander, Patrick J. Kyle, Charlestown, Mass.; Junior Vice-Commander, Charles A. Orr, Buffalo, N. Y.; Chaplain, James Miller, Philadelphia, Pa.; Adjutant, Wm. J. Wray, Philadelphia, Pa.; Judge Advocate, Charles A. Clark, Cedar Rapids, Ia.; Surgeon, Gabriel Grant, M. D., New York City; Quartermaster, Noble D. Preston, Philadelphia, Pa.; Inspector, Wm. L. Hill, Portsmouth, N. H.; Historian, J. Madison Drake, Elizabeth, N. J.

AMERICAN FLAG ASSOCIATION.

From time to time one and another of the patriotic societies of the United States has appointed a committee charged with the duty of seeing that the flag of the nation receives that honor to which the emblem is entitled. The American Flag Association grew out of a growing perception of the necessity for such work as these committees were able to perform. Representatives of several of the Flag Committees held a meeting in New York City on July 15, 1897, and after considering the matter determined upon steps for the organization of such an association. Several other meetings were held, and the formal organization was completed at a mass meeting of all the Flag Committees then existing, which was held at the City Hall, New York City, on February 17, 1898. The object of the association is the fostering of public sentiment in favor of honoring the flag of our country, preserving it from desecration, and initiating and forwarding legal measures to prevent such desecration. The organization consists of the Flag Committee of patriotic societies, Grand Army Posts, etc., admitted by vote of the association or its Executive Committee, and any such society or organization not represented is invited to appoint a Flag Committee of thirteen members in order to be represented. There is also provision made for the admission of members at large, persons of any age or either sex being eligible. A fee of $5 secures life membership, and $1 is the fee for annual membership, except in the case of school children under eighteen years old, who are required to pay an annual fee of 10 cents only. As regards the membership of Flag Committees there are no compulsory dues, the association depending for support of its work upon the voluntary contributions of societies represented. These number about sixty at the present time. In voting every member has a voice, whether present or absent, as votes may be cast by proxy, if a member is unable to attend a meeting. The annual meeting is held on or about the 14th day of June, and officers are elected for one year or until their successors are chosen.

President, Colonel Ralph Earl Prime, Yonkers, N. Y.; Vice-Presidents, Lieutenant-General Nelson A. Miles, Washington, D. C.; Major-General O. O. Howard, Rutland, Vt.; Major-General J. C. Breckinridge, Washington, D. C.; Brigadier-General Frederick D. Grant, New York; Rear Admiral B. Gherardi, Stratford, Conn.; Rear Admiral Winfield S. Schley, Washington, D. C.; Hon. Franklin Murphy, Trenton, N. J.; Major J. Langdon Ward, New York; Edward Hagaman Hall, New York; Mrs. Stephen V. White, Brooklyn, N. Y.; Mrs. Charles W. Lippitt, Providence, R. I.; Miss Mary V. B. Vanderpoel, New York; Secretaries, Theodore Fitch, No. 120 Broadway, New York; Mrs. J. Wells Wentworth, No. 251 West Eighty-seventh street, New York; Treasurer, Edward Payson Cone, No. 314 West Ninetieth street, New York. There is also an Executive Committee composed of the officers of the association and twenty other members.

NAVAL ORDER OF THE UNITED STATES.

The Naval Order of the United States developed from a meeting held informally on July 4, 1890, by a few gentlemen interested in naval history, an organization being effected under the title, Naval Commandery of the United States, on November 10, 1890. In conjunction with another society, since dissolved, a provisional organization of broader scope was effected on June 19, 1893, and the General Commandery of the Naval Order of the United States was fully constituted on August 15, 1893, the parent body becoming the Massachusetts Commandery. Commanderies have since then been instituted in Pennsylvania, New York, Illinois, District of Columbia and California. As now constituted the machinery of the order comprises these several bodies, together with a legislative body designated the Congress, composed of the general officers and six delegates from each commandery. This congress meets triennially on October 5, the anniversary of the adoption by Congress, in 1775, of the resolutions formally authorizing the fitting out of the first ships of the navy. The objects of the order are to transmit to latest posterity the glorious names and memories of the officers and men who have served the United States in battles fought on the water; to encourage research and publication of data pertaining to naval art and science, and to establish libraries in which to preserve all documents, rolls, books, portraits and relics relating to the navy and its heroes. The companions of the order are of two classes. The first class comprises commissioned officers, midshipmen and naval cadets, or corps or staff officers with relative rank as such, or appointed volunteer officers in line of promotion who were in actual service in the navy, marine corps or revenue marine under the authority of any of the thirteen original colonies, or of the Continental Congress during the War of the Revolution, or in any of the subsequent wars of the United States, remaining in service or receiving honorable discharge. This class of membership is hereditary in accordance with the usual rules of primogeniture, passing along male lines of succession. No person who has ever borne arms against the United States, however, is eligible. The second class companionsship covers only the life of the recipient, and is open to enlisted men who have received the United States Naval medal of honor.

OFFICERS OF THE GENERAL COMMANDERY, 1901-1904.

General Commander, Rear Admiral John Grimes Walker, U. S. N., retired, Pennsylvania Commandery; Vice-General Commanders, Admiral George Dewey, U. S. N., New York Commandery; Rear Admiral George Eugene Belknap, U. S. N., retired, Massachusetts Commandery; Rear Admiral Smith Barker, U. S. N., New York Commandery; General Recorder, Lieutenant-Commander S. Hubbard, U. S. N., retired, New York Commandery; Assistant General Recorder, Rodney McDonough, Massachusetts Commandery; General Treasurer, Jarvis Bonesteel Edson, late U. S. N., New York Commandery; General Registrar, James Varnum Peter Turner, late U. S. N., Pennsylvania Commandery; General Historian, Major Richard Strader Collum, U. S. M. C., retired, Pennsylvania Commandery; General Chaplain, Rev. George Williamson Smith, D. D., LL.D., late chaplain U. S. N., New York Commandery. There is also a General Council, consisting of nine members.

NEW YORK COMMANDERY.

The New York Commandery of the Naval Order of the United States was incorporated March 4, 1896, and is the largest one in the order, having 153 members. Its officers are as follows: Commander, Admiral George Dewey, U. S. N.; Vice-Commander, Lieutenant-Commander Leonard Chenery, U. S. N., retired; Recorder, Lieutenant-Commander Socrates Hubbard, U. S. N., retired; Treasurer, Jarvis Bonesteel Edson, late U. S. N.; Registrar, William Tibbits Salter; Historian, Medical Director George Worth Woods, U. S. N.; Chaplain, Rev. Frank Landon Humphreys, S. T. D.

MILITARY ORDER OF FOREIGN WARS OF THE UNITED STATES.

The Military Order of Foreign Wars of the United States is an association, historical in character and patriotic in aim, having for its scope the period of American history since national independence was achieved, and standing for the honorable principle of national defence against foreign aggression. It was founded in 1894 to perpetuate the names and services of commissioned officers who served either in the War of the Revolution, the war with Tripoli, the War of 1812, the Mexican War or the war with Spain. There are twenty-one State commanderies and a national commandery. The members, of whom there are about 1,600, are styled "Companions," and are in three classes—veteran, hereditary and honorary. In order to make membership a greater dignity the right is reserved to confer companionship upon only those officers of the army and navy and their direct descendants as shall be selected by formal action of the State commanderies. In other words, the order seeks the man, not the man the order. The organization has received the recognition of the United States Government, which authorizes the officers of the army and navy who have been admitted to companionship to wear the insignia of the order on all occasions of ceremony.

OFFICERS OF THE NATIONAL COMMANDERY.

Commander-General, Major-General A. S. Webb, late U. S. A.; Vice-Commanders-General, Major-General Charles F. Roe, N. G. N. Y.; Brigadier-General W. W. H. Davis, U. S. V.; A. Floyd Delafield, Hon. Horace Davis, LL. D.; W. De Lancy Howe, Brigadier-General George M. Moulton, Colonel T. V. Kessler, Major-General H. A. Axline, U. S. V.; Colonel Milton Moore, U. S. V.; Captain Frank L. Green, U. S. V.; Colonel H. Ashton Ramsay, M. N. G.; Rear Admiral John G. Walker, U. S. N.; Dr. George B. Johnston, Captain Stephen Waterman, U. S. V.; Commander J. W. Bostwick, U. S. N.; Brigadier-General William J. McKee, U. S. V.; General Edward A. Campbell, U. S. V.; Colonel H. M. Seeman, U. S. V.; Captain Francis C. Kelley, U. S. V.; Brigadier-General W. W. Gordon, U. S. V.; Major-General L. N. Oppenheimer, U. S. V.; Secretary-General, James H. Morgan, New York City; Treasurer-General, Colonel O. C. Bosbyshell, Philadelphia, Pa.; Rgistrar-General, Rev. Henry N. Wayne; Historian-General, Captain Samuel E. Gross, U. S. V.; Judge-Advocate-General, Hon. Frank M. Avery; Chaplain-General, Rev. Dr. S. Ellis Stevens; Deputy Secretary-General, Major David Banks, Jr.; Deputy Treasurer-General, James T. Sands.

MOUNT VERNON LADIES' ASSOCIATION.

With a view to the preservation and care of the estate at Mount Vernon, Va., which was the home of Washington and where the great soldier-statesman died, the Mount Vernon Ladies' Association of the Union was founded in 1854 by Miss Ann Pamela Cunningham, of South Carolina, who was its first regent. The sum of $200,000 was raised by popular subscription, although not without difficulty, and in 1858 the association was able to purchase 200 acres of the estate, including the mansion and the tomb wherein rests all that is mortal of the first President. The Civil War interrupted the work of restoration which was contemplated, but it has been carried to completion since then, and the association adds yearly to its attractiveness and interest as an object to be visited by the tourist, influenced either by patriotism or by the spirit of historical research. The officers of the association are:

Regent, Mrs. Justine van Rensselaer Townsend, New York City; vice-regents, Mrs. Letitia H. Walker, North Carolina; Mrs. Mary T. Barnes, District of Columbia; Mrs. Margaret J. M. Sweat, Maine; Mrs. S. E. Johnson Hudson, Connecticut; Mrs. Emma R. Ball, Virginia; Miss Alice M. Longfellow, Massachusetts; Mrs. Jennie Meeker Ward, Kansas; Mrs. Ida A. Richardson, Louisiana; Mrs. Elizabeth B. A. Rathbone, Michigan; Mrs. Mary T. Leiter, Illinois; Mrs. Alice H. Hill, Colorado; Miss Harriet Clayton Comegys, Delaware; Mrs. Phoebe A. Hearst, California; Mrs. Rebecca B. Flandrau, Minnesota; Mrs. A. R. Winder, New Hampshire; Mrs. Georgia P. Wilder, Georgia; Mrs. George R. Goldsborough, Maryland; Mrs. Helen Field Conover, New Jersey; Mrs. Christine Blair Graham, Missouri; Mrs. Mary Yeatman Webb, Tennessee; Miss Amy Townsend, New York; Mrs. William Ames, Rhode Island; Mrs. Chas. C. Harrison, Pennsylvania; Mrs. Frances C. Maxey, Texas; Mrs. Robert D. Johnston, Alabama; Mrs. Eugene van Rensselaer, West Virginia; Mrs. Charles F. Manderson, Nebraska; Mrs. John Julius Pringle, South Carolina; Mrs. William F. Barret, Kentucky, Mrs. Charles Danby, Indiana; secretary, Mrs. Jennie Meeker Ward, Ottawa, Kan.; treasurer, Mr. E. Francis Riggs, Washington, D. C.; resident superintendent, Mr. Harrison H. Dodge, Mount Vernon, on the Potomac, Va.; assistant superintendent, Mr. James Young, Mount Vernon, on the Potomac, Va.; advisory committee, Chief Justice Fuller, United States Supreme Court, Washington, D. C.; Mr. James Carter, New York.

UNITED DAUGHTERS OF THE CONFEDERACY.

The United Daughters of the Confederacy is a social, literary, historical, monumental and benevolent association, composed of the widows, wives, mothers, sisters and lineal descendants of men who rendered honorable service in the army and navy of the Confederate States, or who served in the civil service of the Confederacy or of any of the States embraced therein, or who gave personal service to the Confederate cause. It was organized at Nashville, Tenn., September 10, 1894, Mrs. M. C. Goodlett, of that city, being the prime mover. In recognition of this service Mrs. Goodlett was subsequently made a permanent official of the organization, with the title of honorary president and founder. Mrs. Stonewall Jackson, of Charlotte, N. C., is also an honorary president for life. The organization has 555 chapters, located in all parts of the United States, and has a total membership of 26,227. The objects of the organization are in no sense political, but cover a range indicated by the characterization herein given to it. The duties it undertakes are to extend all necessary charity to the survivors of the war between the States, and those dependent upon them; to collect and preserve the material for a truthful history of the war; to protect historic places of the Confederacy; to record the part taken by Southern women, as well in untiring effort after the war in the reconstruction of the South as in patient endurance of hardship and in patriotic devotion during the struggle; to honor the memory of those who served and those who fell in the service of the Confederate States; and to cherish the ties of friendship among the members of the society. One great work which the society has set before itself to be accomplished is the erection of a monument to the memory of President Jefferson Davis, to be placed in Monroe Park, Richmond, Va. Following is a list of the officers of the association:

President, Mrs. James A. Rounsaville, Rome, Ga.; First Vice-President, Mrs. M. R. M. Rosenberg, Galveston, Texas; Second Vice-President, Mr. T. J. Latham, Memphis, Tenn.; Recording Secretary, Mrs. John P. Hickman, Nashville, Tenn.; Corresponding Secretary, Mrs. Virginia F. McSherry, Martinsburg, W. Va.; Treasurer, Mrs. James Y. Leigh, Norfolk, Va.; Custodian, Mrs. S. E. Gabbett, Atlanta, Ga.

UNITED SONS OF CONFEDERATE VETERANS.

Simultaneously with the twelfth annual reunion of the United Confederate Veterans the General Society of United Sons of Confederate Veterans held its seventh annual reunion in the city of Dallas, Texas, on April 22, 23, 24 and 25, 1902. This organization is designed to perpetuate the memory of the events and men connected with the struggle to establish the Confederate States of America, which continued through the years 1861 to 1865. Its several constituted bodies consist of Camps, each designated by a name and number; sub-divisions of States, known as Brigades; State organizations, styled Divisions, and Organizations of States, known as Departments. The chief body is designated the Confederation. The Departments are: Army of Northern Virginia Department, formed of the States of Virginia, Maryland, West Virginia, North and South Carolina, and Kentucky; Army of Tennessee Department, comprising the States of Georgia, Alabama, Tennessee, Mississippi, Louisiana, and Florida, and the Trans-Mississippi Department, composed of the States of Arkansas, Texas, Missouri, and the Indian Territory. There are 372 Camps, with a total membership of more than 15,000.

Commander-in-Chief, Thomas P. Stone, Waco, Texas; Adjutant-General and Chief of Staff, Homer D. Wade, Waco, Texas; Inspector-General, N. R. Tisdal, Fort Worth, Texas; Quartermaster-General, R. Hayne King, Waco, Texas; Commissary-General, M. O'Marra, Savannah, Ga.; Judge Advocate-General, Robert E. Lee, Burkes Station, Fairfax County, Va.; Chaplain-General, Bishop Thomas F. Gailor, Sewanee, Tenn.

ORDER OF FOUNDERS AND PATRIOTS OF AMERICA.

This is a patriotic and historical association which was organized on May 13, 1896, the anniversary of the founding of Jamestown, Va. That anniversary is fixed as the date for its annual meetings. The objects of the order are to associate men whose ancestors struggled together for life and liberty, home and happiness in this land when it was a new and unknown country, and whose line of descent from them comes through patriots who sustained the colonies in the struggle for independence; to teach reverent regard for the names, patriotism and deeds of the founders of the country and their patriot descendants; to inculcate patriotism; to collect and preserve records and other historical matter relating to the first colonists and their ancestors and descendants; to commemorate and celebrate events in the history of the colonies and the Republic; and to carry out other patriotic and historical purposes. Membership is open to any man of good character, twenty-one years old, or older, and a citizen of the United States "who is lineally descended in the male line of either parent from an ancestor who settled prior to May 13, 1657, in any of the colonies now included in the United States of America, and one or all of whose intermediate ancestors in the same line, who lived in the period of the Revolution, from 1775 to 1783, adhered to the cause of the colonies." There are 454 members. The General Court of the order has supreme control, and is composed of seven Founders, the past and present general officers, nine councillors-general and the present officers of the State societies.

Governor-General, Ralph E. Prime, Yonkers, N. Y.; deputy governor-general, Gen. William F. Draper, Hopedale, Mass.; chaplain-general, Rev. Dryden William Phelps, New Haven, Conn.; secretary-general, Gen. Ferdinand P. Earle, New York City; treasurer-general, George Clinton Batcheller, New York City; attorney-general, Edward Lang Perkins, Philadelphia, Pa.; registrar-general, Teunis Dimon Hunting, New York City; genealogist-general, Hon. James Jerome Belden, New York City; historian-general, Franklin Whetstone Hopkins, Alpine, N. Y.

SOCIETY OF THE ARMY OF THE TENNESSEE.

Commemorative of the good comradeship developed by service in the Union Army during the Civil War the Society of the Army of the Tennessee was organized at Raleigh, N. C., April 14, 1865. It is composed entirely of commissioned officers who served with honor in the Army of the Tennessee, and provision for its perpetuation is made by making their descendants eligible to membership. In its constitution its object is defined as being "to keep alive and preserve that kindly and cordial feeling which has been one of the characteristics of this army during its career in the service, and which has given it such harmony of action, and contributed, in no small degree, to its glorious achievements in our country's cause." The society usually holds a meeting annually, the last one at Indianapolis, Ind., November 13 and 14, 1901. No meeting was held in 1902, as it was decided to hold a reunion, the thirty-fourth, in May, 1903, at Washington, D. C., where the society will dedicate the statue of General Sherman, now in course of erection.

President, Gen. Grenville M. Dodge, New York City; Vice-Presidents, Gen. L. F. Hubbard, Red Wing, Minn.; Capt. Henry A. Castle, Washington, D. C.; Capt. Henry H. Rood, Mt. Vernon, Ia.; Major A. W. Edwards, Fargo, N. D.; Gen. Fred. W. Moore, Cincinnati, O.; Capt. F. H. Madgeburg, Milwaukee, Wis.; Capt. S. S. Tripp, Peoria, Ill.; Capt. N. T. Spoor, St. Louis, Mo.; Col. Fred Welker, Montreal, Canada; Captain H. C. Adams, Indianapolis, Ind.; Capt. G. A. Busse, Chicago, Ill.; Mrs. Charles H. Smith, Cleveland, O.; Corresponding Secretary, Gen. A. Hickenlooper, Cincinnati, O.; Recording Secretary, Col. Cornelius Cadle, Cincinnati, O.; Treasurer, Major A. M. Van Dyke, Cincinnati, O.

SOCIETY OF THE ARMY OF THE CUMBERLAND.

This society, composed of veterans of the Civil War, was organized in February, 1868. Its objects are mainly social, to preserve the fellowship and the history of the Army of the Cumberland. Any officer or soldier of honorable record in that army is eligible for membership. The members number about four hundred, and the society has lost more than that number by death. Meetings are held annually and an annual volume of proceedings and historical matter is published. Gen. David S. Stanley, who was re-elected president at the last annual meeting, has since died, and the office will remain vacant until the annual meeting of 1903.

President, ———— ————; Corresponding Secretary, Gen. H. V. Boynton; Treasurer, Major John A. Tweedale, U. S. A.; Recording Secretary, Col. J. W. Steele; Historian, Major Charles E. Belknap; Executive Committee, Gen. J. Barnett, Capt. J. W. Foley, Gen. W. A. Robinson, Gen. Paul A. Oliver, Major W. F. Goodspeed, Gen. J. G. Parkhurst and the officers of the society, ex-officio.

SPANISH WAR VETERANS.

The Spanish War Veterans was the first society organized by men who participated in the Spanish-American War in any branch of the armed forces of the United States. It was incorporated November 28, 1899, its object being to keep alive the memories of the war with Spain, to promote the best interest of those who took part in it, in the service of the United States, and of their dependents; and to encourage and spread universal liberty and equal rights and justice to all men, as well as to inculcate the principles of freedom, patriotism and humanity. Those eligible to membership are soldiers and sailors of the regular and volunteer army, navy and marine corps who served honorably during the war with Spain or the insurrection in the Philippines. The society has members in every part of the country, and among those who are enrolled are President Theodore Roosevelt, Lieut.-Gen. Nelson A. Miles, General Joe Wheeler, Major-Gen. Brooke, General Fitzhugh Lee and others prominently representative of all sections. The uniform of the society is of mixed blue and gray, typical of the complete refraternization of North and South under the flag of the Union. General J. Warren Keifer, of Ohio, was the first Commander-in-Chief and was succeeded by Lieut.-Gen. Miles. Gen. William H. Hubbell, of New York, was elected to the position in August, 1902, but has since died, leaving a vacancy.

Commander-in-Chief, ———— ————; Senior Vice-Commander-in-Chief, M. Emmet Urell, Washington, D. C.; Junior Vice-Commander-in-Chief, Harold C. Megrew, Indianapolis, Ind.; Inspector-General, Bernard A. Reinold, New York City; Judge Advocate-General, Charles R. Miller, Cleveland, O.; Surgeon-General, Dr. S. Clifford Cox, Washington, D. C.; Chaplain, Rev. W. H. I. Reaney, U. S. N.; Adjutant-General, L. C. Dyer, Washington, D. C.; Quartermaster-General, Robert A. Brunner, Rutherford, N. J.; Sponsor, Miss Clara Barton, Glen Echo, Md.

SOCIETY OF VETERANS OF INDIAN WARS OF THE UNITED STATES.

The Society of Veterans of Indian Wars of the United States was organized in Philadelphia on April 23, 1896, by officers of the United States Army, to perpetuate the services, heroism and privations of officers and soldiers of the army, as well as of the auxiliary forces of the several States of the Union in wars with the Indians since the close of the War of the Revolution. One of its objects is to collect and preserve for publication a record of those services and historical data relating thereto. Membership is divided into three classes. The first class includes commissioned officers of the United States Army, active, retired, or honorably discharged, and officers of any State National Guard or militia, who have actually served or may hereafter serve in a strictly military capacity in the country occupied by hostile Indians. Those eligible for second class membership are lineal male descendants of members of the first class, or of those officers who would have been eligible, but who died without having become members. The third class is open to non-commissioned officers and soldiers who have received the medal of honor or certificate of merit from the United States Government, or who have been proffered, or recommended for, a commission, or who have been specially mentioned in orders by the War Department or their immediate commanding officer for services rendered against hostile Indians. No honorary membership is permitted.

Commander, Brevet Brig.-Gen. Judson D. Bingham, U. S. A., retired; Vice-Commander, Col. John V. Furye, Assistant Q.-M. General, U. S. A.; Recorder and Treasurer, Capt. Henry Hobart Bellas, U. S. A., retired; Assistant Recorder, Lieut. George R. Burnett, U. S. A., retired; Historian, Brig.-Gen. Charles King, U. S. A., retired; Council, Lieut.-Col. John A. Wilcox, U. S. A., retired; Major John Brooke, Surgeon, U. S. A., retired; Major Gonsalez S. Bingham, Quartermaster, U. S. A.; Capt. John M. Walton, U. S. A., retired; Major Henry E. Smith, late U. S. A.

UNITED STATES VETERAN NAVY.

The United States Veteran Navy was organized September 21, 1899, for the purpose of bettering the condition of all classes of naval veterans by providing for them a fraternal brotherhood which should extend a helping hand to all deserving and needy shipmates and their widows and orphans. Those who are eligible to membership are any commissioned officer or enlisted man who has served in the United States Navy, United States Marine Corps, United States Revenue Cutter Service, Naval Militia, or who has been sworn into the naval service, and whose name appears on the United States Navy pay rolls during any portion of the time between April 12, 1861, and August 25, 1865, or during the Spanish-American War, from the blowing up of the United States Battleship Maine to April 11, 1899, who has not being convicted of any crime against the Government of the United States of America, and who is now in the naval service, or who has been honorably discharged, or resigned by an honorable acceptance of resignation, or any commissioned officer or enlisted man of the United States Navy who, in years to come, may be in the United States Navy in time of war against an enemy of this Government.

The members of the society, now more than 2,900 in number, are divided among the eleven squadrons, which are located in New York City, Brooklyn, Providence, R. I.; Buffalo, N. Y.; Rochester, N. Y.; St. Paul, Minn.; Cincinnati, Ohio; Soldiers' Home, California; Jersey City, N. J.; San Francisco, Cal., and Norfolk, Va. The officers are:

Commodore, F. H. Gove, No. 39 Burling Slip, New York City; Fleet Captain, W. E. Atkins, Cincinnati, Ohio; Fleet Commander, Charles Leimbeck, Brooklyn; Fleet First Lieutenant, Joseph A. McGuinness, St. Paul, Minn.; Fleet Second Lieutenant, Ole T. Rund, Brooklyn; Fleet Secretary, James S. Drew, No. 745 Columbus avenue, New York City; Fleet Paymaster, Erdix F. Dustin, Providence, R. I.; Fleet Chaplain, Robert Edwards, Brooklyn; Fleet Surgeon, Dr. Lorenzo Traver, Providence, R. I.; Fleet Engineer, J. C. Cilley, Cincinnati, Ohio.

THE WOMAN'S RELIEF CORPS.—Auxiliary to the Grand Army of the Republic.

The Woman's Relief Corps was organized by the wives, daughters, mothers and sisters of the Union soldiers of the Civil War to assist the members of the Grand Army of the Republic in the perpetuation of the memory of their heroic dead; to extend needful aid to their widows and orphans by finding them homes and employment and insuring them of sympathy and friends; to cherish and emulate the deeds of the army nurses and all loyal women who rendered loving service to the country in her hour of peril, and to maintain true allegiance to the United States by inculcating lessons of patriotism and love of country in all communities and by encouraging the spread of universal liberty and equal rights to all.

The organization is divided into departments and corps, with detached corps in those States where no departments exist. In 1902 the society consisted of 35 departments, 13 detached corps and 3,080 corps, in which there was a membership of 145,000. Its headquarters is at Bradford, Vt., and the national officers are:

National President, Calista R. Jones, Bradford, Vt.; National Senior Vice-President, Belle C. Harris, Emporia, Kan.; National Junior Vice-President, Minnie M. Kyle, Chicago, Ill.; National Secretary, Mary Ellen Conant, Bradford, Vt.; National Treasurer, Sarah E. Phillips, Syracuse, N. Y.

NATIONAL SOCIETY OF THE ARMY OF THE PHILIPPINES.

The National Society of the Army of the Philippines is composed of soldiers and sailors who have served during the war in the Philippine Islands, and are either honorably discharged or are still in active service. The objects of the order are to promote sociability among its members and to assist those who need help. Annual reunions and meetings are held, that for 1903 to be at St. Paul the first Tuesday, Wednesday and Thursday in September.

The officers elected at the annual meeting in 1902 are: President, General Irving Hale, Denver; first vice-president, Lieutenant Donald McRae, Council Bluffs; second vice-president, Brevet Brigadier-General Alfred Frost, Evanston, Ill.; third vice-president, General Charles King, Milwaukee; fourth vice-president, Colonel J. W. Pope, Colorado; fifth vice-president, Brevet Brigadier-General Wilder S. Metcalf, Lawrence, Kan.; sixth vice-president, H. A. Crow, Connellsville, Pa.; secretary, F. M. Schutte, St. Paul; treasurer, C. B. Lewis, Colorado; chaplain, Rev. Charles Mailley, Nebraska.

NAVAL AND MILITARY ORDER OF THE SPANISH-AMERICAN WAR.

The Naval and Military Order of the Spanish-American War was organized in New York City, February 2, 1899, with an original membership of ninety-eight men, who served as commissioned officers of the United States in the war with Spain. Its objects are to cherish the memories and associations of that war; to unite and promote the ties of fellowship and sympathy formed by those who participated in it; to acquire and preserve records of individual service; to advance the best interests of the sailors and soldiers of the United States; to enforce unqualified allegiance to the general government, and to protect the rights and liberites of American citizenship, and maintain the national honor and union. Officers, regular or volunteer, who were on the active list or served actively in the United States army, navy, marine corps or revenue marine, during the war with Spain or the subsequent insurrection in the Philippines, are eligible to membership, if still in service or honorably discharged. Men who served in the war or during the insurrection as naval or military cadets, prior to April 1, 1901, are also eligible. Upon the death of any member of the order the eldest lineal male descendant, or nearest male heir in collateral branches of the family becomes eligible in successive order. At the present time there are a National Commandery and State Commanderies in New York, Massachusetts, Illinois and Pennsylvania, with a total membership of about 1,000. The New York Commandery has headquarters at No. 170 Fifth avenue, New York City.

Commander, Colonel Theodore Roosevelt, U. S. V.; senior vice-commander, Rear Admiral Joseph N. Miller, U. S. N.; junior vice-commander, Brigadier-General J. W. Clous, U. S. A.; recorder, Ensign A. J. Henriques, late U. S. N.; treasurer, Ensign Frank W. Toppan, U. S. N.; registrar, Ensign Eugene N. Robinson, late U. S. N.; chaplain, J. C. Welwood, U. S. V. The Board of Officers consists of these officers, excepting the recorder, and includes a council composed of Lieutenant W. J. Sears, U. S. N.; Brigadier-General W. F. Randolph, U. S. A.; Captain G. N. Whistler, U. S. A.; Major-Surgeon L. L. Seaman, U. S. V.; P. A. Engineer A. B. Fry, late U. S. N.; Ensign A. J. Henriques, late U. S. N.; Captain Champe S. Andrews, U. S. V.; Lieutenant Paul R. Towne, U. S. V., and Lieutenant G. B. Townsend, late U. S. N.

SPANISH-AMERICAN WAR VETERANS.

The National Association of Spanish-American war veterans was organized and incorporated at Trenton, N. J., December 14, 1899. Its objects are to strengthen the spirit of fraternity engendered among those who served honorably in the military and naval service of the United States during the war with Spain or in the insurrection in the Philippines; to promote loyalty and patriotism and to inculcate the principles of equal rights and free government. All soldiers and sailors, regular or volunteer, who served honorably with army, navy or marine corps in these events are eligible to membership. Camps are organized in all parts of the United States, including Porto Rico and Hawaii, and there are camps in Cuba. There are thirty-eight departments in as many States and Territories, and a national headquarters at Lancaster, Pa. The total membership is about 30,000. Among the members are President Roosevelt, Lieutenant-General Miles, Major-Generals Shafter, Fitzhugh Lee, Joseph Wheeler, MacArthur and Leonard Wood, Adjutant-General Corbin and Brigadier-General Frederick Funston. Colonel William Cary Sanger, Assistant Secretary of War, is department commander for the State of New York. The officers of the national association are as follows:

Commander-in-chief, Colonel Richard Henry Savage, New York; senior vice-commander-in-chief, General Owen Summers, Oregon; junior vice-commander-in-chief, Captain John B. McFarland, Mississippi; adjutant-general, Colonel William C. Liller, Lancaster, Pa.; quartermaster-general, Captain Walter F. Walker, New Hampshire; inspector-general, Major Alexander M. Harvey, Kansas; surgeon-general, Major E. M. Brown, Washington; judge advocate-general, Colonel R. M. Townsend, New York.

ARMY AND NAVY UNION OF THE UNITED STATES OF AMERICA.

This Union, organized at Cincinnati, was incorporated under the laws of Ohio in March, 1888, to bring together in benevolent and social fellowship those who have served honorably in the army, navy or marine corps of the United States, and to foster any proper movement to promote legislation for the benefit of those in service, and to secure employment for those honorably returning to civil life. It is composed of more than sixty garrisons, which are subordinate to the National Corps, organized in August, 1890. There are nearly 3,000 members. Any honorably discharged soldier, sailor or marine is eligible to membership, without regard to time or length of his service. During the past year the Union has established an endowment and funeral benefit fund which has already proved a blessing to the families of deceased comrades.

National commander, Russel C. Paris, Sandy Hill, N. Y.; senior vice national commander, William Budy, St. Paul, Minn.; junior vice national commander, Hugh H. Henry, Phoebus, Va.; adjutant-general, John Schumacher, Brooklyn, N. Y.; inspector-general, Michael J. Hackett, Washington, D. C.

NATIONAL ASSOCIATION, LADIES OF NAVAL VETERANS.

The National Association of Ladies of Naval Veterans is an organization formed to assist all families of naval men who may need assistance, and also in general ways to inculcate patriotism, especially in the rising generation. It was instituted May 24, 1894, in Providence, R. I., and its machinery includes, in addition to the National Association, a local organization or "Port," eight in number at present, and located respectively at Providence, R. I. (No. 1); New Bedford, Mass. (No. 2); Salem, Mass. (No. 3); Baltimore, Md. (No. 4); Philadelphia, Pa. (Nos. 5 and 7); Minneapolis and St. Paul, Minn. (No. 6), and Detroit, Mich. (No. 8). There are about thirty members attached to each "Port," and the National Association includes a number of members unattached. A beautiful observance recently introduced among the features of the National Memorial Day, originated in the thought of Mrs. Armitage S. C. Forbes, of Los Angeles, Cal., and which this association aims to make permanent, is the strewing of flowers upon the ocean, or other bodies of water, in the memory of sailors and marines who lost their lives in the country's service and are buried in watery graves. In recognition of the worthiness of her thought Mrs. Forbes was made an honorary member of the association by vote passed at the eighth annual convention in Cleveland, Ohio, September 12, 1901. The ninth annual convention was held in Washington, D. C., on October 6, 1902, and the following officers were elected for 1902-1903:

Captain Commander, Mrs. Margaret B. Dixon, Detroit, Mich.; commander, Mrs. M. J. Craig, Philadelphia, Pa.; lieutenant commander, Mrs. Ada L. Shannon, Philadelphia, Pa.; senior lieutenant, Mrs. Cora B. Stone, Baltimore; lieutenant, Mrs. Ellen M. Buxton, Peabody, Mass; fleet paymaster, Mrs. Mary E. Baker, Boston, Mass.; fleet surgeon, Mrs. Margaret Gammons, Minneapolis, Minn.; fleet chaplain, Mrs. Lena Raddatz, Philadelphia, Pa.; national secretary, Mrs. S. E. Reynolds, Eaton, Ohio; chief of staff, Mrs. Annie R. Sears, Baltimore, Md.; national boatswain, Mrs. Agnes Mealon, Philadelphia, Pa.; national historian, Mrs. Jennie Laird, Providence, R. I.

ROUGH RIDERS' ASSOCIATION.

Members of the First Regiment United States Volunteer Cavalry, enlisted for service in Cuba during the Spanish-American War, and known as the "Rough Riders," organized an association, prior to the disbandment of the regiment, with the object of perpetuating the memories of the war and promoting a lasting friendship among the members of the command. The Rough Riders' Association was the name chosen. All members of the regiment are eligible to membership in the association, and provision is made for hereditary membership, descending to the eldest sons of original membership, as in the Society of the Cincinnati and other patriotic organizations. There are at present 100 members, and honorary membership has been conferred on Captain John H. Parker, Twenty-eighth U. S. Infantry; Richard Harding Davis, Edward Marshall and Miguel A. Otero. The next meeting of the association is to be held at San Antonio, Texas, on a date to be fixed by the Executive Committee. Following is the list of officers:

President, Captain Frederick Muller, Santa Fe, N. M.; Vice-President, D. J. Leahy, Raton, N. M.; Secretary, Captain W. E. Dame, Albuquerque, N. M.

FRATERNAL ORGANIZATIONS.

FREEMASONRY.

Freemasonry is an institution, the origin of which is so veiled in obscurity that even its name is an enigma to philologists. It is stated that the word freemason is derived from the Norman French, Frere Macon (brother mason), but the constituent word, mason, is itself an etymological mystery of which a variety of solutions has been offered, none tracing it to its source with any degree of certainty. The institution of Freemasonry possesses no veritable history extending farther back than to the beginning of the eighteenth century, although it is easy to point out vague analogies between it and the great secret organizations having social aims which existed in antiquity. Esoteric study of it has nothing more convincing upon which to rely than tradition or legend. The ritual of the order teaches that King Solomon was the first Grand Master, and the entire symbolism of the first three degrees of Entered Apprentice, Fellow Craft, and Master Mason, which constitute the work of the lodge, clusters around the story of the building of the Temple at Jerusalem. Students of Freemasonry, pursuing their research or speculation as initiate in its mysteries, profess to have traced its origin to sources much more remote and the Rev. George Oliver, a poular and voluminous Masonic writer in the early part of the nineteenth century, set forth that Moses was a Grand Master, having Joshua as his deputy, with Aholiab and Bezaleel as Grand Wardens.

Coming down to records which can be established, it is found that on June 24, 1717, four Masonic lodges then existing in London, England, erected themselves into a Grand Lodge and elected their first Grand Master. Thereafter new lodges could be formed in England only by warrant from the Grand Lodge. The order extended into the provinces and eventually provincial Grand Masters were appointed. The Grand Lodge extended its jurisdiction beyond England, granting charters to many foreign lodges. Its supremacy was contested in the latter part of the eighteenth century, when the ancient York Lodge, with which were allied Masons who had been irregularly initiating others, claimed to be the Supreme Grand Lodge on the ground, generally regarded as fabulous, that there had been an assembly of Masons at York in the year 926, from which had descended the authority claimed. With this controversy there originated what are now recognized as the capitular degrees, or Royal Arch Masonry, the emblematical color of which is red, that of the lodges, dedicated to the Saints John, being blue, whence the derivation of the descriptive title, "blue lodge," borne by them at the present time. Royal Arch Masonry was introduced by the York Lodge, the ritual being based upon legends dealing with the second building of the Temple. It was a step toward templarism, and out of it grew the Grand Chapter of Harodim, founded in London in 1787. This was a revival in speculative form of the order of Knights Templar, suppressed by decree of the Council of Vienna in 1312, because of the supposed heresies it entertained. The rival grand lodges of London and York united in 1813, the body resulting from this union being known as the United Grand Lodge of England. Freemasonry was transplanted into France in 1725, into Ireland in 1729, and, during the next ten ears, into Holland, Russia, Spain, Italy, Scotland and Germany.

The first attempt to introduce Freemasonry in America was the appointment by the London Grand Lodge of a Provincial Grand Master for New Jersey in 1730, but there is no account of that official having established any lodges. A lodge was opened in Boston, Mass., in 1733, and from that time the order began to make its way in the several colonies, lodges being opened under charters issued, some by the English Grand Lodge and some by the subsequently instituted Grand Lodge of Scotland. After the successful issue of the War of the Revolution, the lodges thus established became independent of their parent Grand Lodges on the other side of the Atlantic, and established Grand Lodges of their own in their respective States. The institution has had greater prosperity in this than in any other country. There are two recognized rites in the United States, one being known as the "York Rite," and the other as the "Scottish Rite." The "blue lodge" degrees of Entered Apprentice, Fellow Craft and Master Mason are common to both. Many members of the fraternity take all the degrees of both rites, as there is no conflict between them.

Degrees of the York Rite.—In the York Rite there are ten degrees beyond those of the "blue badge," and these are worked in three different bodies, respectively, known as the Chapter (Royal Arch Masons), the Council (Royal and Select Masters), and the Commandery (Knights Templar). The capitular degrees, four in number, are those of Mark Master, Past Master, Most Excellent Master, Royal Arch Mason. Those of the Council, numbering three, consist of Royal Master, Select Master, Super Excellent Master. In passing to the higher degrees of the Commandery many Masons ignore the Council degrees, which they can do in every jurisdiction in the United States excepting that of Virginia, where only Super Excellent Masters are eligible for the chivalric degrees. These consist of Red Cross Knight, Knight Templar, Knight of Malta.

Degrees of the Scottish Rite.—There are thirty degrees in the Scottish Rite, not including those of the "blue lodge," and they are conferred in four different bodies, namely the Lodge of Perfection, the Council of Princes of Jerusalem, the Chapter of Rose Croix, and the Consistory of Sublime Princes of the Royal Secret. The degrees of the Lodge of Perfection number eleven, and are as follows: Secret Master, Perfect Master, Intimate Secretary, Provost and Judge, Intendant of the Building; Elect of Nine, Elect of Fifteen, Sublime Knight Elect, Grand Master Architect, Knight of the Ninth Arch, Grand Elect, Perfect and Sublime Mason. The Council degrees, of which there are two, are Knight of the East or Sword, Prince of Jerusalem. The Rose Croix degrees also are but two, namely, Knight of the East and West, Knight of the Rose Croix de H. R. D. M. Fifteen degrees are comprised in the work of the Consistory, as follows: Grand Pontiff, Master ad Vitam, Patriarch Noachite, Prince of Libanus, Chief of the Tabernacle, Prince of the Tabernacle, Knight of the Brazen Serpent, Prince of Mercy, Commander of the Temple, Knight of the Sun, Knight of St. Andrew, Grand Elect Knight, K. H., or Knight of the Black and White Eagle, Grand Inspector Inquisitor Commander, Sublime Prince of the Royal Secret, Sovereign Grand Inspector-General of the Thirty-third and Last Degree.

Ultra-Masonic Bodies.—There are other rites than the York and Scottish, which, however, are not recognized by the great bodies of Masons in the United States and Great Britain. For instance, the Grand Orient of France is unrecognized because of the fact that it does not demand that postulants for the degrees shall believe in a Supreme Being. The Grand Orient of Spain is also unrecognized. There is a numerous body of colored Free Masons in the United States which traces its origin back to a lodge duly chartered by the English Grand Lodge, but colored Masons are regarded as irregular by all the regular Masonic bodies in this country. Such organizations as the Nobles of the Mystic Shrine and the Sheikhs of the Kaaba are not strictly Masonic, although membership in them is limited to Masons who have received certain specified degrees in either the York or the Scottish Rite.

OTHER GRAND LODGES.

The following is a list of Grand Lodges comprising all with which the Grand Lodges of the United States and British America maintain fraternal relations:

Grand Lodges.	Grand Secretaries.	Grand Lodges.	Grand Secretaries
Belgium	Charles Marchal, Brussels.	Porto Rico	Federico Yumet, San Juan.
Costa Rica	Edmund A Osborne, San Jose.	Royal York	G. Mitzlaff, Berlin.
Cuba	Aurelio Miranda, Havana.	Saxony	Ernst Hattenius, Dresden.
Denmark	Rasmus O. Nielsen, Copenhagen.	Scotland	David Reid, Edinburgh.
Eclectic Union	Wilhelm Lotz, Frankfort-on-Main.	South Australia	James H. Cunningham, Adelaide.
England	Edward Letchworth, London.	Sweden	S. H. B. Svensson, Stockholm.
Germany	William Wald, Berlin.	Switzerland	Paul Ele Bonjour, Neuchatel.
Hungary	Ignacz Fekete, Budapest.	Tasmania	John Hamilton, Hobart
Ireland	Henry E. Flavelle, D.G.S., Dublin.	Three Globes	Johannes Schumann, Berlin.
New South Wales	Arthur H. Bray, Sydney.	Victoria	John Braim, Melbourne.
New Zealand	Malcolm Nicoll, Auckland	Zur Eintracht	Carl Nies, Worms.
Norway	Theodor Hansen, Christiana.	Zur Sonne	George H. Fischer, Bayreuth.
Peru	J. Benjamin Choza, Lima.		

While the spirit of Freemasonry is that of fraternal obligation among the members of the order, the beneficiary features which are embodied in the general character of other secret orders are not included in its policy. The benefits derived from membership are such as come from recognition of a true Mason by the craft in all parts of the world, and from that aid and assistance, which is the due of "a worthy and distressed brother" wherever he may find himself. Some lodges have beneficiary or charitable funds, but each lodge regulates its own work in connection therewith. As a rule the charities of the lodges are determined by circumstances. They are not confined to members of the particular lodge, but are extended very frequently, when the case is found to be a worthy one, to the sojourning Mason who, through illness or uninvited misfortune, is thrown helpless upon a community wherein the Masonic spirit exists. Such benefits as these, however, and of those which are to be derived in business affairs from connection with the order are not supposed to be included in the aims of those who seek the light of Freemasonry, the theory of the order being that the candidate for the degrees becomes such uninfluenced by the solicitation of friends or by any sordid consideration, but purely as a seeker after that higher knowledge which comes to a man through the mysteries of the lodge room. He becomes a Master Mason, as he avers, in order that he may travel, work and receive a master workman's wages, the better to support himself and family and to assist a worthy brother in distress. There are many very wealthy lodges in various parts of the country, and in some of them liberal appropriations are often made for charitable purposes, but usually in view of some special occasion.

ROYAL ARCH MASONS.

Royal Arch Masonry, embracing the four degrees of Mark Master, Past Master, Most Excellent Master and Royal Arch Mason, is under the supervision of a General Grand Chapter, subordinate to which are 44 grand chapters, each representing a State or Territory, except that Pennsylvania and Virginia are united. There are nearly 2,500 subordinate or local chapters, including about 25 in the Sandwich Islands, Chili and the Chinese Empire, these last being under the immediate jurisdiction of the General Grand Chapter. The total membership is upward of 200,000. The General Grand Chapter meets tri-ennially, and the next convocation will be held in 1903. Following are the officers of this supreme body:

General grand high priest, James W. Taylor, Luthersville, Ga.; deputy general grand high priest, Arthur G. Pollard, Lowell, Mass.; general grand king, Joseph E. Dyas, Paris, Ill.; general grand scribe, William C. Swain, Milwaukee, Wis.; general grand treasurer, John M. Carter, Baltimore, Md.; general grand secretary, Christopher G. Fox, Buffalo, N. Y.; general grand captain of the host, Nathan Kingsley, Austin, Minn.; general grand principal sojourner, Bernard G. Witt, Henderson, Ky.; general grand royal arch captain, George E. Corson, Washington, D. C.; general grand master of the third vail, Frederick W. Craig, Des Moines, Ia.; general grand master of the second vail, William F. Kuhn, Kansas City, Mo.; general grand master of the first vail, Bestor G. Brown, Topeka, Kas.

KNIGHTS TEMPLAR.

The order of Knights Templar is a revival, in connection with Freemasonry, of some of the chivalric orders of the middle ages. Its ritual is pervaded by the same religious spirit which marks the earlier degrees of Freemasonry, and is such that only a believer in the Christian faith can conscientiously accept its degrees. These consist of Red Cross, Knight Templar and Knight of Malta. To be eligible to knighthood the postulant must be a Royal Arch Mason, and a member in good standing of a "blue lodge" and a Chapter. In Virginia it is required that he shall also have taken the Council degrees. The supreme body of the order in this country is the Grand Encampment of Knights Templar of the United States of America. There are forty-four Grand Commanderies, each representing individual States and Territories excepting one known as the Grand Commandery of Massachusetts and Rhode Island. The subordinate commanderies number 1,051, and the total membership is 128,073. The next conclave of the Grand Encampment will be held at San Francisco, Cal., September 6, 1904. The present officers are as follows: M. E. Grand Master, Henry Bates Stoddard, Bryan, Texas; R. E. Deputy Grand Master, George M. Moulton, Chicago, Ill.; V. E. Grand Generalissimo, Henry W. Rugg, Providence, R. I.; V. E. Grand Captain-General, William B. Melish, Cincinnati, Ohio; V. E. Grand Senior Warden, Joseph A. Locke, Portland, Me.; V. E. Grand Junior Warden, Frank H. Thomas, Washington, D. C.; V. E. Grand Prelate, Daniel Crane Roberts, D. D., Concord, N. H.; V. E. Grand Standard Bearer, Arthur McArthur, Troy, N. Y.; V. E. Grand Sword Bearer, Charles C. Vogt, Louisville, Ky.; V. E. Grand Warden, Robert Strong, New Orleans, La.; V. E. Grand Captain of the Guard, Charles E. Rosenbaum, Little Rock, Ark.

ANCIENT AND ACCEPTED SCOTTISH RITE OF FREEMASONRY.

Scottish Rite Masonry, which comprises twenty-nine degrees, from the fourth degree to the thirty-third degree, inclusive, is under two jurisdictions in the United States, known respectively as the Northern and the Southern Masonic Jurisdiction. For each there is a "Supreme Council of Sovereign Grand Inspectors-General of the Thirty-third and Last Degree." The two bodies are in amity with each other and also with the Supreme Councils for France, England, Scotland, Ireland, Belgium, Brazil, the Argentine Republic, Uruguay, Paraguay, Peru, Portugal, Italy, Mexico, Colombia, Chili, Central America, Greece, Canada, Cuba, Switzerland, Egypt, Tunis and Spain.

Northern Masonic Jurisdiction.—In this jurisdiction there are 239 subordinate bodies, with a total membership of 34,035. The officers of the Supreme Council are as follows: M. P. Sovereign Grand Commander, Henry L. Palmer, Wisconsin; P. Grand Lieutenant-Commander, Samuel Crocker Lawrence, Massachusetts; Grand Minister of State, John C. Smith, Illinois; Deputy for New York State, William Homan (there are also Deputies for each of thirteen other States included in the jurisdiction); Grand Treasurer-General, Newton Darling Arnold, Rhode Island; Grand Secretary-General, James H. Codding, No. 133 Stewart Building, New York City.

Southern Masonic Jurisdiction.—The number of subordinate bodies in this jurisdiction is 267, divided as follows: Lodges of Perfection, 102; Chapters of Rose Croix, 65; Councils of Kadosh, 52; Particular Consistories, 45; Grand Consistories, 3. The total membership is 14,867. The officers of the Supreme Council, who are elected for life, are as follows: M. P. Sovereign Grand Commander, James D. Richardson, Tennessee; P. Grand Lieutenant-Commander, Samuel E. Adams; Grand Minister of State, Rufus E. Fleming; Grand Treasurer-General, W. Frank Pierce; Grand Secretary-General, Frederick Webber, Washington, D. C.

NOBLES OF THE MYSTIC SHRINE.

The Ancient Arabic Order of the Nobles of the Mystic Shrine is a body which admits to membership none but Free Masons, this fact leading to an erroneous impression among outsiders that it is a Masonic institution. Those eligible are Masons of the thirty-second degree, A. A. S. Rite (eighteen degrees in England), or Knights Templar in good standing. The order is said to have been originally instituted in the year of the Hegira 25, the year 656 of the Christian era, its founder being the Mohammedan Kalif Alee, cousin german and son-in-law of the Prophet Mohammed. It was established at Mekkah, in Arabia as an organization designed to dispense justice, including the execution of merited punishment, in the case of criminals escaping their just deserts through tardiness of the courts. Another of its aims was to promote religious toleration among cultured men of all nations. The modern order is of recent origin, and has had a rapid growth. The governing body in America is the Imperial Council, and there are eighty-five subordinate bodies, designated Temples. The total membership is 67,354. The next meeting of the Imperial Council will be held at Saratoga, N. Y., July 8 and 9, 1903. The present officers of the Imperial Council are as follows: Imperial Potentate, Henry C. Aikin, Omaha, Neb.; Imperial Deputy Potentate, George H. Green, Dallas, Texas; Imperial Chief Rabban, George L. Brown, Buffalo, N. Y.; Imperial Assistant Rabban, Henry A. Collins, Toronto, Canada; Imperial High Priest and Prophet, Alvah P. Clayton, St. Joseph, Mo.; Imperial Oriental Guide, Frank C. Roundy, Chicago, Ill.; Imperial Treasurer, William S. Brown, No. 520 Wood street, Pittsburg, Pa.; Imperial Recorder, Benjamin W. Rowell, No. 206 Masonic Temple, Boston, Mass.; Imperial First Ceremonial Master, Edwin L. Alderman, Marion, Iowa; Imperial Second Ceremonial Master, George L. Street, Richmond, Va.; Imperial Marshal, Frederick A. Hines, Los Angeles, Cal.; Imperial Captain of Guards, Charles A. Tonsor, Brooklyn, N. Y.; Imperial Outer Guard, J. Frank Treat, Fargo, N. D.

SOVEREIGN COLLEGE OF ALLIED MASONIC AND CHRISTIAN DEGREES OF AMERICA.

This body of Masons confers academic as well as ritualistic degrees, the former being given for honorable cause, and including that of "Doctor of Universal Masonry." Those upon whom this degree, the highest in the gift of the college, has been conferred are Prince Demetrius Rhodocanakis of Greece, the Earl of Euston and William James Hughan, of England; D. Murray Lyon, of Scotland, and Josiah H. Drummond, of Maine. The rites governed by the college comprise the degrees of Ark Mariner, Secret Monitor, Tylers of Solomon, St. Lawrence the Martyr, Knight of Constantinople, Holy and Blessed Order of Wisdom and Trinitarian Knight of St. John of Patmos. This body is in communion with the Grand Council of Allied Masonic Degrees of England and with the Grand Ark Mariners' Council of England. The officers are elected triennially, with the exception of the Sovereign Grand Master, who holds "ad vitam," and the Deputy Grand Master, who also holds for life, with right of succession to the higher office. The following are the principal officers: Sovereign Grand Master, Alfred S. Kimball; Deputy Grand Master, Charles A. Nesbitt; Grand Abbot, Right Rev. A. M. Randolph; Grand Senior Warden, Frederick Webber; Grand Junior Warden, Alfred R. Courtney; Grand Almoner, Josiah H. Drummond; Grand Recorder-General, Howard D. Smith, Norway, Me.; Grand Bursar, Frank N. Barker.

ROYAL ORDER OF SCOTLAND.

A provincial grand lodge of the Royal Order of Scotland was instituted in 1878, with the late Albert Pike as Provincial Grand Master. Its charter was issued by the Grand Lodge of the order at Edinburgh, Scotland. There are no subordinate lodges. The total membership is 271. W. Oscar Roome, Washington, D. C., is secretary.

THE CERNEAU RITE.

A body of Free Masons, holding under the Grand Orient of France, but unrecognized by the general body of Masons in this country, is located in New York City, having two consistories and a "Supreme Council of Sovereign Grand Inspectors-General of the Thirty-third and Last Degree of the Ancient and Accepted Scottish Rite, as organized by Joseph Cerneau, Thirty-third Degree, in the Year 1807." Judah Moses is Grand Secretary-General.

ANCIENT AND PRIMITIVE RITE OF MEMPHIS, IN AND FOR THE CONTINENT OF AMERICA.

The Ancient and Primitive Rite of Masonry, Disciples of Memphis, was founded as a Grand Lodge at Montauban, France, in the year 1814, by the Illustrious Brothers Jacques Etienne Marconis, Samuel Honis of Cairo, Baron Dumas, Hypolite Labrunie, Marquis de Laroque, J. Pettit and others. Jacques Etienne Marconis, in person, established the first organization of the Ancient and Primitive Rite in New York City November 9, 1856, under the name and title of "A Supreme Council, Sublime Masters of the Great Work, Ninetieth Degree." On March 1, 1857, Illustrious and Eminent Brother Marconis organized a "Sovereign Grand Council General, Ninety-fourth Degree, with Illustrious Brother David McLellan, Ninety-fifth Degree, Sovereign Grand Master," granting also a charter which gave full authority for the administration and government of the order. April 27, 1861, the then Sovereign Grand Master resigned and appointed his successor in office, who on June 21, 1862, acting in conjunction with the Illustrious Grand Master Marconis, the Marshall Magnan and the Grand Master of the Grand Orient of France, constituted a Sovereign Sanctuary, ninety-fifth degree, in and for the Continent of America.

Officers of the Sovereign Sanctuary, Ninety-fifth Degree, of Ancient and Primitive Freemasonry, according to the Rite of Memphis, in and for the Continent of America, elected, appointed and installed July 3, 1901, for three years: H. G. Goodale, 96., M. Ill. Sov. Grand Master-General; William F. Ford, 95., Grand Administrator General; J. S. Phillips, 95., Grand Chancellor General; L. K. Goldsmith, 95., Grand Expert General; E. T. Stewart, 95., Grand Secretary General; R. H. Fargue, 95., Grand Treasurer General.

Grand Hierophant, Supreme Sovereign Grand Master and Honorary Grand Patron, Professor F. F. degli Oddi, Ninety-seventh Degree.

The Sovereign Sanctuary for Egypt, Illustrious Brother Professor degli Oddi, 97., Grand Master General; Illustrious Brother Joseph Sakakini, 96., Grand Secretary General, Alexandria, Egypt.

The Sovereign Sanctuary of Great Britain and Ireland, Illustrious Brother John Yarker, 96., Sovereign Grand Master General, Manchester, England.

The Sovereign Sanctuary of Roumania, Illustrious Brother, Captain O. Moroiu, 96., Sovereign Grand Master General.

The Sovereign Sanctuary of Naples, Illustrious Brother Gianbatti Pasini, 96., Sovereign Grand Master General.

The Sovereign Sanctuary of Palermo, Illustrious Brother Professor Salvatore Satille, 96., Sovereign Grand Master General.

The Sovereign Sanctuary of India, Illustrious Brother P. C. Dutt, 96., Sovereign Grand Master General.

The Mystic Temple, Grand Council General, Ninety-fourth Degree, in and for the State of New York, held its biennial assembly for the election of officers for the ensuing two years on the 5th of June, 1901, and the following officers were elected: William F. Ford, 95., V. Ill. Grand Master of Light; William H. Small, 95., Grand Orator; G. W. Winterburn, 94., Grand Examiner; E. J. Powers, 94., Grand Keeper of the Rite; E. T. Stewart, 95., Grand Annalist; H. G. Goodale, 96., Grand Treasurer.

Grand Defenders of the Rite, Ninety-first Degree.—John S. Phillips, 95., Grand Judge of the Statutes; G. W. Winterburn, 94., Grand Defender; R. H. Fargue, 95., Grand Arbitrator; H. A. N. Peterson, 95., Grand Orator; E. T. Stewart, 95., Grand Register; H. G. Goodale, 96., Grand Censor.

Alpha Sublime Council, No. 1, Ninetieth Degree, Valley of New York.—Officers for 1902-3: Ill. Bro. William H. Jutsam, Sublime Dai; Ill. Bro. Edward J. Powers, First Mystagogue; Ill. Bro. Pasquale Pepe, Second Mystagogue; Ill. Bro. George W. Winterburn, Orator; Ill. Bro. Charles W. Mussotter, Grand Expert; Ill. Bro. William F. Ford, Secretary; Ill. Bro. Harvey G. Goodale, Treasurer; Ill. Bo. William J. Thompson, Archivist.

Samothrace Senate No. 1, Forty-second Degree.—Officers for 1902-3: Ill. Kt. Joseph Russell, Sublime Grand Commander; Ill. Kt. A. C. Henderson, M. L. Senior Kt. Interpreter; Ill. Kt. J. C. Wilkie, M. L. Junior Kt. Interpreter; Ill. Kt. C. W. Mussotter, Knight Orator; Ill. Kt. William F. Ford, Knight Recorder; Ill. Kt. H. G. Goodale, Knight of Finance; Ill. Kt. W. J. Thompsin, Knight Archivist.

Gramercy Rose Croix Chapter, No. 1, Eighteenth Degree.—Officers for 1902-3: Sir Kt. George W. Winterburn, Most Wise; Sir Kt. H. A. N. Peterson, Senior Knight Warden; Sir Kt. William Langschultz, Junior Knight Warden; Sir Kt. C. W. Mussotter, Knight Orator; Sir. Kt. W. F. Ford, Knight Archivist; Sir Kt. H. G. Goodale, Knight Treasurer.

ORDER OF THE EASTERN STAR.

The Order of the Eastern Star is the only body of a Masonic character which admits women as members. It is not itself Masonic except in the restriction which it places upon candidates for admission. Masons in good and regular standing are eligible for membership, and their eligibility extends to their wives, mothers, sisters and daughters. Widows of Masons also are eligible, and the list is confined to these several classes of persons. The order originated in New York City in 1868, and has extended through the country with the result that there are now twenty-four grand lodges in as many States. The objects of the order are to extend to the female members of the families of Masons such social advantages of the ancient fraternity as may be shared with them, and to place them under the protecting care of the older order. New York State has the largest grand chapter and there are a number of subordinate chapters in New York City, the boroughs of Manhattan and Brooklyn having about thirty chapters, while there are about eighty in the State, all told. The officers of the New York Grand Chapter are as follows: M. W. Grand Matron, Mrs. Annie Vass, Brooklyn; M. W. Grand Patron, John P. Frolich; R. W. Grand Treasurer, Mrs. Lucie A. Buddington, No. 72 East One Hundred and Twenty-fifth street, Manhattan; R. W. Grand Secretary, Mrs. Rebecca Miner, No. 338 West Fifty-first street, Manhattan.

COLORED FREE MASONS.

Freemasonry has existed among the colored people of the United States during the entire period of the nation's history. While the colored Masons are denied recognition by the white members of the order, and by their lodges, grand and subordinate, the regularity of their organization and work is recognized by some of the foreign Grand Lodges. The parent lodge was known as African Lodge, and was opened in Boston, Mass., on March 6, 1775, when fifteen colored men were initiated as charter members. Prince Hall, whose name headed the list, was the first Worshipful Master. African Lodge received a warrant from the Grand Lodge of England in 1784, and upon this fact all the lodges of colored Masons base their claim to regularity. The archives of the order in Massachusetts contain evidence indicating that Prince Hall regarded African Lodge as a Provincial Grand Lodge, and himself as the Provincial Grand Master. The African Grand Lodge of Boston was organized as such in 1808. It is now known as the Prince Hall Grand Lodge of Massachusetts, so named in honor of the man who, in that and other States is regarded as the father of Freemasonry among colored men. There are at the present time twenty-eight Grand Lodges in the United States, and one in Ontario. Those in the United States are in Alabama, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Illinois, Iowa, Indiana, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania (organized in 1815), Rhode Island, South Carolina, Texas and West Virginia.

SONS OF JONADAB.

The order of the Sons of Jonadab is a total abstinence organization, instituted in 1867. Its purpose is to inspire men who have become victims of intemperance with a desire to become and continue to be sober men, by the use of moral and physical forces. Persons becoming members of the organization must subscribe to a life pledge to abstain from the use, manufacture and sale of all intoxicating liquors.

The offices of the national order are at Washington, D. C., and the Sovereign Secretary is William H. Young, No. 1324 Ninth street, N. W., Washington, D. C.

The officers of the Sovereign Council are: Sovereign Chief, J. E. Hibbs; Vice-Sovereign Chief, Joseph R. Murphy; Sovereign Secretary, William H. Young; Sovereign Treasurer, F. J. McQuade; Sovereign Patriarch, Charles Rossiter; Sovereign Guide, Charles A. Cabo; Sovereign Watchman, H. W. Marshall, Past Sovereign Chief, Edward Mullin.

INDEPENDENT ORDER OF ODD FELLOWS.

Odd Fellowship originated in the eighteenth century, and flourished in Great Britain especially, where a number of lodges early in the following century, about the year 1813, consolidated into the Manchester Unity, which is now the principal body representing the Order in that country. There is no affiliation between it and the Independent Order of Odd Fellows, which represents Odd Fellowship in the United States, the Dominion of Canada, Australasia, Germany, Denmark, Sweden, Switzerland and the Netherlands. The first permanent lodge was instituted in the United States in 1819, and the objects of the order in this country are "to visit the sick, relieve the distressed, bury the dead, and educate the orphan, to improve and elevate the character of man." In the lodge proper the degree work is based upon the legends of the patriarchal period in Hebrew history. The order has been marked by a series of evolutions, out of which have grown the Encampment branch, the Chevaliers of the Patriarchs Militant and the Rebekah lodges, the latter being made up of both sexes. According to the report of the Grand Secretary of the Sovereign Grand Lodge for the year ended December 31, 1901, the condition of the order on that date is represented by the statistics which follow: Besides the Sovereign Grand Lodge there were 6 quasi-independent grand lodges in foreign countries, 66 grand lodges in the United States and Canada, 55 grand encampments, 12,792 subordinate lodges, 2,780 subordinate encampments, 1,002,272 lodge members, 145,138 encampment members, 40 Rebekah assemblies, the grand bodies of this branch of the order; 5,756 Rebekah lodges and 373,653 Rebekah lodge members. Of the Rebekah lodge members 139,827 were brothers and 233,826 were sisters. The total amount expended by the various bodies during the year was $3,939,785, out of a total revenue of $10,782,562. The total expenses, not including payments on the relief account, were $4,815,508. Funds invested by subordinate lodges, encampments and Rebekah lodges aggregate $29,962,769. Statistics covering the period from 1830 until the close of the year 1901, and including those of the six quasi-independent grand lodges show that there have been 2,544,120 initiations in subordinate lodges; 2,565,905 members relieved; 256,606 widowed families relieved, and a loss of 252,354 members through death. The total revenue for the period was $240,430,422.21; and the total expenditure for relief, $92,665,214.47.

The officers of the Sovereign Grand Lodge are as follows: Grand Sire, John B. Goodwin, Atlanta, Ga.; Deputy Grand Sire, Robert E. Wright, Allentown, Pa.; Grand Secretary, J. Frank Grant, Baltimore, Md.; Grand Treasurer, M. Richards Muckle, Philadelphia, Pa.; Assistant Grand Treasurer, Elvin J. Curry, Baltimore, Md.; Grand Chaplain, J. W. Venable, Hopkinsville, Ky.; Grand Marshal, John B. Cockrum, Indianapolis, Ind.; Grand Guardian, Edwin L. Pilsbury, Boston, Mass.; Grand Messenger, Louis F. Hart, Tacoma, Wash.

KNIGHTS OF PYTHIAS.

The Knights of Pythias is a fraternal benevolent order, with two branches, the Endowment Rank and the Uniform Rank. It is one of the best known and most popular of secret fraternal orders, as well as one of the oldest in the United States, excepting, of course, the Masons. The principles of Pythianism are Friendship, Charity and Benevolence, and the order stands for the sacredness of the home, the integrity of manhood and the purity of woman. The order claims that "the sun shines on the Pythian banner somewhere in the Supreme Domain every hour in the day." Since its foundation the society has grown to remarkable proportions, and has been widespread in its influence.

On the 31st of December, 1901, the order had 540,138 affiliated members, and to these should be added at least 500,000 more who have been suspended for non-payment of dues or have taken withdrawal cards, making the total more than a million. During 1901, 55,202 were initiated, 7,733 re-instated and 7,677 admitted by card, a total of 70,612. During the same year 4,915 died, 268 were expelled, 8,378 withdrew by card, and 33,857 were suspended, leaving a net gain of 23,194 for the year. The relative rank of the Grand Domains places the domain of West Virginia first and that of Delaware last.

The insurance branch, or Endowment Rank, of the order, provides a life insurance for members of the order at a small premium, and under the usual fraternal insurance system. According to reports made at the biennial session of the Supreme Lodge, held in San Francisco, August 12, 1902, this branch had become, instead of a menace, a benefit to the order and its continuance was recommended. The insurance branch was engrafted upon the order by the adoption of the Supreme Constitution in 1894, and became an integral part of it. The Endowment Rank receives and disburses about $2,000,000 annually. In 1900 and 1901 some bad investments, and, according to the report of the Supreme Chancellor, maladministration of the funds, placed the insurance branch in a bad pecuniary position, but through the efforts of the members, and especially of the officers, the obligations were met and the order placed again upon a sound footing. At the same time, investigation was made of a number of contested death claims, and results justified the order in reducing these from 58 to 16.

The commander-in-chief of the Uniform Rank reported at the biennial session a rapid growth in the military branch, and renewed interest in the rank seems to have extended to all parts of the Supreme Domain. At the beginning of 1902 there were 858 companies of the military branch, with an actual membership of 42,510. At this time warrants had been issued for the organization of twenty-three more companies, which had not yet been formed. Between August, 1900, and June 20, 1902, warrants were issued for 157 companies in all, of which all but the twenty-three above mentioned had been put into commission. Seventy-five defunct companies were reorganized between August, 1900, and June, 1902.

The officers elected in 1902 are: Tracy R. Bangs, Grand Forks, N. D., Supreme Chancellor; Charles E. Shiveley, Richmond, Ind., Supreme Vice-Chancellor; George E. Church, Fresno, Cal., Supreme Prelate; R. L. C. White, Nashville, Tenn., Supreme Keeper of Record and Seal; Thomas D. Meares, Wilmington, N. C., Supreme Master of Exchequer; L. H. Farnsworth, Salt Lake City, Utah, Supreme Master at Arms; Cyrus W. Hall, Charleston, W. Va., Supreme Inner Guard; John W. Thompson, Washington, D. C. Supreme Outer Guard; C. F. S. Neal, Chicago, President Board of Control, Endowment Rank; James R. Carnahan, Major-General of the Uniform Rank.

The membership of subordinate lodges, by States, is as follows:

	No. of members Dec. 31, 1900.	No. of members Jan. 1, 1902.		No. of members Dec. 31, 1900.	No. of members Jan. 1, 1902.

KNIGHTS OF PYTHIAS, ENDOWMENT RANK.

Founded as a branch of the Order of Knights of Pythias in 1877. It has about 5,400 local sections all over the United States, Canada, Mexico and the Hawaiian Islands. Total membership, 58,669. Disbursements during 1902, to August, $905,000; total disbursements since organization, $18,105,000. The officers of the Endowment Rank are as follows: President, Charles F. S. Neal, Chicago, Ill.; Secretary, Samuel M. Smith, Chicago, Ill.; General Counsel, Carlos S. Hardy, Chicago, Ill.; Medical Examiner-in-Chief, George G. McConnell, Chicago, Ill.

THE ORDER OF RATHBONE SISTERS.

The Order of Rathbone Sisters is composed of mothers, wives, sisters and daughters of Knights of Pythias. The object of the order is to promote the moral, mental, social and physical elevation of its members, to cultivate a spirit of fraternal love, to minister to the wants of the sick and distressed, to watch at the bedside of the dying and to pay the last tribute to the dead, to comfort and provide for the widow and to daily exemplify the Golden Rule.

The first temple of the order was instituted in 1888, under the name of the Pythian Sisters. The first grand temple was instituted the year following, and two months later the supreme temple was instituted. The present name of the order was adopted in 1894, in honor of the founder of the Knights of Pythias, Justus H. Rathbone. The membership in the United States numbers about 50,000 ladies and 25,000 knights. The order is affiliated with the National Council of Women.

The grand officers for New York State, elected in 1902, are: Mrs. Amelia Linacre, P. G. C.; Mrs. Lena Meritt, G. C.; Mrs. Harriet Campbell, G. S.; Mrs. Serena Smith, G. J.; Mrs. Rebecca Sandbam, G. M.; Mrs. Lida Palmer, G. M. R.; Mrs. Emma Nichols, G. M. of F.; Mrs. Nellie Smith, G P.; Mrs. Elizabeth Miller, G. S.

SONS OF ST. GEORGE.

The Sons of St. George is the only fraternal benevolent society composed exclusively of Englishmen, their sons and grandsons, in the United States. Its privileges and benefits are available to all worthy Englishmen between the ages of eighteen and fifty. Its objects are to make provision for its members, their widows and families in time of misfortune, sickness or death, to bind in one common brotherhood Englishmen and those of English descent; to perpetuate in them a love for the motherland, while inculcating love and respect for the land of their adoption and the principles of true American citizenship; to aid them to retain their personal independence and habits; to afford opportunity for social intercourse; to welcome and encourage new arrivals to a strange land, and to prevent such as are strangers from becoming stranded or discouraged. Sick benefits of $5 upward are paid to members, and the death benefits are $100 and upward on the death of a beneficial member, and $50 and upward on the death of the wife of a member in good standing.

The Supreme Lodge officers are: John Kenworthy, Pittsburg, Pa., Supreme President; Walter Willis, South Chicago, Ill., Supreme Vice-President; J. Henry Williams, Philadelphia, Pa., Supreme Secretary; George H. Toop, New York City, Supreme Treasurer; Sandy Harrison, Fall River, Mass., Supreme Messenger; George Smales, Pawtucket, R. I., Supreme Chaplain; George Kingston, Bridgeport, Conn., Past Supreme President. The address of the Supreme Secretary is No. 133 South Twelfth street, Philadelphia.

Daughters of St. George.—Founded in 1885. The order has lodges in every part of the United States. Its membership is composed of white English women, daughters and granddaughters of English parents. The Worthy Grand President is Mrs. M. Steele, Pittsburg, Pa.

SONS OF TEMPERANCE.

The order of Sons of Temperance was instituted in New York September, 29, 1842, and at once assumed a prominent place among the fraternal and benevolent societies having for their foundation principle abstinence from intoxicating beverages. Its objects are to shield its members from the evils of intemperance, to afford mutual assistance in case of sickness, and to elevate the character of its membership, and it purposes to reclaim the inebriate, rescue the moderate drinker, save the young from the power of the drink habit and suppress the drink traffic. The order has three distinct branches, the subordinate division or local society, the grand division, which has supervision over the work in the State or province in which it is located, and the national division, which is the law-making body and exercises general control over the entire order.

The order admits to membership persons of fourteen years of age or over, without regard to sex, social condition or religious belief. It is a secret order, but is destitute of the mystical features of either sign, grip or degree. On March 31, 1902, there were 716 subordinate divisions, with 34,967 members.

Loyal Crusaders, a juvenile branch of the order, are organized by the subordinate divisions. These are open societies for children and are made attractive with a simple ritual, banners and badges.

The national officers elected in 1902 are: William H. Williams, Swampscott, Mass., M. W. P.; William M. Burgoyne, St. Catherine, Ont., M. W. A.; B. R. Jewell, South Hampton, N. H., M. W. S.; M. M. Eavenson, Philadelphia, M. W. T.; Rev. S. Foster Grady, Trenton, N. J., M. W. Chaplain; W. R. Geldert, Truro, N. S., M. W. C.; W. D. McCullon, Auburn, Ohio, M. W. Sentinel; F. M. Bradley, Washington, D. C., M. W. Superintendent; A. G. Lawson, Newark, N. J., P. M. W.

The fifty-ninth annual session will be held in New Haven, Conn., July 8, 1903.

UNITED COMMERCIAL TRAVELLERS OF AMERICA.

The order of United Commercial Travellers of America was organized at Columbus, Ohio, July 16, 1888, with eight members. The order has now a membership of about 20,000, and subordinate councils in all but eleven States. Its membership consists entirely of commercial travellers, either actively engaged in that work or who were engaged in it at the time of their affiliation with the order. Its objects are to unite fraternally all commercial travellers of good moral character; to give all moral and material aid in its power to its members and those dependent upon them; to assist the orphans and widows of deceased members; to establish an indemnity fund to indemnify its members for loss of time resulting from accidental injuries; to secure from all transportation companies and hotels just and equitable favors for commercial travellers as a class, and to elevate the moral and social standing of its members. There are 19 Grand Councils and 203 Subordinate Councils in the United States.

The headquarters of the order are in Columbus, Ohio, corner Front and Gay streets. The officers elected in 1902 are: E. F. Mallory, Chicago, Supreme Councillor; B. E. Zartman, Fort Worth, Texas, Past Councillor; Charles C. Daniel, Columbus, Ohio, Secretary; R. N. Hull, Cleveland, Ohio, Treasurer.

The officers of the New York Subordinate Council, which meets at 117 West Twenty-third street, are:

Digitized by Google

Henry V. Selde, Councllor, and Will E. Warner, 71 Lenox avenue, Secretary and Treasurer. The Brooklyn Subordinate Council meets in the Johnston Building, Flatbush avenue and Nevins street, and its officers are: W. G. Morford, Councillor, and Charles W. Rice, 12 Duane street, New York, Secretary and Treasurer.

THE NATIONAL GRANGE.

The National Grange, or the Order of the Patrons of Husbandry originated in the mind of O. H. Kelley, a man of New England birth, who went to Minnesota in his early manhood, and became a farmer in that section of the country. The idea of giving women full membership originated with Miss Carrie A. Hall, of Boston, Mass., a niece of Mr. Kelley, to whom he had imparted his views of the new association.

The first meeting was held December 4, 1867, and the first Subordinate Grange was organized in Washington, D. C., January 8, 1868. The first dispensation for a Grange was granted at Harrisburg, Pa., April 4, 1868, but the first regular Subordinate Grange to which a charter was issued was organized at Fredonia, N. Y., April 16, 1868.

The first State Grange, that of Minnesota, was organized February 22, 1869.

The first meeting of the National Grange, as a delegate body, was held at Georgetown, D. C., January 8, 1873, with six of the founders and seventeen delegates present, representing in all eleven States.

The object of the Grange is "to develop a better and higher manhood and womanhood among ourselves; to enhance the comforts and attractions of our homes, and to strengthen our attachment to our pursuits." At the end of June last the society consisted of nearly 30,000 Subordinate Granges, 226 of which were organized during the year just ended. In all the order is represented in 44 States and Territories. Its officers are: Master, Aaron Jones, South Bend, Ind.; Overseer, Obadiah Gardner, Rockland, Me.; Lecturer, N. J. Bachelder, Concord, N. H.; Steward, W. C. Jewett, Worcester, Mass.; Assistant Steward, C. O. Raine, Monticello, Mo.; Chaplain, W. K. Thompson, Liberty Hill, S. C.; Treasurer, Mrs. E. S. McDowell, Columbus, Ohio; Secretary, John Trimble, Washington, D. C.; Gate Keeper, George W. Baird, Edina Mills, Minn.; Ceres, Mrs. Martha M. Wilson, Magnolia, Ill.; Pomona, Mrs. Cordelia Atkeson, Morgantown, W. Va.; Flora, Mrs. S. B. Wolcott, Covington, Ky.; Lady Assistant Steward, Mrs. Marie A. Hill, Westford, Pa.

The Executive Committee is composed as follows: E. B. Norris, Chairman, Sodus, N. Y.; J. J. Woodman, Secretary, Paw Paw, Mich.; C. J. Bell, East Hardwick, Vt.; Aaron Jones, ex-officio, South Bend, Ind.

The following persons represent the Grange as State Lecturers: Alabama, the Rev. A. Dougherty, Dothen; California, J. D. Cornell, Sacramento; Colorado, J. F. White, Arvada; Connecticut, Frank S. Hopson, Stratford; Delaware, Professor A. T. Neale, Newark; Illinois, E. H. Clark, Dunlap; Indiana, Mrs. L. G. Robertson, South Bend; Iowa, George Van Houden, Lenox; Kansas, A. P. Reardon, McLouth; Kentucky, J. B. Wallser, Hopkinsville; Maine, W. J. Thompson, So. China; Maryland, J. Enos Ray, Sr., Chillum; Massachusetts, Charles H. Rice, Leominster; Michigan, Mrs. F. D. Saunders, Edgerton; Minnesota, George C. Hill, Elk River; Mississippi, H. S. Simrall, Glass; Missouri, T. B. Dunham, New Cambria; Nebraska, A. M. Bovee, Vacoma; New Hampshire, H. H. Metcalf, Concord; New Jersey, G. L. Gillingham, Moorestown; New York, Mrs. S. N. Judd, Canton; Ohio, S. E. Strode, Westland; Oregon, Austin T. Buxton, Forest Grove; Pennsylvania, Albert M. Cornell, Altus; Rhode Island, T. S. Snow, Wakefield; South Carolina, C. J. Rollins, Stokes Bridge; Tennessee, J. M. McCorkle, White Haven; Texas, John B. Long, Rusk; Vermont, R. B. Galusha, So. Royalton; Washington, James Wheelhouse, Columbus; West Virginia, S. W. Moore, Elwell; Wisconsin, S. C. Carr, Milton Junction.

BENEVOLENT AND PROTECTIVE ORDER OF ELKS.

The Benevolent and Protective Order of Elks of the United States of America is a strictly fraternal order, the members of which find a brotherly welcome in any part of the country where its lodges exist. It was founded in 1868, and has had a steady and substantial growth. There are 800 lodges, the general legislation for which is done by a Grand Lodge. Its sessions are held annually, the subordinate lodges reporting to it at each session. When the latest reports were made up in April, 1902, the total membership was 124,399. It can be safely estimated that the present membership is upward of 130,000. While the order does not include a department for life insurance, or for indemnity in case of disability, it is eminently a charitable organization, disbursing at least $200,000 annually for the relief of members in need of assistance. The actual disbursements on this account during the last financial year were $1,918,580.16. Many of the lodges hold real estate, and the total value of property owned by them is a little over $3,000,000. The aggregate of cash on hand reported by the various lodges on April 1, 1902, was $785,708.20. Following are the officers of the Grand Lodge for the year 1902-3: Grand Exalted Ruler, George P. Cronk, Omaha, Neb.; Grand Esteemed Leading Knight, William B. Brock, Lexington, Ky.; Grand Esteemed Loyal Knight, A. H. Pickens, Denver, Col.; Grand Esteemed Lecturing Knight, Joseph E. Hennings, Anderson, Ind.; Grand Secretary, George A. Reynolds, Saginaw, Mich.; Grand Treasurer, Sam H. Needs, Cleveland, Ohio; Grand Tiler, Charles W. Kaufmann, Hoboken, N. J.; Board of Grand Trustees, Joseph T. Fanning, Indianapolis, Ind.; John D. O'Shea, Lynn, Mass.; Henry W. Mears, Baltimore, Md.; Grand Chaplain, Rev. Walter Davenport Buckner, Pine Bluff, Ark.

INDEPENDENT ORDER OF GOOD TEMPLARS.

This order had its origin in Central New York, where the first lodges were instituted in 1851. Both sexes have been admitted to membership on an equal footing since the first organization, and members are obliged to take a pledge that they "will never make, buy, sell, use, furnish nor cause to be furnished to others, as a beverage, any spirituous or malt liquors, wine or cider, and will discountenance the manufacture and sale thereof in all proper ways." The order has established itself in every part of the world, and its ritual exists in fifteen different languages. At the triennial session of the Supreme Lodge, held in Stockholm, Sweden, in July, 1902, three interpreters were necessary in the transaction of business. There are more than 100 Grand Lodges, and upward of 10,000 subordinate lodges, with a total membership of 500,000. The order has initiated more than ten millions of people since its inception, and it is estimated that it has reclaimed more than three hundred thousand drunkards. There is a juvenile branch, with a total membership of about two hundred thousand.

The next triennial session of the Supreme Lodge will be held in Belfast, Ireland, beginning on August 1, 1905. The officers elected at the session held in Stockholm last year are: R. W. G. Templar, Councilor Joseph Malins, Birmingham, England; P. R. W. G. Templar, Dr. D. H. Mann, Brooklyn, N. Y.; R. W. G. Councilor, Professor J. Bergman, Stockholm, Sweden; R. W. G. Vice-Templar, Mrs. M. McDonald, Edinburgh, Scotland; R. W. G. S. of Juvenile Templars, Miss Jessie Forsyth, Boston, Mass.; R. W. G. Secretary, Colonel B. F. Parker, Milwaukee, Wis.; R. W. G. Treasurer, Herman Blume, Hamburg, Germany; R. W. G. Assistant Secretary, H. Schmidt, Kimberley, South Africa; R. W. G. Chaplain, Rev. S. J. Chowrryappah, Madras; R. W. G. Marshal, Gustav Thomassen, Bergen, Norway; R. W. G. Deputy Marshal, Mrs. M. Gray, Belfast, Ireland; R. W. G. Guard, Haraldur Nielsson, Reykjavik, Iceland; R. W. G. Sentinel, Robinson Cooke, Perth, West Australia; R. W. G. Messenger, Miss Mamie Fisher, Tacoma, Washington, U. S. A.

AMERICAN PROTESTANT ASSOCIATION.

The American Protestant Association, which has for its emblem the "red brick school house," has members in nearly every city in the United States. The officers for 1902 are: Right Worthy Grand Master, Thomas T. Seal, Philadelphia; Right Worthy Vice-Grand Master, William T. Watkins, Wilkesbarre; Right Worthy Grand Secretary, William J. McKee, Philadelphia; Right Worthy Grand Treasurer, L. J. Schleven, Trenton; Right Worthy Grand Conductor, Robert T. Adams, Philadelphia; Right Worthy Grand Assistant Conductor, Charles F. Kupp, Reading; Right Worthy Grand Tyler, James Thompson, Philadelphia; Right Worthy Grand Guard, William McDowell, Philadelphia; Right Worthy Assistant Grand Secretary, William T. Atkinson, Philadelphia; Right Worthy Chaplain, James Armstrong, Philadelphia.

The annual meeting for 1903 will be held in Wilkesbarre, Pa.

Matson, Chicago, Ill.; Supreme Overseer, W. H. Miller, St. Louis, Mo.; Supreme Recorder, M. W. Sackett, Meadville, Pa.; Supreme Receiver, John J. Acker, Albany, N. Y.; Supreme Guide, Louis C. Merrill, Concord, N. H.; Supreme Watchman, S. B. Ritchie, Winnipeg, Man.; Supreme Medical Examiner, D. H. Shields, Hannibal, Mo.

Washington Insurance Union, The.—Organized, 1902. Men and women accepted on equal terms. Its ritual illustrates the character, moral and political principles of George Washington. No losses to date of report. Officers: National President, A. S. Griffin, Canton, Ohio; National Secretary, J. A. Bliss, Canton, Ohio; National Treasurer, C. D. Bachtel, Canton, Ohio.

Western Catholic Union.—Organized, 1877. Pays death and sick benefits. Total membership, 1902, 5,125; losses paid, 1901, $71,500; paid since organization, $764,479. Officers: President, Herman F. Jochern, Quincy, Ill.; Secretary, John Schauf, Quincy, Ill.; Treasurer, H. A. Oenning, Quincy, Ill.

Woodmen of the World.—Founded in 1890. It has one grand body and 5,733 subordinate bodies. Total membership, 292,600; disbursements during 1901, $12,489,666. The officers of the Supreme Camp are as follows: Sovereign Commander, J. C. Root, Omaha, Neb.; Sovereign Adviser, F. A. Falkenburg, Denver, Col.; Sovereign Clerk, John T. Yates, Omaha, Neb.; Sovereign Banker, Morris Sheppard, Texarkana, Tex.; Sovereign Escort, H. F. Simrall, Jr., Columbus, Miss.; Sovereign Watchman, B. W. Jewell, Omaha, Neb.; Sovereign Sentry, Dr. H. Bradshaw, Little Rock, Ark.; Sovereign Physicians, A. D. Cloyd, Omaha, Neb., and Ira W. Porter, Omaha, Neb.

Workmen's Benefit Association.—Organized, 1893. Total membership, 1902, 6,683; losses paid, 1901, $55,000; paid since organization, $226,374. Officers: President, John Mackriele, New Haven, Conn.; Secretary, James H. Cutten, Boston, Mass.; Treasurer, E. J. F. Hasseltine, Boston, Mass.

Yeomen of America.—Founded June 28, 1898. It has one Supreme Council and 153 subordinate councils. Total membership, 6,500; disbursements in 1901, $30,273; total disbursements since organization, $55,855. The officers of the Supreme Council are as follows: Supreme President, W. A. Colledge, Aurora, Ill.; Supreme Vice-President, C. D. Judd, Aurora, Ill.; Supreme Treasurer, C. E. Corlett, Aurora, Ill.; Supreme Secretary, C. M. Coats, Aurora, Ill.

COLLEGE FRATERNITIES.

College fraternities, or secret societies, have become an essential part of the structure of college life. Although in the early years of their existence the faculties in many colleges prohibited the students joining the secret societies, nevertheless these organizations were perpetuated by the best men in college even with the utmost secrecy, often under the most trying conditions, until at length they were tolerated, then permitted, and are now approved by the wisest authorities as beneficial to the members and helpful in the administration and discipline of the college. Each fraternity has chapters in several colleges which are closely affiliated, guided by the same principles, associated by correspondence and interchange of visits, and governed by a grand chapter composed of delegates from the several chapters. Meeting in annual conventions and interchanging visits, the members form acquaintances and acquire interests which make them broader and more cosmopolitan as college men.

There is an elective affinity by which the members are chosen. Usually they are admitted into the local chapter early in the freshman year, so that the young men have the benefit and advantage of the advice and direct oversight of the upper class men. The members of a good fraternity are jealous of the reputation of their chapter, therefore they carefully guard the character and conduct of the individuals.

The principal object of the best fraternities is to promote friendship, regulate conduct, develop manly character and supplement the college course by exerting an influence toward a broad culture and a noble life.

The spirit and rules are so strong that membership in one fraternity precludes one from membership in another fraternity.

These college fraternities are peculiar to America, and exist in nearly every university and college in the United States and the two principal universities of Canada. Princeton is the only university of prominence which prohibits them.

It is a fact evident to a casual observer that the fraternity men are the most loyal and enthusiastic of the alumni of a college.

Many of the fraternities have published biographical catalogues of their members. The best catalogue is that of Zeta Psi fraternity, issued in 1900, which is a model as to details, contents, typography, paper and binding. Including the photo engravings of fraternity groups, chapter houses and college buildings, it contains 1,200 pages. The edition of 1,000 cost over $15,000.

For many years the chapters rented rooms for their meetings, but the system has so developed that now the general custom is to occupy a house for dormitory as well as for chapter purposes. Many fraternities, by the aid and under the control of alumni, have erected chapter houses adapted specially to fraternity life. These houses differ widely as to style of architecture and arrangement. Many of them are ornaments to the college community, excellent types of which are found in the Alpha Delta Phi house at Williams College, the Delta Psi house at Columbia University, and in the Zeta Psi house at Cornell University.

The principal college fraternities are named below in chronological order:

Name.	Where founded.	When founded.	Name.	Where founded.	When founded.
Kappa Alpha	Union College	1825	Theta Delta Chi	Union College	1847
Sigma Phi	Union College	1827	Phi Gamma Delta	Jefferson College	1848
Delta Phi	Union College	1827	Phi Delta Theta	Miami University	1848
Alpha Delta Phi	Hamilton College	1832	Phi Kappa Sigma	Univ. of Pennsylvania	1850
Psi Upsilon	Union College	1833	Chi Phi	Princeton University	1854
Beta Theta Pi	Miami University	1839	Sigma Chi	Miami University	1855
Chi Psi	Union College	1841	Delta Tau Delta	Bethany College	1860
Delta Kappa Epsilon	Yale University	1844	Alpha Tau Omega	Va. Military Institute	1865
Zeta Psi	New York University	1847	Kappa Alpha (South'n	Washington and Lee	1865
Delta Psi	Columbia University	1847	Sigma Nu	Va. Military Institute	1869

Delta Upsilon was founded at Williams College in 1834 as an anti-secret society, but later it was considered as a non-secret society and is generally counted with the fraternities.

UNITED CHAPTERS OF PHI BETA KAPPA.

By Rev. OSCAR M. VOORHEES, Secretary and Treasurer.

Among all college Greek letter fraternities, that of Phi Beta Kappa stands not only as the oldest organized in the United States, but with the first in standard and desirability. With its membership limited to those who have attained the highest distinction in scholarship in their colleges, its alumni are to be found in the highest positions in public and private life and have numbered among them professors, physicians, clergymen, business men, members of the legal profession and Presidents of the United States. In number the alumni rank well toward the head of the list of college fraternity men in the country.

The Phi Beta Kappa fraternity was organized December 5, 1776, at William and Mary College, Williamsburg, Va., by students in that institution, and is therefore the oldest Greek letter fraternity in this country, having had a continuous existence for over 125 years. The original chapter was disbanded at the end of four years on account of the progress of the Revolution, but was revived in 1849. The civil war again closed its activity, but it was revived in 1893 and again flourishes on its ancient foundation.

Charters were early granted for the establishment of chapters in connection with Yale and Harvard, and from these institutions the fraternity has spread until it now has chapters in 53 of the leading educational institutions in the country.

The first general catalogue was published in 1900 by Rev. E. B. Parsons, D. D., of Williams College, then secretary of the fraternity, and contained the names of over 10,500 living members.

The object of the fraternity is "the promotion of scholarship and friendship among students and graduates of American colleges," and only those are eligible who attain highest rank in their college classes. Charters for chapters are eagerly sought, and the tendency is to restrict them to institutions that aim to promote high attainments in scholarship.

The United Chapters of Phi Beta Kappa is the name by which the central organization of the fraternity is designated. The National Council, composed of three delegates from each chapter, meets every third year. A Senate consisting of twenty members forms an Executive Committee charged with the care of the general interests of the fraternity during the interval between the sessions of the National Council. The organization has reason to be proud of its history, and the unique position it occupies as the "conserver and rewarder of scholastic attainment." Many eminent scholars and statesmen count it an honor to have their names enrolled upon her list of members, and thus be entitled to wear the well-known golden key. Theodore Roosevelt is the fifth of her members to attain the Presidency of the United States, his predecessors being John Quincy Adams, Franklin Pierce, James A. Garfield and Chester A. Arthur.

The present officers of the fraternity are: President, Hon. John A. De Remer, LL. B., Schenectady, N. Y.; vice-president, vacant; secretary and treasurer, Rev. Oscar M. Voorhees, Three Rivers, N. J.

Senators, 1898 to 1904: Hon. Joseph H. Choate, LL. D., London, Eng.; Hon John A. De Remer, LL. D., Schenectady, N. Y.; Hon. Theodore E. Hancock, LL. D., Syracuse, N. Y.; Professor Samuel Hart, D. D., Middletown, Conn.; Colonel Thomas W. Higginson, LL. D., Cambridge, Mass.; Hon. Seth Low, LL. D., New York City; Editor Hamilton W. Mabie, L. H. D., New York City; Professor Francis A. March, LL. D., Easton, Pa.

Senators, 1901 to 1907: Professor Henry L. Chapman, D. D., Brunswick, Me.; Professor Edwin Grosvenor, M. A., Amherst, Mass.; Professor Edward Everett Hale, LL. D., Roxbury, Mass.; Colonel William Lamb, LL. D., Norfolk, Va.; Rev. Eben B. Parsons, D. D., Williamstown, Mass.; President Ira Remsen, LL. D., Baltimore, Md.; President Charles F. Thwing, LL. D., Cleveland, Ohio; Rev. Oscar M. Voorhees, M. A., Three Rivers, N. J.; Professor Adolph Werner, Ph. D., New York City; President Benjamin Ide Wheeler, LL.D., Berkeley, Cal.

ARTISTIC, SCIENTIFIC AND EDUCATIONAL.

NATIONAL ACADEMY OF DESIGN.

The National Academy of Design was founded in 1826. Its schools will be open daily to male and female students until May 9, 1903, Sundays and holidays excepted. Admission to the schools is obtained through the examinations held the week beginning January 26, 1903. Applicants for these examinations must register at the office of the Academy during the week prior to these examinations.

The Council for 1902-1903 is composed as follows:

President, Frederich Dielman; Vice-President, J. G. Brown; Corresponding Secretary, H. W. Watrous; Recording Secretary, Will H. Low; Treasurer, Lockwood de Forest; Francis C. Jones, George H. Yewell, Irving R. Wiles, Alfred C. Hurland, Herbert Adams and R. Swain Gifford.

The list of academicians and associate academicians is as follows:

(The addresses of members given in the following list refer to the city of New York when not otherwise specified.)

Academicians—Herbert Adams, 42 West Fifteenth street; George R. Barse, Jr., 11 East Fifty-ninth street; J. Carroll Beckwith, 58 West Fifty-seventh street; Edwin H. Blashfield, 48 West Fifty-ninth street; Robert Blum, 90 Grove street; George H. Boughton, West House, Campden Hill, W., London, Eng.; Carl L. Brandt, Hastings-on-the-Hudson, N. Y.; J. R. Brevoort, 52 East Twenty-third street; Fred'k A. Bridgman, 146 Boulevard Malesherbes, Paris; John B. Bristol, 52 East 23d street; J. G. Brown, 51 West Tenth street; George B. Butler, 116 West Eighty-eighth street; Howard Russell Butler, Carnegie Hall; Charles Calverley, 107 East Twenty-seventh street; William M. Chase, 303 Fifth avenue; F. S. Church, Carnegie Hall; B. West Clinedinst, 1000 Madison avenue; Samuel Colman, 97 Central Park West; Bruce Crane, 154 West Fifty-fifth street; W. P. W. Dana, 7 Rue Scribe, Paris, France; Lockwood De Forest, 7 East Tenth street; Thomas W. Dewing, 51 West Tenth street; Frederick Dielman, 51 West Tenth street; J. H. Dolph, 58 West Fifty-seventh street; Frank Fowler, 106 West Fifty-fifth street; Daniel Chester French, 125 West Eleventh street; Gilbert Gaul, 51 West Tenth street; R. Swain Gifford, 152 West Fifty-seventh street; C. C. Griswold, 262 West Twelfth street; Seymour Joseph Guy, 51 West Tenth street; George Henry Hall, abroad; Hamilton Hamilton, 138 Freemont street, Peekskill, N. Y.; Alexander Harrison, 118 East Fortieth street; J. S. Hartley, 145 West Fifty-fifth street; W. J. Hennessey, Saville Club, London, Eng.; E. L. Henry, 7 West Forty-third street; Winslow Homer, Scarboro, Me.; William H. Howe, Bronxville, N. Y.; Alfred C. Howland, 318 West Fifty-seventh street; Daniel Huntington, 49 East Twentieth street; George Inness, Jr., Carnegie Hall Studios; David Johnson, 69 West One Hundred and Thirty-first street; Eastman Johnson, 66 West Fifty-fifth street; Francis C. Jones, 253 West Forty-second street; Bolton H. Jones, 253 West Forty-second street; John Lafarge, 51 West Tenth street; William H. Lippincott, 37 West Twenty-second street; Will H. Low, Bronxville, N. Y.; William Magrath, 11 East Fourteenth street; George W. Maynard, 156 East Thirty-sixth street; Charles H. Miller, 10 East Twenty-third street; F. D. Millet, Broadway, England; Robert C. Minor, 58 West Fifty-seventh street; Louis Moeller, Edenwald, Wakefield, N. Y.; Thomas Moran, 24 West Twenty-second street; H. Siddons Mowbray, 66 West Eleventh street; J. Francis Murphy, 222 West Twenty-third street; Victor Nehlig, abroad; J. C. Nicoll, 51 West Tenth street; Walter L. Palmer, 5 Lafayette street, Albany, N. Y.; Arthur Parton, 52 East Twenty-third street; E. Wood Perry, 18 East Twelfth street; Benjamin C. Porter, 3 North Washington square; Horace Walcott Robbins, 56 East Fifty-seventh street; John Rogers, New Canaan, Conn.; John S. Sargent, 33 Tite street, Chelsea, S. W., London, Eng.; L. G. Sellstedt, 78 West Mohawk street, Buffalo, N. Y.; Aaron D. Shattuck, Granby, Conn.; Walter Shirlaw, abroad; R. M. Shurtleff, 44 West Twenty-second street; George H. Smillie, 650 Madison avenue; James D. Smillie, 156 East Thirty-sixth street; Augustus St. Gaudens, Windsor, Vt.; Arthur F. Tait, Ludlow Park, Yonkers, N. Y.; Abbott H. (Elect) Thayer, Monadnock, N. H.; Louis C. Tiffany, 335 Fourth avenue; D. W. Tryon, 226 West Fifty-ninth street; C. Y. Turner, 35 West Fourteenth street; Kruseman Van Elten, 9 Rue Campagne premiere, Paris, France; Elihu Vedder, 7 West Forty-third street; Frederic P. Vinton, 247 Newbury street, Boston; Douglas Volk, Center Lovell, Maine; Horatio Walker, Beaulieu, Isle d'Orleans, Can.; Edgar M. Ward, 51 West Tenth street; J. Q. A. Ward, 119 West Fifty-second street; Harry W. Watrous, 58 West Fifty-seventh street; John F. Weir, Yale School of Art, New Haven, Conn.; J. Alden Weir, 146 West Fifty-fifth street; C. D. Weldon, 51 West Tenth street; Worthington Whittredge, Summit, N. J.; Irving R. Wiles, 106 West Fifty-fifth street; Lemuel E. Wilmarth, 352 Adelphi street, Brooklyn; Thomas Waterman Wood, 51 West Tenth street; George H. Yewell, 51 West Tenth street.

Associates—Edwin A. Abbey, Morgan Hall, Fairford, Gloucestershire, Eng.; J. W. Alexander, 123 East Sixty-third street; Thomas Allen, 12 Commonwealth avenue, Boston; Paul W. (Elect) Bartlett, 229 East Twentieth street; Miss Cecilia Beaux, 1710 Chestnut street, Philadelphia; E. A. (Elect) Bell, 226 Central Park, South; Frank W. Benson, Salem, Mass.; William Verplanck Birney, 58 West Fifty-seventh street; Karl (Elect) Bitter, Weehawken, N. J.; George H. Bogert, 204 West Fifty-fifth street; Joseph H. (Elect) Boston, 203 Montague street, Brooklyn; A. T. Bricher, 2 West Fourteenth street; Miss Fidelia Bridges, Canaan, Conn.; George De Forest Brush, Dublin, N. H.; J. Wells Champney, 96 Fifth avenue; Carlton T. Chapman, 58 West Fifty-seventh street; Walter Clark, 939 Eighth avenue; William A. Coffin, 58 West Fifty-seventh street; C. C. Coleman, "The Players," 16 Gramercy Park; E. Irving Couse, 939 Eighth avenue; Kenyon Cox, 145 West Fifty-fifth street; Thomas A. Craig, Rutherford, N. J.; Charles C. Curran, 16 West Sixty-first street; C. H. Dani, Mystic, Conn.; F. De Haven 23 West Twenty-fourth street; H. C. Dearth, Carnegie Studios; Percival De Luce, 52 East Twenty-third street; Louis Paul Dessar, 204 West Fifty-fifth street; Frank Du Mond, 58 West Fifty-seventh street; Thomas Eakins, 1729 Mount Vernon avenue, Philadelphia, Pa.; L. C. Earle, Montclair, N. J.; C. Warren Eaton, 318 West Fifty-seventh street; Henry A. Ferguson, 215 West Fifty-fourth street; Ben Foster, 253 West Forty-second street; Frederich W. Freer, State and Ohio streets, Chicago, Ill.; Edward Gay, Mount Vernon, N. Y.; Frank Russell Green, 211 West 85th street; William St. John Harper, 215 West Fifty-seventh street; Childe Hassam, 139 West Fifty-fifth street; Albert Herter, 841 Madison avenue; William H. Hyde, 105 East Sixty-first street; Samuel Isham, 80 West Fortieth street; William Sergeant Kendall, 26 West Eighth street; William Fair Kline, 152 West Fifty-fifth street; F. W. Kost, 146 West Fifty-fifth street; W. L. Lathrop, New Hope, Pa.; Louis Loeb, 58 West Fifty-seventh street; Mrs. Henry A. Loop, Clifton Springs, N. Y.; Joseph Lyman, Century Club; George H. McCord, 399 Classon avenue, Brooklyn; C. Morgan McIlhenney, Shrub Oak, N. Y.; Frederich McMannus, "The Players;" Constant Mayer, abroad; Henry Mosler, Margaretville, N. Y.; Leonard Ochtman., Cos Cob, Conn.; W. R. O'Donovan, 31 St. Nicholas place; Charles Parsons, Boonton, N. J.; Charles A. Platt, "The Players;" H. R. Poore, Orange, N. J.; Edward Polthast, 52 East Twenty-third street; A. Phimester Proctor, 13 East Thirtieth street; Henry W. Ranger, 228 West Forty-fourth street; F. K. M. Rehn, 222 West Twenty-third street; Frederic Remington, New Rochelle, N. Y.; W. M. J. Rice, 55 West Thirty-third street; Will S. Robinson, 202 West Seventy-fourth street; William Sartain, 152 West Fifty-seventh street; Walter Satterlee, 52 East Twenty-third street; Charles Schreyvogel, 1220 Park avenue, Hoboken, N. J.; R. V. V. Sewell, 139 West Fifty-fifth street; William T. Smedley, 222 West Twenty-third street; George H. Story, 230 West Fifty-ninth street; Charles F. Ulrich, abroad; Robert W. Van Boskerch, 58 West Fifty-seventh street; A. T. Van Laer, 30 East Fifty-seventh street; Robert Vonnoh, Rockland Lake, N. Y.; Henry O. Walker, 152 West Fifty-fifth street; W. J. Whittemore, 318 West Fifty-seventh street; Carleton Wiggins, 1079 Dean street, Brooklyn.

SOCIETY OF AMERICAN ARTISTS.

Many of the most prominent artists and sculptors in the United States are members of the Society of American Artists and its annual exhibitions at No. 215 West Fifty-seventh street, New York, have often attracted international attention. The society awards three prizes each year: "The Shaw Prize," "The Webb Prize" and "The Carnegie Prize." Its officers are: President, John La Farge; vice-president, Kenyon Cox; secretary, Bruce Crane; treasurer, Samuel Isham.

NATIONAL ARTS CLUB.

The National Arts Club was organized in the city of New York, April 24, 1899, its object being to promote the artistic side of American manufacturing by the encouragement of hand made articles, lest machine-made goods should suffocate all art in modern manufacture, as well as to stimulate interest in the embellishment of cities and public buildings, and the immediate success of the club was greatly due to the interest it aroused among public-spirited citizens interested in municipal development.

The Arts Club has never intended to compete with other art societies but rather to co-operate with them. From the start the intention was announced to strive to build up other organizations of artists and art-loving laymen throughout the United States and the purpose has been fulfilled. To this end it allows a rebate of dues paid to local art societies, as set forth in the constitution. In short the club acts as a clearing house for art societies and clubs that promote the fine and industrial arts. In its committee rooms the officers of different art organizations gather; at its dinners the policy of different art societies is discussed. Under its roof the directors of the National Sculpture Society, the Mural Painters, the New York Municipal Art Commission and those of the Municipal Art Societies of New York and other cities meet to confer in a congenial atmosphere, finding a hearty welcome and an interchange of ideas.

The officers of the club are: President, George B. Post, New York; Vice-Presidents, James W. Alexander, New York; Samuel P. Avery, New York; Bernard N. Baker, Baltimore, Md.; George K. Birge, Buffalo, N. Y.; George G. Briggs, Grand Rapids, Mich.; Charles E. Dana, Philadelphia, Pa.; Henry C. Frick, Pittsburg, Pa.; Harry E. Hayes, Cleveland, Ohio; A. Augustus Healy, Brooklyn Borough; William M. Ladd, Portland, Ore.; F. A. Richardson, Burlington, Vt.; E. Francis Riggs, Washington, D. C.; Irving M. Scott, San Francisco, Cal.; Mrs. J. Montgomery Sears, Boston, Mass.; William Watts Taylor, Cincinnati, Ohio; Brooks Adams, Quincy, Mass.; Sir William C. Van Horne, Montreal, Canada; Thomas B. Walker, Minneapolis, Minn.; Treasurer, Spencer Trask, 27 Pine street, New York; Managing Director, Charles De Kay, 413 West Twenty-third street, New York; Secretary, Henry M. Stegman, 37 West Thirty-fourth street, New York.

METROPOLITAN MUSEUM OF ART.

The Metropolitan Museum of Art, Central Park, at Eighty-second street and Fifth avenue, was organized in 1870, and has a membership of 3,500. Henry G. Marquand is president; L. P. Di Cesnola, 109 East Thirty-seventh street, secretary. The directors are Henry G. Marquand, Daniel Huntington, Louis P. Di Cesnola, William L. Andrews, John L. Cadwalader, John Bigelow, Elihu Root, Harris C. Fahnestock, Frederic W. Rhinelander, Salem H. Wales, Robert W. De Forest, J. Pierpont Morgan, Darius O. Mills, Samuel P. Avery, Heber R. Bishop, Rutherford Stuyvesant, William E. Dodge, Joseph H. Choate, Charles S. Smith, John S. Kennedy, Whitelaw Reid, Edward D. Adams, J. Crosby Brown, and William R. Ware.

The Museum is open daily from 10 a. m. until half an hour before sunset; on Sundays after 1 p. m., and on Monday and Friday evenings from 8 to 10. On Monday and Friday, 10 a. m. to 5 p. m., the public is admitted only by payment of a fee of 25 cents. At other times admission is free. Membership in the Museum may be obtained by payment of the annual fee of $10.

NATIONAL EDUCATIONAL ASSOCIATION.

The National Educational Association of the United States was organized at Philadelphia, in 1857, under the name of the National Teachers' Association, and reorganized in 1870 as the National Educational Association, including as departments the former independent organizations, the American Normal School Association and the National Association of School Superintendents.

The departments of the Association now number eighteen, covering every important phase of educational work, as follows: The National Council of Education, Kindergarten, Elementary, Secondary, Higher, Normal, Superintendence, Manual, Art, Music, Business, Child Study, Physical Training, Science Instruction, School Administration, Library, Deaf, Blind, and Feeble-Minded, Indian Education.

The Association held its fortieth annual convention at Detroit, Michigan, in 1901. No meetings were held in 1861, 1862, 1867, 1878, and 1893. In 1893 the International Congresses of Education were held in Chicago, Ill., under the auspices of the Association in connection with the World's Columbian Exposition. The proceedings of these congresses were published by the Association in a volume which constitutes one of the most valuable of the series.

The annual meetings previous to 1884 were small in numbers, averaging about 200 members; since 1884 the annual conventions have averaged more than 6,000 members; since 1895 the average annual membership has been nearly 10,000. These forty conventions within forty-five years have been a most important agency in shaping national educational aims and progress.

The establishment by Congress of the Bureau of Education of the United States and of the office of United States Commissioner of Education was secured through the early efforts of the Association. The recent special committee reports indicate the lines of investigation which, in addition to the work of its annual conventions, have made the Association the largest and most important educational organization in the world.

There are three classes of members: Active members are those who are teachers or who are actively associated with educational work or in the management of educational institutions, including libraries and periodicals. Only active members are privileged to vote at conventions. Any person, on paying a small fee, may become an associate member, entitling him to a volume of the proceedings of the Association each year. Eminent educators not residing in America may become corresponding members when elected by the Directory of the Association, but the number of corresponding members may not exceed fifty. Under special provisions, educational institutions and libraries are enrolled as members, securing thereby the publications of the Association and delegate representation in annual conventions.

The total number of members at the close of 1901 was 10,182, and the total number of members registered at the convention held in Minneapolis, July 7-11, 1902, was 8,191. The executive officers of the Association, elected at the convention in 1902 are: Charles W. Eliot, Cambridge, Mass., President; Irwin Shepard, Winona, Minn., Secretary; W. N. Davidson, Topeka, Kan., Treasurer; Vice-Presidents, William M. Beardshear, Ames, Iowa; O. T. Bright, Chicago, Ill.; Charles F. Reeves, Latona, Wash.; Joseph Kennedy, Grand Forks, N. D.; Charles F. Thwing, Cleveland, Ohio; W. N. Sheats, Tallahassee, Fla.; Miss Marion Brown, New Orleans, La.; James B. Pearcy, Anderson, Ind.; Mrs. Helen L. Grenfell, Denver, Col.; Henry R. Sanford, Penn Yan, N. Y.; J. H. Francis, Los Angeles, Cal.; Wallace G. Nye, Minneapolis, Minn.

UNITED STATES BOARD OF GEOGRAPHIC NAMES.

The United States Board of Geographic Names was organized in accordance with an executive order issued by President Harrison, in 1890, and which required that uniformity in regard to geographic nomenclature and orthography should in the future prevail throughout all departments of the Government. The present position of this Board, therefore, is that of a standard authority, to whom all unsettled questions regarding geographic names are referred, and it is due to its decisions that there is now so much more similarity between the various maps and charts issued by the different bureaus and departments.

The Board is composed of the following members: Chairman, Henry Gannett, U. S. Geological Survey, Washington, D. C.; Secretary, Marcus Baker, Carnegie Institution, Washington, D. C.; members, H. G. Ogden, Coast and Geodetic Survey, Washington, D. C.; A. B. Johnson, Lighthouse Board, Treasury Department, Washington, D. C.; Harry King, General Land Office, Washington, D. C.; Andrew H. Allen, State Department, Washington, D. C.; W. H. H. Southerland, Hydrographic Office, Washington, D. C.; James L. Lusk, War Department, Washington, D. C.; Otis T. Mason, Smithsonian Institution, Washington, D. C.; A. Von Haake, Post Office Department, Washington, D. C.; H. T. Brian, Government Printing Office, Washington, D. C.; John Hyde, Department of Agriculture, Washington, D. C.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

During the past fifty years the names of practically all the leaders of American Science have been on the register of the Association, and the fifty-one volumes of its proceedings contain many of the most important contributions to scientific literature published in this country. At the present time the Association numbers about 4,000 members, and includes in its list of active fellows, such well-known scientific men as Newcomb, Barker, Brush, Young, Lesley, Morse, Langley, Remsen, Mendenhall, Goodale, Prescott, A. Hall, Harkness, Morley, Gibbs, Gill, Putnam, Gilbert, Woodward and Minot. Among the prominent educators who are members and have taken an active interest in its work are ex-President Gilman, of Johns Hopkins; ex-President Low, of Columbia; President Schurman, of Cornell; President Jordan, of Stanford; President Brown, of Lehigh; President Pritchett, of the Massachusetts Institute of Technology; ex-President Mendenhall, of Worcester Polytechnic Institute, and President Dabney, of the University of Tennessee. The Association also admits to membership those who are in sympathy with its aims and who wish to assist in promoting them, even though they are not actually engaged in scientific work.

Meetings of the Association are held annually, each time in a different city, the last seven meetings having been held at Detroit, Boston, Columbus, New York, Denver and Pittsburg. The last meeting will be held December 29, 1902, to January 3, 1903, during "Convocation Week," at Washington, D. C., under the presidency of Dr. Ira Remsen. The Association publishes an annual volume of proceedings which for the past fifty years has, in large measure, reflected the scientific activity of the country.

The officers of the next meeting are: President, Dr. Ira Remsen, Johns Hopkins University; Vice-Presidents, Section A, George B. Halsted, Austin, Tex.; B, E. F. Nichols, Dartmouth College, N. H.; C, Charles Baskerville, Chapel Hill, N. C.; D, C. A. Waldo, Purdue University, Lafayette, Ind.; E, W. M. Davis, Harvard; F, C. W. Hargitt, Syracuse, N. Y.; G, F. V. Coville, Washington; H, G. M. Dorsey, Chicago; I, H. T. Newcomb, Philadelphia; Permanent Secretary, L. O. Howard, Cosmos Club, Washington, D. C.; General Secretary, H. B. Ward, University of Nebraska; Secretary of Council, Charles Wardell Stiles, of Washington.

NATIONAL ACADEMY OF SCIENCES.

The National Academy of Sciences has for its object to investigate, examine, experiment and report upon any subject of science or art, when called upon by the Government of the United States, and the actual expense of such investigation, experiments and reports is paid from appropriations which may be made for the purpose. Under no circumstances does the academy receive any compensation whatever for services to the Government. Annual meetings are held at such places in the United States as may be designated, when reports of the work of the year are made. During 1901 the academy held three sessions, one in Washington in April and two in Philadelphia in November, the latter two being special sessions.

The academy consists of members, honorary members and foreign associates. Members must be citizens of the United States, and the foreign associates are limited in number to 50. The present membership is 90. Officers are elected for a term of six years.

The officers and the dates their terms expire are: President, Alexander Aggassiz, Cambridge, Mass. (1907); vice-president, Aspah Hall, Norfolk, Conn. (1903); foreign secretary, Ira Remsen, Baltimore, Md. (1907); home secretary, Arnold Hague, Washington, D. C. (1907); treasurer, Charles D. Walcott, Washington, D. C. (1904).

CHAUTAUQUA.

In 1874 a camp meeting on the shore of Lake Chautauqua, N. Y., became educational without ceasing to be religious. That was the beginning of the system which has grown into tremendous proportions in the twenty-eight years of its life, and which is known everywhere that books and papers reach. Originally, Chautauqua meant the name of a lake, then it grew to mean the name of a meeting place on the shores of that lake, and then it became the name of an idea. The idea, as formulated by Professor Albert S. Cook, of Yale University, is a "fraternal, enthusiastic, methodical and sustained attempt to elevate, enrich and inspire the individual life in its entirety, by an appeal to the curiosity, hopefulness and ambition of those who would otherwise be debarred from the greatest opportunities of culture and spiritual advancement." The individual is exhorted to meet in circles for his general improvement, and his social instincts are appealed to and cultivated and neighborhood life is made full of a greater charm.

The direct purpose of the Chautauqua is to provide a systematic course of reading in history, literature, science and art. It is in no sense a college either in its course of study or its methods of work. Since its organization 250,000 members have been enrolled, of whom nearly 50,000 have been graduated from the four years' course. Out-of-school people everywhere are welcomed to its fellowship, without any entrance examination or other requirement. The student's statement at the end of four years that he has read the prescribed books is sufficient to entitle him to a diploma.

The Chautauqua Assembly meets yearly, during the Summer months, at Chautauqua, N. Y., and there a course of instruction by reading and lectures is carried on. This village of Chautauqua consists of a Summer colony devoted entirely to the carrying out of the idea of the Assembly. It is of the nature of an educational camp meeting place, fully equipped with the conveniences of town life, and possessing the charm of out of doors living. There is published in connection with the work The Chautauqua Magazine, a monthly periodical, belonging to the Department of Instruction, and during the Summer The Chautauqua Assembly Herald is issued weekly.

The officers are: John H. Vincent, Chancellor; George E. Vincent, Principal; Kate F. Kimball, Executive Secretary; A. M. Martin, Honorary Secretary; W. I. Davidson and George M. Brown, Field Secretaries. Besides these there are secretaries for the various sections of the United States and a Board of Counsellors made up of eight well-known educators.

JEWISH CHAUTAUQUA SOCIETY.

The Jewish Chautauqua is a system of popular Jewish education, based upon exactly the same lines as the Chautauqua Society which had its birth at Lake Chautauqua, New York, some twenty years ago. About ten years ago Rev. Dr. Henry Berkowitz, of Chicago, suggested the adoption by Jews of of the Chautauqua method of study in order to stimulate the interest of the coming generation in Jewish history and achievements. The idea was taken up by influential Jews all over the country, and the society was organized in 1893, with headquarters in Philadelphia. A course book of study was prepared and issued by the Jewish Publication Society and Mrs. Minnie D. Lewis was sent out as an organizer. Within the first two years several thousand pupils were enrolled in the work and the number has steadily grown ever since.

At first all the work was done by the correspondence system and by reading circles, but in 1897, as an experiment, a Summer school was held at Atlantic City, and this was successful far beyond expectations. Each year this Summer assembly is held the number of attendants increases, and last Summer several thousand were in the colony, made up of teachers, rabbis, business men, students, philanthropists and literary men. Courses of lectures are given on biblical and Jewish history and literature, and addresses upon topics of peculiar interest to Jews are made an important feature. All reference to financial and commercial matters is carefully avoided.

The officers of the society for 1902-1903 are Henry Berkowitz, chancellor; Jacob Gimbel, president; Isaac Hassler, secretary and director; Louis Wolf, treasurer; Mrs. Minnie D. Louis, field secretary.

CATHOLIC SUMMER SCHOOL.

The Catholic Summer School, incorporated by the Board of Regents of the State of New York, is instituted for the purpose of providing the Catholics of the United States with the means of meeting during the Summer months, in order to know one another better, understand their strength, enlarge the scope of their education and to get correct views upon the important questions incident to Catholic life in the United States. It is situated on the shore of Lake Champlain, with grounds of about 500 acres in extent. Special courses of study in history, literature and philosophy are provided, and numerous lectures on educational topics are held throughout the sessions. Attention is paid to the social side of the school, and each year camping parties, athletic tournaments and sports of various sorts are organized. The officers elected in 1902 are: Rev. M. J. Lavelle, New York, President; Rev. F. P. Siegfried, Overbrook, Pa., First Vice-President; Warren E. Mosher, New York, Secretary; Rev. John F. Mullany, Syracuse, N. Y., Treasurer.

UNIVERSITY EXTENSION.

The American Society for the Extension of University Teaching was founded at Philadelphia in June, 1890, and incorporated in March, 1892. The present officers are: President, Charles A. Brinley; Treasurer, Frederick B. Miles; Secretary, John Nolen. The office is in Philadelphia. The aim of University Extension is, first, to extend higher education to all classes of people; second, to extend education through the whole of adult life; third, to extend thorough methods of study to subjects of everyday interest. During the academic year 1901-02 the society arranged for the delivery of eighty-four courses of lectures at sixty-four centres. The course attendance at lectures was 22,115. The attendance at classes, held in connection with lectures, was 8,374. The number of courses for 1902-3, arranged by States, is as follows: Pennsylvania, 35; New York, 22; New Jersey, 18; Maryland, 8; Connecticut, 1. The division by subjects is as follows: History, 28; literature, 33; music and art, 17; ethics and philosophy, 5; political economy, 1. The constantly widening use that is being made of the society's lectures and of the University Extension system is shown by the following list and the various auspices under which the courses of last year were delivered: Centres primarily or mainly for teachers, 3; centres under control of women's clubs, 3; People's Institute, New York City (for workingmen), 5 courses; educational institutions (schools, Brooklyn Institute, etc.), 18 courses; New York City Board of Education ("Free Lectures to the People"), 12 courses; free libraries, 3 courses; regular University Extension centres, 40. The society has just completed its twelfth year of work. Since its organization there have been delivered under its auspices 1,133 courses, comprising 6,660 lectures. The average attendance at each lecture has been 205, and the aggregate attendance, 1,365,552. The most important work, outside of that of the general society in Philadelphia, is carried on under the auspices of the University of Chicago, the Regents of the University of New York, Rutgers College, New Brunswick, and in California. Sample syllabi and circulars descriptive of University Extension can be obtained free of charge by addressing John Nolen, Secretary, 111 South Fifteenth street, Philadelphia, Pa.

SOUTHERN EDUCATION BOARD.

The Southern Education Board consists of twelve members. They are Robert C. Ogden, President; George Foster Peabody, Treasurer; Charles D. McIver, Secretary; E. A. Alderman, W. H. Baldwin, Jr., Wallace Buttrick, J. L. M. Curry, Charles W. Dabney, H. B. Frissell, H. H. Hanna, W. H. Page, Albert Shaw and Rev. Edgar G. Murphy. The Board was created and organized November, 1901, in accordance with the platform and resolutions adopted at the fourth annual meeting of the Southern Educational Conference at Winston-Salem, N. C., in April, 1901. The work undertaken by this board is that of agitation and stimulation of all efforts toward universal education in the Southern States. It does not make any gifts to any educational institutions whatever. It has sufficient funds to aid in a campaign for local taxation and for the betterment of public school facilities in several of the Southern States.

So far its chief work has been done in Virginia, North Carolina and Louisiana. It began to arrange for continuous campaigns in these States in January, 1902. It has also done some work in the State of Georgia, and is planning to aid in public educational campaigns in South Carolina, Alabama and Mississippi.

The Southern Education Board is engaged in aiding the friends of education in the Southern States to create a public sentiment in favor of improvement of public school facilities for all the people. The consolidation of school districts, the improvement of public school houses, and the voting of special local taxes for these improvements and for the lengthening of school terms are the definite objects aimed at.

AMERICAN LIBRARY ASSOCIATION.

The American Library Association was organized in Philadelphia, October 6, 1876, as the result of a three days' library conference held in connection with the Centennial Exhibition. Its purposes are the promotion of library interests, the interchange of experience and opinions, the obtaining of larger results from library labor and expenditure, and the advancement of the profession of librarianship. Meetings of the association are held annually in different parts of the country in order that all members may have an equal chance to obtain the great benefits to be derived from such conferences, and the meeting of 1902, which was held in Boston, was the largest in the history of the organization, 1,019 of the 1,100, members being present. The twenty-fifth annual meeting will be held at Niagara Falls, in June next.

The present officers of the association are: President, James K. Hosmer, Minneapolis, Minn.; First Vice-President, James H. Canfield, New York City; Second Vice-President, Anne Wallace, Atlanta, Ga.; Secretary, Frederick W. Faxon, Dorchester, Mass.; Treasurer, Gardner M. Jones, Salem, Mass.; Recorder, Helen E. Haines, New York City; ex-President, John S. Billings, New York City.

NATIONAL MUNICIPAL LEAGUE.

The National Municipal League is composed of associations formed in the various cities of the United States having as their object the improvement of municipal government. It has no connection with National or State issues, but confines its efforts strictly to municipal affairs. Its objects, as stated, are:

1. To multiply the numbers, harmonize the methods and combine the forces of all who realize that it is only by united action and organization that good citizens can secure the adoption of good laws and the selection of men of trained ability and proved integrity for all municipal positions, or prevent the success of incompetent or corrupt candidates for public office. 2. To promote the thorough investigation and discussion of the conditions and details of civic administration, and of the methods for selecting and appointing officials in American cities, and of laws and ordinances relating to such subjects. 3. To provide for such meetings and conferences and for the preparation and circulation of such addresses and other literature as may seem likely to advance the cause of good city government.

The present officers of the League are:

President, James C. Carter, New York; First Vice-President, Charles Richardson, Philadelphia; Second Vice-President, Samuel B. Capen, Boston; Third Vice-President, Thomas N. Strong, Portland, Oregon; Fourth Vice-President, H. Dickson Bruns, New Orleans; Fifth Vice-President, Edmund J. James, Chicago; Secretary, Clinton Rogers Woodruff, Philadelphia; Treasurer, George Burnham, Jr., Philadelphia.

Executive Committee, Charles J. Bonaparte, Chairman, 216 St. Paul street, Baltimore; George W. Guthrie, Pittsburg; Frank N. Hartwell, Louisville; George W. Ochs, Philadelphia; Harry A. Garfield, Cleveland; Hector McIntosh, Philadelphia; William P. Bancroft, Wilmington; William G. Low, Brooklyn; Dudley Tibbits, Troy; Joseph A. Miller, Providence; John A. Butler, Milwaukee; Oliver McClintock, Pittsburg; E. M. Thresher, Dayton, Ohio; Joseph T. Alling, Rochester.

LEAGUE OF AMERICAN MUNICIPALITIES.

The League of American Municipalities may be said to be the result of a united effort on the part of American city officials in all departments to study the various and complex questions involved in municipal administration. In this connection the league furnishes the organization necessary for the proper protection of municipalities against the encroachments of private contractors and corporations; it provides for mayors and council members a ready and convenient means for securing reliable information relating to questions upon which they must act for their municipal cities, and gives to the heads of all municipal departments an economical and prompt method for the interchange of experience and ideas. At present 125 of the most important cities in the United States and Canada hold membership in the league, and their municipal officials are recognized as delegates to its annual conventions.

The officers of the League are: President, J. Adgar Smith, Mayor of Charleston, S. C.; First Vice-President, M. M. Stephens, Mayor of East St. Louis, Ill.; Second Vice-President, Richard J. Barr, Mayor of Joliet, Ill.; Third Vice-President, James M. Head, Mayor of Nashville, Tenn.; Secretary, John MacVicar, Des Moines, Iowa; Treasurer, Thomas P. Taylor, Bridgeport, Conn.; Trustees, Thomas G. Hayes, Mayor of Baltimore, Md.; Jacob Cantor, President of the Borough of Manhattan, N. Y.; John Arbuthnot, Mayor of Winnipeg, Canada; Ignatius A. Sullivan, Mayor of Hartford, Conn.; Isaac S. Hascall, Member of Council, Omaha, Neb., and A. E. Griffin, Member of Council, Columbus, Ohio.

LEARNED SOCIETIES OF AMERICA.

Actuarial Society of America.—Organized in 1889. Its object is "the promotion of actuarial science by personal intercourse, presentation of appropriate papers, discussion, and such other methods as may be found desirable." Membership, 143. Annual dues, $10. Annual meetings in May in New York City. Officers: President, Oscar B. Ireland; first vice-president, Israel C. Pierson; treasurer, Archibald A. Welch; secretary, John Tatlock, Jr., 32 Nassau street, New York City.

Alaska Geographical Society.—The Alaska Geographical Society was organized in 1898 and incorporated in 1900, to encourage geographical exploration and discovery; to disseminate geographical information by discussions, lectures and publications; to foster commerce and navigation; to promote the great industrial, educational and material interests of Alaska and the islands and countries of the Pacific; to establish in such cities as may seem advisable, headquarters and museums where the most recent and accurate information may be obtained relating to every part of the world; to accumulate libraries of the best books, with particular reference to geography, history and statistics; to make collections of the best maps, charts and photographs; and to carry on correspondence with societies and individuals whose work is connected with geography. The headquarters of the society are at Seattle, Tacoma, Juneau and Nome. There are about 1,300 members. The officers are: President, Arthur C. Jackson, F. R. G. S.; secretary, Harrington Emerson, M. A., M. E.; corresponding secretary, Mrs. Isabella C. Jackson; treasurer, B. M. Behrends.

American Academy of Medicine.—Organized in 1876. Its object is "to bring in touch physicians who are graduates of literary and scientific institutions, and to emphasize the importance of a thorough course in training preparatory to the study of medicine." Membership, 861. Initiation fee, $5; annual dues, $1. Officers: President, Charles McIntyre, M. D., Easton, Pa.; vice-president, William R. White, Providence, R. I.; secretary, Alex. R. Craig, Columbia, Pa.; treasurer, Edgar M. Green, Easton, Pa.

American Academy of Political and Social Science.—Founded in 1889; incorporated in 1891. The object of the Academy "is to promote the scientific study and investigation of the social sciences—economics, politics and sociology." Membership, 2,000. Annual dues, $5; life membership, $100. Annual meetings in Philadelphia on the third Monday of January. Officers: L. S. Rowe, Ph. D., University of Pennsylvania; vice-presidents, Samuel McCune Lindsay, Franklin H. Giddings and Woodrow Wilson; treasurer, Stuart Wood, Philadelphia, Pa.; secretary, James T. Young, Ph. D., University of Pennsylvania, Philadelphia, Pa.

American Antiquarian Society.—Organized in 1812 for the purpose of collecting and preserving the antiquities of our country. Membership, 140. Admission fee, $5; annual dues, $5. Officers: President, Stephen Salisbury, Worcester, Mass.; vice-presidents, George F. Hoar, Worcester, Mass., and Edward Everett Hale, Roxbury, Mass.; secretaries, foreign correspondence, Franklin B. Dexter, New Haven, Conn.; domestic correspondence, Charles Francis Adams, Lincoln, Mass.; recording secretary, Charles A. Chase, Worcester, Mass.; treasurer, Nathaniel Paine, Worcester, Mass.

American Asiatic Association.—Organized in 1898. Its object is to foster and safeguard the trade and commercial interests of citizens of the United States in Asiatic countries. Membership, 213. Annual dues, $10. An annual meeting is held in New York City on the third Thursday of October of each year. Officers: President, Silas D. Webb, New York City; vice-president, Samuel D. Brewster, New York City; treasurer, Joseph B. Patterson, New York City; secretary, John Foord, P. O. Box 1,500, New York City.

American Bar Association.—Organized in 1878 "to advance the science of jurisprudence, promote the administration of justice and uniformity of legislation throughout the Union." The membership numbers 1775. The next meeting of the association will be held at Hot Springs, Va., beginning August 26, 1903. The officers are: President, Frank Rawle, Philadelphia, Pa.; secretary, John Hinkley, No. 215 North Charles street, Baltimore, Md.; treasurer, Frederick E. Wadhams, No. 34 Tweddle Building, Albany, N. Y.

American Chemical Society.—Organized in 1876 for the purpose of "the advancement of chemistry and the promotion of chemical research." Membership, 2,100. Dues $5 per year; no initiation fee. The Journal of the American Chemical Society is issued monthly. Officers: President, Ira Remsen, Johns Hopkins University, Baltimore, Md.; secretary, Albert C. Hale, 352A Hancock street, Brooklyn, N. Y.; treasurer, Albert P. Hallock, New York City; editor, William A. Noyes, Terre Haute, Ind.; librarian, E. G. Love, New York City.

American Climatological Association.—Organized in New York City in 1884. Its object is the study of climatology and diseases of the circulatory and respiratory systems. Total membership, 141; active membership limited to 150. Next meeting to be held May 12-14, 1903, at Washington, D. C. Officers: President, Norman Bridge, M. D., Los Angeles, Cal.; secretary-treasurer, Guy Hinsdale, M. D., No. 3943 Chestnut street, Philadelphia, Pa.

American Dermatological Association.—Its object is the furtherance of the scientific study of cutaneous diseases. Membership, 46. Officers: President, Dr. George T. Jackson, New York City; vice-president, Dr. Joseph Zeisler, Chicago, Ill.; secretary-treasurer, Dr. Frank Hugh Montgomery, 100 State st., Chicago, Ill.

American Dialect Society.—Organized in 1888 for the study of pronunciation and the usage of American English. Membership, 300. Annual dues, $1. Publishes "Dialect Notes" each year. Officers: President, Professor George Hempl, University of Michigan, Ann Arbor, Mich.; secretary-treasurer, Professor O. F. Emerson, Western Reserve University, Cleveland, Ohio.

American Economic Association.—Organized in 1885. Its objects are the investigation of economic problems and the publication of the results of such investigations. Membership, 1,000. Officers: President, Professor E. R. A. Seligman, Columbia University, New York City; secretary, Professor Frank A. Fetter, Cornell University, Ithaca, N. Y.

American Electro-Therapeutic Association.—Organized in 1890. Its object is to seek the exact value for the electric current in medicine, to recognize its extension and limitation therein, to prevent its use in quackery, and to discriminate properly in its direct application to disease and departure from health. Membership, 200. Admission fee, $5; annual dues, $5. Officers, President, Fred H. Morse, Melrose, Mass.; first vice-president, Dr. D. R. Brower, Chicago, Ill.; treasurer, Dr. R. J. Nunn, Savannah, Ga.; secretary, Dr. George E. Bill, No. 17 S. Third street, Harrisburg, Pa.

American Entomological Society.—Organized in 1859; incorporated in 1862. Its object is the study of insect life. Membership, 121. Officers: President, P. P. Calvert, Ph. D.; vice-president, H. W. Wenzel; treasurer, E. T. Cresson; recording secretary, Henry Skinner, M. D.; corresponding secretary, C. W. Johnson; curator, Henry Skinner, M. D.; location of the society, Hall of the Academy of Natural Sciences, Nineteenth and Race streets, Philadelphia, Pa.

American Fisheries Society.—Organized in 1870. Its objects are "to promote the cause of fish culture, to gather and diffuse information upon all matters relating to the fisheries and the treatment of all questions regarding fish, of a scientific and economic character." Membership, 370. Annual dues, $1; life membership, $15. Meetings are held once each year. Officers: President, General E. E. Bryant, Madison, Wis.; vice-president, Eugene G. Blackford, New York City; recording secretary, George F. Peabody, Appleton, Wis.; corresponding secretary, John E. Guneckel, Toledo, Ohio; treasurer, C. W. Willard, Westerly, R. I.

American Forestry Association.—Organized in 1882. Its objects are "the discussion of subjects relating to tree planting, the conservation, management and renewal of forests, the collection of forest statistics." Membership, over 2,000. Annual dues, $2. Officers: President, Hon. James Wilson, Secretary of Agriculture, Washington, D. C.; first vice-president, Dr. B. E. Fernow; corresponding secretary, F. H. Newell; recording secretary, George P. Whittlesey; treasurer, Otto J. J. Luebkert; office of the association, No. 202 Fourteenth street, S. W., Washington, D. C.

American Genealogical Society.—A society of expert compilers of family records. Membership fee, $3; annual dues, $3. Officers: President, Dr. M. E. Poole, Ithaca, N. Y.; secretary-treasurer, L. Nelson Nichols, Ithaca, N. Y.

American Geographical Society.—Founded in 1852. Its objects are "the collection, discussion and diffusion of geographical information; the promotion of exploration, and the survey and preservation of our harbors." Membership, about 1,200. Annual dues, $10; life fellowship, $100. The Bulletin of the society is published five times a year. Officers: President (vacant); vice-presidents, C. C. Tiffany, W. H. H. Moore and D. O. Mills; foreign corresponding secretary, Professor William Libbey; domestic corresponding secre-

Digitized by Google

tary, Chandler Robbins; recording secretary, Anton A. Raven; treasurer, W. R. T. Jones. The headquarters of the society are at No. 15 West Eighty-first street, New York City.

American Gynecological Society.—Organized in 1876. Its object is to stimulate investigation and disseminate information concerning obstetrics and diseases of women. Membership, 100. Meetings are held annually. Officers: President, Dr. Joseph Janvrim, New York City; vice-president, Dr. Edward Jenks, Detroit, Mich.; treasurer, Dr. J. Montgomery Baldy, Philadelphia, Pa.; secretary, Dr. J. Riddle Goffe, No. 29 West Forty-sixth street, New York City.

American Historical Association.—Organized in 1884; incorporated by act of Congress, 1889. Its object is the promotion of historical studies. Membership, 1,702. Entrance fee, $3; annual dues, $3. An annual meeting is held during the Christmas holidays in the East or the West or the District of Columbia in triennial succession. Officers: President, Alfred T. Mahan, LL.D., New York City; vice-presidents, Henry C. Lea, LL.D., Philadelphia, Pa., and Professor Goldwin Smith, LL.D., Toronto, Canada; secretary and curator, A. Howard Clark, Smithsonian Institution, Washington, D. C.; corresponding secretary, Charles H. Haskins, University of Wisconsin, Madison, Wis.; treasurer, Clarence W. Bowen, Ph.D., No. 130 Fulton street, New York City.

American Institute of Architects.—Organized in 1857. Its object is the advancement of the art of architecture. Membership, 396 Fellows, 400 associate members and 125 honorary and corresponding members. Officers: President, Charles F. McKim, New York City; first vice-president, Frank M. Day, Philadelphia, Pa.; second vice-president, Alfred Stone, Providence, R. I.; secretary and treasurer, Glenn Brown, the Octagon, Washington, D. C.

American Institute of Electrical Engineers.—Organized in 1884. Its object is "the advancement of the theory and practice of electrical engineering and of the arts and sciences connected with the production and utilization of electricity." Membership, 1,546. Annual dues, $15 for members, $10 for associates. Annual meeting is held on the third Tuesday of May. Officers: President, Charles P. Steinmetz; treasurer, George A. Hamilton, New York City; secretary, Ralph W. Pope, No. 26 Cortlandt street, New York City.

American Institute of Mining Engineers.—Organized in 1873. Its object is "to promote the arts and sciences connected with the economical production of the useful minerals and metals." Membership, 2,875. Entrance fee, $10; annual dues, $10. The annual meeting is held on the third Tuesday of February each year. Officers: President, E. E. Olcott, New York City; treasurer, Theodore D. Rand, Philadelphia, Pa.; secretary, R. W. Raymond, No. 99 John street, New York City.

American-Irish Historical Society.—Founded at Boston, Mass., in 1897. Its object is "to make better known the Irish chapter in American history." Membership, 100. Non-sectarian and non-political. Annual meeting held in New York City. Officers: President-General, Hon. John D. Crimmins, New York City; vice-president-general, Hon. Morgan J. O'Brien, New York City; secretary-general, Thomas H. Murray, No. 34 Newbury street, Boston, Mass.; treasurer-general, Hon. John C. Linehan, Concord, N. H.

American Laryngological Association.—Organized in 1898 for the study of all matters pertaining to nose and throat diseases. Membership, 100. Conventions every third year at Washington, D. C. Officers: President, Dr. J. H. Bryan, Washington, D. C.; secretary-treasurer, Dr. J. E. Newcomb, No. 118 West Sixty-ninth street, New York City.

American Mathematical Society.—Organized in 1894. Its object is to encourage and maintain an active interest in mathematical science. Membership, 375. Initiation fee, $5; annual dues, $5. Annual meeting is held between the 26th and 31st of December, inclusive. Two periodicals, the Bulletin of the American Mathematical Society and the Transactions of the American Mathematical Society, are published. Officers of the society: President, Eliakim Moore; vice-presidents, Frank Morley and Maxime Bocher; secretary, F. N. Cole; treasurer, W. S. Dennett; librarian, D. E. Smith; secretary of Chicago Section, Thomas F. Holgate, No. 617 Hamline street, Evanston, Ill. Offices of the secretary, librarian and Committee of Publication, No. 501 West One Hundred and Sixteenth street, New York City.

American Medical Association.—Incorporated in 1897. Its object is "to federate into one compact organization the medical profession of the United States, for the purpose of fostering the growth and diffusion of medical knowledge," etc. Membership, over 12,000. An equal assessment of not more than $10 is levied annually. Next annual session, New Orleans, La., May 5-8, 1903. Officers: President, Frank Billings, Illinois; first vice-president, J. A. Witherspoon, Tennessee; secretary, George H. Simmons, No. 61 Market street, Chicago, Ill.; treasurer, Henry P. Newman, Illinois.

American Microscopical Society.—Organized in 1878, for the purpose of the encouragement of microscopical research. Membership, 300. Admission fee, $3; annual dues, $2; life membership, $50. Officers: President, Dr. E. A. Birge, Madison, Wis.; first vice-president, Dr. William H. Seaman, Washington, D. C.; second vice-president, Dr. A. M. Holmes, Denver, Col.; secretary, Dr. Henry B. Ward, University of Nebraska, Lincoln, Neb.; treasurer, J. C. Smith, New Orleans; custodian, Magnus Pflaum, Pittsburg, Pa.

American Numismatic and Archaeological Society.—Organized, 1858; incorporated, 1865. Its objects are "the collection of coins and medals, the investigation of matters connected therewith, and the popularization of the science of numismatology." Membership, 300. Officers: President, Andrew C. Zabriskie; recording secretary, Bauman L. Belden; corresponding secretary, J. Sanford Saltus; treasurer, Charles Pryer. Headquarters of the society, No. 1271 Broadway, New York City.

American Ophthalmological Society.—Membership, 158. Annual meeting in conjunction with the congress of Physicians and Surgeons, at Washington, D. C., May, 1903. Officers: President, C. S. Bull, New York City; vice-president, A. Matthewson, Brooklyn, N. Y.; corresponding secretary, J. S. Prout, Brooklyn, N. Y.; recording secretary and treasurer, S. B. St. John, Hartford, Conn.

American Oriental Society.—Organized in 1842, for the purpose of encouraging Oriental literature and the cultivation of learning in Oriental languages. Membership, 353. Annual dues, $5. Officers: President, D. C. Gilman, Johns Hopkins University; corresponding secretary, E. W. Hopkins, Madison, Conn.

American Ornithologists' Union.—Organized in 1813, for the purpose of the advancement of its members in ornithological science. Its present membership is 814, and its officers are: President, Dr. C. Hart Merriam, Washington, D. C.; secretary, John H. Sage, Portland, Conn. The association publishes a journal of ornithology and many works relating to the science. The admission fee varies from $3 to $10, according to the different classes of membership; the annual dues, from $3 to $5.

American Orthopedic Association.—Its object is the advancement of orthopedic science and art. Membership limited to 60. Annual meetings are held every third year, in conjunction with the Congress of American Physicians and Surgeons, at Washington, D. C. Officers: President, Dr. Louis Weigel, Rochester, N. Y.; first vice-president, Dr. Reginald Sayre, New York City; second vice-president, Dr. R. T. Taylor, Baltimore, Md.; treasurer, Dr. E. G. Brackett, Boston, Mass.; secretary, Dr. John Ridlon, No. 103 State street, Chicago, Ill.

American Philological Association.—Organized in 1869. Devoted to the study of languages and literature. Membership, about 600. Admission fee, $5; annual dues, $3. Next annual meeting at Yale University, July, 1903. Officers: President, Professor Charles F. Smith, University of Wisconsin; vice-presidents, Professor George Hempl, University of Michigan, and Professor Mortimer L. Earle, Columbia University, secretary and treasurer, Herbert Weir Smyth, Harvard University.

American Philosophical Society.—Founded in 1743, in consequence of a circular issued by Benjamin Franklin. Its object is "for promoting useful knowledge." Membership, 450. Officers: President, General Isaac J. Wistar; vice-presidents, Coleman Sellers, George F. Barker and Samuel P. Langley; secretaries, I. Minis Hays, Edwin G. Conklin, Arthur W. Goodspeed and Morris Jastrow, Jr. Address of the society, No. 104 South Fifth street, Philadelphia, Pa.

American Physical Society.—Organized for the purpose of promoting the advancement and diffusion of the knowledge of physics. Four meetings are held each year, and the annual fee for membership is $5. The officers are: President, Albert A. Michaelson; vice-president, Arthur G. Webster; secretary, Ernest Merritt, Ithaca, N. Y.; treasurer, William Hallock.

American Public Health Association.—Organized in 1872, for the purpose of advancing public hygiene. Membership, about 500. Admission fee, $5; annual dues, $5. Officers: President, Dr. Henry D. Holton,

KNIGHTS TEMPLAR.

The order of Knights Templar is a revival, in connection with Freemasonry, of some of the chivalric orders of the middle ages. Its ritual is pervaded by the same religious spirit which marks the earlier degrees of Freemasonry, and is such that only a believer in the Christian faith can conscientiously accept its degrees. These consist of Red Cross, Knight Templar and Knight of Malta. To be eligible to knighthood the postulant must be a Royal Arch Mason, and a member in good standing of a "blue lodge" and a Chapter. In Virginia it is required that he shall also have taken the Council degrees. The supreme body of the order in this country is the Grand Encampment of Knights Templar of the United States of America. There are forty-four Grand Commanderies, each representing individual States and Territories excepting one known as the Grand Commandery of Massachusetts and Rhode Island. The subordinate commanderies number 1,051, and the total membership is 128,073. The next conclave of the Grand Encampment will be held at San Francisco, Cal., September 6, 1904. The present officers are as follows: M. E. Grand Master, Henry Bates Stoddard, Bryan, Texas; R. E. Deputy Grand Master, George M. Moulton, Chicago, Ill.; V. E. Grand Generalissimo, Henry W. Rugg, Providence, R. I.; V. E. Grand Captain-General, William B. Melish, Cincinnati, Ohio; V. E. Grand Senior Warden, Joseph A. Locke, Portland, Me.; V. E. Grand Junior Warden, Frank H. Thomas, Washington, D. C.; V. E. Grand Prelate, Daniel Crane Roberts, D. D., Concord, N. H.; V. E. Grand Treasurer, H. Wales Lines, Meriden, Conn.; V. E. Grand Recorder, John A. Gerow, Detroit, Mich.; V. E. Grand Standard Bearer, Arthur McArthur, Troy, N. Y.; V. E. Grand Sword Bearer, Charles C. Vogt, Louisville, Ky.; V. E. Grand Warden, Robert Strong, New Orleans, La.; V. E. Grand Captain of the Guard, Charles E. Rosenbaum, Little Rock, Ark.

ANCIENT AND ACCEPTED SCOTTISH RITE OF FREEMASONRY.

Scottish Rite Masonry, which comprises twenty-nine degrees, from the fourth degree to the thirty-third degree, inclusive, is under two jurisdictions in the United States, known respectively as the Northern and the Southern Masonic Jurisdiction. For each there is a "Supreme Council of Sovereign Grand Inspectors-General of the Thirty-third and Last Degree." The two bodies are in amity with each other and also with the Supreme Councils for France, England, Scotland, Ireland, Belgium, Brazil, the Argentine Republic, Uruguay, Paraguay, Peru, Portugal, Italy, Mexico, Colombia, Chili, Central America, Greece, Canada, Cuba, Switzerland, Egypt, Tunis and Spain.

Northern Masonic Jurisdiction.—In this jurisdiction there are 239 subordinate bodies, with a total membership of 34,035. The officers of the Supreme Council are as follows: M. P. Sovereign Grand Commander, Henry L. Palmer, Wisconsin; P. Grand Lieutenant-Commander, Samuel Crocker Lawrence, Massachusetts; Grand Minister of State, John C. Smith, Illinois; Deputy for New York State, William Homan (there are also Deputies for each of thirteen other States included in the jurisdiction); Grand Treasurer-General, Newton Darling Arnold, Rhode Island; Grand Secretary-General, James H. Codding, No. 133 Stewart Building, New York City.

Southern Masonic Jurisdiction.—The number of subordinate bodies in this jurisdiction is 267, divided as follows: Lodges of Perfection, 102; Chapters of Rose Croix, 65; Councils of Kadosh, 52; Particular Consistories, 45; Grand Consistories, 3. The total membership is 14,867. The officers of the Supreme Council, who are elected for life, are as follows: M. P. Sovereign Grand Commander, James D. Richardson, Tennessee; P. Grand Lieutenant-Commander, Samuel E. Adams; Grand Minister of State, Rufus E. Fleming; Grand Treasurer-General, W. Frank Pierce; Grand Secretary-General, Frederick Webber, Washington, D. C.

NOBLES OF THE MYSTIC SHRINE.

The Ancient Arabic Order of the Nobles of the Mystic Shrine is a body which admits to membership none but Free Masons, this fact leading to an erroneous impression among outsiders that it is a Masonic institution. Those eligible are Masons of the thirty-second degree, A. A. S. Rite (eighteen degrees in England), or Knights Templar in good standing. The order is said to have been originally instituted in the year of the Hegira 25, the year 656 of the Christian era, its founder being the Mohammedan Kalif Alee, cousin german and son-in-law of the Prophet Mohammed. It was established at Mekkah, in Arabia as an organization designed to dispense justice, including the execution of merited punishment, in the case of criminals escaping their just deserts through tardiness of the courts. Another of its aims was to promote religious toleration among cultured men of all nations. The modern order is of recent origin, and has had a rapid growth. The governing body in America is the Imperial Council, and there are eighty-five subordinate bodies, designated Temples. The total membership is 67,354. The next meeting of the Imperial Council will be held at Saratoga, N. Y., July 8 and 9, 1903. The present officers of the Imperial Council are as follows: Imperial Potentate, Henry C. Atkin, Omaha, Neb.; Imperial Deputy Potentate, George H. Green, Dallas, Texas; Imperial Chief Rabban, George L. Brown, Buffalo, N. Y.; Imperial Assistant Rabban, Henry A. Collins, Toronto, Canada; Imperial High Priest and Prophet, Alvah P. Clayton, St. Joseph, Mo.; Imperial Oriental Guide, Frank C. Roundy, Chicago, Ill.; Imperial Treasurer, William S. Brown, No. 529 Wood street, Pittsburg, Pa.; Imperial Recorder, Benjamin W. Rowell, No. 206 Masonic Temple, Boston, Mass.; Imperial First Ceremonial Master, Edwin I. Alderman, Marion, Iowa; Imperial Second Ceremonial Master, George L. Street, Richmond, Va.; Imperial Marshal, Frederick A. Hines, Los Angeles, Cal.; Imperial Captain of Guards, Charles A. Tonsor, Brooklyn, N. Y.; Imperial Outer Guard, J. Frank Treat, Fargo, N. D.

SOVEREIGN COLLEGE OF ALLIED MASONIC AND CHRISTIAN DEGREES OF AMERICA.

This body of Masons confers academic as well as ritualistic degrees, the former being given for honorable cause, and including that of "Doctor of Universal Masonry." Those upon whom this degree, the highest in the gift of the college, has been conferred are Prince Demetrius Rhodocanakis of Greece, the Earl of Euston and William James Hughan, of England; D. Murray Lyon, of Scotland, and Josiah H. Drummond, of Maine. The rites governed by the college comprise the degrees of Ark Mariner, Secret Monitor, Tylers of Solomon, St. Lawrence the Martyr, Knight of Constantinople, Holy and Blessed Order of Wisdom and Trinitarian Knight of St. John of Patmos. This body is in communion with the Grand Council of Allied Masonic Degrees of England and with the Grand Ark Mariners' Council of England. The officers are elected triennially, with the exception of the Sovereign Grand Master, who holds "ad vitam," and the Deputy Grand Master, who also holds for life, with right of succession to the higher office. The following are the principal officers: Sovereign Grand Master, Alfred S. Kimball; Deputy Grand Master, Charles A. Nesbitt; Grand Abbot, Right Rev. A. M. Randolph; Grand Senior Warden, Frederick Webber; Grand Junior Warden, Alfred R. Courtney; Grand Almoner, Josiah H. Drummond; Grand Recorder-General, Howard D. Smith, Norway, Me.; Grand Bursar, Frank N. Barker.

ROYAL ORDER OF SCOTLAND.

A provincial grand lodge of the Royal Order of Scotland was instituted in 1878, with the late Albert Pike as Provincial Grand Master. Its charter was issued by the Grand Lodge of the order at Edinburgh, Scotland. There are no subordinate lodges. The total membership is 271. W. Oscar Roome, Washington, D. C., is secretary.

THE CERNEAU RITE.

A body of Free Masons, holding under the Grand Orient of France, but unrecognized by the general body of Masons in this country, is located in New York City, having two consistories and a "Supreme Council of Sovereign Grand Inspectors-General of the Thirty-third and Last Degree of the Ancient and Accepted Scottish Rite, as organized by Joseph Cerneau, Thirty-third Degree, in the Year 1807." Judah Moses is Grand Secretary-General.

ANCIENT AND PRIMITIVE RITE OF MEMPHIS, IN AND FOR THE CONTINENT OF AMERICA.

The Ancient and Primitive Rite of Masonry, Disciples of Memphis, was founded as a Grand Lodge at Montauban, France, in the year 1814, by the Illustrious Brothers Jacques Etienne Marconis, Samuel Honis of Cairo, Baron Dumas, Hypolite Labrunie, Marquis de Laroque, J. Pettit and others. Jacques Etienne Marconis, in person, established the first organization of the Ancient and Primitive Rite in New York City November 9, 1856, under the name and title of "A Supreme Council, Sublime Masters of the Great Work, Ninetieth Degree." On March 1, 1857, Illustrious and Eminent Brother Marconis organized a "Sovereign Grand Council General, Ninety-fourth Degree, with Illustrious Brother David McLellan, Ninety-fifth Degree, Sovereign Grand Master," granting also a charter which gave full authority for the administration and government of the order. April 27, 1861, the then Sovereign Grand Master resigned and appointed his successor in office, who on June 21, 1862, acting in conjunction with the Illustrious Grand Master Marconis, the Marshall Magnan and the Grand Master of the Grand Orient of France, constituted a Sovereign Sanctuary, ninety-fifth degree, in and for the Continent of America.

Officers of the Sovereign Sanctuary, Ninety-fifth Degree, of Ancient and Primitive Freemasonry, according to the Rite of Memphis, in and for the Continent of America, elected, appointed and installed July 3, 1901, for three years: H. G. Goodale, 96., M. Ill. Sov. Grand Master-General; William F. Ford, 95., Grand Administrator General; J. S. Phillips, 95., Grand Chancellor General; L. K. Goldsmith, 95., Grand Expert General; E. T. Stewart, 95., Grand Secretary General; R. H. Fargue, 95., Grand Treasurer General.

Grand Hierophant, Supreme Sovereign Grand Master and Honorary Grand Patron, Professor F. F. degli Oddi, Ninety-seventh Degree.

The Sovereign Sanctuary for Egypt, Illustrious Brother Professor degli Oddi, 97., Grand Master General; Illustrious Brother Joseph Sakakini, 96., Grand Secretary General, Alexandria, Egypt.

The Sovereign Sanctuary of Great Britain and Ireland, Illustrious Brother John Yarker, 96., Sovereign Grand Master General, Manchester, England.

The Sovereign Sanctuary of Roumania, Illustrious Brother, Captain O. Moroiu, 96., Sovereign Grand Master General.

The Sovereign Sanctuary of Naples, Illustrious Brother Gianbatti Pasini, 96., Sovereign Grand Master General.

The Sovereign Sanctuary of Palermo, Illustrious Brother Professor Salvatore Satille, 96., Sovereign Grand Master General.

The Sovereign Sanctuary of India, Illustrious Brother P. C. Dutt, 96., Sovereign Grand Master General.

The Mystic Temple, Grand Council General, Ninety-fourth Degree, in and for the State of New York, held its biennial assembly for the election of officers for the ensuing two years on the 5th of June, 1901, and the following officers were elected: William F. Ford, 95., V. Ill. Grand Master of Light; William H. Small, 95., Grand Orator; G. W. Winterburn, 94., Grand Examiner; E. J. Powers, 94., Grand Keeper of the Rite; E. T. Stewart, 95., Grand Annalist; H. G. Goodale, 96., Grand Treasurer.

Grand Defenders of the Rite, Ninety-first Degree.—John S. Phillips, 95., Grand Judge of the Statutes; G. W. Winterburn, 94., Grand Defender; R. H. Fargue, 95., Grand Arbitrator; H. A. N. Peterson, 95., Grand Orator; E. T. Stewart, 95., Grand Register; H. G. Goodale, 96., Grand Censor.

Alpha Sublime Council, No. 1, Ninetieth Degree, Valley of New York.—Officers for 1902-3: Ill. Bro. William H. Jutsam, Sublime Dai; Ill. Bro. Edward J. Powers, First Mystagogue; Ill. Bro. Paqsuale Pepe, Second Mystagogue; Ill. Bro. George W. Winterburn, Orator; Ill. Bro. Charles W. Mussotter, Grand Expert; Ill. Bro. William F. Ford, Secretary; Ill. Bro. Harvey G. Goodale, Treasurer; Ill. Bo. William J. Thompson, Archivist.

Samothrace Senate No. 1, Forty-second Degree.—Officers for 1902-3: Ill. Kt. Joseph Russell, Sublime Grand Commander; Ill. Kt. A. C. Henderson, M. L. Senior Kt. Interpreter; Ill. Kt. J. C. Wilkie, M. L. Junior Kt. Interpreter; Ill. Kt. C. W. Mussotter, Knight Orator; Ill. Kt. William F. Ford, Knight Recorder; Ill. Kt. H. G. Geodale, Knight of Finance; Ill. Kt. W. J. Thompsin, Knight Archivist.

Gramercy Rose Croix Chapter, No. 1, Eighteenth Degree.—Officers for 1902-3: Sir Kt. George W. Winterburn, Most Wise; Sir Kt. H. A. N. Peterson, Senior Knight Warden; Sir Kt. William Langschultz, Junior Knight Warden; Sir Kt. C. W. Mussotter, Knight Orator; Sir. Kt. W. F. Ford, Knight Archivist; Sir Kt. H. G. Goodale, Knight Treasurer.

ORDER OF THE EASTERN STAR.

The Order of the Eastern Star is the only body of a Masonic character which admits women as members. It is not itself Masonic except in the restriction which it places upon candidates for admission. Masons in good and regular standing are eligible for membership, and their eligibility extends to their wives, mothers, sisters and daughters. Widows of Masons also are eligible, and the list is confined to these several classes of persons. The order originated in New York City in 1868, and has extended through the country with the result that there are now twenty-four grand lodges in as many States. The objects of the order are to extend to the female members of the families of Masons such social advantages of the ancient fraternity as may be shared with them, and to place them under the protecting care of the older order. New York State has the largest grand chapter and there are a number of subordinate chapters in New York City, the boroughs of Manhattan and Brooklyn having about thirty chapters, while there are about eighty in the State, all told. The officers of the New York Grand Chapter are as follows: M. W. Grand Matron, Mrs. Annie Vass, Brooklyn; M. W. Grand Patron, John P. Frollch; R. W. Grand Treasurer, Mrs. Lucie A. Buddington, No. 72 East One Hundred and Twenty-fifth street, Manhattan; R. W. Grand Secretary, Mrs. Rebecca Miner, No. 338 West Fifty-first street, Manhattan.

COLORED FREE MASONS.

Freemasonry has existed among the colored people of the United States during the entire period of the nation's history. While the colored Masons are denied recognition by the white members of the order, and by their lodges, grand and subordinate, the regularity of their organization and work is recognized by some of the foreign Grand Lodges. The parent lodge was known as African Lodge, and was opened in Boston, Mass., on March 6, 1775, when fifteen colored men were initiated as charter members. Prince Hall, whose name headed the list, was the first Worshipful Master. African Lodge received a warrant from the Grand Lodge of England in 1784, and upon this fact all the lodges of colored Masons base their claim to regularity. The archives of the order in Massachusetts contain evidence indicating that Prince Hall regarded African Lodge as a Provincial Grand Lodge, and himself as the Provincial Grand Master. The African Grand Lodge of Boston was organized as such in 1808. It is now known as the Prince Hall Grand Lodge of Massachusetts, so named in honor of the man who, in that and other States is regarded as the father of Freemasonry among colored men. There are at the present time twenty-eight Grand Lodges in the United States, and one in Ontario. Those in the United States are in Alabama, Arkansas, California, Colorado, Connecticut, Delaware, District of Columbia, Florida, Georgia, Illinois, Iowa, Indiana, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania (organized in 1815), Rhode Island, South Carolina, Texas and West Virginia.

SONS OF JONADAB.

The order of the Sons of Jonadab is a total abstinence organization, instituted in 1867. Its purpose is to inspire men who have become victims of intemperance with a desire to become and continue to be sober men, by the use of moral and physical forces. Persons becoming members of the organization must subscribe to a life pledge to abstain from the use, manufacture and sale of all intoxicating liquors.

The offices of the national order are at Washington, D. C., and the Sovereign Secretary is William H. Young, No. 1324 Ninth street, N. W., Washington, D. C.

The officers of the Sovereign Council are: Sovereign Chief, J. E. Hibbs; Vice-Sovereign Chief, Joseph R. Murphy; Sovereign Secretary, William H. Young; Sovereign Treasurer, F. J. McQuade; Sovereign Patriarch, Charles Rossiter; Sovereign Guide, Charles A. Cabo; Sovereign Watchman, H. W. Marshall, Past Sovereign Chief, Edward Mullin.

INDEPENDENT ORDER OF ODD FELLOWS.

Odd Fellowship originated in the eighteenth century, and flourished in Great Britain especially, where a number of lodges early in the following century, about the year 1813, consolidated into the Manchester Unity, which is now the principal body representing the Order in that country. There is no affiliation between it and the Independent Order of Odd Fellows, which represents Odd Fellowship in the United States, the Dominion of Canada, Australasia, Germany, Denmark, Sweden, Switzerland and the Netherlands. The first permanent lodge was instituted in the United States in 1819, and the objects of the order in this country are "to visit the sick, relieve the distressed, bury the dead, and educate the orphan, to improve and elevate the character of man." In the lodge proper the degree work is based upon the legends of the patriarchal period in Hebrew history. The order has been marked by a series of evolutions, out of which have grown the Encampment branch, the Chevaliers of the Patriarchs Militant and the Rebekah lodges, the latter being made up of both sexes. According to the report of the Grand Secretary of the Sovereign Grand Lodge for the year ended December 31, 1901, the condition of the order on that date is represented by the statistics which follow: Besides the Sovereign Grand Lodge there were 6 quasi-independent grand lodges in foreign countries, 66 grand lodges in the United States and Canada, 55 grand encampments, 12,792 subordinate lodges, 2,780 subordinate encampments, 1,002,272 lodge members, 145,138 encampment members, 40 Rebekah assemblies, the grand bodies of this branch of the order; 5,756 Rebekah lodges and 373,653 Rebekah lodge members. Of the Rebekah lodge members 139,827 were brothers and 233,826 were sisters. The total amount expended by the various bodies during the year was $3,939,785, out of a total revenue of $10,782,562. The total expenses, not including payments on the relief account, were $4,815,508. Funds invested by subordinate lodges, encampments and Rebekah lodges aggregate $29,952,769. Statistics covering the period from 1830 until the close of the year 1901, and including those of the six quasi-independent grand lodges show that there have been 2,544,120 initiations in subordinate lodges; 2,565,905 members relieved; 256,606 widowed families relieved, and a loss of 252,354 members through death. The total revenue for the period was $240,430,422.21; and the total expenditure for relief, $92,665,214.47.

The officers of the Sovereign Grand Lodge are as follows: Grand Sire, John B. Goodwin, Atlanta, Ga.; Deputy Grand Sire, Robert E. Wright, Allentown, Pa.; Grand Secretary, J. Frank Grant, Baltimore, Md.; Grand Treasurer, M. Richards Muckle, Philadelphia, Pa.; Assistant Grand Treasurer, Elvin J. Curry, Baltimore, Md.; Grand Chaplain, J. W. Venable, Hopkinsville, Ky.; Grand Marshal, John B. Cockrum, Indianapolis, Ind.; Grand Guardian, Edwin L. Pilsbury, Boston, Mass.; Grand Messenger, Louis F. Hart, Tacoma, Wash.

KNIGHTS OF PYTHIAS.

The Knights of Pythias is a fraternal benevolent order, with two branches, the Endowment Rank and the Uniform Rank. It is one of the best known and most popular of secret fraternal orders, as well as one of the oldest in the United States, excepting, of course, the Masons. The principles of Pythianism are Friendship, Charity and Benevolence, and the order stands for the sacredness of the home, the integrity of manhood and the purity of woman. The order claims that "the sun shines on the Pythian banner somewhere in the Supreme Domain every hour in the day." Since its foundation the society has grown to remarkable proportions, and has been widespread in its influence.

On the 31st of December, 1901, the order had 540,138 affiliated members, and to these should be added at least 500,000 more who have been suspended for non-payment of dues or have taken withdrawal cards, making the total more than a million. During 1901. 55,202 were initiated, 7,733 re-instated and 7,677 admitted by card, a total of 70,612. During the same year 4,915 died, 268 were expelled, 8,378 withdrew by card, and 33,857 were suspended, leaving a net gain of 23,194 for the year. The relative rank of the Grand Domains places the domain of West Virginia first and that of Delaware last.

The insurance branch, or Endowment Rank, of the order, provides a life insurance for members of the order at a small premium, and under the usual fraternal insurance system. According to reports made at the biennial session of the Supreme Lodge, held in San Francisco, August 12, 1902, this branch had become, instead of a menace, a benefit to the order and its continuance was recommended. The insurance branch was engrafted upon the order by the adoption of the Supreme Constitution in 1894, and became an integral part of it. The Endowment Rank receives and disburses about $2,000,000 annually. In 1900 and 1901 some bad investments, and, according to the report of the Supreme Chancellor, maladministration of the funds, placed the insurance branch in a bad pecuniary position, but through the efforts of the members, and especially of the officers, the obligations were met and the order placed again upon a sound footing. At the same time, investigation was made of a number of contested death claims, and results justified the order in reducing these from 58 to 16.

The commander-in-chief of the Uniform Rank reported at the biennial session a rapid growth in the military branch, and renewed interest in the rank seems to have extended to all parts of the Supreme Domain. At the beginning of 1902 there were 858 companies of the military branch, with an actual membership of 42,510. At this time warrants had been issued for the organization of twenty-three more companies, which had not yet been formed. Between August, 1900, and June 20, 1902, warrants were issued for 157 companies in all, of which all but the twenty-three above mentioned had been put into commission. Seventy-five defunct companies were reorganized between August, 1900, and June, 1902.

The officers elected in 1902 are: Tracy R. Bangs, Grand Forks, N. D., Supreme Chancellor; Charles E. Shiveley, Richmond, Ind., Supreme Vice-Chancellor; George E. Church, Fresno, Cal., Supreme Prelate; R. L. C. White, Nashville, Tenn., Supreme Keeper of Record and Seal; Thomas D. Meares, Wilmington, N. C., Supreme Master of Exchequer; L. H. Farnsworth, Salt Lake City, Utah, Supreme Master at Arms; Cyrus W. Hall, Charleston, W. Va., Supreme Inner Guard; John W. Thompson, Washington, D. C. Supreme Outer Guard; C. F. S. Neal, Chicago, President Board of Control, Endowment Rank; James R. Carnaham, Major-General of the Uniform Rank.

The membership of subordinate lodges, by States, is as follows:

	No. of members Dec. 31, 1900.	No. of members Jan. 1, 1902.		No. of members Dec. 31, 1900.	No. of members Jan. 1, 1902.

KNIGHTS OF PYTHIAS, ENDOWMENT RANK.

Founded as a branch of the Order of Knights of Pythias in 1877. It has about 5,400 local sections all over the United States, Canada, Mexico and the Hawaiian Islands. Total membership, 58,669. Disbursements during 1902, to August, $905,000; total disbursements since organization, $18,105,000. The officers of the Endowment Rank are as follows: President, Charles F. S. Neal, Chicago, Ill.; Secretary, Samuel M. Smith, Chicago, Ill.; General Counsel, Carlos S. Hardy, Chicago, Ill.; Medical Examiner-in-Chief, George G. McConnell, Chicago, Ill.

THE ORDER OF RATHBONE SISTERS.

The Order of Rathbone Sisters is composed of mothers, wives, sisters and daughters of Knights of Pythias. The object of the order is to promote the moral, mental, social and physical elevation of its members, to cultivate a spirit of fraternal love, to minister to the wants of the sick and distressed, to watch at the bedside of the dying and to pay the last tribute to the dead, to comfort and provide for the widow and to daily exemplify the Golden Rule.

The first temple of the order was instituted in 1888, under the name of the Pythian Sisters. The first grand temple was instituted the year following, and two months later the supreme temple was instituted. The present name of the order was adopted in 1894, in honor of the founder of the Knights of Pythias, Justus H. Rathbone. The membership in the United States numbers about 50,000 ladies and 25,000 knights. The order is affiliated with the National Council of Women.

The grand officers for New York State, elected in 1902, are: Mrs. Amelia Linacre, P. G. C.; Mrs. Lena Meritt, G. C.; Mrs. Harriet Campbell, G. S.; Mrs. Serena Smith, G. J.; Mrs. Rebecca Sandham, G. M.; Mrs. Lida Palmer, G. M. R.; Mrs. Emma Nichols, G. M. of F.; Mrs. Nellie Smith, G P.; Mrs. Elizabeth Miller, G. S.

SONS OF ST. GEORGE.

The Sons of St. George is the only fraternal benevolent society composed exclusively of Englishmen, their sons and grandsons, in the United States. Its privileges and benefits are available to all worthy Englishmen between the ages of eighteen and fifty. Its objects are to make provision for its members, their widows and families in time of misfortune, sickness or death, to bind in one common brotherhood Englishmen and those of English descent; to perpetuate in them a love for the motherland, while inculcating love and respect for the land of their adoption and the principles of true American citizenship; to aid them to retain their personal independence and habits; to afford opportunity for social intercourse; to welcome and encourage new arrivals to a strange land, and to prevent such as are strangers from becoming stranded or discouraged. Sick benefits of $5 upward are paid to members, and the death benefits are $100 and upward on the death of a beneficial member, and $50 and upward on the death of the wife of a member in good standing.

The Supreme Lodge officers are: John Kenworthy, Pittsburg, Pa., Supreme President; Walter Willis, South Chicago, Ill., Supreme Vice-President; J. Henry Williams, Philadelphia, Pa., Supreme Secretary; George H. Toop, New York City, Supreme Treasurer; Sandy Harrison, Fall River, Mass., Supreme Messenger; George Smales, Pawtucket, R. I., Supreme Chaplain; George Kingston, Bridgeport, Conn., Past Supreme President. The address of the Supreme Secretary is No. 133 South Twelfth street, Philadelphia.

Daughters of St. George.—Founded in 1885. The order has lodges in every part of the United States. Its membership is composed of white English women, daughters and granddaughters of English parents. The Worthy Grand President is Mrs. M. Steele, Pittsburg, Pa.

SONS OF TEMPERANCE.

The order of Sons of Temperance was instituted in New York September, 29, 1842, and at once assumed a prominent place among the fraternal and benevolent societies having for their foundation principle abstinence from intoxicating beverages. Its objects are to shield its members from the evils of intemperance, to afford mutual assistance in case of sickness, and to elevate the character of its membership, and it purposes to reclaim the inebriate, rescue the moderate drinker, save the young from the power of the drink habit and suppress the drink traffic. The order has three distinct branches, the subordinate division or local society, the grand division, which has supervision over the work in the State or province in which it is located, and the national division, which is the law-making body and exercises general control over the entire order.

The order admits to membership persons of fourteen years of age or over, without regard to sex, social condition or religious belief. It is a secret order, but is destitute of the mystical features of either sign, grip or degree. On March 31, 1902, there were 716 subordinate divisions, with 34,987 members.

Loyal Crusaders, a juvenile branch of the order, are organized by the subordinate divisions. These are open societies for children and are made attractive with a simple ritual, banners and badges.

The national officers elected in 1902 are: William H. Williams, Swampscott, Mass., M. W. P.; William M. Burgoyne, St. Catherine, Ont., M. W. A.; B. R. Jewell, South Hampton, N. H., M. W. S.; M. M. Eavenson, Philadelphia, M. W. T.; Rev. S. Foster Grady, Trenton, N. J., M. W. Chaplain; W. R. Geldert, Truro, N. S., M. W. C.; W. D. McCullon, Auburn, Ohio, M. W. Sentinel; F. M. Bradley, Washington, D. C., M. W. Superintendent; A. G. Lawson, Newark, N. J., P. M. W.

The fifty-ninth annual session will be held in New Haven, Conn., July 8, 1903.

UNITED COMMERCIAL TRAVELLERS OF AMERICA.

The order of United Commercial Travellers of America was organized at Columbus, Ohio, July 16, 1888, with eight members. The order has now a membership of about 20,000, and subordinate councils in all but eleven States. Its membership consists entirely of commercial travellers, either actively engaged in that work or who were engaged in it at the time of their affiliation with the order. Its objects are to unite fraternally all commercial travellers of good moral character; to give all moral and material aid in its power to its members and those dependent upon them; to assist the orphans and widows of deceased members; to establish an indemnity fund to indemnify its members for loss of time resulting from accidental injuries; to secure from all transportation companies and hotels just and equitable favors for commercial travellers as a class, and to elevate the moral and social standing of its members. There are 19 Grand Councils and 203 Subordinate Councils in the United States.

The headquarters of the order are in Columbus, Ohio, corner Front and Gay streets. The officers elected in 1902 are: E. F. Mallory, Chicago, Supreme Councillor; B. E. Zartman, Fort Worth, Texas, Past Councillor; Charles C. Daniel, Columbus, Ohio, Secretary; R. N. Hull, Cleveland, Ohio, Treasurer.

The officers of the New York Subordinate Council, which meets at 117 West Twenty-third street, are:

Digitized by Google

Henry V. Selde, Councilor, and Will E. Warner, 71 Lenox avenue, Secretary and Treasurer. The Brooklyn Subordinate Council meets in the Johnston Building, Flatbush avenue and Nevins street, and its officers are: W. G. Morford, Councillor, and Charles W. Rice, 12 Duane street, New York, Secretary and Treasurer.

THE NATIONAL GRANGE.

The National Grange, or the Order of the Patrons of Husbandry originated in the mind of O. H. Kelley, a man of New England birth, who went to Minnesota in his early manhood, and became a farmer in that section of the country. The idea of giving women full membership originated with Miss Carrie A. Hall, of Boston, Mass., a niece of Mr. Kelley, to whom he had imparted his views of the new association.

The first meeting was held December 4, 1867, and the first Subordinate Grange was organized in Washington, D. C., January 8, 1868. The first dispensation for a Grange was granted at Harrisburg, Pa., April 4, 1868, but the first regular Subordinate Grange to which a charter was issued was organized at Fredonia, N. Y., April 16, 1868.

The first State Grange, that of Minnesota, was organized February 22, 1869.

The first meeting of the National Grange, as a delegate body, was held at Georgetown, D. C., January 8, 1873, with six of the founders and seventeen delegates present, representing in all eleven States.

The object of the Grange is "to develop a better and higher manhood and womanhood among ourselves; to enhance the comforts and attractions of our homes, and to strengthen our attachment to our pursuits." At the end of June last the society consisted of nearly 30,000 Subordinate Granges, 226 of which were organized during the year just ended. In all the order is represented in 44 States and Territories. Its officers are: Master, Aaron Jones, South Bend, Ind.; Overseer, Obadiah Gardner, Rockland, Me.; Lecturer, N. J. Bachelder, Concord, N. H.; Steward, W. C. Jewett, Worcester, Mass.; Assistant Steward, C. O. Raine, Monticello, Mo.; Chaplain, W. K. Thompson, Liberty Hill, S. C.; Treasurer, Mrs. E. S. McDowell, Columbus, Ohio; Secretary, John Trimble, Washington, D. C.; Gate Keeper, George W. Baird, Edina Mills, Minn.; Ceres, Mrs. Martha M. Wilson, Magnolia, Ill.; Pomona, Mrs. Cordelia Atkeson, Morgantown, W. Va.; Flora, Mrs. S. B. Wolcott, Covington, Ky.; Lady Assistant Steward, Mrs. Marie A. Hill, Westford, Pa.

The Executive Committee is composed as follows: E. B. Norris, Chairman, Sodus, N. Y.; J. J. Woodman, Secretary, Paw Paw, Mich.; C. J. Bell, East Hardwick, Vt.; Aaron Jones, ex-officio, South Bend, Ind.

The following persons represent the Grange as State Lecturers: Alabama, the Rev. A. Dougherty, Dothen; California, J. D. Cornell, Sacramento; Colorado, J. F. White, Arvada; Connecticut, Frank S. Hopson, Stratford; Delaware, Professor A. T. Neale, Newark; Illinois, E. H. Clark, Dunlap; Indiana, Mrs. L. G. Robertson, South Bend; Iowa, George Van Houden, Lenox; Kansas, A. P. Reardon, McLouth; Kentucky, J. B. Wallser, Hopkinsville; Maine, W. J. Thompson, So. China; Maryland, J. Enos Ray, Sr., Chillum; Massachusetts, Charles H. Rice, Leominster; Michigan, Mrs. F. D. Saunders, Edgerton; Minnesota, George C. Hill, Elk River; Mississippi, H. S. Simrall, Glass; Missouri, T. B. Dunham, New Cambria; Nebraska, A. M. Bovee, Vacoma; New Hampshire, H. H. Metcalf, Concord; New Jersey, G. L. Gillingham, Moorestown; New York, Mrs. S. N. Judd, Canton; Ohio, S. E. Strode, Westland; Oregon, Austin T. Buxton, Forest Grove; Pennsylvania, Albert M. Cornell, Altus; Rhode Island, T. S. Snow, Wakefield; South Carolina, C. J. Rollins, Stokes Bridge; Tennessee, J. M. McCorkle, White Haven; Texas, John B. Long, Rusk; Vermont, R. B. Galusha, So. Royalton; Washington, James Wheelhouse, Columbus; West Virginia, S. W. Moore, Elwell; Wisconsin, S. C. Carr, Milton Junction.

BENEVOLENT AND PROTECTIVE ORDER OF ELKS.

The Benevolent and Protective Order of Elks of the United States of America is a strictly fraternal order, the members of which find a brotherly welcome in any part of the country where its lodges exist. It was founded in 1868, and has had a steady and substantial growth. There are 806 lodges, the general legislation for which is done by a Grand Lodge. Its sessions are held annually, the subordinate lodges reporting to it at each session. When the latest reports were made up in April, 1902, the total membership was 124,399. It can be safely estimated that the present membership is upward of 130,000. While the order does not include a department for life insurance, or for indemnity in case of disability, it is eminently a charitable organization, disbursing at least $200,000 annually for the relief of members in need of assistance. The actual disbursements on this account during the last financial year were $1,918,580.16. Many of the lodges hold real estate, and the total value of property owned by them is a little over $3,000,000. The aggregate of cash on hand reported by the various lodges on April 1, 1902, was $785,708.20. Following are the officers of the Grand Lodge for the year 1902-3: Grand Exalted Ruler, George P. Cronk, Omaha, Neb.; Grand Esteemed Leading Knight, William B. Brock, Lexington, Ky.; Grand Esteemed Loyal Knight, A. H. Pickens, Denver, Col.; Grand Esteemed Lecturing Knight, Joseph E. Hennings, Anderson, Ind.; Grand Secretary, George A. Reynolds, Saginaw, Mich.; Grand Treasurer, Sam H. Needs, Cleveland, Ohio; Grand Tiler, Charles W. Kaufmann, Hoboken, N. J.; Board of Grand Trustees, Joseph T. Fanning, Indianapolis, Ind.; John D. O'Shea, Lynn, Mass.; Henry W. Mears, Baltimore, Md.; Grand Chaplain, Rev. Walter Davenport Buckner, Pine Bluff, Ark.

INDEPENDENT ORDER OF GOOD TEMPLARS.

This order had its origin in Central New York, where the first lodges were instituted in 1851. Both sexes have been admitted to membership on an equal footing since the first organization, and members are obliged to take a pledge that they "will never make, buy, sell, use, furnish nor cause to be furnished to others, as a beverage, any spirituous or malt liquors, wine or cider, and will discountenance the manufacture and sale thereof in all proper ways." The order has established itself in every part of the world, and its ritual exists in fifteen different languages. At the triennial session of the Supreme Lodge, held in Stockholm, Sweden, in July, 1902, three interpreters were necessary in the transaction of business. There are more than 100 Grand Lodges, and upward of 10,000 subordinate lodges, with a total membership of 560,000. The order has initiated more than ten millions of people since its inception, and it is estimated that it has reclaimed more than three hundred thousand drunkards. There is a juvenile branch, with a total membership of about two hundred thousand.

The next triennial session of the Supreme Lodge will be held in Belfast, Ireland, beginning on August 1, 1905. The officers elected at the session held in Stockholm last year are: R. W. G. Templar, Councilor Joseph Malins, Birmingham, England; P. R. W. G. Templar, Dr. D. H. Mann, Brooklyn, N. Y.; R. W. G. Councilor, Professor J. Bergman, Stockholm, Sweden; R. W. G. Vice-Templar, Mrs. M. McDonald, Edinburgh, Scotland; R. W. G. S. of Juvenile Templars, Miss Jessie Forsyth, Boston, Mass.; R. W. G. Secretary, Colonel B. F. Parker, Milwaukee, Wis.; R. W. G. Treasurer, Herman Blume, Hamburg, Germany; R. W. G. Assistant Secretary, H. Schmidt, Kimberley, South Africa; R. W. G. Chaplain, Rev. S. J. Chowrryappah, Madras; R. W. G. Marshal, Gustav Thomassen, Bergen, Norway; R. W. G. Deputy Marshal, Mrs. M. Gray, Belfast, Ireland; R. W. G. Guard, Haraldur Nielsson, Reykjavik, Iceland; R. W. G. Sentinel, Robinson Cooke, Perth, West Australia; R. W. G. Messenger, Miss Mamie Fisher, Tacoma, Washington, U. S. A.

AMERICAN PROTESTANT ASSOCIATION.

The American Protestant Association, which has for its emblem the "red brick school house," has members in nearly every city in the United States. The officers for 1902 are: Right Worthy Grand Master, Thomas T. Seal, Philadelphia; Right Worthy Vice-Grand Master, William T. Watkins, Wilkesbarre; Right Worthy Grand Secretary, William J. McKee, Philadelphia; Right Worthy Grand Treasurer, L. J. Schleven, Trenton; Right Worthy Grand Conductor, Robert T. Adams, Philadelphia; Right Worthy Grand Assistant Conductor, Charles F. Kupp, Reading; Right Worthy Grand Tyler, James Thompson, Philadelphia; Right Worthy Grand Guard, William McDowell, Philadelphia; Right Worthy Assistant Grand Secretary, William T. Atkinson, Philadelphia; Right Worthy Chaplain, James Armstrong, Philadelphia.

The annual meeting for 1903 will be held in Wilkesbarre, Pa.

Matson, Chicago, Ill.; Supreme Overseer, W. H. Miller, St. Louis, Mo.; Supreme Recorder, M. W. Sackett, Meadville, Pa.; Supreme Receiver, John J. Acker, Albany, N. Y.; Supreme Guide, Louis C. Merrill, Concord, N. H.; Supreme Watchman, S. B. Ritchie, Winnipeg, Man.; Supreme Medical Examiner, D. H. Shields, Hannibal, Mo.

Washington Insurance Union, The.—Organized, 1902. Men and women accepted on equal terms. Its ritual illustrates the character, moral and political principles of George Washington. No losses to date of report. Officers: National President, A. S. Griffin, Canton, Ohio; National Secretary, J. A. Bliss, Canton, Ohio; National Treasurer, C. D. Bachtel, Canton, Ohio.

Western Catholic Union.—Organized, 1877. Pays death and sick benefits. Total membership, 1902, 5,125; losses paid, 1901, $71,500; paid since organization, $764,479. Officers: President, Herman F. Jochern, Quincy, Ill.; Secretary, John Schauf, Quincy, Ill.; Treasurer, H. A. Oenning, Quincy, Ill.

Woodmen of the World.—Founded in 1890. It has one grand body and 5,733 subordinate bodies. Total membership, 292,600; disbursements during 1901, $12,489,666. The officers of the Supreme Camp are as follows: Sovereign Commander, J. C. Root, Omaha, Neb.; Sovereign Adviser, F. A. Falkenburg, Denver, Col.; Sovereign Clerk, John T. Yates, Omaha, Neb.; Sovereign Banker, Morris Sheppard, Texarkana, Tex.; Sovereign Escort, H. F. Simrall, Jr., Columbus, Miss.; Sovereign Watchman, B. W. Jewell, Omaha, Neb.; Sovereign Sentry, Dr. H. Bradshaw, Little Rock, Ark.; Sovereign Physicians, A. D. Cloyd, Omaha, Neb., and Ira W. Porter, Omaha, Neb.

Workmen's Benefit Association.—Organized, 1893. Total membership, 1902, 6,683; losses paid, 1901, $55,000; paid since organization, $226,374. Officers: President, John Mackriele, New Haven, Conn.; Secretary, James H. Cutten, Boston, Mass.; Treasurer, E. J. F. Hasseltine, Boston, Mass.

Yeomen of America.—Founded June 28, 1898. It has one Supreme Council and 153 subordinate councils. Total membership, 6,500; disbursements in 1901, $30,273; total disbursements since organization, $55,855. The officers of the Supreme Council are as follows: Supreme President, W. A. Colledge, Aurora, Ill.; Supreme Vice-President, C. D. Judd, Aurora, Ill.; Supreme Treasurer, C. E. Corlett, Aurora, Ill.; Supreme Secretary, C. M. Coats, Aurora, Ill.

COLLEGE FRATERNITIES.

College fraternities, or secret societies, have become an essential part of the structure of college life. Although in the early years of their existence the faculties in many colleges prohibited the students joining the secret societies, nevertheless these organizations were perpetuated by the best men in college even with the utmost secrecy, often under the most trying conditions, until at length they were tolerated, then permitted, and are now approved by the wisest authorities as beneficial to the members and helpful in the administration and discipline of the college. Each fraternity has chapters in several colleges which are closely affiliated, guided by the same principles, associated by correspondence and interchange of visits, and governed by a grand chapter composed of delegates from the several chapters. Meeting in annual conventions, and interchanging visits, the members form acquaintances and acquire interests which make them broader and more cosmopolitan as college men.

There is an elective affinity by which the members are chosen. Usually they are admitted into the local chapter early in the freshman year, so that the young men have the benefit and advantage of the advice and direct oversight of the upper class men. The members of a good fraternity are jealous of the reputation of their chapter, therefore they carefully guard the character and conduct of the individuals.

The principal object of the best fraternities is to promote friendship, regulate conduct, develop manly character and supplement the college course by exerting an influence toward a broad culture and a noble life.

The spirit and rules are so strong that membership in one fraternity precludes one from membership in another fraternity.

These college fraternities are peculiar to America, and exist in nearly every university and college in the United States and the two principal universities of Canada. Princeton is the only university of prominence which prohibits them.

It is a fact evident to a casual observer that the fraternity men are the most loyal and enthusiastic of the alumni of a college.

Many of the fraternities have published biographical catalogues of their members. The best catalogue is that of Zeta Psi fraternity, issued in 1900, which is a model as to details, contents, typography, paper and binding. Including the photo engravings of fraternity groups, chapter houses and college buildings, it contains 1,200 pages. The edition of 1,000 cost over $15,000.

For many years the chapters rented rooms for their meetings, but the system has so developed that now the general custom is to occupy a house for dormitory as well as for chapter purposes. Many fraternities, by the aid and under the control of alumni, have erected chapter houses adapted specially to fraternity life. These houses differ widely as to style of architecture and arrangement. Many of them are ornaments to the college community, excellent types of which are found in the Alpha Delta Phi house at Williams College, the Delta Psi house at Columbia University, and in the Zeta Psi house at Cornell University.

The principal college fraternities are named below in chronological order:

Name.	Where founded.	When founded.	Name.	Where founded.	When founded.
Kappa Alpha	Union College	1825	Theta Delta Chi	Union College	1847
Sigma Phi	Union College	1827	Phi Gamma Delta	Jefferson College	1848
Delta Phi	Union College	1827	Phi Delta Theta	Miami University	1848
Alpha Delta Phi	Hamilton College	1832	Phi Kappa Sigma	Univ. of Pennsylvania	1850
Psi Upsilon	Union College	1833	Chi Phi	Princeton University	1854
Beta Theta Pi	Miami University	1839	Sigma Chi	Miami University	1855
Chi Psi	Union College	1841	Delta Tau Delta	Bethany College	1860
Delta Kappa Epsilon	Yale University	1844	Alpha Tau Omega	Va. Military Institute	1865
Zeta Psi	New York University	1847	Kappa Alpha (South'n	Washington and Lee	1865
Delta Psi	Columbia University	1847	Sigma Nu	Va. Military Institute	1869

Delta Upsilon was founded at Williams College in 1834 as an anti-secret society, but later it was considered as a non-secret society and is generally counted with the fraternities.

UNITED CHAPTERS OF PHI BETA KAPPA.

By Rev. OSCAR M. VOORHEES, Secretary and Treasurer.

Among all college Greek letter fraternities, that of Phi Beta Kappa stands not only as the oldest organized in the United States, but with the first in standard and desirability. With its membership limited to those who have attained the highest distinction in scholarship in their colleges, its alumni are to be found in the highest positions in public and private life and have numbered among them professors, physicians, clergymen, business men, members of the legal profession and Presidents of the United States. In number the alumni rank well toward the head of the list of college fraternity men in the country.

The Phi Beta Kappa fraternity was organized December 5, 1776, at William and Mary College, Williamsburg, Va., by students in that institution, and is therefore the oldest Greek letter fraternity in this country, having had a continuous existence for over 125 years. The original chapter was disbanded at the end of four years on account of the progress of the Revolution, but was revived in 1849. The civil war again closed its activity, but it was revived in 1893 and again flourishes on its ancient foundation.

Charters were early granted for the establishment of chapters in connection with Yale and Harvard, and from these institutions the fraternity has spread until it now has chapters in 53 of the leading educational institutions in the country.

The first general catalogue was published in 1900 by Rev. E. B. Parsons, D. D., of Williams College, then secretary of the fraternity, and contained the names of over 10,500 living members.

The object of the fraternity is "the promotion of scholarship and friendship among students and graduates of American colleges," and only those are eligible who attain highest rank in their college classes. Charters for chapters are eagerly sought, and the tendency is to restrict them to institutions that aim to promote high attainments in scholarship.

The United Chapters of Phi Beta Kappa is the name by which the central organization of the fraternity is designated. The National Council, composed of three delegates from each chapter, meets every third year. A Senate consisting of twenty members forms an Executive Committee charged with the care of the general interests of the fraternity during the interval between the sessions of the National Council. The organization has reason to be proud of its history, and the unique position it occupies as the "conserver and rewarder of scholastic attainment." Many eminent scholars and statesmen count it an honor to have their names enrolled upon her list of members, and thus be entitled to wear the well-known golden key. Theodore Roosevelt is the fifth of her members to attain the Presidency of the United States, his predecessors being John Quincy Adams, Franklin Pierce, James A. Garfield and Chester A. Arthur.

The present officers of the fraternity are: President, Hon. John A. De Remer, LL. B., Schenectady, N. Y.; vice-president, vacant; secretary and treasurer, Rev. Oscar M. Voorhees, Three Rivers, N. J.

Senators, 1898 to 1904: Hon. Joseph H. Choate, LL. D., London, Eng.; Hon John A. De Remer, LL. D., Schenectady, N. Y.; Hon. Theodore E. Hancock, LL. D., Syracuse, N. Y.; Professor Samuel Hart, D. D., Middletown, Conn.; Colonel Thomas W. Higginson, LL. D., Cambridge, Mass.; Hon. Seth Low, LL. D., New York City; Editor Hamilton W. Mable, L. H. D., New York City; Professor Francis A. March, LL. D., Easton, Pa.

Senators, 1901 to 1907: Professor Henry L. Chapman, D. D., Brunswick, Me.; Professor Edwin Grosvenor, M. A., Amherst, Mass.; Professor Edward Everett Hale, LL. D., Roxbury, Mass.; Colonel William Lamb, LL. D., Norfolk, Va.; Rev. Eben B. Parsons, D. D., Williamstown, Mass.; President Ira Remsen, LL. D., Baltimore, Md.; President Charles F. Thwing, LL. D., Cleveland, Ohio; Rev. Oscar M. Voorhees, M. A., Three Rivers, N. J.; Professor Adolph Werner, Ph. D., New York City; President Benjamin Ide Wheeler, LL.D., Berkeley, Cal.

ARTISTIC, SCIENTIFIC AND EDUCATIONAL.

NATIONAL ACADEMY OF DESIGN.

The National Academy of Design was founded in 1826. Its schools will be open daily to male and female students until May 9, 1903, Sundays and holidays excepted. Admission to the schools is obtained through the examinations held the week beginning January 26, 1903. Applicants for these examinations must register at the office of the Academy during the week prior to these examinations.

The Council for 1902-1903 is composed as follows:

President, Frederich Dielman; Vice-President, J. G. Brown; Corresponding Secretary, H. W. Watrous; Recording Secretary, Will H. Low; Treasurer, Lockwood de Forest; Francis C. Jones, George H. Yewell, Irving R. Wiles, Alfred C. Hurland, Herbert Adams and R. Swain Gifford.

The list of academicians and associate academicians is as follows:

(The addresses of members given in the following list refer to the city of New York when not otherwise specified.)

Academicians—Herbert Adams, 42 West Fifteenth street; George R. Barse, Jr., 11 East Fifty-ninth street; J. Carroll Beckwith, 58 West Fifty-seventh street; Edwin H. Blashfield, 48 West Fifty-ninth street; Robert Blum, 90 Grove street; George H. Boughton, West House, Campden Hill, W., London, Eng.; Carl L. Brandt, Hastings-on-the-Hudson, N. Y.; J. R. Brevoort, 52 East Twenty-third street; Fred'k A. Bridgman, 146 Boulevard Malesherbes, Paris; John B. Bristol, 52 East 23d street; J. G. Brown, 51 West Tenth street; George B. Butler, 116 West Eighty-eighth street; Howard Russell Butler, Carnegie Hall; Charles Calverley, 107 East Twenty-seventh street; William M. Chase, 303 Fifth avenue; F. S. Church, Carnegie Hall; B. West Clinedinst, 1000 Madison avenue; Samuel Colman, 97 Central Park West; Bruce Crane, 154 West Fifty-fifth street; W. P. W. Dana, 7 Rue Scribe, Paris, France; Lockwood De Forest, 7 East Tenth street; Thomas W. Dewing, 51 West Tenth street; Frederick Dielman, 51 West Tenth street; J. H. Dolph, 58 West Fifty-seventh street; Frank Fowler, 106 West Fifty-fifth street; Daniel Chester French, 125 West Eleventh street; Gilbert Gaul, 51 West Tenth street; R. Swain Gifford, 152 West Fifty-seventh street; C. C. Griswold, 262 West Twelfth street; Seymour Joseph Guy, 51 West Tenth street; George Henry Hall, abroad; Hamilton Hamilton, 138 Freemont street, Peekskill, N. Y.; Alexander Harrison, 118 East Fortieth street; J. S. Hartley, 145 West Fifty-fifth street; W. J. Hennessey, Saville Club, London, Eng.; E. L. Henry, 7 West Forty-third street; Winslow Homer, Scarboro, Me.; William H. Howe, Bronxville, N. Y.; Alfred C. Howland, 318 West Fifty-seventh street; Daniel Huntington, 49 East Twentieth street; George Inness, Jr., Carnegie Hall Studios; David Johnson, 69 West One Hundred and Thirty-first street; Eastman Johnson, 65 West Fifty-fifth street; Francis C. Jones, 253 West Forty-second street; Bolton H. Jones, 253 West Forty-second street; John Lafarge, 51 West Tenth street; William H. Lippincott, 37 West Twenty-second street; Will H. Low, Bronxville, N. Y.; William Magrath, 11 East Fourteenth street; George W. Maynard, 156 East Thirty-sixth street; Charles H. Miller, 10 East Twenty-third street; F. D. Millet, Broadway, England; Robert C. Minor, 58 West Fifty-seventh street; Louis Moeller, Edenwald, Wakefield, N. Y.; Thomas Moran, 24 West Twenty-second street; H. Siddons Mowbray, 66 West Eleventh street; J. Francis Murphy, 222 West Twenty-third street; Victor Nehlig, abroad; J. C. Nicoll, 51 West Tenth street; Walter L. Palmer, 5 Lafayette street, Albany, N. Y.; Arthur Parton, 52 East Twenty-third street; E. Wood Perry, 18 East Twelfth street; Benjamin C. Porter, 3 North Washington square; Horace Walcott Robbins, 56 East Fifty-seventh street; John Rogers, New Canaan, Conn.; John S. Sargent, 33 Tite street, Chelsea, S. W., London, Eng.; L. G. Sellstedt, 78 West Mohawk street, Buffalo, N. Y.; Aaron D. Shattuck, Granby, Conn.; Walter Shirlaw, abroad; R. M. Shurtleff, 44 West Twenty-second street; George H. Smillie, 650 Madison avenue; James D. Smillie, 156 East Thirty-sixth street; Augustus St. Gaudens, Windsor, Vt.; Arthur F. Tait, Ludlow Park, Yonkers, N. Y.; Abbott H. (Elect) Thayer, Monadnock, N. H.; Louis C. Tiffany, 335 Fourth avenue; D. W. Tryon, 226 West Fifty-ninth street; C. Y. Turner, 35 West Fourteenth street; Kruseman Van Elten, 9 Rue Campagne premiere, Paris, France; Elihu Vedder, 7 West Forty-third street; Frederic P. Vinton, 247 Newbury street, Boston; Douglas Volk, Center Lovell, Maine; Horatio Walker, Beaulieu, Isle d'Orleans, Can.; Edgar M. Ward, 51 West Tenth street; J. Q. A. Ward, 119 West Fifty-second street; Harry W. Watrous, 58 West Fifty-seventh street; John F. Weir, Yale School of Art, New Haven, Conn.; J. Alden Weir, 146 West Fifty-fifth street; C. D. Weldon, 51 West Tenth street; Worthington Whittredge, Summit, N. J.; Irving R. Wiles, 106 West Fifty-fifth street; Lemuel E. Wilmarth, 352 Adelphi street, Brooklyn; Thomas Waterman Wood, 51 West Tenth street; George H. Yewell, 51 West Tenth street.

Associates—Edwin A. Abbey, Morgan Hall, Fairford, Gloucestershire, Eng.; J. W. Alexander, 123 East Sixty-third street; Thomas Allen, 12 Commonwealth avenue, Boston; Paul W. (Elect) Bartlett, 229 East Twentieth street; Miss Cecilia Beaux, 1710 Chestnut street, Philadelphia; E. A. (Elect) Bell, 226 Central Park, South; Frank W. Benson, Salem, Mass.; William Verplanck Birney, 58 West Fifty-seventh street; Karl (Elect) Bitter, Weehawken, N. J.; George H. Bogert, 204 West Fifty-fifth street; Joseph H. (Elect) Boston, 203 Montague street, Brooklyn; A. T. Bricher, 2 West Fourteenth street; Miss Fidelia Bridges, Canaan, Conn.; George De Forest Brush, Dublin, N. H.; J. Wells Champney, 96 Fifth avenue; Carlton T. Chapman, 58 West Fifty-seventh street; Walter Clark, 939 Eighth avenue; William A. Coffin, 58 West Fifty-seventh street; C. C. Coleman, "The Players," 16 Gramercy Park; E. Irving Couse, 939 Eighth avenue; Kenyon Cox, 145 West Fifty-fifth street; Thomas A. Craig, Rutherford, N. J.; Charles C. Curran, 16 West Sixty-first street; C. H. Dani, Mystic, Conn.; F. De Haven 23 West Twenty-fourth street; H. C. Dearth, Carnegie Studios; Percival De Luce, 52 East Twenty-third street; Louis Paul Dessar, 204 West Fifty-fifth street; Frank Du Mond, 58 West Fifty-seventh street; Thomas Eakins, 1729 Mount Vernon avenue, Philadelphia, Pa.; L. C. Earle, Montclair, N. J.; C. Warren Eaton, 318 West Fifty-seventh street; Henry A. Ferguson, 215 West Fifty-fourth street; Ben Foster, 253 West Forty-second street; Frederich W. Freer, State and Ohio streets, Chicago, Ill.; Edward Gay, Mount Vernon, N. Y.; Frank Russell Green, 211 West 85th street; William St. John Harper, 215 West Fifty-seventh street; Childe Hassam, 139 West Fifty-fifth street; Albert Herter, 841 Madison avenue; William H. Hyde, 105 East Sixty-first street; Samuel Isham, 80 West Fortieth street; William Sergeant Kendall, 26 West Eighth street; William Fair Kline, 152 West Fifty-fifth street; F. W. Kost, 146 West Fifty-fifth street; W. L. Lathrop, New Hope, Pa.; Louis Loeb, 58 West Fifty-seventh street; Mrs. Henry A. Loop, Clifton Springs, N. Y.; Joseph Lyman, Century Club; George H. McCord, 399 Classon avenue, Brooklyn; C. Morgan McIlhenney, Shrub Oak, N. Y.; Frederich McMannus, "The Players;" Constant Mayer, abroad; Henry Mosler, Margaretville, N. Y.; Leonard Ochtman., Cos Cob, Conn.; W. R. O'Donovan, 31 St. Nicholas place; Charles Parsons, Boonton, N. J.; Charles A. Platt, "The Players;" H. R. Poore, Orange, N. J.; Edward Polthast, 52 East Twenty-third street; A. Phimester Proctor, 13 East Thirtieth street; Henry W. Ranger, 228 West Forty-fourth street; F. K. M. Rehn, 222 West Twenty-third street; Frederic Remington, New Rochelle, N. Y.; W. M. J. Rice, 55 West Thirty-third street; Will S. Robinson, 202 West Seventy-fourth street; William Sartain, 152 West Fifty-seventh street; Walter Satterlee, 52 East Twenty-third street; Charles Schreyvogel, 1220 Park avenue, Hoboken, N. J.; R. V. V. Sewell, 139 West Fifty-fifth street; William T. Smedley, 222 West Twenty-third street; George H. Story, 230 West Fifty-ninth street; Charles F. Ulrich, abroad; Robert W. Van Boskerch, 58 West Fifty-seventh street; A. T. Van Laer, 30 East Fifty-seventh street; Robert Vonnoh, Rockland Lake, N. Y.; Henry O. Walker, 152 West Fifty-fifth street; W. J. Whittemore, 318 West Fifty-seventh street; Carleton Wiggins, 1079 Dean street, Brooklyn.

SOCIETY OF AMERICAN ARTISTS.

Many of the most prominent artists and sculptors in the United States are members of the Society of American Artists and its annual exhibitions at No. 215 West Fifty-seventh street, New York, have often attracted international attention. The society awards three prizes each year: "The Shaw Prize," "The Webb Prize" and "The Carnegie Prize." Its officers are: President, John La Farge; vice-president, Kenyon Cox; secretary, Bruce Crane; treasurer, Samuel Isham.

NATIONAL ARTS CLUB.

The National Arts Club was organized in the city of New York, April 24, 1899, its object being to promote the artistic side of American manufacturing by the encouragement of hand made articles, lest machine-made goods should suffocate all art in modern manufacture, as well as to stimulate interest in the embellishment of cities and public buildings, and the immediate success of the club was greatly due to the interest it aroused among public-spirited citizens interested in municipal development.

The Arts Club has never intended to compete with other art societies but rather to co-operate with them. From the start the intention was announced to strive to build up other organizations of artists and art-loving laymen throughout the United States and the purpose has been fulfilled. To this end it allows a rebate of dues paid to local art societies, as set forth in the constitution. In short the club acts as a clearing house for art societies and clubs that promote the fine and industrial arts. In its committee rooms the officers of different art organizations gather; at its dinners the policy of different art societies is discussed. Under its roof the directors of the National Sculpture Society, the Mural Painters, the New York Municipal Art Commission and those of the Municipal Art Societies of New York and other cities meet to confer in a congenial atmosphere, finding a hearty welcome and an interchange of ideas.

The officers of the club are: President, George B. Post, New York; Vice-Presidents, James W. Alexander, New York; Samuel P. Avery, New York; Bernard N. Baker, Baltimore, Md.; George K. Birge, Buffalo, N. Y.; George G. Briggs, Grand Rapids, Mich.; Charles E. Dana, Philadelphia, Pa.; Henry C. Frick, Pittsburg, Pa.; Harry E. Hayes, Cleveland, Ohio; A. Augustus Healy, Brooklyn Borough; William M. Ladd, Portland, Ore.; F. A. Richardson, Burlington, Vt.; E. Francis Riggs, Washington, D. C.; Irving M. Scott, San Francisco, Cal.; Mrs. J. Montgomery Sears, Boston, Mass.; William Watts Taylor, Cincinnati, Ohio; Brooks Adams, Quincy, Mass.; Sir William C. Van Horne, Montreal, Canada; Thomas B. Walker, Minneapolis, Minn.; Treasurer, Spencer Trask, 27 Pine street, New York; Managing Director, Charles De Kay, 413 West Twenty-third street, New York; Secretary, Henry M. Stegman, 37 West Thirty-fourth street, New York.

METROPOLITAN MUSEUM OF ART.

The Metropolitan Museum of Art, Central Park, at Eighty-second street and Fifth avenue, was organized in 1870, and has a membership of 3,500. Henry G. Marquand is president; L. P. Di Cesnola, 109 East Thirty-seventh street, secretary. The directors are Henry G. Marquand, Daniel Huntington, Louis P. Di Cesnola, William L. Andrews, John L. Cadwalader, John Bigelow, Elihu Root, Harris C. Fahnestock, Frederic W. Rhinelander, Salem H. Wales, Robert W. De Forest, J. Pierpont Morgan, Darius O. Mills, Samuel P. Avery, Heber R. Bishop, Rutherford Stuyvesant, William E. Dodge, Joseph H. Choate, Charles S. Smith, John S. Kennedy, Whitelaw Reid, Edward D. Adams, J. Crosby Brown, and William R. Ware.

The Museum is open daily from 10 a. m. until half an hour before sunset; on Sundays after 1 p. m., and on Monday and Friday evenings from 8 to 10. On Monday and Friday, 10 a. m. to 5 p. m., the public is admitted only by payment of a fee of 25 cents. At other times admission is free. Membership in the Museum may be obtained by payment of the annual fee of $10.

NATIONAL EDUCATIONAL ASSOCIATION.

The National Educational Association of the United States was organized at Philadelphia, in 1857, under the name of the National Teachers' Association, and reorganized in 1870 as the National Educational Association, including as departments the former independent organizations, the American Normal School Association and the National Association of School Superintendents.

The departments of the Association now number eighteen, covering every important phase of educational work, as follows: The National Council of Education, Kindergarten, Elementary, Secondary, Higher, Normal, Superintendence, Manual, Art, Music, Business, Child Study, Physical Training, Science Instruction, School Administration, Library, Deaf, Blind, and Feeble-Minded, Indian Education.

The Association held its fortieth annual convention at Detroit, Michigan, in 1901. No meetings were held in 1861, 1862, 1867, 1878, and 1893. In 1893 the International Congresses of Education were held in Chicago, Ill., under the auspices of the Association in connection with the World's Columbian Exposition. The proceedings of these congresses were published by the Association in a volume which constitutes one of the most valuable of the series.

The annual meetings previous to 1884 were small in numbers, averaging about 200 members; since 1884 the annual conventions have averaged more than 6,000 members; since 1895 the average annual membership has been nearly 10,000. These forty conventions within forty-five years have been a most important agency in shaping national educational aims and progress.

The establishment by Congress of the Bureau of Education of the United States and of the office of United States Commissioner of Education was secured through the early efforts of the Association. The recent special committee reports indicate the lines of investigation which, in addition to the work of its annual conventions, have made the Association the largest and most important educational organization in the world.

There are three classes of members: Active members are those who are teachers or who are actively associated with educational work or in the management of educational institutions, including libraries and periodicals. Only active members are privileged to vote at conventions. Any person, on paying a small fee, may become an associate member, entitling him to a volume of the proceedings of the Association each year. Eminent educators not residing in America may become corresponding members when elected by the Directory of the Association, but the number of corresponding members may not exceed fifty. Under special provisions, educational institutions and libraries are enrolled as members, securing thereby the publications of the Association and delegate representation in annual conventions.

The total number of members at the close of 1901 was 10,182, and the total number of members registered at the convention held in Minneapolis, July 7-11, 1902, was 8,191. The executive officers of the Association, elected at the convention in 1902 are: Charles W. Eliot, Cambridge, Mass., President; Irwin Shepard, Winona, Minn., Secretary; W. N. Davidson, Topeka, Kan., Treasurer; Vice-Presidents, William M. Beardshear, Ames, Iowa; O. T. Bright, Chicago, Ill.; Charles F. Reeves, Latona, Wash.; Joseph Kennedy, Grand Forks, N. D.; Charles F. Thwing, Cleveland, Ohio; W. N. Sheats, Tallahassee, Fla.; Miss Marion Brown, New Orleans, La.; James B. Pearcy, Anderson, Ind.; Mrs. Helen L. Grenfell, Denver, Col.; Henry R. Sanford, Penn Yan, N. Y.; J. H. Francis, Los Angeles, Cal.; Wallace G. Nye, Minneapolis, Minn.

UNITED STATES BOARD OF GEOGRAPHIC NAMES.

The United States Board of Geographic Names was organized in accordance with an executive order issued by President Harrison, in 1890, and which required that uniformity in regard to geographic nomenclature and orthography should in the future prevail throughout all departments of the Government. The present position of this Board, therefore, is that of a standard authority, to whom all unsettled questions regarding geographic names are referred, and it is due to its decisions that there is now so much more similarity between the various maps and charts issued by the different bureaus and departments.

The Board is composed of the following members: Chairman, Henry Gannett, U. S. Geological Survey, Washington, D. C.; Secretary, Marcus Baker, Carnegie Institution, Washington, D. C.; members, H. G. Ogden, Coast and Geodetic Survey, Washington, D. C.; A. B. Johnson, Lighthouse Board, Treasury Department, Washington, D. C.; Harry King, General Land Office, Washington, D. C.; Andrew H. Allen, State Department, Washington, D. C.; W. H. H. Southerland, Hydrographic Office, Washington, D. C.; James L. Lusk, War Department, Washington, D. C.; Otis T. Mason, Smithsonian Institution, Washington, D. C.; A. Von Haake, Post Office Department, Washington, D. C.; H. T. Brian, Government Printing Office, Washington, D. C.; John Hyde, Department of Agriculture, Washington, D. C.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

During the past fifty years the names of practically all the leaders of American Science have been on the register of the Association, and the fifty-one volumes of its proceedings contain many of the most important contributions to scientific literature published in this country. At the present time the Association numbers about 4,000 members, and includes in its list of active fellows, such well-known scientific men as Newcomb, Barker, Brush, Young, Lesley, Morse, Langley, Remsen, Mendenhall, Goodale, Prescott, A. Hall, Harkness, Morley, Gibbs, Gill, Putnam, Gilbert, Woodward and Minot. Among the prominent educators who are members and have taken an active interest in its work are ex-President Gilman, of Johns Hopkins; ex-President Low, of Columbia; President Schurman, of Cornell; President Jordan, of Stanford; President Brown, of Lehigh; President Pritchett, of the Massachusetts Institute of Technology; ex-President Mendenhall, of Worcester Polytechnic Institute, and President Dabney, of the University of Tennessee. The Association also admits to membership those who are in sympathy with its aims and who wish to assist in promoting them, even though they are not actually engaged in scientific work.

Meetings of the Association are held annually, each time in a different city, the last seven meetings having been held at Detroit, Boston, Columbus, New York, Denver and Pittsburg. The last meeting will be held December 29, 1902, to January 3, 1903, during "Convocation Week," at Washington, D. C., under the presidency of Dr. Ira Remsen. The Association publishes an annual volume of proceedings which for the past fifty years has, in large measure, reflected the scientific activity of the country.

The officers of the next meeting are: President, Dr. Ira Remsen, Johns Hopkins University; Vice-Presidents, Section A, George B. Halsted, Austin, Tex.; B, E. F. Nichols, Dartmouth College, N. H.; C, Charles Baskerville, Chapel Hill, N. C.; D, C. A. Waldo, Purdue University, Lafayette, Ind.; E, W. M. Davis, Harvard; F, C. W. Hargitt, Syracuse, N. Y.; G, F. V. Coville, Washington; H, G. M. Dorsey, Chicago; I, H. T. Newcomb, Philadelphia; Permanent Secretary, L. O. Howard, Cosmos Club, Washington, D. C.; General Secretary, H. B. Ward, University of Nebraska; Secretary of Council, Charles Wardell Stiles, of Washington.

NATIONAL ACADEMY OF SCIENCES.

The National Academy of Sciences has for its object to investigate, examine, experiment and report upon any subject of science or art, when called upon by the Government of the United States, and the actual expense of such investigation, experiments and reports is paid from appropriations which may be made for the purpose. Under no circumstances does the academy receive any compensation whatever for services to the Government. Annual meetings are held at such places in the United States as may be designated, when reports of the work of the year are made. During 1901 the academy held three sessions, one in Washington in April and two in Philadelphia in November, the latter two being special sessions.

The academy consists of members, honorary members and foreign associates. Members must be citizens of the United States, and the foreign associates are limited in number to 50. The present membership is 90. Officers are elected for a term of six years.

The officers and the dates their terms expire are: President, Alexander Aggassiz, Cambridge, Mass. (1907); vice-president, Aspah Hall, Norfolk, Conn. (1903); foreign secretary, Ira Remsen, Baltimore, Md. (1907); home secretary, Arnold Hague, Washington, D. C. (1907); treasurer, Charles D. Walcott, Washington, D. C. (1904).

CHAUTAUQUA.

In 1874 a camp meeting on the shore of Lake Chautauqua, N. Y., became educational without ceasing to be religious. That was the beginning of the system which has grown into tremendous proportions in the twenty-eight years of its life, and which is known everywhere that books and papers reach. Originally, Chautauqua meant the name of a lake, then it grew to mean the name of a meeting place on the shores of that lake, and then it became the name of an idea. The idea, as formulated by Professor Albert S. Cook, of Yale University, is a "fraternal, enthusiastic, methodical and sustained attempt to elevate, enrich and inspire the individual life in its entirety, by an appeal to the curiosity, hopefulness and ambition of those who would otherwise be debarred from the greatest opportunities of culture and spiritual advancement." The individual is exhorted to meet in circles for his general improvement, and his social instincts are appealed to and cultivated and neighborhood life is made full of a greater charm.

The direct purpose of the Chautauqua is to provide a systematic course of reading in history, literature, science and art. It is in no sense a college either in its course of study or its methods of work. Since its organization 250,000 members have been enrolled, of whom nearly 50,000 have been graduated from the four years' course. Out-of-school people everywhere are welcomed to its fellowship, without any entrance examination or other requirement. The student's statement at the end of four years that he has read the prescribed books is sufficient to entitle him to a diploma.

The Chautauqua Assembly meets yearly, during the Summer months, at Chautauqua, N. Y., and there a course of instruction by reading and lectures is carried on. This village of Chautauqua consists of a Summer colony devoted entirely to the carrying out of the idea of the Assembly. It is of the nature of an educational camp meeting place, fully equipped with the conveniences of town life, and possessing the charm of out of doors living. There is published in connection with the work The Chautauqua Magazine, a monthly periodical, belonging to the Department of Instruction, and during the Summer The Chautauqua Assembly Herald is issued weekly.

The officers are: John H. Vincent, Chancellor; George E. Vincent, Principal; Kate F. Kimball, Executive Secretary; A. M. Martin, Honorary Secretary; W. L. Davidson and George M. Brown, Field Secretaries. Besides these there are secretaries for the various sections of the United States and a Board of Counsellors made up of eight well-known educators.

JEWISH CHAUTAUQUA SOCIETY.

The Jewish Chautauqua is a system of popular Jewish education, based upon exactly the same lines as the Chautauqua Society which had its birth at Lake Chautauqua, New York, some twenty years ago. About ten years ago Rev. Dr. Henry Berkowitz, of Chicago, suggested the adoption by Jews of of the Chautauqua method of study in order to stimulate the interest of the coming generation in Jewish history and achievements. The idea was taken up by influential Jews all over the country, and the society was organized in 1893, with headquarters in Philadelphia. A course book of study was prepared and issued by the Jewish Publication Society and Mrs. Minnie D. Lewis was sent out as an organizer. Within the first two years several thousand pupils were enrolled in the work and the number has steadily grown ever since.

At first all the work was done by the correspondence system and by reading circles, but in 1897, as an experiment, a Summer school was held at Atlantic City, and this was successful far beyond expectations. Each year this Summer assembly is held the number of attendants increases, and last Summer several thousand were in the colony, made up of teachers, rabbis, business men, students, philanthropists and literary men. Courses of lectures are given on biblical and Jewish history and literature, and addresses upon topics of peculiar interest to Jews are made an important feature. All reference to financial and commercial matters is carefully avoided.

The officers of the society for 1902-1903 are Henry Berkowitz, chancellor; Jacob Gimbel, president; Isaac Hassler, secretary and director; Louis Wolf, treasurer; Mrs. Minnie D. Louis, field secretary.

CATHOLIC SUMMER SCHOOL.

The Catholic Summer School, incorporated by the Board of Regents of the State of New York, is instituted for the purpose of providing the Catholics of the United States with the means of meeting during the Summer months, in order to know one another better, understand their strength, enlarge the scope of their education and to get correct views upon the important questions incident to Catholic life in the United States. It is situated on the shore of Lake Champlain, with grounds of about 500 acres in extent. Special courses of study in history, literature and philosophy are provided, and numerous lectures on educational topics are held throughout the sessions. Attention is paid to the social side of the school, and each year camping parties, athletic tournaments and sports of various sorts are organized. The officers elected in 1902 are: Rev. M. J. Lavelle, New York, President; Rev. F. P. Siegfried, Overbrook, Pa., First Vice-President; Warren E. Mosher, New York, Secretary; Rev. John F. Mullany, Syracuse, N. Y., Treasurer.

UNIVERSITY EXTENSION.

The American Society for the Extension of University Teaching was founded at Philadelphia in June, 1890, and incorporated in March, 1892. The present officers are: President, Charles A. Brinley; Treasurer, Frederick B. Miles; Secretary, John Nolen. The office is in Philadelphia. The aim of University Extension is, first, to extend higher education to all classes of people; second, to extend education through the whole of adult life; third, to extend thorough methods of study to subjects of everyday interest. During the academic year 1901-02 the society arranged for the delivery of eighty-four courses of lectures at sixty-four centres. The course attendance at lectures was 22,115. The attendance at classes, held in connection with lectures, was 8,374. The number of courses for 1902-3, arranged by States, is as follows: Pennsylvania, 35; New York, 22; New Jersey, 18; Maryland, 8; Connecticut, 1. The division by subjects is as follows: History, 28; literature, 33; music and art, 17; ethics and philosophy, 5; political economy, 1. The constantly widening use that is being made of the society's lectures and of the University Extension system is shown by the following list and the various auspices under which the courses of last year were delivered: Centres primarily or mainly for teachers, 3; centres under control of women's clubs, 3; People's Institute, New York City (for workingmen), 5 courses; educational institutions (schools, Brooklyn Institute, etc.), 18 courses; New York City Board of Education ("Free Lectures to the People"), 12 courses; free libraries, 3 courses; regular University Extension centres, 40. The society has just completed its twelfth year of work. Since its organization there have been delivered under its auspices 1,133 courses, comprising 6,660 lectures. The average attendance at each lecture has been 205, and the aggregate attendance, 1,365,552. The most important work, outside of that of the general society in Philadelphia, is carried on under the auspices of the University of Chicago, the Regents of the University of New York, Rutgers College, New Brunswick, and in California. Sample syllabi and circulars descriptive of University Extension can be obtained free of charge by addressing John Nolen, Secretary, 111 South Fifteenth street, Philadelphia, Pa.

SOUTHERN EDUCATION BOARD.

The Southern Education Board consists of twelve members. They are Robert C. Ogden, President; George Foster Peabody, Treasurer; Charles D. McIver, Secretary; E. A. Alderman, W. H. Baldwin, Jr., Wallace Buttrick, J. L. M. Curry, Charles W. Dabney, H. B. Frissell, H. H. Hanna, W. H. Page, Albert Shaw and Rev. Edgar G. Murphy. The Board was created and organized November, 1901, in accordance with the platform and resolutions adopted at the fourth annual meeting of the Southern Educational Conference at Winston-Salem, N. C., in April, 1901. The work undertaken by this board is that of agitation and stimulation of all efforts toward universal education in the Southern States. It does not make any gifts to any educational institutions whatever. It has sufficient funds to aid in a campaign for local taxation and for the betterment of public school facilities in several of the Southern States.

So far its chief work has been done in Virginia, North Carolina and Louisiana. It began to arrange for continuous campaigns in these States in January, 1902. It has also done some work in the State of Georgia, and is planning to aid in public educational campaigns in South Carolina, Alabama and Mississippi.

The Southern Education Board is engaged in aiding the friends of education in the Southern States to create a public sentiment in favor of improvement of public school facilities for all the people. The consolidation of school districts, the improvement of public school houses, and the voting of special local taxes for these improvements and for the lengthening of school terms are the definite objects aimed at.

AMERICAN LIBRARY ASSOCIATION.

The American Library Association was organized in Philadelphia, October 6, 1876, as the result of a three days' library conference held in connection with the Centennial Exhibition. Its purposes are the promotion of library interests, the interchange of experience and opinions, the obtaining of larger results from library labor and expenditure, and the advancement of the profession of librarianship. Meetings of the association are held annually in different parts of the country in order that all members may have an equal chance to obtain the great benefits to be derived from such conferences, and the meeting of 1902, which was held in Boston, was the largest in the history of the organization, 1,019 of the 1,100, members being present. The twenty-fifth annual meeting will be held at Niagara Falls, in June next.

The present officers of the association are: President, James K. Hosmer, Minneapolis, Minn.; First Vice-President, James H. Canfield, New York City; Second Vice-President, Anne Wallace, Atlanta, Ga.; Secretary, Frederick W. Faxon, Dorchester, Mass.; Treasurer, Gardner M. Jones, Salem, Mass.; Recorder, Helen E. Haines, New York City; ex-President, John S. Billings, New York City.

NATIONAL MUNICIPAL LEAGUE.

The National Municipal League is composed of associations formed in the various cities of the United States having as their object the improvement of municipal government. It has no connection with National or State issues, but confines its efforts strictly to municipal affairs. Its objects, as stated, are:

1. To multiply the numbers, harmonize the methods and combine the forces of all who realize that it is only by united action and organization that good citizens can secure the adoption of good laws and the selection of men of trained ability and proved integrity for all municipal positions, or prevent the success of incompetent or corrupt candidates for public office. 2. To promote the thorough investigation and discussion of the conditions and details of civic administration, and of the methods for selecting and appointing officials in American cities, and of laws and ordinances relating to such subjects. 3. To provide for such meetings and conferences and for the preparation and circulation of such addresses and other literature as may seem likely to advance the cause of good city government.

The present officers of the League are:

President, James C. Carter, New York; First Vice-President, Charles Richardson, Philadelphia; Second Vice-President, Samuel B. Capen, Boston; Third Vice-President, Thomas N. Strong, Portland, Oregon; Fourth Vice-President, H. Dickson Bruns, New Orleans; Fifth Vice-President, Edmund J. James, Chicago; Secretary, Clinton Rogers Woodruff, Philadelphia; Treasurer, George Burnham, Jr., Philadelphia.

Executive Committee, Charles J. Bonaparte, Chairman, 216 St. Paul street, Baltimore; George W. Guthrie, Pittsburg; Frank N. Hartwell, Louisville; George W. Ochs, Philadelphia; Harry A. Garfield, Cleveland; Hector McIntosh, Philadelphia; William P. Bancroft, Wilmington; William G. Low, Brooklyn; Dudley Tibbits, Troy; Joseph A. Miller, Providence; John A. Butler, Milwaukee; Oliver McClintock, Pittsburg; E. M. Thresher, Dayton, Ohio; Joseph T. Alling, Rochester.

LEAGUE OF AMERICAN MUNICIPALITIES.

The League of American Municipalities may be said to be the result of a united effort on the part of American city officials in all departments to study the various and complex questions involved in municipal administration. In this connection the league furnishes the organization necessary for the proper protection of municipalities against the encroachments of private contractors and corporations; it provides for mayors and council members a ready and convenient means for securing reliable information relating to questions upon which they must act for their municipal cities, and gives to the heads of all municipal departments an economical and prompt method for the interchange of experience and ideas. At present 125 of the most important cities in the United States and Canada hold membership in the league, and their municipal officials are recognized as delegates to its annual conventions.

The officers of the League are: President, J. Adgar Smith, Mayor of Charleston, S. C.; First Vice-President, M. M. Stephens, Mayor of East St. Louis, Ill.; Second Vice-President, Richard J. Barr, Mayor of Joliet, Ill.; Third Vice-President, James M. Head, Mayor of Nashville, Tenn.; Secretary, John MacVicar, Des Moines, Iowa; Treasurer, Thomas P. Taylor, Bridgeport, Conn.; Trustees, Thomas G. Hayes, Mayor of Baltimore, Md.; Jacob Cantor, President of the Borough of Manhattan, N. Y.; John Arbuthnot, Mayor of Winnipeg, Canada; Ignatius A. Sullivan, Mayor of Hartford, Conn.; Isaac S. Hascall, Member of Council, Omaha, Neb., and A. E. Griffin, Member of Council, Columbus, Ohio.

LEARNED SOCIETIES OF AMERICA.

Actuarial Society of America.—Organized in 1889. Its object is "the promotion of actuarial science by personal intercourse, presentation of appropriate papers, discussion, and such other methods as may be found desirable." Membership, 143. Annual dues, $10. Annual meetings in May in New York City. Officers: President, Oscar B. Ireland; first vice-president, Israel C. Pierson; treasurer, Archibald A. Welch; secretary, John Tatlock, Jr., 32 Nassau street, New York City.

Alaska Geographical Society.—The Alaska Geographical Society was organized in 1898 and incorporated in 1900, to encourage geographical exploration and discovery; to disseminate geographical information by discussions, lectures and publications; to foster commerce and navigation; to promote the great industrial, educational and material interests of Alaska and the islands and countries of the Pacific; to establish in such cities as may seem advisable, headquarters and museums where the most recent and accurate information may be obtained relating to every part of the world; to accumulate libraries of the best books, with particular reference to geography, history and statistics; to make collections of the best maps, charts and photographs; and to carry on correspondence with societies and individuals whose work is connected with geography. The headquarters of the society are at Seattle, Tacoma, Juneau and Nome. There are about 1,300 members. The officers are: President, Arthur C. Jackson, F. R. G. S.; secretary, Harrington Emerson, M. A., M. E.; corresponding secretary, Mrs. Isabella C. Jackson; treasurer, B. M. Behrends.

American Academy of Medicine.—Organized in 1876. Its object is "to bring in touch physicians who are graduates of literary and scientific institutions, and to emphasize the importance of a thorough course in training preparatory to the study of medicine." Membership, 861. Initiation fee, $5; annual dues, $1. Officers: President, Charles McIntyre, M. D., Easton, Pa.; vice-president, William R. White, Providence, R. I.; secretary, Alex. R. Craig, Columbia, Pa.; treasurer, Edgar M. Green, Easton, Pa.

American Academy of Political and Social Science.—Founded in 1889; incorporated in 1891. The object of the Academy "is to promote the scientific study and investigation of the social sciences—economics, politics and sociology." Membership, 2,000. Annual dues, $5; life membership, $100. Annual meetings in Philadelphia on the third Monday of January. Officers: L. S. Rowe, Ph. D., University of Pennsylvania; vice-presidents, Samuel McCune Lindsay, Franklin H. Giddings and Woodrow Wilson; treasurer, Stuart Wood, Philadelphia, Pa.; secretary, James T. Young, Ph. D., University of Pennsylvania, Philadelphia, Pa.

American Antiquarian Society.—Organized in 1812 for the purpose of collecting and preserving the antiquities of our country. Membership, 140. Admission fee, $5; annual dues, $5. Officers: President, Stephen Salisbury, Worcester, Mass.; vice-presidents, George F. Hoar, Worcester, Mass., and Edward Everett Hale, Roxbury, Mass.; secretaries, foreign correspondence, Franklin B. Dexter, New Haven, Conn.; domestic correspondence, Charles Francis Adams, Lincoln, Mass.; recording secretary, Charles A. Chase, Worcester, Mass.; treasurer, Nathaniel Paine, Worcester, Mass.

American Asiatic Association.—Organized in 1898. Its object is to foster and safeguard the trade and commercial interests of citizens of the United States in Asiatic countries. Membership, 213. Annual dues, $10. An annual meeting is held in New York City on the third Thursday of October of each year. Officers: President, Silas D. Webb, New York City; vice-president, Samuel D. Brewster, New York City; treasurer, Joseph R. Patterson, New York City; secretary, John Foord, P. O. Box 1,500, New York City.

American Bar Association.—Organized in 1878 "to advance the science of jurisprudence, promote the administration of justice and uniformity of legislation throughout the Union." The membership numbers 1775. The next meeting of the association will be held at Hot Springs, Va., beginning August 26, 1903. The officers are: President, Frank Rawle, Philadelphia, Pa.; secretary, John Hinkley, No. 215 North Charles street, Baltimore, Md.; treasurer, Frederick E. Wadhams, No. 34 Tweddle Building, Albany, N. Y.

American Chemical Society.—Organized in 1876 for the purpose of "the advancement of chemistry and the promotion of chemical research." Membership, 2,100. Dues $5 per year; no initiation fee. The Journal of the American Chemical Society is issued monthly. Officers: President, Ira Remsen, Johns Hopkins University, Baltimore, Md.; secretary, Albert C. Hale, 352A Hancock street, Brooklyn, N. Y.; treasurer, Albert P. Hallock, New York City; editor, William A. Noyes, Terre Haute, Ind.; librarian, E. G. Love, New York City.

American Climatological Association.—Organized in New York City in 1884. Its object is the study of climatology and diseases of the circulatory and respiratory systems. Total membership, 141; active membership limited to 150. Next meeting to be held May 12-14, 1903, at Washington, D. C. Officers: President, Norman Bridge, M. D., Los Angeles, Cal.; secretary-treasurer, Guy Hinsdale, M. D., No. 3943 Chestnut street, Philadelphia, Pa.

American Dermatological Association.—Its object is the furtherance of the scientific study of cutaneous diseases. Membership, 46. Officers: President, Dr. George T. Jackson, New York City; vice-president, Dr. Joseph Zeisler, Chicago, Ill.; secretary-treasurer, Dr. Frank Hugh Montgomery, 100 State st., Chicago, Ill.

American Dialect Society.—Organized in 1888 for the study of pronunciation and the usage of American English. Membership, 300. Annual dues, $1. Publishes "Dialect Notes" each year. Officers: President, Professor George Hempl, University of Michigan, Ann Arbor, Mich.; secretary-treasurer, Professor O. F. Emerson, Western Reserve University, Cleveland, Ohio.

American Economic Association.—Organized in 1885. Its objects are the investigation of economic problems and the publication of the results of such investigations. Membership, 1,000. Officers: President, Professor E. R. A. Seligman, Columbia University, New York City; secretary, Professor Frank A. Fetter, Cornell University, Ithaca, N. Y.

American Electro-Therapeutic Association.—Organized in 1890. Its object is to seek the exact value for the electric current in medicine, to recognize its extension and limitation therein, to prevent its use in quackery, and to discriminate properly in its direct application to disease and departure from health. Membership, 200. Admission fee, $5; annual dues, $5. Officers, President, Fred H. Morse, Melrose, Mass.; first vice-president, Dr. D. R. Brower, Chicago, Ill.; treasurer, Dr. R. J. Nunn, Savannah, Ga.; secretary, Dr. George E. Bill, No. 17 S. Third street, Harrisburg, Pa.

American Entomological Society.—Organized in 1859; incorporated in 1862. Its object is the study of insect life. Membership, 121. Officers: President, P. P. Calvert, Ph. D.; vice-president, H. W. Wenzel; treasurer, E. T. Cresson; recording secretary, Henry Skinner, M. D.; corresponding secretary, C. W. Johnson; curator, Henry Skinner, M. D.; location of the society, Hall of the Academy of Natural Sciences, Nineteenth and Race streets, Philadelphia, Pa.

American Fisheries Society.—Organized in 1870. Its objects are "to promote the cause of fish culture, to gather and diffuse information upon all matters relating to the fisheries and the treatment of all questions regarding fish, of a scientific and economic character." Membership, 370. Annual dues, $1; life membership, $15. Meetings are held once each year. Officers: President, General E. E. Bryant, Madison, Wis.; vice-president, Eugene G. Blackford, New York City; recording secretary, George F. Peabody, Appleton, Wis.; corresponding secretary, John E. Guneckel, Toledo, Ohio; treasurer, C. W. Willard, Westerly, R. I.

American Forestry Association.—Organized in 1882. Its objects are "the discussion of subjects relating to tree planting, the conservation, management and renewal of forests, the collection of forest statistics." Membership, over 2,000. Annual dues, $2. Officers: President, Hon. James Wilson, Secretary of Agriculture, Washington, D. C.; first vice-president, Dr. B. E. Fernow; corresponding secretary, F. H. Newell; recording secretary, George P. Whittlesey; treasurer, Otto J. J. Luebkert; office of the association, No. 202 Fourteenth street, S. W., Washington, D. C.

American Genealogical Society.—A society of expert compilers of family records. Membership fee, $3; annual dues, $3. Officers: President, Dr. M. E. Poole, Ithaca, N. Y.; secretary-treasurer, L. Nelson Nichols, Ithaca, N. Y.

American Geographical Society.—Founded in 1852. Its objects are "the collection, discussion and diffusion of geographical information; the promotion of exploration, and the survey and preservation of our harbors." Membership, about 1,200. Annual dues, $10; life fellowship, $100. The Bulletin of the society is published five times a year. Officers: President (vacant); vice-presidents, C. C. Tiffany, W. H. H. Moore and D. O. Mills; foreign corresponding secretary, Professor William Libbey; domestic corresponding secre-

Digitized by Google

tary, Chandler Robbins; recording secretary, Anton A. Raven; treasurer, W. R. T. Jones. The headquarters of the society are at No. 15 West Eighty-first street, New York City.

American Gynecological Society.—Organized in 1876. Its object is to stimulate investigation and disseminate information concerning obstetrics and diseases of women. Membership, 100. Meetings are held annually. Officers: President, Dr. Joseph Janvrim, New York City; vice-president, Dr. Edward Jenks, Detroit, Mich.; treasurer, Dr. J. Montgomery Baldy, Philadelphia, Pa.; secretary, Dr. J. Riddle Goffe, No. 29 West Forty-sixth street, New York City.

American Historical Association.—Organized in 1884; incorporated by act of Congress, 1889. Its object is the promotion of historical studies. Membership, 1,702. Entrance fee, $3; annual dues, $3. An annual meeting is held during the Christmas holidays in the East or the West or the District of Columbia in triennial succession. Officers: President, Alfred T. Mahan, LL.D., New York City; vice-presidents, Henry C. Lea, LL.D., Philadelphia, Pa., and Professor Goldwin Smith, LL.D., Toronto, Canada; secretary and curator, A. Howard Clark, Smithsonian Institution, Washington, D. C.; corresponding secretary, Charles H. Haskins, University of Wisconsin, Madison, Wis.; treasurer, Clarence W. Bowen, Ph.D., No. 130 Fulton street, New York City.

American Institute of Architects.—Organized in 1857. Its object is the advancement of the art of architecture. Membership, 396 Fellows, 400 associate members and 125 honorary and corresponding members. Officers: President, Charles F. McKim, New York City; first vice-president, Frank M. Day, Philadelphia, Pa.; second vice-president, Alfred Stone, Providence, R. I.; secretary and treasurer, Glenn Brown, the Octagon, Washington, D. C.

American Institute of Electrical Engineers.—Organized in 1884. Its object is "the advancement of the theory and practice of electrical engineering and of the arts and sciences connected with the production and utilization of electricity." Membership, 1,546. Annual dues, $15 for members, $10 for associates. Annual meeting is held on the third Tuesday of May. Officers: President, Charles P. Steinmetz; treasurer, George A. Hamilton, New York City; secretary, Ralph W. Pope, No. 26 Cortlandt street, New York City.

American Institute of Mining Engineers.—Organized in 1873. Its object is "to promote the arts and sciences connected with the economical production of the useful minerals and metals." Membership, 2,875. Entrance fee, $10; annual dues, $10. The annual meeting is held on the third Tuesday of February each year. Officers: President, E. E. Olcott, New York City; treasurer, Theodore D. Rand, Philadelphia, Pa.; secretary, R. W. Raymond, No. 99 John street, New York City.

American-Irish Historical Society.—Founded at Boston, Mass., in 1897. Its object is "to make better known the Irish chapter in American history." Membership, 100. Non-sectarian and non-political. Annual meeting held in New York City. Officers: President-General, Hon. John D. Crimmins, New York City; vice-president-general, Hon. Morgan J. O'Brien, New York City; secretary-general, Thomas H. Murray, No. 34 Newbury street, Boston, Mass.; treasurer-general, Hon. John C. Linehan, Concord, N. H.

American Laryngological Association.—Organized in 1898 for the study of all matters pertaining to nose and throat diseases. Membership, 100. Conventions every third year at Washington, D. C. Officers: President, Dr. J. H. Bryan, Washington, D. C.; secretary-treasurer, Dr. J. E. Newcomb, No. 118 West Sixty-ninth street, New York City.

American Mathematical Society.—Organized in 1894. Its object is to encourage and maintain an active interest in mathematical science. Membership, 375. Initiation fee, $5; annual dues, $5. Annual meeting is held between the 26th and 31st of December, inclusive. Two periodicals, the Bulletin of the American Mathematical Society and the Transactions of the American Mathematical Society, are published. Officers of the society: President, Eliakin Moore; vice-presidents, Frank Morley and Maxime Bocher; secretary, F. N. Cole; treasurer, W. S. Dennett; librarian, D. E. Smith; secretary of Chicago Section, Thomas F. Holgate, No. 617 Hamline street, Evanston, Ill. Offices of the secretary, librarian and Committee of Publication, No. 501 West One Hundred and Sixteenth street, New York City.

American Medical Association.—Incorporated in 1897. Its object is "to federate into one compact organization the medical profession of the United States, for the purpose of fostering the growth and diffusion of medical knowledge," etc. Membership, over 12,000. An equal assessment of not more than $10 is levied annually. Next annual session, New Orleans, La., May 5-8, 1903. Officers: President, Frank Billings, Illinois; first vice-president, J. A. Witherspoon, Tennessee; secretary, George H. Simmons, No. 61 Market street, Chicago, Ill.; treasurer, Henry P. Newman, Illinois.

American Microscopical Society.—Organized in 1878, for the purpose of the encouragement of microscopical research. Membership, 300. Admission fee, $3; annual dues, $2; life membership, $50. Officers: President, Dr. E. A. Birge, Madison, Wis.; first vice-president, Dr. William H. Seaman, Washington, D. C.; second vice-president, Dr. A. M. Holmes, Denver, Col.; secretary, Dr. Henry B. Ward, University of Nebraska, Lincoln, Neb.; treasurer, J. C. Smith, New Orleans; custodian, Magnus Pflaum, Pittsburg, Pa.

American Numismatic and Archaeological Society.—Organized, 1858; incorporated, 1865. Its objects are "the collection of coins and medals, the investigation of matters connected therewith, and the popularization of the science of numismatology." Membership, 300. Officers: President, Andrew C. Zabriskie; recording secretary, Bauman L. Belden; corresponding secretary, J. Sanford Saltus; treasurer, Charles Pryer. Headquarters of the society, No. 1271 Broadway, New York City.

American Ophthalmological Society.—Membership, 158. Annual meeting in conjunction with the congress of Physicians and Surgeons, at Washington, D. C., May, 1903. Officers: President, C. S. Bull, New York City; vice-president, A. Matthewson, Brooklyn, N. Y.; corresponding secretary, J. S. Prout, Brooklyn, N. Y.; recording secretary and treasurer, S. B. St. John, Hartford, Conn.

American Oriental Society.—Organized in 1842, for the purpose of encouraging Oriental literature and the cultivation of learning in Oriental languages. Membership, 353. Annual dues, $5. Officers: President, D. C. Gilman, Johns Hopkins University; corresponding secretary, E. W. Hopkins, Madison, Conn.

American Ornithologists' Union.—Organized in 1813, for the purpose of the advancement of its members in ornithological science. Its present membership is 814, and its officers are: President, Dr. C. Hart Merriam, Washington, D. C.; secretary, John H. Sage, Portland, Conn. The association publishes a journal of ornithology and many works relating to the science. The admission fee varies from $3 to $10, according to the different classes of membership; the annual dues, from $3 to $5.

American Orthopedic Association.—Its object is the advancement of orthopedic science and art. Membership limited to 60. Annual meetings are held every third year, in conjunction with the Congress of American Physicians and Surgeons, at Washington, D. C. Officers: President, Dr. Louis Weigel, Rochester, N. Y.; first vice-president, Dr. Reginald Sayre, New York City; second vice-president, Dr. R. T. Taylor, Baltimore, Md.; treasurer, Dr. E. G. Brackett, Boston, Mass.; secretary, Dr. John Ridlon, No. 103 State street, Chicago, Ill.

American Philological Association.—Organized in 1869. Devoted to the study of languages and literature. Membership, about 600. Admission fee, $5; annual dues, $3. Next annual meeting at Yale University, July, 1903. Officers: President, Professor Charles F. Smith, University of Wisconsin; vice-presidents, Professor George Hempl, University of Michigan, and Professor Mortimer L. Earle, Columbia University, secretary and treasurer, Herbert Weir Smyth, Harvard University.

American Philosophical Society.—Founded in 1743, in consequence of a circular issued by Benjamin Franklin. Its object is "for promoting useful knowledge." Membership, 450. Officers: President, General Isaac J. Wistar; vice-presidents, Coleman Sellers, George F. Barker and Samuel P. Langley; secretaries, I. Minis Hays, Edwin G. Conklin, Arthur W. Goodspeed and Morris Jastrow, Jr. Address of the society, No. 104 South Fifth street, Philadelphia, Pa.

American Physical Society.—Organized for the purpose of promoting the advancement and diffusion of the knowledge of physics. Four meetings are held each year, and the annual fee for membership is $5. The officers are: President, Albert A. Michaelson; vice-president, Arthur G. Webster; secretary, Ernest Merritt, Ithaca, N. Y.; treasurer, William Hallock.

American Public Health Association.—Organized in 1872, for the purpose of advancing public hygiene. Membership, about 500. Admission fee, $5; annual dues, $5. Officers: President, Dr. Henry D. Holton,

Digitized by Google

Brattleboro, Vt.; first vice-president, Dr. Walter Reed, Washington, D. C.; secretary, Dr. Charles O. Probst, Columbus, Ohio; treasurer, Dr. Frank W. Wright, New Haven, Conn.

American Society of Civil Engineers.—Organized in 1852. Its objects are "the advancement of engineering knowledge and practice and the maintenance of a high professional standard among its members." Membership, 2,554. Annual dues: Corporate members, $15; associates, $10; juniors, $10. Meetings are held the first and second Wednesdays of each month. Officers: President, Robert Moore; secretary, Charles Warren Hunt; treasurer, J. W. Knap. House of the Society, No. 220 West Fifty-seventh street, New York City.

American Society of Curio Collectors.—Its object is the mutual advantage of naturalists, geologists, mineralogists, archaeologists, neumismatists and antiquarians. Each department is in charge of a superintendent who is an expert in his line. The society has now 400 members, with these officers: Roy Farrell Greene, Arkansas City, Kans., president; T. C. Edilen, Pittsburg, Pa., vice-president; F. W. Coning, Macyville, Tenn., secretary and treasurer.

American Society of Mechanical Engineers.—Organized in 1880; incorporated in 1881. Its object is "to promote the arts and sciences connected with engineering and mechanical construction." Total membership, 2,325. Initiation fee, $25; annual dues, $15. Two meetings are held each year, the annual meeting in December, in New York City. Officers: President, Edwin Reynolds, Milwaukee, Wis.; vice-presidents, Wilfred M. Lewis, Philadelphia, Pa.; M. E. Cooley, Ann Arbor, Mich., and M. P. Higgins, Worcester, Mass.; treasurer, William H. Wiley, New York City; secretary, Professor F. R. Hutton, New York City. Headquarters of the society, No. 12 West Thirty-first street, New York City.

American Society of Naturalists.—Organized in 1883, "for the exchange of ideas regarding problems of natural history." Membership, 228. Meetings held annually during last week of December. Officers: President, J. McKeen Cattell, Garrison-on-Hudson, N. Y.; secretary, R. G. Harrison, Johns Hopkins Medical School, Baltimore, Md.; treasurer, M. M. Metcalf, Woman's College, Baltimore, Md.

American Statistical Association.—Has for its object the collection, preservation and diffusion of statistical information in the different departments of human knowledge. The association holds its regular meetings in Boston on the third Friday in January, April and October the annual meeting being held in January. The annual dues are $2, and the present officers are: President, Hon. Carroll D. Wright; vice-presidents, Hon. Horace G. Wadlin, Professor Henry C. Adams, Ph.D.; John Ward Dean, A. M.; Henry Gannett, and S. N. D. North; corresponding secretary and librarian, Worthington C. Ford, Public Library, Boston; treasurer, John S. Clark, Boston, Mass.; secretary, Davis R. Dewey, Ph.D., Boston, Mass.; assistant secretary, John Hyde, Washington, D. C.

American Surgical Association.—Next annual meeting to be held at Washington, D. C., May 12-14, 1903, in conjunction with the Congress of American Physicians and Surgeons. Officers: President, Maurice H. Richardson, M. D.; vice-presidents, N. B. Carson, M. D., and W. J. Mayo, M. D.; treasurer, George R. Fowler, M. D.; secretary, Dudley P. Allen, M. D., No. 278 Prospect street, Cleveland, Ohio.

Archaeological Institute of America.—Organized in 1879. Its object is to promote and to direct archaeological investigation and research. Membership, 956. Annual dues, $10; life membership, $100. Annual meetings are held on the second Saturday of May each year. Officers: President, Professor John Williams White, Harvard University, Cambridge, Mass.; treasurer, James H. Hyde, No. 120 Broadway, New York City; president of New York society, Julius Sachs, Ph.D.; secretary of New York society, Nelson G. McCrea, Ph.D., Columbia University.

Association of American Physicians.—Organized in 1886. Its object is the advancement of scientific and practical medicine. Membership limited to 125. Officers for 1902-1903: President, James Stewart, M. D., Montreal, Canada; vice-president, William T. Councilman, M. D., Boston, Mass.; secretary, Henry Huhn, M. D., Albany, N. Y.; recorder, Solomon S. Cohen, M. D., Philadelphia, Pa.; treasurer, J. P. Crozer Griffith, M. D., Philadelphia, Pa.

Association of Economic Entomologists.—Its objects are the presentation and consideration of matters relating to economic entomology. Officers: President, E. P. Felt, Albany, N. Y.; first vice-president, W. H. Ashmead, Washington, D. C.; second vice-president, Lawrence Bruner, Lincoln, Neb.; secretary and treasurer, A. L. Quaintance, College Park, Md.

Astronomical and Astrophysical Society of America.—Organized in 1898. Has for its object "the advancement of astronomy, astrophysics and related branches of science," and its membership, 175, includes nearly every working astronomer in America. The annual dues are $5, and annual meetings are held in obedience to the call of the Council. Officers: President, Simon Newcomb, Washington, D. C.; first vice-president, Charles A. Young; second vice-president, George E. Hale; secretary, George C. Comstock, Madison, Wis.; treasurer, Charles L. Doolittle; Council, E. C. Pickering, Ormond Stone, W. W. Campbell and S. J. Brown.

Astronomical and Physical Society of America.—Membership, 175. Officers: President, Simon Newcomb, Washington, D. C.; secretary, G. C. Comstock, Madison, Wis.

Botanical Society of America.—Organized in 1893. Its object is the advancement of botanical knowledge. Annual dues, $10; life membership, $100. Officers: President, Beverly T. Galloway, Bureau of Plant Industry, Washington, D. C.; vice-president, Frederick V. Coville, Washington, D. C.; treasurer, Arthur Hollick, New York City; secretary, Daniel T. MacDougal, New York Botanical Garden, New York City.

Geological Society of America.—Organized in 1888. Its object is the promotion of geological science. Membership, 250. Initiation fee, $10; annual dues, $10. Officers: President, N. H. Winchell, Minnesota Geological Survey; vice-presidents, S. F. Emmons, U. S. Geological Survey, and J. C. Branner, Stanford University; secretary, H. L. Fairchild, University of Rochester, N. Y.; treasurer, Q. C. White, Morgantown, W. Va.; editor, J. Stanley-Brown, Washington, D. C.; librarian, H. P. Cushing, Western Reserve University.

International Geographical Society.—The International Geographical Society was organized at Buffalo, N. Y., in 1901, and its headquarters are in St. Louis, Mo. Its objects are the acquisition and dissemination of geographical knowledge. The officers are as follows: President, Arthur C. Jackson, F. R. G. S.; home secretary, Col. Robert M. Yost, Missouri; foreign secretary, Senor Coronel Don Sergio Lusky, Honduras; treasurer, Clifford Hubbell, Buffalo, N. Y.

National Geographic Society.—Organized in 1888. Its object is "the increase and diffusion of geographic knowledge." Membership, 2,600. Annual dues, $2. The official organ of the society is The National Geographic Magazine, published monthly. Officers: President, Alexander Graham Bell; vice-president, W. J. McGee; treasurer, John Joy Edson; secretary, Alfred J. Henry. Offices of the society, Rooms 107, 108, Corcoran Building, Fifteenth and F streets, Washington, D. C.

New York State Historical Association.—Organized in 1899. Its objects are "to promote and encourage original historical research and to disseminate a greater knowledge of the early history of New York State." Membership, 163. Admission fee, $2; annual dues, $2. Annual meetings are held on the last Tuesday of July in each year. Officers: President, Hon. James A. Roberts, Buffalo, N. Y.; first vice-president, Daniel C. Farr, Ph.D., Glens Falls, N. Y.; treasurer, James A. Holden, Glens Falls, N. Y.; secretary, Morris P. Ferris, No. 32 Broadway, New York City.

New York Zoological Society.—The objects of the society are the establishment of a free Zoological Park containing collections of North American and exotic animals, the encouragement of interest in animal life and the promotion of zoological science in general. Membership, 1,200. Officers: President, Hon. Levi P. Morton; first vice-president, Henry Fairchild Osborn; treasurer, Charles T. Barney; secretary, Madison Grant, No. 11 Wall street, New York City.

Pennsylvania Society for the Prevention of Tuberculosis.—Organized in Philadelphia, in 1892. Its object is the distribution of information relating to practical methods of prevention and the means by which consumptives can avoid communicating their disease to others. Annual dues, $1; life membership, $10. Officers: President, Dr. Howard S. Anders, Philadelphia, Pa.; vice-president, Dr. Guy Hinsdale, Philadelphia, Pa.; secretary, Dr. A. H. Davisson, No. 2024 Pine street, Philadelphia, Pa. Meetings are held at No. 1900 Race street, Philadelphia, Pa.

Scientific Alliance of New York.—Organized in 1891. Its object is to promote the interests of the eight allied scientific societies of which it is composed. Membership, 1,102. Officers: President, Charles F. Cox; treasurer, E. G. Love; secretary, N. L. Britton, New York Botanical Gardens, New York City.

Scotch-Irish Society of America.—Was organized in 1889, at Columbia, Tenn., its object being racial, historical and social. The officers are as follows: President, Hon. John Stewart, Chambersburg, Pa.; vice-president general and honorary secretary, Rev. John S. MacIntosh, D.D., No. 220 Witherspoon Building, Philadelphia; treasurer, John McIlhenny, No. 1339 Cherry street, Philadelphia.

Society of American Authors.—Founded in 1892. Its object is the improvement of the condition of the craft. Membership, 350. Initiation fee, $2; annual dues, $5 for resident, $3 for non-resident members. The offices of the society are at No. 32 Broadway, New York City. Officers: President, Hon. Rastus S. Ranson, New York City; vice-presidents, Mrs. Julia Ward Howe, Andrew Carnegie, Mrs. Ellen H. Walworth, General Lew Wallace, Hon. Hubert H. Bancroft and Miss Grace D. Litchfield; treasurer and counsel, Morris P. Ferris; secretary, G. Grosvenor Dame.

Society of Chemical Industry.—An International organization, of which the New York section is the American representative. During 1901-02, 130 new members joined this section, making a total membership in the United States of 975. In that year eight general meetings were held, at which papers of great technical value were read by eminent chemical experts. The present officers of the American section are: Chairman, Virgil Coblentz; vice-chairman, Russell W. Moore; treasurer, R. C. Woodcock; secretary, H. Schweitzer, No. 40 Stone street, New York City. The principal officers of the general society are: President, I. Levinstein, Manchester, England; treasurer, Samuel Hall, East London Soap Works, Bow, E., England; secretary, Charles G. Cresswell, 9 Bridge street, Westminster, London, S. W., England.

Society of Naval Architects and Marine Engineers.—Its object is "the promotion of the art of shipbuilding, commercial and naval." Membership, 431. Entrance fee, $5; annual dues, $5. Annual meetings are held. Officers: President, Clement A. Griscom; secretary and treasurer, W. L. Capps. Address of the society, No. 12 West Thirty-first street, New York City.

Society for the Promotion of Agricultural Science.—Was organized in 1882, for the purpose of encouraging original researches in the sciences applied in agriculture. The annual proceedings are published by the society and include papers presented at the annual meetings, and must be confined to original research in some of the sciences entering into agriculture. The society now consists of eighty members, the membership being limited to 100, and the present officers are: President, Dr. W. H. Jordan, Geneva, N. Y.; secretary-treasurer, F. M. Webster, Urbana, Ill.; custodian, Dr. W. J. Beal, Agricultural College, Mich.; executive committee, Professor W. R. Lazenby, Columbus, O.; Professor C. S. Plumb, Columbus, O.; Dr. W. J. Beal, Agricultural College, Mich.

RELIGIOUS AND TEMPERANCE ASSOCIATIONS.

CHRISTIAN ENDEAVOR.

The Christian Endeavor movement, world-wide in its spread, and embracing more than 3,000,000 people within its membership, all bonded together with a single purpose, had its origin at a revival at the Williston Church, Portland, Me., in the Winter of 1880-81. Rev. Francis E. Clark was pastor of the church, and it was in his study on the evening of February 2, 1881, that the first Young People's Society of Christian Endeavor was formed, with essentially the same constitution, pledge and methods of work as are used at present. The first signer, W. H. Pennell, was the first president of the United Society, and is now one of its trustees.

The second society was formed in October of the same year by Rev. C. P. Mills, of Newbury, Mass., and by the end of the year four more societies had been formed, one each in Rhode Island, Maine, Vermont and Ohio.

Without concerted effort, and almost without notice, the Christian Endeavor ideas were scattered abroad and took root in widely separated localities. A little more than a year after the establishment of the first society, when there were only six organizations, the first convention was held at the Williston church. By the end of another year, when the second convention was held at Portland, the six societies had grown to fifty-three, and the membership to 2,630. During this year, 1883, the first Christian Endeavor book was written, "Children and the Church," by Rev. F. E. Clark.

On March 27, 1884, the first junior society was organized by Rev. J. W. Cowan, of Tabor, Iowa. The convention of 1885 was the first to be held in Christian Endeavor dates, July 9 and 10. This was at Old Orchard, Me., and it was there that the United Society of Christian Endeavor was founded and incorporated. To this convention came the news that the movement had reached foreign countries, and societies were reported from China, the Hawaiian Islands and other distant countries. By this time there were 253 societies and 14,892 members. The first local union was organized at New Haven, Conn., January 11, 1886.

In 1886, at the convention held at Saratoga, the Christian Endeavor organ, The Golden Rule, was established, which, by its wide circulation and influence, has contributed largely to the multiplication and usefulness of Christian Endeavor societies. Just after this convention Rev. Francis E. Clark, D. D., the founder of the movement, resigned his pastorate of an important South Boston, Mass., church, to become president of the United Society and editor-in-chief of The Golden Rule. Soon after the assumption of these duties Dr. Clark went to England and laid the foundation of the Christian Endeavor growth in the United Kingdom.

Two thousand delegates attended the second Saratoga convention, and at the convention held in Chicago in 1888 over 5,000 delegates were present, representing thirty-three States and Territories. At Philadelphia in 1889 there were over 6,500 delegates and many foreign countries were represented. At the St. Louis convention of 1890 there were more than 8,000 delegates in attendance.

In the spring of 1891 Dr. Clark, together with several associates in the work, made a second Christian Endeavor journey to England, where many meetings were held with gratifying results. At this time there were only 120 societies in Great Britain.

Over 14,000 delegates were present at the Minneapolis convention of 1891. At this time there were 855 Junior societies formed, and it was reported that 75,000 young people had been pledged to give two cents a week to foreign missions. At this convention the custom was inaugurated of awarding banners for the greatest growth in the number of societies.

During 1891 and the year following the problem of the determination of the relation of Christian Endeavor societies to denominational young people's societies was worked out and a satisfactory result reached. In most cases the Christian Endeavor Society has been accepted as the denominational society of the different branches of the Protestant Church.

The first international convention was held at Montreal in 1893, and over 16,000 delegates were present. At Boston in 1895 the number of delegates was 56,435, and the aggregate attendance at the meetings amounted to 643,500. For the first time the Endeavorers carried on, in connection with the convention, an evangelistic campaign in 120 meetings held in factories, stores, markets, saloons, jails, missions, wharves, streets and engine houses. This year the World's Christian Endeavor Union was organized, with Dr. Clark as president.

Since that time the growth of the movement has been by tens of thousands of members each year, and local societies have been formed in almost every country on the globe. In July, 1902, there were recorded 62,300 societies with a membership of over three and a half millions.

The Cristian Endeavor stands for personal devotion to Christ, religious training for all kinds of service involved in the various communities, loyalty to the church and denomination with which each society is connected, for Christian citizenship, purity, temperance, law and order and all righteousness. It has for its ultimate aim the bringing of the world to Christ.

The United Society is simply a bureau of information, furnishing literature and answering questions. Each society is amenable to no authority save that of its own church and its own pastor. The officers of the general society are: Rev. Francis E. Clark, D. D., president; John Willis Baer, general secretary; William Shaw, treasurer, and Rev. Charles E. Eberman, field secretary. The general offices are in Tremont Temple, Boston, Mass.

BAPTIST YOUNG PEOPLE'S UNION OF AMERICA.

The Baptist Young People's Union of America was organized July 7, 1891, as "a federation of all Baptist young people, without regard to name or organization," for the purpose of bringing all such persons "together in a common interest and sympathy and work, seeking to develop Christian character, enlargement of Scripture knowledge, and imparting a wider missionary outlook." The association is represented by branch societies in nearly every State and Territory, and the financial support which its work has received has been of so satisfactory a character that the debt of $20,000 which existed at the time of the Chicago convention in 1901 was reported as practically obliterated at the convention held at Providence, R. I., July 10-13, 1902.

In addition to the courses of reading and study already established the organization has recently undertaken to secure the general observance of a Christian culture Sunday by the Baptist churches throughout the United States and Canada, the object being the establishment of a day on which all attendants at Baptist churches may devote themselves to the consideration of the value of more thorough Bible study.

The headquarters of the association is at No. 324 Dearborn street, Chicago, Ill., and its present officers are: President, John H. Chapman, Chicago; vice-presidents, George Miller, Baltimore, Md.; Thomas Trotter, D. D., Wolfville, N. S., and Samuel Seeman, Sharpsburg, Pa.; general secretary, Rev. Walter Calley, Chicago; recording secretary, Rev. H. W. Reed, Rock Island, Ill.; treasurer, H. B. Osgood, Chicago; business manager, W. H. Merritt, Chicago; chairman of board of managers, L. L. Henson, D. D., Providence, R. I. Executive Committee, Professor Ira M. Price, Ph. D., Illinois; Rev. H. W. Reed, Ph. D., Illinois; John H. Chapman, Illinois; John W. Low, Illinois; Charles S. Burton, Illinois; H. F. Perry, D. D., Illinois; W. H. Geistweit, D. D., Illinois; L. J. Yager, Illinois; C. A. Hobbs, D. D., Wisconsin; L. L. Henson, D. D., Rhode Island; H. F. Stillwell, D. D., Minnesota; Emory W. Hunt, D. D., Ohio; Rev George T. Webb, Ontario; Professor M. L. Brittain, Georgia.

The Board of Managers is constituted as follows: Members whose terms end 1903—Rev. R. M. Hunsicker, Pennsylvania; O. W. Van Osdel, D. D., Washington; Hamilton H. West, Illinois; Rev. A. T. Jamison, South Carolina; Rev. C. H. Dold, New Jersey; W. W. Main, Massachusetts; James R. Vaughan, Iowa; Rev. B. F. Fellman, Nebraska; O. P. Coshow, Oregon; Charles M. Ness, Maryland; Rev. W. T. Stackhouse, British Columbia; Rev. C. H. McKee, Idaho; Rev. G. P. Raymond, Prince Edward Island; L. Halsey, D. D., Arizona; Orin R. Judd, New York; Rev. A. D. Berry, Indiana; Dr. W. H. Buckley, Arkansas, and the members of the Executive Committee. Members whose terms end 1904—Rev. J. E. Noftsinger, Montana; H. G. Baldwin, Ohio; D. J. Davis, North California; J. E. Hounsom, Ontario; G. Jay Vinton, Michigan; E. H. Lovett, D. D., Kansas; A. T. Dunn, D. D., Maine; T. M. Shanafelt, D. D., South Dakota; Carter Helm Jones, D. D., Kentucky; Rev. E. B. Earle, New Hampshire; J. Calvin Moss, Virginia; A. W. Payne, Missouri; J. O. Rust, D. D., Tennessee; T. C. Johnson, D. D., West Virginia; Rev. G. A. Lawson, Nova Scotia; Rev. H. E. Wise, Connecticut; L. L. Henson, D. D., Rhode Island; Rev. T. M. Callaway, Alabama; R. A. Ford, District of Columbia. Members whose terms end 1905—Rev. S. T. Foster, North Dakota; Rev. W. A. Petzoldt, Wyoming; Hon. C. J. Ferguson, Vermont; Rev. R. Van Deventer, Georgia; C. A. Hobbs, D. D., Wisconsin; Jeff. H. Irish, Minnesota; Harry Ballantyne, Quebec; T. Neil Johnson, North Carolina; Rev. O. G. Bunnington, Delaware; Rev. J. H. McDonald, New Brunswick; W. M. Findlay, Manitoba; Rev. Joseph Smale, South California; Rev. George L. Hale, Oklahoma; G. W. Truett, D. D., Texas; Arthur Flake, Mississippi; Rev. Joshua Gravett, Colorado; Rev. C. V. Edwards, Louisiana.

SALVATION ARMY.

(The material for this article was furnished by Commander Booth Tucker.)

The Salvation Army is a religious society, organized on a military basis, with an influence reaching to the very limits of civilization. Organized at Mile End, England, July 5, 1865, by Rev. William Booth, a minister of the "Methodist new connection," the order met with derision and often violence from those among whom it worked, the unchurched masses of England's slums. The members of the body, increasing their numbers by converts, persevered, and within a comparatively short time began to be respected and encouraged in their work. The Salvation Army was originally known as the Christian Mission, and its present name was adopted in 1878, after the military feature had become typical of the work. The army has aimed to reach those who most need its influence, by appealing directly to their emotions, the main idea being that the good in every individual can be brought out if the right chord is but struck. To be enthusiastic is one of the first rules of the society.

William Booth is the General and Commander-in-Chief of the army in the world. He was born at Nottingham, England, April 10, 1829, became an evangelist at the age of fifteen, and entered the ministry in 1852. He is the author of several books, the best known of them being "In Darkest England and the Way Out." His headquarters are in London, at the International Headquarters, 101 Queen Victoria street.

The headquarters for the United States are at Nos. 120 and 124 West Fourteenth street, New York City. Here is the centre for the direction of the spiritual, social, financial and publishing work of the army in the United States. Frederick de Latour and Emma Booth Tucker are the Commanders; Colonel Edward John Higgins is chief secretary; Colonel Holland, social secretary, and Lieutenant-Colonel C. Miles, field secretary.

There are 15,500 officers in the 6,239 corps, operating in 42 countries and in 28 languages. Officers are working among 19 heathen races. Forty-five periodicals are published with a weekly circulation of over 1,000,000 copies.

In the United States there are 2,444 officers, 604 clerks and employes, 3,009 non-commissioned officers and 600 corps. There are 18,923 volunteer workers known as soldiers and recruits. The army in the United States maintains 166 institutions, with nightly accommodation for nearly 8,000 persons, including 72 shelters for men, 4 shelters for women, 21 rescue homes for fallen women, 3 homes for waifs and strays, 19 food depots and 3 farm colonies. The farm colonies were begun as an experiment a few years ago and have since proved to be entirely successful. The idea of the army was to utilize waste energy on waste land, for the better cultivation of simple crops. These colonies have been generally self-supporting and have been homes for men who otherwise would be shelterless and without occupation.

The social work in Greater New York embraces the relief work in the slum districts, a shelter for homeless women at No. 243 Bowery, shelters for homeless men at Nos. 83 and 21 Bowery and 118 Avenue D, industrial homes at No. 528 West Thirtieth Street, Manhattan, and No. 28 Raymond Street and No. 219 West Eighth Street, Brooklyn; a day nursery for children at No. 112 Cherry Street, and an inquiry department for missing relatives, with branches in every part of the world. This was opened in the Fall of 1896 and is supported by voluntary contributions. Work in this department is done generally through the police courts. In New York City religious services are held every night on the streets and in 23 halls.

The army in the United States controls property to the value of $825,200, divided as follows: Real estate, $470,000; value of leaseholds, $22,500; value of farm colonies, $69,200; value of farm colony leaseholds, $60,000; personal property, $203,500.

On October 4, General Booth arrived in New York for a tour of the United States, intending to visit all of the principal cities. His itinerary extended from the Atlantic to the Pacific Coast, and was to last until February 18, 1903.

AMERICAN SOCIETY OF RELIGIOUS EDUCATION.

The American Society of Religious Education was organized "to increase the popular interest in the sacred Scriptures and to secure their more general and thorough study; to unite the efforts of scholars in promoting improved methods for the development and cultivation of man's spiritual nature; to introduce such methods into the family, the Sunday-school, the pulpit and higher institutions of learning, and to collect and preserve full statistical and documentary information of all systems of religious instruction employed by the various ecclesiastical and other bodies in this country and in foreign lands, and to make such information available to the general public." The work of the association, which is inter-denominational, is divided into eight fully organized departments. Its office is located in the Washington Savings Bank Building, Twelfth and G streets, N. W., Washington, D. C., and its officers are: President, Hon. John M. Harlan; vice-presidents, John E. Rankin, D. D., LL. D., A. Mackay Smith, D. D., and Hon. W. S. Shallenberger; general secretary, J. E. Gilbert, D. D., LL. D.; treasurer, C. H. Davidge; registrar, Mrs. G. D. Woodburn.

VOLUNTEERS OF AMERICA.

By GENERAL BALLINGTON BOOTH.

When any kind of enterprise, especially that of a religious, philanthropic or economic character, has been able to maintain a strenuous existence for six years and produce facts of its benediction and helpfulness, all who are either concerned or interested in it are justified in assuming that it has more than demonstrated its right to exist. I do not, therefore, propose to deal at all with theories, but as concisely as possible to report that which represents the six years' effort of Christian Volunteer work.

The organization (incorporated) was launched on March 9, 1896, in New York City. At that time its present leaders had but a small bank balance, consisting of a loan from several friends. There were five young field officers (not counting its leaders), no official organ or paper, absolutely no property, and not even office furniture or any material for such an undertaking.

It has not been our aim to seek a costly and pretentious building as a national centre, but one that is commodious and suited to our work. Such a one is the four-story building No. 38 Cooper square, from whence the general supervision of the work is directed. Here also the printing, publishing, secretarial work and making up of the weekly magazine, the Volunteer Gazette, and other printed matter is executed. The printing plant and type, as also furniture and nine departments under the supervision of eight responsible colonels and staff, is entirely owned and paid for by the incorporation.

Though we were not in a position to predict any large growth at the inauguration, the Volunteers have already assumed national proportions, and we are only yet in the pioneer period. The organization has six regiments or districts under the direction of six able and intelligent sectional officers and their wives. These embrace fourteen companies or prominent societies that have met the higher requirements before becoming chartered by the incorporation, and nearly one hundred self-supporting posts or societies throughout the country, not including outposts. Apart from the sick and wounded funds, there is hardly a society in the country supported by the national centre. These societies during the last fiscal year alone raised $86,819 in support of their own rents, officers and work. They attracted 1,177,195 persons to their Sunday and week-night meetings within the Volunteer halls, and reports further show that 2,743,698 were attracted to the 15,539 open-air services conducted. This is a yearly aggregate attendance of 3,920,893 persons reached by our workers throughout the field. Our officers have visited 30,522 families in the interests of Christianity.

The sociological work of the Volunteers may be divided into two branches. (1) There are the homes for the unfortunate and destitute men who have no place to sleep—the men who creep into doorways, crouch down in alleys or grope under steps, wherever they are not molested by the night staff of the police officer. These for a mere pittance are warmed and sheltered and helped over night. (2) The homes or hotels for workingmen. These are fitted up for those who have work and are yet without a home, and, in many instances, a friend, and who are a grade higher in respectability—the men who do not want to mingle with the lowest classes and who can pay a little more for a night's or a week's lodging. There are homes for such men in Chicago, Pueblo, Joliet, Kansas City, New York City, Brooklyn, Lowell, Worcester, Lynn, Auburn, Toledo, Erie, Philadelphia and other cities. In these homes nearly 252,760 people were lodged during last year alone, and in the homes and restaurants 344,450 persons were fed with substantial meals at a nominal cost.

Why restrict your homes for young women to those who bear the stamp of society's scorn and censure? was asked. What of the respectable young woman who enters your city a stranger, with a slender purse, seeking for shelter and work? Whither is she to turn? The higher class hotel is not open to her, because its terms are above her reach. The scant means at her disposal will last but a few days. She turns with instinctive horror from the cheap lodging houses. The charitable institutions will require references and credentials. There are few respectable places open to her. This is the want that our homes of mercy will aim to fill. All young women are welcomed there, without distinction of creed or condition of life, and employment is found for them. "It is never necessary to question them. If they have sinned or fallen," our matrons say, "they are sure to confess all to the matron before they have been many days at the home, and everything possible is done to help them toward a better and happier life." Over 2,760 beds have been provided for young women in the homes in Newark, N. J., and Boston, Mass. Three hundred and eighty-five women have been permanently cared for, and a magnificent percentage have been restored to positions, where they are doing creditably.

One of the most recent branches of philanthropy will appeal to all alike, for all hearts, however lacking in sentiment, gladden over benedictions brought to children. Unprotected and neglected children, many of whom are but infants, have been taken from the squalor and poverty of homes, where such vicious and pestilential surroundings existed as would sicken the casual visitor, and placed in clean, comfortable, bright homes, where they have been properly fed, clothed and cared for. It is impossible to express the joy and gratitude which some parents evinced in tears and exclamations upon seeing their children in these homes. We are now endeavoring to open another such home for deserted children, being encouraged with the fact that 426 have been provided in those we already have.

We can without hesitation assert that history has shown no branch of effort more remarkable in its far-reaching influence for social and moral reform than that of the Volunteers' prison work. At the last reporting Mrs. Ballington Booth states that the organization has now leagues formed in sixteen State prisons, embracing 14,000 prisoners, who are living reformed and subordinate lives within the prison precincts. A correspondence for the moral elevation and benefit of their families is carried on with some 22,000 men. There are two large homes known as Hope Halls, one leased in Chicago, accommodating sixty men; another owned by the Volunteers in Flushing, which, with the new wing, accommodates eighty men, and is surrounded by ten acres of ground. Thus far over 75 per cent of these men have given satisfaction in the places of occupation and trust to which they have been drafted. At the hall in Chicago there is an average of thirty-five paroled prisoners—men who have been given by the prison authorities into the charge of the Volunteers before their term expires. It must be remembered that this work is a new field; that it is not only seeking to ameliorate the conditions of the prisoners, but to improve the laws concerning prisoners in different sections of the country.

We might lay ourselves open to the charge of exaggeration in describing the need-stricken and deplorable condition of hundreds of men, women and children as found by our tenement workers in the larger cities. Our workers have visited and aided 1,140 families in and around New York alone.

This of all branches is dependent upon voluntary support, but a narration of some of the cases permanently uplifted would more than justify the subscription and reward the giver.

The incorporated Society of the Volunteers is in a safe and solvent condition financially. Our liabilities at the national centre, including bond and mortgage on one of our properties, are $17,834.31; our assets or resources are $49,507.27. It must not be forgotten also that the circle of the Volunteers' contributors is continually widening, and that in addition to our defenders and general subscribers the V. P. L., under Mrs. Booth's direction, is also embracing new friends throughout the country, who assist in her work.

Whatever church its members individually belong to, the organization is undenominational. Its work, therefore, no more belongs to one church than to another. It aims to form the bridge between those belonging to and ignoring the church. It would require a sketch too long and detailed for the time and space at our command to recount other sections of work which, like the branches of the tree, grow out of new needs and demands as they face us. The many thousands fed during holiday seasons; the visitation and aid given to prisoners' families; the formation of reading rooms for poor men; the distribution of the Volunteers' Gazette, bringing its terse and Godly messages to thousands; the formation of classes among poor women for sewing; the patient watching done by officers in hospitals; the finding of situations for those out of work, to say nothing of the general relief administered to the poor by the societies through the country—all this effort and more deserves grateful acknowledgment. I believe, however, I have submitted sufficient evidence of the wisdom of the step taken by Mrs. Ballington Booth and myself when inaugurating this movement six years ago. We claim no merit. We ask no praise. If He so approves of the workmen as to cause the "little one to become a thousand" and "to hasten it in His time," we give Him the glory, and are rewarded by the good work done among so many thousands of our countrymen.

CHRISTIAN AND MISSIONARY ALLIANCE.

The object of the Christian and Missionary Alliance is: "Wide diffusion of the Gospel in its fulness, the promotion of a deeper and higher Christian life and the work of evangelization among the neglected classes in distant and especially in heathen countries," and all professing Christians who are willing to subscribe to the principles of the association are eligible for membership.

The Christian Alliance was formed in 1887, and ten years later it combined with the International Missionary Alliance, taking its present name. To-day it has so far extended its work that, in addition to scores of active missionaries in the foreign field, it has affiliated branches in nearly every State in the Union, all of which contribute to the support of its home and foreign missionary work. Among its mission enterprises at home are the Missionary Training Institutes at Nyack, N. Y., and in New York City, and the Berachah Home and Orphanage. The total receipts for the year 1901-1902 were $185,162.32.

The officers of the organization are. President and general superintendent, Rev. A. B. Simpson; vice-presidents, Rev. C. N. Kinney, Rev. John Salmon, Rev. O. E. Mallory, Rev. W. C. Stevens, Rev. M. B. Fuller, Rev. O. M. Brown, Mr. George Montgomery, Mr. Emmons T. Mockridge and Ulysses Lewis; general secretary and foreign superintendent, Rev. A. E. Funk; treasurer, Mr. David Crear, No. 692 Eighth avenue, New York; recording secretary, Rev. J. D. Williams; superintendent assignment of missionaries, Mrs. A. B. Simpson; field superintendent of the East, Rev. Henry Wilson, D. D.; field superintendent of the West, Rev. Wilbur F. Memlinger; secretary of organization department, Miss May Agnew.

STUDENT VOLUNTEER MOVEMENT FOR FOREIGN MISSIONS.

The purpose of the Student Volunteer Movement is "(1) to awaken and maintain among all Christian students of the United States and Canada intelligent and active interest in foreign missions; (2) to enroll a sufficient number of properly qualified student volunteers to meet the successive demands of the various missionary branches of North America, and to unite all volunteers in an organized aggressive movement; (3) to help all such intending missionaries to prepare for their life-work, and to enlist their co-operation in developing the missionary life of the home churches, and (4) to lay an equal burden of responsibility on all students who are to remain as ministers and lay workers at home, that they may actively promote the missionary enterprise by their intelligent advocacy, by their gifts and by their prayers."

The work of the movement is supported by voluntary contributions, and its list of officers is as follows: Executive Committee, chairman, John R. Mott; vice-chairman, J. Ross Stevenson; Dr. Pauline Root, Hans P. Anderson, Dr. W. Harley Smith and Bertha Conde; general secretary and treasurer, Fennell P. Turner; assistant secretary, James E. Knotts; educational secretary, Harlan P. Beach. The movement is located at No. 3 West Twenty-ninth street, where its official organ, The Intercollegian, is published monthly during the academic year.

NATIONAL CHRISTIAN LEAGUE FOR THE PROMOTION OF SOCIAL PURITY.

The national Christian League for the Promotion of Social Purity has its headquarters at No. 33 East Twenty-second street, New York. It is an organization for the furtherance of social purity and works largely along lines parallel to those of the Woman's Christian Temperance Union. By the establishment of homes for working girls and by the dissemination of literature it aims to prevent the extension of vice, not only by appealing to the moral nature of those it reaches, but by supplying physical needs.

The greater part of the work is done through the means of committees and departments, each of which works along a special line. A home for self-supporting women has been established at No. 5 East Twelfth street, New York, where lodgings are furnished for women at nominal rates. In its work among the poorer classes the association attempts to improve family life through young mothers and girls, who receive instruction and help where necessary.

A hospital auxiliary is composed of a committee of women who visit the sick in the hospitals and provide help for special patients, especially those who are placed in hospitals through this committee. The Social Culture Club, another auxiliary of the league, aims to accomplish good along social, educational and philanthropic lines for young people. This club meets at the homes of members the second Tuesday of each month during eight months of the year.

Annual conventions are held at various cities, designated from year to year.

The officers for 1902 are: Elizabeth B. Grannis, president; Mrs. M. P. Buchanan, Bishop Henry Y. Satterlee, Mrs. Catherine Ferris, Frank Moss, Mrs. W. Vigelus, Bishop William C. Doane, Rev. James D. Steele, D. D., Mrs. Caroline B. Buell, Rev. Samuel H. Virgin, D. D., Mrs. Mary A. Livermore, Rev. A. H. Lewis, D. D., Mrs. M. F. Scripture, Bishop Samuel Fallows and Dr. Sylvanus Stall, vice-presidents; Frances M. Applegate, corresponding secretary; Mrs. Elizabeth Pettis, recording secretary; Dr. Charlotte Wooley, treasurer.

AMERICAN PURITY ALLIANCE.

The American Purity Alliance has for its object "the repression of vice, the prevention of its regulation by the State, the better protection of the young, the rescue of the fallen, the extension of the White Cross among men, and the maintenance of the law of purity as equally binding upon man and woman." The headquarters of the association are at No. 9 West Fourteenth street, New York City, and its officers are: President, O. Edward Janney, M. D., Baltimore, Md.; vice-presidents, Rt. Rev Wm. N. McVickar, D. D., R. I.; Rev. Wm. T. Sabine, D. D., N. Y.; Mrs. Mary A. Livermore, Mass.; Rev. S. H. Virgin, D. D., N. Y; Rev. Joseph May, Pa.; Joshua L. Baily, Pa.; Rev. Edward Bryan, Wis.; Mrs. Miriam Howard, Ga.; Alice C. Robinson, Md.; Professor H. H. Wright, Tenn.; Martha Schofield, S. C.; Josiah W. Leeds, Pa.; Rev. W. C. Gannett, N. Y.; J. H. Kellogg, M. D., Mich.; Mrs. C. C. Hussey, N. J.; Mrs. Julia Ward Howe, Mass.; Rev. S. S. Seward, N. Y.; Dr. Katherine C. Bushnell, Cal.; Rev. Charles Roads, Pa.; Rev. Anna Garlin Spencer, R. I.; Rev. A. H. Lewis, D. D., N. J.; J. W. Walton, Ohio; Mrs. Katherine M. Phillips, Pa.; Jonathan W. Plummer, Ill.; Anna M. Starr, Ind.; Hannah J. Bailey, Me.; Francis J. Garrison, Mass.; Caroline M. Severance, Cal.; Mrs. S. G. Humphreys, La.; Mrs. Elizabeth W. Andrew, Cal., and Mrs. Catharine A. F. Stebbins, Mich.; Executive Committee, O. Edward Janney, M. D., Rev. Antoinette B. Blackwell, Elizabeth Gay, Emily Blackwell, M. D., Anna Lukens, M. D., Anna M. Jackson, Naomi Lawton Davis, Anna Rice Powell, William M. Jackson, Mrs. Martha Mott Lord, Mrs. William Emerson, Jr., Henry W. Wilbur and Harry A. Hawkins; recording secretary, Mrs. Naomi Lawton Davis, Philadelphia, Pa.; corresponding secretary and treasurer, Mrs. Anna Rice Powell, No. 243 East Sixth street, Plainfield, N. J.; general council, Grace H. Dodge, N. Y.; Hannah A. Plummer, Ill.; Arria S. Huntington, N. Y.; Susan W. Hildreth, N. Y.; Andrew J. Gavett, N. J.; Mrs. Charlotte S. Lewis, Pa.; Eliza M. Mosher, M. D., Mich.; Allan J. Flitcraft, Ill.; Isaac Roberts, Pa.; Mary G. Smith, Ill.; Mrs. Sarah B. Stearns, Cal.; Elizabeth Powell Bond, Pa.; Elizabeth H. Coale, Ill.; Miss Ann B. Branson, Va.; Mrs. J. H. Kellogg, Mich.; Martha G. Ripley, M. D., Minn.; Mrs. Elizabeth Justice May, Pa.; Sarah C. Fox, Ohio; Mrs. M. T. Lewis Gannett, N. Y.; Thomas W. Woodnutt, Ill.; Benjamin F. Nichols, Ind.; Emily Howland, N. Y.; Mrs. M. L. Bogue, Conn.; Cornelia A. Gavett, N. J.; Lauretta H. Nichols, Ind.; Mrs. A. L. Prinelle, N. Y.; Mrs. Deborah C. Leeds, Pa.; Pauline W. Holme, Md.; Marcia C. Powell, N. Y.; Sarah T. Miller, Md.; E. H. Thompson, Ark.; Mrs. E. G. Underhill, N. Y., and Laura H. Satterthwaite, M. D., N. J.

CATHOLIC TOTAL ABSTINENCE UNION OF AMERICA.

The Catholic Total Abstinence Union of America is a confederation of all the Catholic temperance societies in the country that are approved by the pastors of their respective churches. It embraces 85,729 members, enrolled in 1,038 societies. Its objects are to secure to its members the privilege of being received into societies connected with the union in any part of America; to encourage and aid communities and pastors in establishing new societies, and to spread, by means of Catholic total abstinence publications, correct views regarding total abstinence principles.

The national officers are: Rev. Walter J. Shanley, Hartford, Conn., president; J. Washington Logue, Philadelphia, first vice-president; Hon. Walter J. Gibbons, Chicago, second vice-president; Mrs. L. M. Lake, St. Louis, third vice-president; Rev. J. J. Curran, Wilkesbarre, Pa., treasurer; Rev. A. P. Doyle, New York City, general secretary.

BROTHERHOOD OF ST. ANDREW.

The Brotherhood of St. Andrew in the United States started as a parish guild in St. James's Episcopal Church, Chicago, in 1883, having been organized by Rev. W. H. Vibbert, D. D., and James L. Houghteling. The object of the organization was "The spread of Christ's Kingdom among young men" in the hope of bringing young men within the hearing of the gospel of Jesus Christ as set forth in the services of the Church and in young men's Bible classes. The efforts of the organizers of this guild were so successful that the work spread rapidly, so that in 1886 thirty-five of these parochial organizations united in forming the "Brotherhood of St. Andrew in the Protestant Episcopal Church in the United States." Up to July 20, 1902, 1710 chapters had been organized in the senior department and 490 chapters in the junior department, embracing a membership of fully 15,000 men and boys. The spirit of the brotherhood spread to other countries also. There are now national organizations in the Dominion of Canada, in England, Scotland, Australia, the West Indies, and separate organizations, in most cases affiliated with the English brotherhood, in almost all of the colonies of Great Britain. Affiliated with the American brotherhood are chapters in China, Japan and Germany, with other members in various parts of Central and South America. The brotherhood is now recognized in all countries as the leading organization devoted to bringing young men nearer to the teachings of Jesus Christ. The headquarters of the American brotherhood are in Pittsburg, Pa. The present officers are: H. D. W. English, president; G. Harry Davis, first vice-president; Edmund Billings, second vice-president; Charles S. Shoemaker, treasurer; Hubert Carleton, travelling secretary; Edgar G. Criswell, office secretary, and Alan B. Wells, assistant secretary. The governing body is a national council, in which are representatives from the various States. The official publication of the brotherhood in the United States and Canada is St. Andrew's Cross, published also in Pittsburg, a monthly magazine edited by the travelling secretary of the brotherhood, Hubert Carleton.

BROTHERHOOD OF ANDREW AND PHILIP.

The Brotherhood of Andrew and Philip is an organization of the men of the church in all denominations. The rules of the brotherhood are two: The rule of daily prayer and the rule of service.

Each denomination has its own council and officers and legislates for itself. Three members are chosen by each denomination to the Federal Council, which plans the work for the church as a unit and issues the federal organ and literature. Six hundred and thirty-eight chapters and about 20,000 men are now enrolled. The officers are: President, Rev. Rufus W. Miller, Reading, Pa., the founder of the order; general and field secretary, Rev. J. Garland Hamner, Jr., Newark, N. J.; general treasurer, Rev. George E. Talmage, Schenectady, N. Y.

The brotherhood reaches twenty-three denominations, and has chapters in Canada, Japan and Australia. Its official organ, The Brotherhood Star, is published monthly at Lebanon, Pa., and New York City.

The New York headquarters of the organization are at No. 1 West Twenty-ninth street, and the local officers are: President, Professor Jasper T. Goodwin; secretary and treasurer, R. H. Fenker, No. 635 Prospect avenue, New York City.

AMERICAN UNITARIAN ASSOCIATION.

The American Unitarian Association is the missionary organization of the Unitarians of the United States and Canada. Of the 460 Unitarian churches nearly all are embodied in this association by virtue of making annual contributions to its treasury. At its meetings, which are held in Boston, Mass., each contributing church is represented by its minister and two lay delegates. There are also about 2,500 life members who are entitled to vote. The association has headquarters at No. 25 Beacon street, Boston, Mass.; at No. 104 East Twentieth street, New York, N. Y.; No. 175 Dearborn street, Chicago, Ill., and No. 374 Sutter street, San Francisco, Cal.

The purposes of the association are to establish new Unitarian societies, to aid enfeebled ones, to assist in the building of churches, to support missionary preachers, and to publish religious books and tracts. It succeeds in establishing new societies at about the rate of twelve a year. Its various enterprises are carried on at an expense of about $100,000 a year. Its present officers are: President, Rev. Samuel A. Eliot, D. D.; secretary, Rev. Charles E. St. John; assistant secretary, Mr. George W. Fox; treasurer, Mr. Francis H. Lincoln; all of whom have offices at No. 25 Beacon street, Boston, Mass.

ACTORS' CHURCH ALLIANCE.

The Actors' Church Alliance was founded June 18, 1899, by Rev. Walter E. Bentley, who was formerly a member of the dramatic profession and is now rector of the Church of the Holy Sepulchre, Seventy-fourth street and Park avenue, New York City. The purpose of the organization is to establish closer relationship between the church and the theatre by appointing clergymen of all denominations as chaplains throughout the United States and Canada to minister to the needs of members of the dramatic profession. The association has 2,500 members, half of whom are members of the dramatic profession, the rest being clergymen and lay members of churches. It is established in more than 400 cities in the United States and Canada, and has local chapters in New York City, Boston and Philadelphia, and it is affiliated with the Actors' Church Union of England, of which the Lord Bishop of Rochester is president.

The officers are Right Rev. Henry C. Potter, D. D., LL. D., D. C. L., president; F. F. Mackay, first vice-president; Rev. Thomas R. Slicer, second vice-president; Rev. Walter E. Bentley, secretary; George D. Macintyre, treasurer. The honorary vice-presidents are Right Rev. F. D. Huntington, S. T. D.; Rev. Thomas J. Ducey, Rev. H. M. Warren, D. D.; Rev. Charles H. Eaton, D. D.; Rev. John P. Peters, D. D.; Rev. William S. Rainsford, D. D.; Rev. R. Heber Newton, D. D.; Rev. George W. Shinn, D. D.; Rev. E. Walpole Warren, D. D.; Rev. Percey S. Grant, Sir Henry Irving, Joseph Jefferson, Daniel Frohman, Henry C. Jarrett, Frederick Warde, James H. Stoddart, Lillian Lawrence, Clara Morris, James O'Neill, Mrs. Louisa Eldridge.

UNITED SOCIETY OF FREE BAPTIST YOUNG PEOPLE.

The United Society of Free Baptist Young People is a general society organized for missionary endeavo and for the improvement of the young people affiliated with the Free Baptist Churches of America. At present it consists of 590 societies, including 137 junior societies, and has a membership of more than 20,000. During 1902 the society supported eight missionaries, six being in India, one in Africa and one at work among the colored people. The officers of the society are: President, E. P. Metcalf, Providence, R. I.; vice-president, Rev. T. J. Mawhorter, Wawaka, Ind.; recording secretary, Miss Bertha F. Flies, Lewiston, Me.; general secretary, Harry S. Myers, Hillsdale, Mich.; treasurer, Rev. Arthur Given, D. D., Auburn, R. I.; junior superintendent, Mrs. Harry S. Myers, Hillsdale, Mich.; supply agent, A. L. Freeman, Boston, Mass.; editors, Rev. Ernest G. Wellesley-Wesley, Providence, R. I., and Rev. C. E. McColley, Central City Ia.; council, Professor H. T. McDonald, Harper's Ferry, W. Va.; Miss Alice Andrews, South Wayne, Wis.; Rev. J. H. Wolfe, Lincoln, Neb.; Rev. R. R. Kennan, Minneapolis, Minn.; Mrs. Iva House, Lawrenceburg, Ind.; Mrs. M. E. Ricker, Lewiston, Me.; Miss Agnes H. Collins, South Danville, N. H.; Rev. R. E. Benjamin, Farnham, Ohio, and Miss Lora A. Marsh, Keuka Park, N. Y.

NATIONAL SPIRITUALIST ASSOCIATION.

The National Spiritualist Association of the United States and Canada is a national organization, as its name implies. It is made up of chartered spiritual societies, and holds a delegate convention annually. Its conventions are movable, but once in two or three years the annual gathering is held in Washington, D. C., where its headquarters are established. The association has issued 302 charters, eighteen of which have been to State associations, which are also made up of local societies in the respective States. These societies extend from Maine to California, with several in Canada. A number own their own temples and churches, the Spiritual Temple in Boston being valued at $150,000.

The present list of officers is as follows: President, H. D. Barrett, Boston, Mass.; vice-president, Hon. T. M. Locke, Philadelphia, Pa.; secretary, Mrs. Mary T. Longley, Washington, D. C.; treasurer, Theodore J. Mayer, Washington, D. C.; trustees, I. C. I. Evans, Washington, D. C.; Hon. Alonzo Thompson, Fullerton, Neb.; C. D. Pruden, Minneapolis, Minn.; C. L. Stevens, Pittsburg, Pa., and George W. Kates, Rochester, N. Y.

WOMAN'S CHRISTIAN TEMPERANCE UNION.

The Woman's Christian Temperance Union is the most numerous organization of women in the world, and its operations and influence are felt in nearly every civilized country. The basis of its organization is the local union. County unions are formed by a combination of local unions. Similarly, State unions are formed by combination of county unions, and these exist in every State and Territory, their combination resulting in the National Union, which was organized in 1874 at Cleveland, Ohio. The World's W. C. T. Union was organized in 1883 through the influence of the late Miss Frances E. Willard. In the United States there are upward of 10,000 local unions, with a membership and following, inclusive of the children's societies, of more than 600,000. The W. C. T. U. has forty-four distinct departments of work, presided over by as many women experts in the National Union and in each of the State unions. Through the influence of the organization nearly every one of the States has laws requiring study of scientific temperance in the public schools. The laws in the States which prohibit the sale of tobacco to minors; laws raising the age of consent, and providing for the better protection of women and girls; the appointment of police matrons; the establishing of industrial homes for girls and of houses of refuge for erring women, together with various other work of a philanthropic character, aiming always at social improvement, and especially by means of moral suasion and Christian effort, have marked the success of the movement.

The Woman's Christian Temperance Union of the State of New York was organized in October, 1874, about one month previous to the formation of the National Union. Its membership, as shown by the annual report for 1902, was 24,193, all paying members. Every county in the State has its county union. There are also three subsidiary bodies. The Young Woman's Branch is designed to train the young women of the nation as workers in the W. C. T. U. and in temperance reform. The Primary and Junior Department aims to instruct children from infancy up to thirteen and fourteen years of age as to the reasonableness and duty of total abstinence from alcoholic stimulants, tobacco and profanity. The Senior Loyal Temperance Legion is composed of graduates in the courses of study taken in the Primary and Junion Department, who, having received diplomas, take up a course of topical reading, which is scientific, ethical and governmental, the entire system being designed to develop trained workers in the cause. New York has already 1,000 graduates, and the number is constantly increasing.

The general officers of the State Union are: President, Mrs. Ella A. Boole, Ph. D., Brooklyn; first vice-president, Miss Celia S. Hutton, Penn Yan; corresponding secretary, Mrs. Frances W. Graham, Lockport; recording secretary, Mrs. Nellie H. Hutchinson, Owego; treasurer, Mrs. Ellen N. Tenney, Albany. The president of each of the county unions is, ex-officio, a vice-president of the State Union.

NON-PARTISAN NATIONAL WOMEN'S CHRISTIAN TEMPERANCE UNION.

This organization is an offshoot from the Woman's Christian Temperance Union, and was instituted in Cleveland, Ohio, January 22, 1890. It was formed by women who objected to political action taken by the W. C. T. U., an objection which already had caused some secession from that body. Ohio organized a non-partisan union in 1880, and there were various other non-partisan bodies subsequently formed. When the Non-Partisan National Women's Christian Temperance Union was organized Pennsylvania had already followed Ohio's example, and was represented in the new movement by a State union. At the present time there are State unions in fourteen States and a district union in the District of Columbia. The work of this organization is almost wholly educational, its efforts being to reach every class of the population, child, youth and adult, with proven facts regarding the drink habit and traffic. Its efforts are directed through several departments, each having its secretary, as follows: Educational, Mrs. Susanna F. Savery, West Chester, Pa.; legislative, Mrs. Lydia H. Tilton, Washington, D. C.; Sunday-school work, Mrs. H. S. Ellis, Philadelphia, Pa.; rescue work, Mrs. Agnes C. Paul, Fort Fairfield, Me.; industrial training, vacant; army, navy and marine corps work, Miss Rachael C. Levy, Washington, D. C.; young people's work, Mrs. George W. Coblentz, Clarion, Pa.; evangelistic, Mrs. Eliza A. Potter, Grinnell, Ia.; editor Temperance Tribune, Laura Rosamond White, Geneva, Ohio. The officers of the union are: President, vacant; vice-presidents, Mrs. T. B. Walker, Minneapolis, Minn.; Mrs. Etta B. Hurford, Indianola, Ia.; general secretary, Mrs. Ellen J. Phinney, Cleveland, Ohio; treasurer, Mrs. C. Cornelius Alford, Bernardston, Mass.; recording secretary, Miss Emma A. Fowler, Pittsburg, Pa.; evangelist and organizer, Mrs. Isabel Plumb, Dixon, Ill.

WOMAN'S FOREIGN MISSIONARY SOCIETY OF THE METHODIST PROTESTANT CHURCH.

The Women's Foreign Missionary Society of the Methodist Protestant Church has for its object "the education and Christianization of women and children in foreign lands, and to that end assisting and maintaining persons in such work." Its officers are: President, Mrs. F. A. Brown, Urichsville, Ohio; vice-president, Mrs. M. A. Miller, Kansas City, Kan.; corresponding secretary, Mrs. D. S. Stephens, Kansas City, Kan.; recording secretary, Mrs. Henry Hupfield, No. 2803 St. Paul street, Baltimore, Md.; treasurer, Mrs. J. D. Anderson, Bellevue, Pa.; auditor, Mrs. J. E. Palmer, Pittsburg, Pa.; treasurer of building fund, Mrs. C. B. Fornshil, Baltimore, Md.; Leaflet Committee, Mrs. A. C. Wragg, Castle Shannon, Pa.; mite boxes, Mrs. J. Leupple, Pitnam Grove, N. J.

The following is a list of the corresponding secretaries of the various branches:

Maryland, Mrs. Henry Hupfield, No. 2803 St. Paul street, Baltimore, Md.; New Jersey, Mrs. Thomas Humphreys, No. 242 Bank street, Bridgeton, N. Y.; Washington and Alexandria, Mrs. Laura Wilson, No. 1456 Corcoran street, Washington, D. C.; North Carolina, Miss Velna McCulloch, Greensboro, N. C.; New York, Mrs. G. W. Falkenburg, No. 1471 Dean street, Brooklyn, N. Y.; Genesee, Miss Alida Coe, Tuscarora, N. Y.; Pittsburg, Mrs. B. W. Anthony, Castle Shannon, Pa.; Michigan, Mrs. C. W. Gray, Birch Run, Mich.; West Michigan, Mrs. Ida M. Parker, Holt, Mich.; Muskingum, Mrs. F. C. Chambers, Steubenville, Ohio; Ohio, Miss Alice Conway, Catawba, Ohio; Onondaga, Mrs. R. D. Vrooman, Edicks, N. Y.; Indiana, Mrs. M. J. McCaslin, Greenwood, Indiana; North Illinois, Mrs. Ernest Evans, La Harpe, Ill.; South Illinois, Mrs. Ettie Day, Pinkstaff, Ill.; Iowa, Mrs. E. O. Chinn, South Ottumwa, Iowa; Missouri, Miss Maggie Sanders, Raymore, Mo.; Kansas, Mrs. Harlan A. Toler, No. 2068 Darby avenue, Kansas City, Kansas; Nebraska, Mrs. Margaret White, Arapahoe, Neb.; West Virginia, Miss Olive I. Hodges, Morgantown, W. Va.

WOMAN'S HOME MISSIONARY SOCIETY OF THE METHODIST PROTESTANT CHURCH.

The Woman's Home Missionary Society of the Methodist Protestant Church was formed to enlist the women and children who are connected with the congregation of that denomination throughout the United States in organized efforts in behalf of those who do not avail themselves of Gospel privileges, as well as to co-operate with other agencies of the denomination in educational and other home missionary work. Its officers are: President, Mrs. M. A. Miller, Kansas City, Kan.; vice-president, Mrs. Anna Windrem, Richfield, Mich.; recording secretary, Mrs. M. A. Colhouer, Castle Shannon, Pa.; corresponding secretary, Mrs. W. A. Morris, Kansas City, Kan.; treasurer, Miss E. P. Hazlett, East Liverpool, Ohio; auditor, Miss Ella C. Wilson, New Brighton, Pa.

ROYAL TEMPLARS OF TEMPERANCE.

The object of the Royal Templars of Temperance is to improve the moral, mental and social condition of the members of the order, to induce men to lead sober, industrious and Christian lives, to prevent by just means the growth of intemperance, to aid in saving from its evil effects those already addicted to intemperate habits, and to aid and assist the members and their families in cases of want, sickness or death. A death benefit of not more than $5,000 is paid to the immediate dependents of a member who has complied with the laws and requirements of the order.

The corporation home of the order is at Buffalo, N. Y., and the office of the supreme secretary is in the Masonic Building, Buffalo. The officers of the supreme council, elected in 1902, are Charles Mills, Sodus, N. Y., supreme councillor; Edson B. Rew, Buffalo, N. Y., supreme secretary; William H. D. Barr, supreme treasurer.

MISSION BOARD OF SEVENTH DAY ADVENTISTS.

The Mission Board of Seventh Day Adventists, located at Battle Creek, Mich., presents the following report for the year ending December 31, 1901: Amount contributed to missions in 1901, $127,337.11; total mission stations, 153; number of missionaries in foreign fields, 195. The total membership of the association was 78,188, and 4,537 believers were received during the year. The Mission Board is composed as follows: A. G. Daniells, chairman; J. H. Kellogg, David Paulson, A. J. Read, E. A. Sutherland, I. H. Evans, W. C. White, H. F. Rand, W. T. Knox, A. T. Jones, W. W. Prescott and E. R. Palmer. Its officers are: Corresponding secretary, W. A. Spicer; assistant secretary, H. E. Osborne; field secretary, W. W. Prescott; treasurer, H. M. Mitchell.

NATIONAL CONFERENCE OF UNITARIANS.

The National Conference of Unitarian and Other Christian Churches is a delegate body, composed of three delegates from each of the five hundred churches and other organizations entitled to representation. The conference meets biennially, either in Saratoga, N. Y., or at Washington, D. C., and the $2,500 required to meet the expenses of each meeting is raised by voluntary contributions from the affiliated churches. The officers of the conference are: President, Hon. Carroll D. Wright, Washington, D. C.; general secretary, Rev. D. W. Morehouse, No. 104 East Twentieth street, New York City; treasurer, Richard C. Humphreys, Boston, Mass.

BOYS' WELCOME HALL ASSOCIATION.

The Boys' Welcome Hall Association is an organization under the auspices of the Women's Christian Temperance Union, which provides a place for boys and young men to spend evenings at games, books, study or exercise. It is located at No. 185 Chauncey street, Brooklyn, N. Y., and contains a gymnasium, library, reading room, sewing school, educational class rooms and a chapel for gospel services. Public meetings are held the first Monday of each month, when reports of the work are read. The annual membership fee is $1, or $5 for sustaining members. The officers are Mrs. C. A. Barwise, president; Mrs. F. McCammon, corresponding secretary; Mrs. R. H. Duncan, treasurer.

WOMAN'S CENTENARY ASSOCIATION.

The Woman's Centenary Association is the woman's national missionary society of the Universalist Church. Its present officers are: President, Mrs. C. A. Quinby, Boston, Mass.; vice-presidents, Mrs. M. A. Adams, Melrose Highlands, Mass, and Mrs. S. A. Russell, Philadelphia, Pa.; recording secretary, Mrs. E. E. Manning, Chicago, Ill.; corresponding secretary, Mrs. S. H. Maebey, No. 202 South Ninth street, Brooklyn, N. Y.; treasurer, Mrs. T. A. Williams, Washington, D. C.; Executive Committee, Mrs. Eleanor P. Townsend, Syracuse, Ill.; Mrs. Ara Cushman, Auburn, Me., and Rev. Henrietta G. Moore, Springfield, Ohio; Publishing Committee, Mrs. E. L. Sherwood, Washington, D. C., and Mrs. E. E. Manning, Chicago, Ill.

GIRLS' FRIENDLY SOCIETY IN AMERICA.

The Girls' Friendly Society in America was founded in 1877 to encourage purity of life, dutifulness, faithfulness and thrift among its members, of whom there are now 18,543 active and 4,458 associate members in the United States. The officers of the society are: President, Mrs. Thomas Roberts, Philadelphia, Pa.; secretary and treasurer, Miss E. Alexander, No. 659 West Lexington street, Baltimore, Md. The central office of the society is located in the Church Mission House, New York City.

LABOR ORGANIZATIONS.

(Revised for The American Almanac for 1903 by Samuel Gompers, President of the American Federation of Labor.)

AMERICAN FEDERATION OF LABOR.

The American Federation of Labor was organized to aid the laboring classes "by rendering employment and the means of subsistence less precarious by securing for the workingman an equitable share of the fruits of his toil," and the rapid growth of the organization is evidence that its efforts on behalf of the toiler have been appreciated, for the development of the Trade Union, both from the standpoint of numerical expansion and that of practical results, has been marvellously rapid. The American Federation is composed of international, national, State, central and local unions, and it now undoubtedly represents the great bulk of organized labor in the United States and Canada, for it aims to give to all organizations in its ranks recognition in all phases of the labor field; to secure, in cases of boycotts, strikes and lockouts, attentive hearing before all affiliated bodies, and to render all possible financial aid when such assistance is necessary.

The American Federation is composed of 99 national and international unions, with 27 State branches, 406 city central unions and 1,378 local unions not attached to national or international bodies. Its organizers, of whom there are more than 800, act under the direction of the President, and their efforts in arousing interest in the work of well-organized trade unionism has been so successful that the aggregate membership is now estimated at more than 2,000,000. While nearly 250 weekly and monthly periodicals are published by the various unions throughout the country, the official organ of the Federation is The Federationist, edited by Mr. Samuel Gompers, and published monthly at the headquarters of the organization, No. 423 G Street, N. W., Washington, D. C.

The officers of the American Federation of Labor are: President, Samuel Gompers, Washington, D. C.; secretary, Frank Morrison, Washington, D. C.; treasurer, John B. Lennon, Bloomington, Ill.; first vice-president, James Duncan, Boston, Mass.; second vice-president, John Mitchell, Indianapolis, Ind.; third vice-president, James O'Connell, Washington, D. C.; fourth vice-president, Max Morris, Denver, Col.; fifth vice-president, Thomas I. Kidd, Chicago, Ill.; sixth vice-president, Denis A. Hayes, Philadelphia, Pa.

The following list includes all the national and international unions that are affiliated with the American Federation:

Actors' National Protective Union.—Lew Morton, 8 Union Square, New York City.

Allied Metal Mechanics, International Association of.—George B. Buchanan, 421 Valentine Bldg., Toledo, O.

Bakers and Confectioners' International, Journeymen.—F. H. Harsbecker, Room 39, Harrington Building, 236 Superior Street, Cleveland, O.

Barbers' International Union, Journeymen.—W. E. Klapetzky, Room 407, Electric Building, Cleveland, O.

Blacksmiths, International Brotherhood of.—Robert B. Kerr, New Mail Building, Moline, Ill.

Blast Furnace Workers and Smelters of America, National Association of.—William J. Clark, 128 Sandusky street, Buffalo, N. Y.

Boilermakers and Iron Ship Builders, Brotherhood of.—W. J. Gilthorpe, Room 406, Portsmouth Building, Kansas City, Kans.

Bookbinders, International Brotherhood of.—James W. Dougherty, 216 East Seventy-first Street, New York, N. Y.

Boot and Shoe Workers' Union.—C. L. Baine, 434 Albany Building, Boston, Mass.

Brewery Men, International Union of United.—Louis Kemper, Odd Fellows Temple, corner Seventh and Elm Streets, Cincinnati, O.

Brick, Tile and Terra Cotta Workers' Alliance, International.—George Hodge, 155 East Washington Street, Chicago, Ill.

Broommakers' Union, International.—W. R. Boyer, 387 South Prairie Street, Galesburg, Ill.

Carpenters and Joiners of America, United Brotherhood of.—Frank Duffy, Rooms 212-215 Lippincott Building, 46 North Twelfth Street, Philadelphia, Pa.

Carpenters and Joiners, Amalgamated Society of.—Thomas Atkinson, 332 East Ninety-third Street, New York, N. Y.

Digitized by Google

Carriage and Wagonmakers, International.—C. A. Peterson, 54 Aiken Avenue, Cleveland, O.
Carvers' Association of North America, International Wood.—George H. Thobe, 513 Russell Avenue, Covington, Ky.
Carworkers, International Association of.—A. D. Wheeler, 644 Prudential Building, Buffalo, N. Y.
Chainmakers' National Union of the United States of America.—Russell L. Mohler, 609 Genesee Street, Trenton, N. J.
Cigarmakers' International Union of America.—George W. Perkins, Room 820, Monon Block, 320 Dearborn Street, Chicago, Ill.
Clerks' International Protective Association, Retail.—Max Morris, Box 1441, Denver, Col.
Clothingmakers' Union of America, Special Order.—Charles V. Peterson, Room 10, Metropolitan Building, Chicago, Ill.
Cloth Hat and Capmakers of North America, United.—Maurice Mikol, 66 East Fourth Street, New York.
Coopers' International Union of North America.—James A. Cable, 411-412 Portsmouth Building, Kansas City, Kans.
Coremakers' International Union.—M. F. Flaherty, 101 Baxter street, South Boston, Mass.
Curtain Operatives of America, Amalgamated Lace.—Charles Pasley, 3338 Howard Street, Philadelphia, Pa.
Drivers' International Union, Team.—George Innis, Room 12, 29 Monroe Avenue West, Detroit, Mich.
Electrical Workers of America, International Brotherhood of.—H. W. Sherman, Corcoran Building, Washington, D. C.
Engineers, National Brotherhood of Coal Hoisting.—T. E. Jenkins, Room 3, Goldsmith Bldg., Danville, Ill.
Engineers, International Union of Steam.—R. A. McKee, 224 Masonic Temple, Peoria, Ill.
Engineers, Amalgamated Society of.—William Delahay, 76 Ahrens Bldg., Elm and Franklin Sts., New York.
Engravers, International Association of Watch Case.—F. Huber, Box 263, Canton, O.
Firemen, International Brotherhood of Stationary.—C. L. Shamp, 1053 Grand Avenue, Toledo, O.
Fitters and Helpers, National Association of Steam and Hot Water.—W. L. Onstott, 2834 Wallace Street, Chicago, Ill.
Flour and Cereal Employes, International Union of.—A. E. Kellington, 921 26th Avenue, N. Minneapolis, Minn.
Garment Workers of America, United.—Henry White, Rooms 116-117, Bible House, New York, N. Y.
Garment Workers' Union, International Ladies.—Bernard Braff, 8 First Avenue, New York, N. Y.
Glass Bottle Blowers' Association of the United States and Canada.—William Launer, Rooms 930-931 Witherspoon Building, Juniper and Walnut Streets, Philadelphia, Pa.
Glass Snappers (Window), National Protective Association of America.—W. C. McEnteer, 113 Haines Street, Kane, Pa.
Glass Workers' Union, American Flint.—John L. Dobbins, Room 316, Bissell Block, Pittsburg, Pa.
Glass Workers, International, Association Amalgamated.—William Figolah, 3257 Union Avenue, Chicago, Ill.
Gold Beaters' National Protective Union of America.—W. Norris Batture, 1135 Baring Street, Camden, N. J.
Granite Cutters' National Union.—James Duncan, Washington, D. C.
Grinders' National Union, Table Knife.—Frederick Spencer, Box 75, Shelburn Falls, Mass.
Hatters of North America, United.—John Phillips, 797 Bedford Avenue, Brooklyn, N. Y.
Horseshoers of United States and Canada, International Union of Journeymen.—Roady Kenehan, 1548 Wazee Street, Denver, Col.
Hotel and Restaurant Employes' International Alliance and Bartenders'. International League of America.—Jere L. Sullivan, 903 Elm Street, Cincinnati, O.
Iron, Steel and Tin Workers, Amalgamated Association of.—John Williams, House Building, Smithfield and Water Streets, Pittsburg, Pa.
Jewelry Workers' Union of America, International.—J. O. Jackson, 275 Seventh Street, Buffalo, N. Y.
Lathers, International Union of Wood, Wire and Metal.—A. F. Leibig, 182 Abbey Street, Cleveland, O.
Laundry Workers' International Union, Shirt and Waist.—Charles E. Nordeck, Lock Box 10, Station 1, Troy, N. Y.
Leather Workers on Horse Goods, United Brotherhood of.—Charles S. Conine, 435 Gibraltar Building, Kansas City, Mo.
Leather Workers' Union of America, Amalgamated.—John Roach, 317 North Seventh Street, Olean, N. Y.
Longshoremen's Association, International.—Henry C. Barter, Colonial Building, Detroit, Mich.
Machinists, International Association of.—George Preston, Rooms 82-85, Corcoran Building, Washington.
Machine Printers and Color Mixers of the United States, National Association of.—Charles McCrory, 510 Sixth Avenue, New York City.
Marble Workers, International Association of.—W. H. Downing, 1416 O'Campton Avenue, St. Louis, Mo.
Meat Cutters and Butcher Workmen of North America, Amalgamated.—Homer D. Call, Lock Box 317, Syracuse, N. Y.
Metal Polishers, Buffers, Platers and Brass Workers' Union of North America.—James J. Cullen, 25 Third Avenue, Station D, New York, N. Y.
Metal Workers' International Association, Amalgamated Sheet.—John E. Bray, 313 Nelson Building, Kansas City, Mo.
Metal Workers' International Union, United.—C. O. Sherman, 148 West Madison Street, Chicago, Ill.
Mine Managers and Assistants' Mutual Aid Association, National.—William Scaife, Springfield, Ill.
Mine Workers of America, United.—William B. Wilson, 1101 Stevenson Building, Indianapolis, Ind.
Mine Workers' Progressive Union of America, Northern Mineral.—Matt Wasley, Ishpeming, Mich.
Molders' Union of North America, Iron.—E. J. Denney, 433 Walnut Street, Cincinnati, O.
Musicians, American Federation of.—Owen Miller, 20 Elm Building, Broadway and Market Sts., St. Louis, Mo.
Oil and Gas Well Workers, International Brotherhood of.—Jay H. Mullen, Bowling Green, O.
Painters, Decorators and Paperhangers of America, Brotherhood of.—M. P. Carrick, Drawer 199, Lafayette, Ind.
Paper Makers of America, United Brotherhood of.—P. J. Ackerman, 56A Main Street, Watertown, N. Y.
Pattern Makers' League of North America.—J. B. McNerney, 25 Third Avenue, New York, N. Y.
Paving Cutters' Union of the United States of America.—J. H. Patterson, Lithonia, Ga.
Piano and Organ Workers' Union of America, International.—Frank Helle, 1350 South Forty-second Court, Chicago, Ill.
Plumbers, Gas Fitters, Steam Fitters and Steam Fitters' Helpers, United Association of.—L. W. Tilden, 518 Ogden Building, Chicago, Ill.
Plate Printers' Union of North America, International Steel and Copper.—T. L. Mahan, 12 Leroy street, Dorchester, Mass.
Potters, National Brotherhood of Operative.—J. T. Duffy, Box 50, East Liverpool, Ohio.
Powder and High Explosive Workers of America, United.—James G. McCrindle, Gracedale, Pa.
Printing Pressmen's Union, International.—W. J. Webb, 202 Lexington Avenue, Brooklyn, N. Y.
Print Cutters' Association of America, National.—Thomas G. Clark, 2555 Sartain St., Philadelphia, Pa.
Railway Employes of America, Amalgamated Association of Street.—W. D. Mahon, 45 Hodges Block, Detroit, Mich.
Railroad Telegraphers, Order of.—L. W. Quick, Fullerton Building, St. Louis, Mo.
Railway Trackmen, Brotherhood of.—John T. Wilson, 303 Benoist Building, St. Louis, Mo.
Saw Smiths' Union of North America.—Herbert I. Scott, 1316 Capitol Avenue North, Indianapolis, Ind.
Seamen's Union, International.—William H. Frazier, 1½ Lewis Street, Boston, Mass.
Spinners' Association, Cotton Mule.—Thomas O'Donnell, Box 203, Fall River, Mass.

Wood Workers' International Union of America, Amalgamated.—Thomas I. Kidd, 616-617 Garden City Block, Chicago, Ill.

INDEPENDENT LABOR UNIONS.

The national unions not affiliated with the American Federation of Labor are:
Brotherhood of Locomotive Firemen. W. F. Arnold, Peoria, Ill.
Brotherhood of R. R. Trainmen. A. E. King, Cleveland, Ohio.
Order of R. R. Conductors. W. J. Maxwell, Cedar Rapids, Iowa.
Brotherhood of Locomotive Engineers. C. H. Salmons, 307 Society for Savings Building, Cleveland, Ohio.
Brotherhood of R. R. Switchmen. M. R. Welch, 530 Ellicott square, Buffalo, N. Y.
Stone Cutters' Association. J. F. McHugh, 803 Fifth street, N. W., Washington, D. C.
Bricklayers and Masons. William Dobson, 41 Summer street, N. Adams, Mass.
Brotherhood of Operative Plasterers. T. A. Scully, 1215 Orange street, Indianapolis, Ind.
National Association of Letter Carriers. E. J. Cantwell, Hutchins Building, Washington, D. C.
Post Office Clerks. Charles Dvorak, 506 S. Wood street, Chicago, Ill.
Stone Masons' International Union. John Reichwein, President, 536 Concord street, Indianapolis, Ind.

KNIGHTS OF LABOR.

This organization has been in existence since 1878, and during its life has done important service for the workingman. It now claims a membership of about 200,000, and the officers are as follows: General Master Workman, John W. Hayes; General Worthy Foreman, I. H. Sanderson; General Secretary-Treasurer, I. D. Chamberlain, No. 43 B street, N. W., Washington, D. C.; Executive Board, H. A. Beckmeyer, J. R. Manslon, M. T. Judge. The next General Assembly will be held in 1904.

SPORTING CLUBS AND ASSOCIATIONS.

American Black Minorca Club.—The object of this club is to promote the breeding of black minorca fowls, to urge the adoption of the best type by breeders, exhibitors and judges, and to advance the interest of the breed. The directors have power to offer prizes out of the funds of the club amounting to 75 per cent of the sum in the treasury. Such prizes are open for competition only to birds owned and bred by a member of the club.

The officers are: George H. Northup, president, Raceville, N. Y.; Joseph P. Hilldorfer, vice-president, Centre avenue, Allegheny, Pa.; John J. Yelton, secretary and treasurer, No. 362 North Clinton street, East Orange, N. J.; H. A. Parkhurst, assistant secretary, No. 110 Glenwood avenue, East Orange, N. J. Directors: Dr. R. W. Baker, No. 1138 Pendleton avenue, St. Louis, Mo.; Mrs. George E. Monroe, Dryden, N. Y.; Rowland Story, No. 187 Arlington avenue, Brooklyn, N. Y.; A. H. Gseller, No. 827 Drexel Building, Philadelphia, Pa.

American Exhibition Game and Game Bantam Club.—The objects of this club are to obtain the better classification of the game fowls of our poultry shows by offering special premiums and guaranteeing all or part of the classes provided thereat; to protect the interests of breeders and exhibitors of game fowls; to suppress fraud and in general to ameliorate the condition of this variety. It has now fifty-two members, and these are the officers: T. A. Havemeyer, president; Robert D. Winthrop, first vice-president; S. W. Doubleday, second vice-president; Charles T. Cornman, secretary and treasurer; Executive Committee, F. P. Magoun, H. O. Havemeyer, Jr., William Barber, A. E. Blunck, A. F. Pierce, Charles Jehl, Fremont Chapin, A. A. Parker, John Crowe.

American Kennel Club.—All dog shows of record held throughout the United States are held under the rules of the club, subject to its control and government. It issues the official stud book of this country, and the registrations therein are recognized by the United States Government, to the extent that certified pedigrees issued by it, if in conformation with the rules of the Treasury Department, will admit dogs imported to this country free of customs duties. It holds a "trial court" before which are tried all cases for misconduct in connection with dogs, and if the penalty of disqualification is ordered, it means that the person so penalized cannot register a dog, nor can a dog bred or owned by him, and subsequently conveyed to another, be registered, nor can that person show a dog at any show held in the United States. In short, it assumes the jurisdiction which is acknowledged over all kennel matters in this country. The officers are: President, August Belmont; vice-president, H. H. Hunnewell, Jr.; secretary-treasurer, A. P. Vredenburgh. Address all communications to the secretary, 55 Liberty street, New York. Officers, associate members: President, H. K. Bloodgood; vice-president, Oliver Ames; secretary, Henry Jarrett; Executive Board, August Belmont, chairman; H. H. Hunnewell, Jr., H. K. Bloodgood, A. Clinton Wilmerding, Marcel A. Viti, J. W. Appleton, Charles W. Rodman, Jr., G. M. Carnochan; Pacific Advisory Committee, John E. De Ruyter, chairman; H. H. Carlton, M. C. Allen, A. J. Allen, J. P. Norman, secretary; Standing Committees—Stud Book, Marcel A. Viti, chairman; C. B. Knocker, Charles W. Rodman, Jr.; Constitution and Rules, Charles W. Rodman, Jr., chairman; James Watson, G. M. Carnochan, Henry Jarrett, A. P. Vredenburgh; Field Trials and Coursing Meetings, J. W. Appleton, chairman; D. F. Summers, John Caswell, R. Crompton; Finance, A. C. Wilmerding, chairman; James B. Blossom, G. M. Carnochan; Membership, G. M. Carnochan, chairman; Singleton Van Schaick, C. B. Knocker.

American Mastiff Club.—The object of the club is to promote the interest of the mastiff breed of dogs in North America. It has now nine members, ten associate members, and thirty-nine life members, and the officers are as follows: President, Richard H. Derby; vice-presidents, Robert Lenox Belknap, F. T. Underhill, George G. Stephenson; Executive Committee, R. H. Derby, R. L. Belknap, F. T. Underhill, George G. Stephenson, Edward Dudley, James Lenox Banks, W. P. Stevenson, Herbert Mead, C. C. Marshall, J. L. Winchell; secretary and treasurer, Herbert Mead, Lake Waccabuc, N. Y.

American Rifle Team of Staten Island.—Was founded for these objects: To learn the use of rifles for the purpose of improving the marksmanship of the members in the art of shooting and rifle practice, to preserve and cultivate social and friendly relations amongst its members, and voluntarily temporarily assist needy and distressed members. The territory in which the principal operations of the society are conducted is the County of Richmond and its principal office is at Stapleton.

American Saddle Horse Breeders' Association.—The first name of this association was "National," which was changed to "American." It was organized in Louisville, Ky., April 7, 1891, pursuant to a call made by prominent breeders and handlers of the Kentucky type of saddle horses. General John B. Castleman, of Louisville, was elected president, I. B. Nall, of Louisville, secretary, and they are still retained in office. A constitution and by-laws were adopted and a complete set of officers elected. Rules were adopted for

Digitized by Google

entries in the Register, to be published, and the secretary, I. B. Nall, was authorized to make entries. A list of foundation horses was named and a committee appointed which selected, registered and numbered a list of deceased sires of note and reputation as sires of saddle and show horses. The first volume of the Saddle Horse Register was issued in 1892. It contained entries of 545 stallions and 555 mares. Vol. II. was issued in 1894, Vol. III. in 1900 and Vol. IV. in 1902. The number of entries to date of the last volume is: Stallions and geldings, 1,785; mares, 2,229. Additional officers are: First vice-president, W. A. Gaines, of Georgetown, Ky.; second vice-president, Dr. S. Maddox, Ely, Mo.; treasurer, Attilla Cox, Louisville. The officers are directors with an addition of eight from different States; also one is selected from each for State vice-president. Members consist of all who own a share of capital stock in the association. The shares now cost $20, if issued by the secretary. There are about 236 members, but the number of the patrons of the Register is about 1,000, located in nearly every State and in Canada. The association pays no dividends, but members register at half-rate and get the Register free. The fees for registry are: Members, $1; others, $2. These fees pay all expenses of the association.

American Trotting Association.—Was organized for the purpose of promoting the breeding and trotting interests of the country, by conducting all trials of speed in accordance with an equitable written code of rules, and deciding all matters of difference in accordance with its provisions, which have been adopted with a view of rendering exact justice to the struggling and obscure horseman as well as to his more affluent competitors. The association has 583 members located in various parts of the United States and Canada. During 1901 these members held 524 meetings, with an aggregate of 1,842 days of trotting and pacing races. At these meetings $1,145,050 was offered in stakes and purses. The headquarters of the association are at No. 355 Dearborn street, Chicago, Ill., and its present officers are: President, W. P. Ijams, Terre Haute, Ind.; vice-president, E. J. Lewis, Chicago, Ill.; secretary and treasurer, J. H. Steiner, Chicago, Ill.; directors, E. M. Bartlett, Omaha, Neb.; N. J. Colman, St. Louis, Mo.; J. W. Fleming, Columbus, O.; T. H. Gill, Milwaukee, Wis.; F. T. Moran, Detroit, Mich.

Collie Club of America.—The object of this club is to promote the breeding of collies, to publish a description of the true type, to urge the adoption of the rule by breeders and judges as the only recognized standard by which collies are to be judged, and to do all in its power to protect and advance the interests of the breed. The club gives a number of cups, stakes and medals at the exhibitions, and these are much sought after. It has nine honorary, thirty-eight life and sixty-five annual members. The officers are: President, Henry Jarrett; vice-presidents, J. Pierpont Morgan, John L. Lincoln, Samuel L. Stewart, Joseph Reid; executive committee, the officers and Edwin J. Van Schaick, M. M. Palmer, Dr. M. Lewson, F. Geraghty; treasurer, Robert A. Murray, No. 100 Chauncey street, Boston, Mass.; secretary, William O. Hunter, Fayetteville, Pa.; delegate to the American Kennel Club, James Watson.

Intercollegiate Association of Amateur Athletes.—Was organized to protect the mutual interests of the different colleges comprising the association, as well as for the advancement and improvement of amateur athletic sports among colleges. The educational institutions which are affiliated with the association are Amherst, Boston College, Bowdoin, Brown, California, The College of the City of New York, Columbia, Cornell, Fordham, Georgetown, Harvard, Haverford, Holy Cross, Johns Hopkins, Lafayette, Michigan, New York University, Pennsylvania, Princeton, Rutgers, Stevens, Swathmore, Syracuse, Williams and Yale, and the association declares its absolute jurisdiction among its members over the following sports: Running (all distances), walking, jumping, pole vaulting, putting the shot, throwing the hammer and throwing of weights, and any violation of the rules made to govern these games renders a member or competitor liable to suspension or expulsion. The officers of the association are: President, George H. Hooker, Cornell; secretary, C. Robert Adams, New York University; treasurer, Allen B. A. Bradley, Columbia; honorary vice-presidents, James P. Clarke, of Fordham, and James W. Reeder, of Haverford. Executive committee: Lawrence P. Frothingham, of Harvard; Charles Gould, of Yale; Edwin K. Large, of Princeton, and Edward A. Mechling, of Pennsylvania. Advisory Committee: Gustavus A. Kirby, of Columbia; Murdock Kendrick, of Pennsylvania, and Thornton Gerrish, of Harvard. Faculty Committee: Professor E. L. Nichols, of Cornell; Professor A. C. Coolidge, of Harvard; Professor E. L. Richards, of Yale; Professor H. B. Fine, of Princeton, and Professor M. J. Colbert, of Georgetown.

Irish Terrier Club of America.—The object of the club is to promote the breeding of pure Irish terriers, to define precisely and publish a definition of the true type and to urge the adoption of such types on breeders, judges, dog show committees, etc., as the only recognized and unvarying standard by which Irish terriers are to be judged, and which may in future be uniformly accepted as the sole standard of excellence in breeding and in awarding prizes of merit to Irish terriers. The officers are: Howard Willets, president; L. Loring Brooks, vice-president, William W. Caswell, treasurer; Charles W. Rodman, secretary. Board of Governors—Frederick J. Alley, L. Loring Brooks, William W. Caswell, Oscar W. Donner, Mrs. James L. Kernochan, Julian A. Madan, Charles W. Rodman, Jr., Singleton Van Schaick, Howard Willets. Delegate to the American Kennel Club, Singleton Van Schaick. Committee on Special Prizes—William W. Caswell, Charles W. Rodman, Jr., Singleton Van Schaick. Official list of judges—William L. Beadleston, L. Loring Brooks, William W. Caswell, Oscar W. Donner, Henry Jarrett, Harry W. Lacy, James Mortimer, Charles W. Rodman, Jr., Singleton Van Schaick, James Watson. It has eighty-six members.

Middle States Regatta Association.—Its object is the advancement and improvement of rowing among amateurs. It defines an amateur as one who does not enter in any competition, for either a stake, public or admission money or entrance fee, or compete with or against a professional for a prize; one who has never taught, pursued or assisted in the pursuit of athletic exercises as a means of livelihood; one whose membership of any rowing or other athletic club was not brought about, or does not continue because of any mutual agreement or understanding, expressed or implied, whereby his becoming or continuing a member of such club would be of any pecuniary benefit to him whatever, direct or indirect; one who has never been employed in any occupation involving use of the oar or paddle; one who rows for pleasure or recreation only, and during his leisure hours, and does not abandon his usual business or occupation for the purpose of training. The officers are: President, William Vandeveer, Passaic Boat Club, Newark, N. J.; vice-president, J. F. Buckley, Wyanoke Boat Club, New York; recording secretary, George S. Scofield, Jr., Clifton Boat Club, Clifton, S. I.; secretary and treasurer, David Brown, No. 110 West One Hundred and Twenty-third street, Atalanta Boat Club, New York.

National Amateur Skating Association of America.—Was founded in 1885 by William B. Curtis, its object being to give the annual speed skating and figure skating national championships, and to perfect, perpetuate and establish on a firm basis the development of speed, art and science of skating in America. It has held skating championships yearly since its organization, with the exception of 1887, 1890, 1893 and 1902, when the ice was not in condition. The officers are: President, H. E. Buermeyer, succeeding the late W. B. Curtis, October 30, 1900; vice-president, R. J. Schaefer; secretary-treasurer, S. J. Montgomery; captain, G. D. Phillips; first lieutenant, A. G. Keane; second lieutenant, H. S. Lyons.

National Association of Amateur Oarsmen.—Its object is the encouragement of amateur rowing, and through its affiliation with the greatest events in this country and Europe it exerts an influence in the government of rowing throughout the world. The association, which was organized on August 29, 1872, now consists of nearly 200 clubs and a personal membership which exceeds 50,000, and the annual races for the American championship are held under its auspices. Its present officers are: President, Julius D. Marks, New York City; vice-president, Charles Catlin, Chicago; treasurer, Robert H. Pelton, New York City; secretary, Fred R. Fortmeyer, Postoffice Box 740, New York City. Executive Committee—Henry W. Garfield, of Albany, N. Y.; Walter Stimson, of Cambridge, Mass.; William C. Jupp, of Detroit, Mich.; Claude R. Zappone, of Washington, D. C.; C. W. Preisendanz, of Philadelphia, Pa.; James Pilkington, of New York City; James P. Fox, of Boston, Mass., and Gordon R. Carrigan, of Philadelphia, Pa.

National Bantam Association.—The main objects of this association are the solidifying of the interests of bantam fanciers, and, by the offer of cash special prizes for the several varieties, encouraging the breeding of better birds. The annual exhibit is held at New York each year in connection with the show of the New York Poultry and Pigeon Association, at Madison Square Garden. During the past eight years

Digitized by Google

more than 3,000 choice specimens in bantams alone have been placed on exhibition, and over $1,000 in cash prizes, besides numerous cups and medals, have been won by the members. The association was organized in 1892 with a dozen members, and now numbers eighty fanciers, who come from a wide range of this country and from Canada. The next annual meeting will be held in Madison Square Garden during the week of January 6-10, 1903. The past presidents are: C. E. Rockenstyn, 1893-5, and Philander Williams, 1895-1902. The present officers are: Charles T. Cornman, president; Hon. A. F. Pierce, Winchester, N. H.; Dr. W. Y. Fox, Taunton, Mass.; Hon. D. A Nichols, Monroe, Conn; C. H. Proper, Schoharie, N. Y.; W. J. Andries, Hackensack, N. J.; Dr. E. H. Witmer, Neffeville, Pa.; Ira C. Keller, Prospect, O.; M. Mayer, Brunswick, Ga.; Richard Oka, London, Canada; S. A. Woftzyer, North Manchester, Ind., vice-presidents; E. Larham, Flatbush, N. Y., secretary; A. A. Parker, treasurer; John Glasgow, Mahwap, N. J.; J. F. Kirkpatrick, Easton, Pa.; F. F. McGrew, New York; William Holmes, Shelton, Conn.; William Barber, Toronto, Canada; H. J. Quilhot, Johnstown, N. Y.; Charles T. Cornman, Carlisle, Pa.; A. A. Parker, Dunellen, N. J.; E. Larham, Flatbush, N. Y., directors.

National Rifle Association of America.*—A national patriotic organization organized in 1871 for the purpose of "promoting and encouraging rifle shooting throughout the United States." The association owns no ranges, its sphere being that of a supervisory and governing nature; making the rules and regulations governing competitions, training and sending to other countries rifle teams to represent the United States in international competitions, etc. The association owns and controls four trophies, to wit: The Palma trophy, representing the World's team championship, the Hilton trophy for teams from the different States, the U. A. Army and foreign countries, the Interstate trophy for the Interstate championship, the Wimbledon for the individual long range championship and the Leech Cup for long range individual shooting. All of these trophies, with the exception of the Palma are shot for annually at Sea Girt, N. J., on the range of the New Jersey National Guard the first week in September.

Membership in the association consists of the following: Benefactors—To whom shall be issued on payment of $1,000 a certificate entitling the holder or his nominee to all the rights of membership in the association in perpetuity. Patrons—To whom shall be issued on payment of $500 a certificate entitling his and the male members of his immediate family to all the rights of membership in the association for life of said patron. Life Members—Who shall upon election as such by the executive committee and the payment of $25 be entitled to all privileges of membership during life. Associate Members—Who shall be elected by the executive committee and shall contribute annually $5. Annual Members—Who shall pay an initiation fee of $1 and annual dues of $1 in advance. Subscribing Members, Firms, Corporations or Banks—Who shall subscribe $100 or more per annum shall have a vote for each $500 so subscribed annually.

Any rifle association, club or military organization may affiliate with the association upon the payment of $10 membership fee and $5 annual dues, if the organization has less than fifty members. The annual dues for organizations having more than fifty members will be at the rate of 10 cents per member, provided, that regiments will not be required to pay more than $10.

Officers: President, Brigadier-General Bird W. Spencer, inspector-general of rifle practice, New Jersey; vice-presidents, Brigadier-General George H. Harries, commanding D. C. M.; Brigadier-General John S. Saunders, adjutant-general, Maryland; Colonel James M. Rice, Illinois N. G.; treasurer, Nathan Spering, president Philadelphia Rifle Association; secretary, Lieutenant Albert S. Jones, Passaic, N. J.

National Wyandotte Club.—The purpose of this association is to foster and benefit all varieties of Wyandottes as may seem best from time to time. It is a co-operative effort on the part of Wyandotte breeders generally to maintain these several varieties at a high point of excellence, as an all around general purpose fowl having more general purpose qualities than any other variety of poultry, especially adapted for market purposes and egg production, and having at the same time many admirers among those who care for the fancy side of the poultry business. The officers are: President, James Cheston, Jr.; vice-president, A. L. Sparks; secretary and treasurer, C. S. Mattison.

New York State Chess Association.—Organized in 1878. Officers, President, Isaac L. Rice, Manhattan; first vice-president, W. E. Scripture, Rome; second vice-president, A. McMartin, Johnstown; third vice-president, A. E. Blackmar, Brooklyn; secretary and treasurer, Dr. L. D. Broughton, Jr., No. 418 Madison street, Brooklyn; Advisory Committee, D. F. Searle, Rome; H. Helms, Brooklyn; George H. Thornton, Buffalo; J. M. Hanham, Manhattan; Julius Finn, Cosmopolitan. President Rice donated this year a valuable trophy for annual competition between champions of chess organizations of all States east of and including New Jersey, Pennsylvania and New York, the tournaments to be held during the annual midsummer meetings of the New York State Chess Association, and to be played under the rules which governed the contests for the Staatz-Zeitung trophy. The trophy will become the property of the club whose champion wins it three times. On February 22 a meeting was held in the hall of the United Charities building, Manhattan. Prize winners, master class: Dr. B. Lasker, first prize and New York State championship for 1902; H. Keidanz, second prize; the third, fourth and fifth prizes were shared equally by Julius Finn, H. Helms and J. M. Hanham. General tournament—Leo Pelz, first prize; second, third and fourth shared by C. Curt, L. Schweitzer and E. Loeb; fifth prize shared by A. E. Swaffield, T. T. Lawrence and V. Igel. Midsummer meeting, held at Murray Hill Hotel, Thousand Islands, July 14 to 19. A tie occurred in the tournament for the Rice trophy between Juliuc Finn, Manhattan Chess Club, and C. S. Howell, Brooklyn Chess Club, which was played off in October. General Tournament: First Class—C. Curt, first prize and "Farnsworth Cup;" second prize, George N. Cheney, Syracuse; third prize, D. W. Waller, Seneca Falls. Second Class—First prize, B. Colle, New York City; second prize, Dr. S. W. Close, Gouverneur.

Pillsbury National Correspondence Chess Association.—Was formed in January, 1896, its object being to increase interest in the pastime, to raise the standard of chess in America and to provide a means whereby lovers of the game might satisfy their utmost desires. Team matches, tournaments, board contests and correspondence games are arranged for and projected by the management, and an extensive membership throughout the United States enables it to furnish informal games to members without delay. In 1897-98 the association won a correspondence with the Orillia Chess Club of Canada by a score of 8½ to 3½. The list of officers is: Lee W. Parke, president; Stanley H. Chadwick, first vice-president; Hermann Helms, second vice-president; Nelson Hald, third vice-president; Rev. Myron W. Haynes, D. D., treasurer; Sidney P. Johnston, referee; A. B. Hodges, critic; G. A. L'hommede, corresponding secretary; S. F. Barnett, recording secretary; William Dubois, tournament director; C. C. McKechnie, chairman Membership Committee; A. E. Swaffield, chairman Game Committee.

Tuxedo Tennis and Racket Club.—The object of this club is sufficiently expressed by its title. Its courts for the two games are said to be the finest in the country. The place resembles the Casino at Newport, everybody playing something, and the ladies very often try their hands at court tennis. The tennis and squash courts are much used by them and the children. There are three bachelor apartments connected with the club, which are rented annually by T. Suffern Taller, Hon. Hugo Baring and H. Cruger Oakley. The president of the club is James Henry Smith; vice-president, H. W. Poor; secretary and treasurer, Hugo Baring; trustees are the above with Robert Bacon, J. W. Henning, A. D. Guillard, Grenville Kane, P. Lorillard, T. Suffern Taller and J. McDonough, while Robert Moon is the club manager.

United States Golf Association.—Its object is, as its name implies, to promote interest in the game of golf, to establish and enforce uniformity in the rules of the game, and to establish a uniform system of handicapping Each year there are three championship contests, amateur, open and for women. The officers are: R. H. Robertson, president; David R. Forgan and G. Hubert Windden, vice-presidents; Maturin Ballou, secretary; Samuel Y. Heebner, treasurer; these with James A. Steelman and Alan L. Reid, executive committee.

* By Lieutenant Albert S. Jones, secretary of the association.

MISCELLANEOUS ASSOCIATIONS.

SOCIETY OF THE RED CROSS.

The Society of the Red Cross has been in existence in Europe for thirty-eight years and in the United States for twenty years. It is a confederation of relief societies in different countries, the aim of which is to ameliorate the condition of sick and wounded soldiers in the time of war and to lend aid at the time of any disaster of such extent that it can be termed national.

The development of the principle of the Red Cross Society began in 1859, during the battle of Solferino. A Swiss gentleman, Henri Dunant, happened to be present at the battle, and the scenes of suffering he witnessed aroused in him the recognition of the need of some organization which would have for its object the amelioration of the suffering of soldiers on the battlefield and in hospitals. He presented his views before the Swiss Society of Public Utility, and, as a result a convention was called to meet at Geneva in 1864.

At this convention sixteen governments were represented, including all the great European nations except Russia. It was numerously attended by members eminent in diplomatic or military service or in medical science. The deliberations occupied two weeks, and a code of nine articles were adopted, providing for the protection of hospitals and people bearing the insignia of the Red Cross, and for a proper care of wounded enemies or prisoners. This code made no provision for the relief of suffering caused by disasters other than war.

It remained for America to organize the civil branch of the Red Cross, known as the "American Amendment." The ratifying Congress of Berne, after some discussion, accepted the American society with this digression from the original treaty:

The first act in each country, after its government has signed the treaty, has been to form a national central society. Each national society is independent, making its own regulations, except as it owes allegiance to the head centre, the International Society of Switzerland, in respect to a few fundamental principles essential to unity of direction and successful action.

These are, first, that in each country there shall be one national, central society, to which the auxiliary societies in that country shall be tributary, the central society being the medium of communication for all with the seat of war and with medical authorities. It is through this central society that the work is recognized by government.

Second, that the societies shall in time of peace keep themselves constantly prepared for war, thus securing permanency of organization.

Third, that during war their succor shall be extended to foe equally with friend, whenever necessary.

Fourth, that societies whose countries are at peace may send relief to belligerent armies without being considered to violate any principle of neutrality to which their governments may be pledged.

The public, in general, to a large extent, is coming to the use of the Red Cross as a medium of conveyance and distribution for its contributions. The National Association, with its headquarters at Washington, has a field agent, who visits, in person, every scene where aid is rendered. Commencing with the "forest fires" of Michigan in 1881, there has fallen to its hands a share of the relief work in the overflow of the Mississippi River in 1882; of the Ohio in 1883; of the Mississippi cyclone the same year; the overflow of both the Ohio and the Mississippi in 1884; the representation of the United States Government at the International Conference of Geneva, Switzerland, in 1884; the exhibition of "woman's work" in the Red Cross, both foreign and American, at the Exposition at New Orleans in 1885; the drought in Texas in 1886; the Charleston earthquake in 1886; the representation of the United States Government again at the Court of their Royal Highnesses, the Grand Duke and Duchess of Baden, at Carlsruhe, Germany, in 1887; the relief of the sufferers from the Mount Vernon cyclone, 1888, and all great disasters since then.

The executive officers of the American National Red Cross are: Clara Barton, President; General John M. Wilson, First Vice-President; Mrs. John A. Logan, Second Vice-President; Samuel W. Briggs, Secretary; William J. Flather, Treasurer; Hon. Richard Olney, Counsellor, and the President of the United States and the members of the Cabinet, Board of Consultation. The headquarters are in the Sun Building, Washington, D. C.

Below is a table of the work done by the American National Red Cross Society since 1881:

1881—Michigan forest fires, material and money	$80,000
1882—Mississippi River floods, money and seeds	8,000
1883—Mississippi River floods, material and seeds	18,000
1883—Mississippi cyclone, money	1,000
1884—Ohio and Mississippi rivers floods, feed for stock, food, clothing, tools, lumber, house furnishings	175,000
1883—Balkan war	500
1885—Texas famine, contributions and State appropriations resulting from personal investigations and effort	100,000
1886—Charlestown earthquake, money	500
1888—Mount Vernon, Ill., cyclone, money and supplies	85,000
1888—Florida yellow fever, physicians and nurses	15,000
1889—Johnstown disaster, money and all kinds of materials, buildings and furnishings	250,000
1892—Russian famine, mainly food	125,000
1893—Pomeroy, Iowa, cyclone, money, nurses and medical supplies	2,700
1893-1894—South Carolina islands hurricane and tidal wave, money, lumber, tools, seeds, supplies, materials and clothing	65,000
1896—Armenian massacres, Turkey, Asia Minor, protection, medical help, tools, seeds, food, stock, money	116,325
1898-1900—Cuban Reconcentrado relief, food, clothing, medicines, material, orphan asylums	500,000
1898—Spanish-American War, through auxiliaries, East and West	800,000
1900—Galveston storm, money and material	120,000

ACTORS' FUND OF AMERICA.

The Actors' Fund of America is a charity whose object is to "advance, promote and benefit the condition and welfare of members of the corporation and of other persons belonging to the theatrical profession, and to aid the indigent sick and to bury the destitute dead of the theatrical profession in the United States of America."

The annual membership numbers about 1,000, and the life membership, made up of members of the profession and those interested in the drama, consists of several hundred more. Funds are raised by annual dues, bequests, special entertainments and by contributions. In the Summer of 1902 an Actors' Fund Home was opened at West New Brighton, Staten Island, for members of the profession incapacitated through age or illness for active work.

The offices of the fund are at 12 West Twenty-eighth street, New York, and the officers for 1902 are: Al. Hayman, President; Daniel Frohman, First Vice-President; Antonio Pastor, Second Vice-President; William Harris, Treasurer; Frank McKee, Secretary.

TELEGRAPHERS' MUTUAL BENEFIT ASSOCIATION.

The Telegraphers' Mutual Benefit Association is an organization of employes in the telegraphic service, and has for its object the payment of money to the beneficiaries of its deceased members. It is a purely insurance order and eligibility to membership consists in being an employe of some branch of telegraphic or telephone service and in good health at the time of making application. It is conducted on the half assessment principle, and as the association has a large reserve fund the assessments cannot be large. The officers are: Belvidere Brooks, President; W. H. Young, First Vice-President; Charles P. Bruch, Second Vice-President; M. J. O'Leary, Secretary; A. R. Brewer, Treasurer. The secretary's address is Post Office Box 510, New York City.

LEAGUE OF AMERICAN WHEELMEN.

By ABBOT BASSETT, Secretary and Treasurer.

The L. A. W. is an organization to promote the general interests of cycling; to ascertain, defend and protect the rights of wheelmen; to facilitate touring, and to secure improvement in the condition of the public roads and highways by promoting in the public mind a sense of the utility, general economy and desirability of high-class roads, and an active sentiment in their favor. The crying need of the hour is for better roads. To obtain reform in this direction is one of the objects of the league. Already much work has been done, but there is yet very much to be accomplished. From its infancy the L. A. W. has been at the front in the Good Roads movement. By means of this body, legislative action has been secured in many States relative to the improvement of the public highways and the people have been educated up to the point where they now see the absolute necessity for good roads. The league has expended over $120,000 in this portion of the work.

The League of American Wheelmen was organized at Newport, R. I., May 31, 1880, and now has a membership of 10,462. Its headquarters are at No. 221 Columbus avenue, Boston, Mass., and its officers are: President, W. A. Howell, Rockville, Conn.; first vice-president, M. M. Belding, Jr., No. 455 Broadway, New York City; second vice-president, Howard L. Perkins, box 103, Providence, R. I.; secretary-treasurer, Abbot Bassett, No. 221 Columbus avenue, Boston, Mass.; auditor, Clarence W. Small, No. 74 Winslow street, Portland, Me.

The division officers are:

Connecticut—Chief consul, E. H. Wilkins, Portland; secretary-treasurer, W. A. Wells, Norwich.

Kentucky—Chief consul, J. W. Brigman, Columbia Building, Louisville; secretary-treasurer, Owen Lawson, No. 2510 West Jefferson street, Louisville.

Maine—Chief consul, C. W. Small, No. 74 Winslow street, Portland; secretary-treasurer, H. T. Passmore, Bath.

Maryland—Chief consul, J. J. McElroy, No. 105 West Fayette street, Baltimore; secretary-treasurer, R. H. Carr, Jr., Nos. 607 and 621 Law Building, Baltimore.

Massachusetts—Chief consul, George A. Perkins, No. 15 Court square, Boston; secretary-treasurer, Aaron Wolfson, No. 16 Paisley Park, New Dorchester.

Michigan—Chief consul, E. N. Hines, No. 35 Larned street, West Detroit; secretary-treasurer, Henry E. Perry, No. 243 Sheridan avenue, Detroit.

Missouri—Chief consul, John R. Williams, No. 1933 North Second street, St. Louis; secretary-treasurer George Lang, Jr.; No. 3656 Cleveland avenue, St. Louis.

New Hampshire—Chief consul, Robert T. Kingsbury, Keene; secretary-treasurer, E. B. Stearns, box 63, Manchester.

New Jersey—Chief consul, Dr. Harvey Iredell, box 34, New Brunswick; secretary-treasurer, J. C. Tattersall, box 329, Trenton.

New York—Chief consul, C. J. Obermayer, No. 498 Fifth avenue, Brooklyn; secretary-treasurer, John F. Clark, office of the division, Vanderbilt Building, New York.

Pennsylvania—Chief consul, Samuel A. Boyle, No. 654 City Hall, Philadelphia; secretary-treasurer, George M. Schell, division office, No. 639 The Bourse, Philadelphia.

Rhode Island—Chief consul, James G. Peck, East Providence; secretary-treasurer, Nelson H. Gibbs, No. 288 Westminster street, Providence.

South California—Chief consul, O. S. Barnum, No. 302 Stimson Block, Los Angeles; secretary-treasurer, H. H. Gibbs, Stimson Block, Los Angeles.

Wisconsin—Chief consul, Louis Pierron, No. 736 Holton street, Milwaukee; secretary-treasurer, F. G. Cramer, No. 207 Grand avenue, Milwaukee.

Of the practical work done by the league may be mentioned the prosecution of many cases in which the rights of wheelmen were sought to be invaded. The passage of the so-called Liberty bill by the New York Legislature is a case in point. Wheelmen were not allowed to ride in New York parks nor on the boulevards, and there was nowhere else to ride. We made a test case and were beaten; $12,000 spent and nothing gained. We went to the Legislature and got a new law which provided that no laws or local restrictions shall be enacted against the use of the wheel in the State of New York that are not equally applicable to vehicles drawn by horses. In several other States we have obtained similar bills. In fact the league has made it possible for a cycler to ride on any street or highway in the United States, and whereas, before the organization of the L. A. W., wheelmen as wheelmen had no legal standing, their wheels now have the same legal standing as the carriage.

NATIONAL CYCLING ASSOCIATION.

The National Cycling Association was organized December 8, 1898, and incorporated March 31, 1899. It has for its object the direction of bicycle racing, the prevention, detection and punishment of frauds therein, uniformity in the government of the sport, methods of conducting race meets, and all other interests which would mutually benefit the association, the racing men and the general public.

The officers for 1902 are: President, George M. Hendee, Springfield, Mass.; first vice-president, C. B. Bloemecke, Newark, N. J.; second vice-president, F. R. Wendelschaefer, Providence, R. I.; secretary, Tom Roe, Harlem Wheelmen, New York City.

Board of Control: A. G. Batchelder, chairman, No. 150 Nassau street, New York City; R. F. Kelsey, Boston, Mass.; N. E. Turgeon, Buffalo, N. Y.; C. Ross Klosterman, Baltimore, Md.; Harry Hartley, Jacksonville, Fla. Special Representatives: W. I. Doty, Denver, Col.; C. W. Carpenter, San Francisco, Cal. A. R. C. U. Representative: Frank L. Kramer, East Orange, N. J.

Board of Appeals: G. A. Needham, chairman, Kings County Wheelmen, Brooklyn, N. Y.; Abbot Bassett, Boston; M. L. Bridgman, New York City; Horace S. Fogel, Philadelphia; S. A. Miles, Cycle Age, Chicago.

SPORTSMAN'S BENEVOLENT FUND OF AMERICA.

A young and flourishing benevolent organization, which had its birth in New York, is the Sportsman's Benevolent Fund of America. This association was organized in 1899, receiving a charter in September of that year. It has for its object the caring for indigent and weak members of the athletic profession, and those who are eligible to help are those who have lived a sporting life in its widest significance and can show destitution and lack of ability to earn a living. A distinction is drawn between true sportsmen, who enjoy athletic games or games of skill, and those who indulge in so-called sport that has in it an element of cruelty.

It does not purpose housing its constituents as a charity, but to enable them to live where they will, paying up to a certain amount for board. It also pays the expenses in case of illness or death of one of those deserving its care.

The fund is raised by voluntary contributions from the sportsmen of the country, and the association is financially completely successful. Membership in the association costs $2 a year or $50 for life, but it is not necessary to be a member to receive aid from the fund. Boxes for the receipt of contributions are placed in conspicuous places about New York City, or money can be sent to the treasurer. The association has rooms at 1601 Broadway, where meetings are held and general business transacted.

During the past year, beside caring for many who needed immediate help, the fund took upon itself the expenses of the funeral and burial of Adolph De Ruyter, and made every effort to recover the body of Warren F. Lewis, who was drowned in Long Island Sound.

The officers for 1902 were: Selden W. Crowe, president; Michael Donovan and Adolph Jantzen, vice-presidents; Michael Coburn, secretary; Dr. S. W. Crowe, treasurer; James McClelland, counsel, and E. L. Granger, Hot Springs, Ark., and Sam Gassenheimer, Washington, D. C., corresponding secretaries.

ASSOCIATED PRESS.

The annual meeting of the Associated Press was held in New York, September 17. There was an average attendance and the following officers were elected; President, Frank B. Noyes, Chicago Record-Herald; First Vice-President, Horace White, New York Evening Post; Second Vice-President, William R. Nelson, Kansas City Star; Secretary, Melville E. Stone; Assistant Secretary, Charles S. Diehl; Treasurer, V. P. Snyder; Executive Committee, Charles W. Knapp, St. Louis Republic; Stephen O'Meara, Boston Journal; Victor P. Lawson, Chicago News; Whitelaw Reid, New York Tribune, and Frank B. Noyes, Chicago Record-Herald.

The present directors of the Associated Press are: Whitelaw Reid, New York Tribune; W. L. McLean, Philadelphia Bulletin; George Thompson, St. Paul Dispatch; Charles H. Grast, Baltimore News; W. D. Birchell, Columbus Dispatch; Clark Howell, Atlanta Constitution; Frank B. Noyes, Albert J. Barr, Pittsburg Post; Charles W. Knapp, M. H. De Young, San Francisco, Cal.; Stephen O'Meara, Victor F. Lawson, Harry W. Scott, Portland Oregonian; Thomas G. Rapier, New Orleans Picayune, and Herman Ridder, New York Staats Zeitung.

LEAGUE OF ELECT SURDS.

The League of Elect Surds is a benevolent organization of deaf men resident in New York City and vicinity. Most of the members are professional men or artisans, graduates of the college or of schools for the deaf, and are associated together to obtain the benefits of co-operation denied them by the majority of fraternal bodies which consider a deaf person an unsafe risk. Its objects are to promote the welfare of its members and other deaf persons; to elevate the moral tone, to cultivate feelings of friendship; to render assistance to them and their families when necessary; to form a bond of union between them, and to afford an organization whereby they may act together for the common good. The League is unsectarian and non-political, and is open to any deaf man twenty-one years of age or over who possesses certain qualifications, including an honest means of support and a respectable education. Its headquarters are at 250 West One Hundred and Twenty-fifth street, New York City, and the officers are: Edwin A. Hodgson, Grand Ruler; Isaac Newton Soper, Deputy Grand Ruler; Thomas F. Fox, Grand Secretary and Treasurer; Alexander L. Pach, Grand Tyler.

AMERICAN ASSOCIATION OF MASTERS AND PILOTS OF STEAM VESSELS.

The American Association of Masters and Pilots of Steam Vessels was organized in New York City, January 17, 1887, under the title of the American Brotherhood of Steamboat Pilots. The objects of the association are a better education to the profession in the line of duty, the elevation of the character and standing of its members, protection of life and property, a careful adherence to the rules of the road and strict obedience to the laws laid down for their government. The association has no alliance with labor organizations of any other profession. It is national in its scope and extends its influences to every port in the United States. The officers of the association are: Captain John C. Silva, Dorchester, Mass., Grand Captain; Captain Charles Maytham, Buffalo, N. Y., First Grand Pilot; Captain Nathaniel L. Cullin, Camden, N. J., Second Grand Pilot; Captain Luther B. Dow, Brooklyn, N. Y., Grand Purser; Captain Benjamin F. Perkins, Camden, N. J., Grand Captain's Clerk. The association now numbers nearly 7,000 members and is in a very prosperous condition.

NATIONAL ASSOCIATION OF LETTER CARRIERS.

The object of the National Association of Letter Carriers is to promote the interests of the employes of that branch of the United States postal service and to establish fraternal relations among all the letter carriers in the United States. It aims to seek improvement in the condition of all by legislation or otherwise, to obtain and secure the rights of letter carriers as Government employes and to strive at all times to promote the welfare of every member.

It purposes to create and establish the United States Letter Carriers' Mutual Benefit Association, to provide insurance for the members, and the United States Letter Carriers' Retirement Association, for the purpose of retiring aged and incapacitated letter carriers from a fund created and maintained by members of the National Association, and to act in conjunction with the Post Office Department officials to strive for the constant improvement of the postal service.

The headquarters of the Association are in Washington, in the Times Building, Tenth and D streets, and the officers elected in 1902 are: James C. Keller, Cleveland, Ohio, President; A. C. MacFarland, Des Moines, Iowa, Vice-President; E. J. Cantwell, Washington, D. C., Secretary; George W. Butterfield, Bay City, Mich., Treasurer.

NEW YORK STATE ASSOCIATION OF LETTER CARRIERS.

The New York State Association of Letter Carriers is the State Branch of the National Association, and its object is to co-operate in all things with the National Association; to bring the organization into closer touch with each individual member, and for the improvement of the postal service. The branches in the cities are under direct control of the State Association, and membership in the latter body is dependent upon membership in a branch.

The officers of the State Association, elected in 1902, are: S. O. Stevenson, Brooklyn, President; S. W. Shepard, Syracuse, Vice-President; C. B. Ingalls, Oswego, Secretary; John F. Brophy, Yonkers, Treasurer.

POSTAL EMPLOYES MUTUAL AID ASSOCIATION.

The sole object of the Postal Employes Mutual Aid Association is to provide a life insurance upon the co-operative and assessment plan, for the employes of the United States postal service. It is incorporated under the insurance laws of the State of New York, and is subject to the supervision of the State Insurance Department. It admits to life insurance benefit all physically eligible postal employes between the ages of eighteen and fifty years, and pays $1,000 to the beneficiaries of a deceased member.

The officers are: Cornelius Van Cott, Honorary President; Edward S. Post, President; William Mooney, Vice-President; Thomas A. Jardines, Treasurer; Francis R. Roome, Secretary, all of the New York City Post Office.

UNITED NATIONAL ASSOCIATION OF POST OFFICE CLERKS.

The objects of the United National Association of Post Office Clerks are to secure, through legislation or such other methods as may be deemed advisable, the classification of post office clerks, with a view to securing more equitable salary rates, regulation of hours of labor, upholding the Civil Service laws and such other methods as may from time to time arise. The organization also embraces a death benefit feature, in which policies ranging from $1,000 to $2,000 are issued to members.

The officers elected in 1902 are: Frank T. Rogers, Chicago, President; H. J. McGee, Buffalo, N. Y., First Vice-President; Charles Lynn, Kansas City, Mo., Second Vice-President; F. L. May, Dayton, Ohio, Third Vice-President; R. C. Loeffler, Milwaukee, Wis., Secretary; John H. McDonough, New York City, Treasurer; Joseph Dillon, Grand Rapids, Mich., Sergeant-at-Arms.

INTERNATIONAL ASSOCIATION OF FIRE ENGINEERS.

The annual meeting of the International Association of Fire Engineers was held in New York City in September. The election of officers, held September 19, resulted as follows: President, Chief Edward F. Croker, of New York; First Vice-President, Major Edward Hughes, Louisville, Ky.; Second Vice-President, John F. Stagg; Secretary, Henry A. Hills, Wyoming, Ohio; Treasurer, B. C. Larkin, Dayton, Ohio. The next convention will be held at Atlantic City, N. J.

Abyssinia.

Capital.
ADIS ABBABA.

By treaty with Great Britain in 1897, the ancient empire of Abyssinia included within her boundaries a part of hitherto British Somaliland. Besides this, the empire is made up of the Kingdoms of Tigre, Ambora and Shoa, with parts of Galla and Somali lands, and with outlying dependencies and tributaries. It claims the entire territory on the north of British East Africa, except the Italian strip on the coast, and as far south as the second degree. Menelek II., King of Shoa, is Emperor of Ethiopia, as Abyssinia is styled. Its independence is universally recognized.

The Abyssinians adhere to the Alexandrian Church, to which they were converted in the fourth century. The head of the church is always a Copt. One tribe is said to practise the Jewish religion, to which it was early converted.

Emperor of Ethiopia.

There is no education, in the modern sense of the word. The administration of justice is confined to the provincial governors and the petty chiefs.

The trade of Abyssinia, although of much importance, is that of a semi-barbarous country, hardly capable of even approximate valuation. American cotton goods are imported there annually to the value of about $1,000,000.

Academies and Academicians.

Academia was a beautiful suburb of ancient Athens, made so by Cimon, son of Miltiades, who bequeathed it to his fellow citizens for the purpose of a pleasure ground. It was near the home of Plato, who found amid its walks and groves and fountains the restful quiet which developed his philosophic thought. Here, in what Horace describes as the "groves of the Academy where Plato taught his truth," the philosopher established his school, and here his disciples sought him during the nearly fifty years, ending with his death in the year 348 B. C., which were occupied by his teaching. To distinguish the Platonic school from that of the Peripatetics it was named the Academics. Thus the word academy came to stand for learning, and eventually it took on a character signifying a society or corporate body of learned men, established for the advancement of science, literature and the arts, which is its modern signification, in the higher sense of the word. It has been appropriated, also, as a designation for certain advanced schools devoted to the education of youth, but in this sense it is not to be considered in this article. It is an interesting fact, nevertheless, that an academy founded at Oxford by Alfred the Great, in the ninth century, which was rather a grammar school than a society of learned men, was the origin of Oxford University. Of academies, in the highest meaning of the word, many have been founded, and some have attained permanent greatness.

At the mention of academies and academicians the thought turns naturally, and with tribute of preeminence, to L'Academie Francaise and its "Forty Immortals." As the French Academy exists to-day it is the revival of the old Academy of Sciences founded by Cardinal Richelieu in 1635, which, with all other academies in France, was suppressed by the French Republican Convention in 1793. The old academy had a glorious history, and numbered among its members such famous men as Laplace, the astronomer; Buffon, the naturalist; Lagrange, the mathematician; d'Alebert, the philosopher and physicist; Lavoisier, the chief founder of modern chemistry, and Jussien, who was the parent of the modern school of botany. Two years after this academy had been swept away, some of its brightest lights being sent to the guillotine, the Convention determined to replace it, and the others which shared its fate, by establishing the Institute of France. This Institute was created with three classes, each divided into sections. Napoleon, as First Consul, remodelled it in 1803, with four classes. After the Restoration, Louis XVIII., on March 21, 1816, decreed the revival of the names of the former academies to designate the four classes, which became respectively L'Academie Francaise, L'Academie Royale des Inscriptions et Belles Lettres, L'Academie Royale des Sciences, and L'Academie des Sciences Morales et Politiques. Subsequently a fifth was added, and the Institute, as it exists to-day, comprises five, as follows: The French Academy, with 40 members; the Academy of Inscriptions and Belles Lettres, with 40 members; the Academy of Sciences, with 68 members; the Academy of Fine Arts, with 40 members (painting, 14; sculpture, 8; architecture, 8; engraving, 4; musical composition, 6), and the Academy of Moral and Political Science, with 40 members. All members are elected for life. The French Academy meets twice weekly, at the Palace Mazarin, 23 Quai Conti, Paris, and the body is one to whose membership Frenchmen of literary fame aspire as to the climax of honor. The chief officer is the secretary, chosen for life, the office being held at the present time by Marie Louis Antoine Gaston Boissier, who was elected an Academician in 1876. The list of the "forty immortals" in the order of their election, and with the date thereof preceding and the date of birth following each name, is as follows: 1855, Ernest Wilfred Gabriel Baptiste Legouve, 1807; 1870, Emile Ollivier, 1825; 1874, Alfred Jean Francois Mezieres, 1826; 1876, Marie Louis Antoine Gaston Boissier, 1823; 1877, Victorien Sardou, 1831; 1878, Edmund Armand, Duc d'Audiffret-Pasquier, 1823; 1880, Aime Joseph Edmund Rousse, 1817; 1881, Rene Francois Armand Sully-Prudhomme, 1839; 1882, Adolphe Louis Albert Perraud, 1828; 1884, Francois Edouard Joachin Coppee, 1842; 1884, Ludovic Halevy, 1834; 1886, Vallery Clement Octave Greard, 1828; 1886, Othenin P. de Cleron Comte d'Haussonville, 1843; 1888, Jules Arnaud Arsene Claretie, 1840; 1888, Eugene Marie Melchoir, Vicomte de Vogue, 1848; 1890, Charles Louis de Saulses de Freycinet, 1828; 1891, Louis Marie Julien Viaud (Pierre Loti), 1850; 1892, Ernest Lavisse, 1842; 1893, Paul Louis Thureau-Dangin, 1837; 1893, Marie Ferdinand Brunetiere, 1849; 1894, Jose Marie de Heredia, 1842; 1894, Albert Sorel, 1842; 1894, Paul Bourget, 1852; 1894, Henri Houssaye, 1858; 1895, Jules Lemaitre, 1853; 1896, Jacques Anatole Thibault (Anatole France), 1844; 1896, Marquis Marie C. A. Costa de Beauregard, 1839; 1896, Gaston Bruno Paulin Paris, 1839; 1896, Claude Adhemar (Andre Theuriet), 1833; 1896, Louis Jules Albert Comte Vandal, 1861; 1897, Albert Comte de Mun, 1841; 1897, Gabriel Hanotaux, 1853; 1898, Claude Jean Baptiste Guillaume, 1822; 1899, Henri Leon Emile Lavedan, 1859; 1899, Paul Deschanel, 1856; 1900, Paul Hervieu, 1857; 1900, Auguste Emile Faguet, 1847; 1900, Eugene Marcellus Pierre Berthelot, 1827; 1901, Charles Jean Melcnoir, Marquis de Vogue, 1829; 1901, Edmond Rostand, 1868.

The Royal Academy of Arts in London comes next to the French Academy in world-wide importance. It was instituted in 1768, with Sir Joshua Reynolds as its first president, and it is under the immediate patronage of the sovereign. There are 40 academicians, resident; 6 foreign honorary academicians, and 30 associates.

Of the other academies those most important include the Royal Academy of Sciences at Berlin, founded in 1700; the Electoral Bavarian Academy of Sciences, at Munich, established in 1759; the Imperial Academy of Sciences, at St. Petersburg, planned by Peter the Great in 1724, and founded by Catherine I. in 1725; the Royal Swedish Academy, at Stockholm, founded in 1741; the Royal Academy of Sciences, at Copenhagen, founded in 1743; and others in Belgium, France, Great Britain, Ireland, Germany, Italy, Holland, Spain and Portugal.

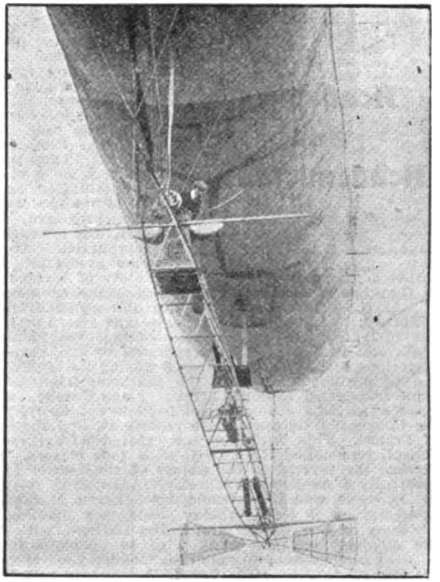
Aerial Navigation. The Progress in Aeronautics to 1902.

FREDERICK W. WEBBER, M. A.

Myths and chronicles of uncertain verity compose a literature more entertaining than instructive in connection with the efforts of mankind to discover a means of ascending into and travelling through the air, or, in other words, of overcoming that law of gravity which confines our routes of transit and transportation to the surfaces of earth and ocean. They indicate that this has been one of the dreams of many ages. So far as any element of fact underlies this literature it is apparent that whatever hope was entertained in remote times as to the possibility of superterranean travel, or whatever experiments were undertaken in attempted realization of such hope, the wings of birds were regarded as the model for any device offering any promise of success. It was not until the thirteenh century of the present era that there was any suggestion of the possibility of overcoming the force of gravity by any other than mechanical means; and even then it was merely a suggestion, although, as subsequently appeared, a very prophetic one. Albert of Saxony, a Franciscan monk who won the title of Albertus Magnus by his learning, had investigated physical science to an extent remarkable in his day, and advanced the idea that as fire is more attenuated than the atmosphere, and rises above it, a small portion of fire enclosed in a light hollow globe would raise the globe into the air and keep it suspended clear of earth. His theory was adopted and modified or elaborated by a number of others in succeeding times, some of them natural philosophers, others charlatans,, and various schemes were eventually proposed for making practical application of it. There is no record of any actual experiment, however, until the brothers, Stephen and Joseph Montgolfier, astonished Europe by the successful ascension of their hot-air balloon at Annonay, near Lyons, France, on June 5, 1783. Whether these experimenters understood the principle of physical science demonstrated by their achievement, or not, is made an open question by the various stories told of the incidents leading to their invention of the balloon, and it is quite possible that they imagined that the ascension was caused by some vapor emitted from the fire, rather than that they knew it to be the effect of heat expanding the air within the balloon.

Alberto Santos-Dumont.



Santos-Dumont's Airship.

Hydrogen gas had been discovered nearly a score of years prior to this experiment of the Montgolfiers, Henry Cavendish, a noted English chemist and physicist, having made the discovery in 1766. He demonstrated that it was at least seven times as light as air, a fact which suggested to Dr. Joseph Black, of Edinburgh, famed as the discoverer of latent heat, precisely the idea which had occurred to Albert of Saxony, only in a new form. Believing that a light envelope inflated with hydrogen would ascend he provided the allantois of a calf, which he proposed to fill with the gas and to use in an experiment to prove the theory in the course of a public lecture. His experiment failed; undoubtedly because the weight of the allantois more than offset the difference between the weight of the contained hydrogen and that of the atmospheric air which it displaced. In fact this appears to be proved by the experience of Tiberius Cavallo, an Italian electrician and natural philosopher, recognized by learned bodies in England as well as in Naples, for the value of his contributions to scientific knowledge. Cavallo undertook experiments similar to that proposed by Dr. Black, but he found that bladders, even when carefully scraped, are too heavy to be carried up into the air by the quantity of hydrogen which they will contain. And here it may be stated, in passing, that the lifting capacity of the gas, as accepted by practical aeronauts, is about seven pounds for each one hundred cubic feet. Cavallo, although he failed, just as Dr. Black did, in experiments with hydrogen-inflated membranes, actually demonstrated the principle of the modern gas-balloon. He found that soap bubbles containing hydrogen rose and sustained themselves in the air until they burst. Dr. Black, however, did not pursue his experiments in this direction any further after the failure cited.

Cavallo's success with soap bubbles preceded the Montgolfier balloon ascension by about a year. The latter success created interest and enthusiasm concerning aeronautics which speedily resulted in the experiments of Black and Cavallo being repeated upon a larger scale at the instance of M. Faujas de Saint-Fond, a French naturalist, who inspired a subscription in Paris to promote repetition there of the Montgolfier experiment, the proposition enlisting the practical sympathy of M. Charles, professor of natural philosophy in Paris, and later a member of the Academy of Sciences. M. Charles superintended the construction of a silk balloon, which was undertaken by two brothers named Robert; and he was instrumental in having hydrogen

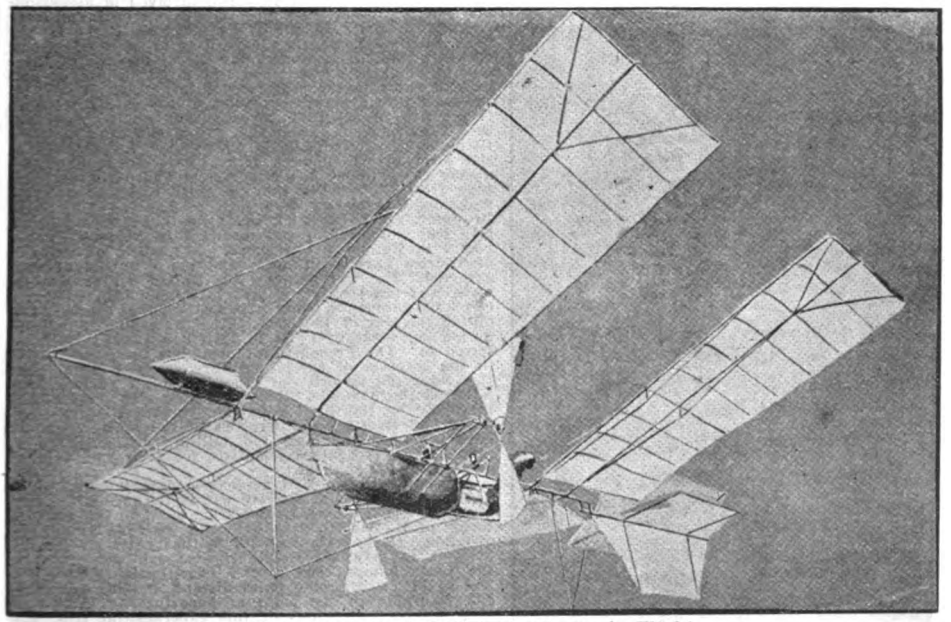
rather than hot air chosen as the element for its inflation. The gas was generated by the action of diluted sulphuric acid upon iron filings. As it was not previously cooled by being passed through water its heated condition made the inflation somewhat imperfect, the process occupying three full days, although the balloon was but thirteen feet in diameter, with a capacity of not more than 1,500 cubic feet. The ascension took place from the Champ de Mars about 5 P. M., on August 27, 1783, in the presence of an immense gathering of people, the balloon, which carried no freight of any kind, rising with great rapidity to a height estimated at 3,000 feet. It remained in the air some forty-five minutes, travelling over about fifteen miles of country, and coming down in a field near Gonesse, where the terrified peasantry, regarding it as some diabolical contrivance, fell upon it with all manner of farm implements, tearing it to shreds.

Meanwhile Joseph Montgolfier, who was the leading spirit among the two brothers to whom the pioneer honors of aeronautics belong, had not been idle. On September 19, in this same year, he sent up a balloon from Versailles, the ascension being witnessed by King Louis XVI., the Queen, the court and such a mass of people as so novel an experiment in such an august presence would naturally attract. On this occasion a sheep, a cockerel and a duck were carried up in a cage suspended beneath the globe containing the heated air. The balloon attained a height of about 1,500 feet and descended at the expiration of eight minutes in a wood about two miles distant. Its living passengers were none the worse for their aerial experience.

A young naturalist named Francois Pilatre de Rozier and the Marquis d'Arlandes were the first human beings known to have made a free ascension in a balloon. The Marquis, however, was preceded in aeronautic honors by M.Girond de Villtte, who was M. de Rozier's companion in one of several captive ascensions which were made preliminary to the great event of November 21, 1783, when the two men first named made an aerial journey of twenty minutes or longer, travelling at a height which reached 500 feet, over the 9,000 yards or more intervening between the Jardin du Chateau de la Muette in the Bois de Boulogne, Paris, and a point beyond the Boulevards. While the Marquis d'Arlandes shares equally with M. de Rozier the credit for this bold experiment, it should be stated that to M. de Rozier alone belongs the honor of being actually the first aeronaut, although his first ascension was only a captive one.

The first ascension of a hydrogen balloon with human beings as passengers occurred only ten days after the venture of M. de Rozier and his companion. On December 1, 1783, MM. Charles and Robert started



Professor S. P. Langley's Aerodrome in Flight.
